Lol. O' pooh, I'm removing you off my fan list, and I request your
membership card back. ;)

>but your repetitiveness makes you look
> even more retarded than he is.

What does his Tholen's retarted repitiveness, have to do with A26, Rev?

>Take a deep breath and maybe go outside
> and away from usenet for awhile.

But if we don't post the system may die! Other then Google Group lozers
this old girl does not have much left in her...

--
Fearing his life, the grand architect Hiram Abiff yelled these three
words, so all could hear - Mahabone, Tubal Cain, and IAOM to the rogues.
With this the key to King Solomon's Temple had been given to all,
brothers or not.

3263. Re: Robert James, the faggiest Gigalo Groupie of 'em all.

O' hoe hum, you fabolous Hog Town sailerboi, you know I'm your delicious
white chocolate dessert!

--
Fearing his life, the grand architect Hiram Abiff yelled these three
words, so all could hear - Mahabone, Tubal Cain, and IAOM to the rogues.
With this the key to King Solomon's Temple had been given to all,
brothers or not.

What do your classic unsubstantiated and erroneous claims have
to do with OS/2, James?

10> What does your whacking off have to do with A26, Christmas Jew?

Who is "Christmas Jew", James? There is nobody in this newsgroup
using that alias.

I have a Vinyl Vixen for sale or trade.
She is listed on Ebay as being 'slightly used' and is in almost new
condition.

She still has her original, factory lipstick and her buttocks are still firm
and inflated.

There is nothing wrong with her and she is clean.

I have replaced her with a blowup Boy doll and have no need for her now.

Woger

What was allegedly endured while writing, dizzy?

1155> You are indeed the King of the Kooks, tholen.

What does your classic unsubstantiated and erroneous claim
have to do with OS/2, dizzy? There is nothing kooky about
an OS/2 user reading an OS/2 newsgroup and expecting to
find OS/2 content in that newsgroup. There is something
plenty kooky about non-OS/2 users continually posting
non-OS/2 content to an OS/2 newsgroup, dizzy, especially
over a thousand times. Of course, logic has never been
your strong suit, dizzy.

Amateur Radio Newsline(tm) Report 1727 - September 17 2010

Amateur Radio Newsline report number 1727 with a release date of
Friday, September 17 2010 to follow in 5-4-3-2-1.

The following is a QST. A new European solar observation system can
warn of solar storms, Canadian hams forced to share spectrum with a
cycling event, the ARRL asks the FCC to clarify where ham radio stands
on 2 point 3 Ghz and the Fall VHF and UHF Sprints are here. Find out
the details on Amateur Radio Newsline(tm) report number 1727 coming
your way right now.

(Billboard Cart Here)

**

PROPAGATION SCIENCE: NEW EUROPEAN SYSTEM GIVES WARNING OF SOLAR STORMS

Researchers at the University of Bradford located in the United Kingdom
say that a new method of predicting solar storms that could help to
avoid widespread power and communications blackouts has been launched.
Amateur Radio Newslines Norm Seeley, KI7UP, is here with more:

--

Up to now, solar weather prediction has been done manually with experts
looking at 2 dimensional satellite images of the sun and assessing the
likelihood of future activity. But a team from the university's Centre
for Visual Computing has created the first online automated prediction
system using 3D images generated from the Solar and Heliospheric
Observatory or SOHO satellite.

Already in use by both NASA and the European Space Agency, the Bradford
Automated Solar Activity Prediction system also known by the acronym
ASAP identifies and classifies sun spots and then feeds this
information through a model which can predict the likelihood of solar
flares. The system is able to accurately predict a solar flare six
hours in advance and the team is working to achieve a similar accuracy
for the prediction of major solar eruptions in the near future.

Solar storms involve the release of huge amounts of hot gas and
magnetic forces from the surface of the sun into space at around a
million miles an hour. The next major solar storms are expected in
2012-13 as part of the sun's 11-year weather cycle. A 2008 US National
Academy of Sciences report estimated that modern reliance on
electronics and satellite communications means a major storm could

cause twenty times more economic damage than Hurricane Katrina.

Although major solar eruptions and coronal mass ejections normally take several days to reach the Earth, the largest recorded in 1859 took only eighteen hours. Solar flares which can also cause significant disruption to communications systems take just a few minutes. Because of this, advance warning is of vital importance to enable steps to be taken to avoid the worst effects of such solar activity.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale Arizona, reporting for the Amateur Radio Newsline.

--

Data recovered from the system is on-line at the European Spaceweather website at tinyurl.com/2ud62yo (University of Bradford, ESA, Science OnLine)

RADIO LAW: CANADIAN HAMS FORCED TO SHARE SPECTRUM WITH CYCLING EVENT

Hams in two Canadian cities were recently forced to temporarily share their VHF and UHF frequencies for a pair of sporting events. On September 10th, telecommunications regulator Industry Canada advised both Radio Amateurs of Canada and Radio Amateurs du Quebec that their Montreal office had authorized a number of 430 to 450 MHz frequencies and a single VHF frequency of 145.555 MHz for non-ham radio use.

According to Industry Canada these frequencies in the 70 cm and 2 meter amateur bands were authorized to support communications for many European entrants of a now concluded cycling event held on September 10th and 12th in Quebec City and Montreal. Industry Canada says that the frequencies were chosen to avoid known amateur repeater channels.

In a statement after the announcement, Radio Amateurs of Canada said that this type of authorized intrusion by Industry Canada of non-amateur communications in amateur spectrum is highly unusual and is a matter of great concern to the national society. Radio Amateurs of Canada says that it will be taking the matter up with Industry Canada officials. It is also interested in knowing if actual interference had been caused to amateur radio communications by these non amateur events. (Various)

**

ENFORCEMENT: BEIJING CRACKS DOWN ON UNLICENSED BROADCASTERS

The Chinese government backed English-language daily the Global Times reports on a crackdown on users of unlicensed radio transmitters in that nation.

According to the article, It appears that users of radio transmitters with a power output of half a watt or more will have to register. In

the case of commercial users registration is with the Beijing Radio Administration Bureau. For those described as non-commercial users with registration will be with the Beijing Wireless Sports Association. For the latter group the registration procedure will involve taking and passing an amateur radio test.

The article, incorrectly titled "Bureau Cracks Down on Radio Hams," labels both commercial and hobby users as radio amateurs. It is also suspected that the writer got the name of the association wrong and was likely referring to the Chinese Radio Sports Association as the registration point for non commercial broadcasters. You can read it for yourself at tinyurl.com/37hkzve (Southgate)

**

RADIO LAW: ARRL ASKS FCC TO CLARIFY 2.3 GHZ IMPACT SHARING ON HAM RADIO

Back in the USA, the ARRL has filed a Petition for Clarification or Partial Reconsideration asking the FCC to clarify, or partially reconsider a single aspect of its Report and Order in WT Docket No 07-293. This involving possible impact on the Amateur Radio Service by a result of the partial implementation of the agency's National Broadband Plan.

In it, the FCC adopted amendments to the rules for Wireless Communications Services in the 2.3 GHz band. The amendments will permit mobile broadband services, in addition to fixed services, in the bands 2305-2317.5 and 2347.5-2360 MHz.

Specifically, the ARRL requested that the Commission affirm that Section 2.102(f) of the its rules applies to Wireless Communications Service fixed and mobile operations, so that harmful interference that is caused to Amateur Radio Service operations in the 2300-2305 MHz band is to be remedied by Wireless Communications Service licensees. Also that the current out-of-band emission limits for the Wireless Communications Service devices in Section 27.53(a)(3) of the Commission's rules continue to apply to mobile, portable and fixed facilities across the entirety of the 2300-2305 MHz band following the rule changes implemented in this regulatory change. (ARRL)

**
RADIO POLITICS: IRESC SUSPENDS OPERATION TO RESTRUCTURE The International Radio Emergency Support Coalition has halted all operations. According to a posting on its website, the reason for the suspension is to undertake a fundamental restructuring. The unsigned announcement continued by saying membership at all levels was being immediately cancelled, but the organization claims that it will return to normal operations once its restructuring is complete. You will remember our report last week that South Africa's Hamnet amateur radio emergency response organization had severed all links with the International Radio Emergency Support Coalition. This, over a

difference of opinion in how the IRESC should function. The full text of the coalition to restructure is on line at www.iresc.org. (IRESC)

**
RADIO LAW: NY STATE HAM WINS FOR HAM RADIO IN TROY CITY COURT A New York State ham ticketed under the states driving while using a cellphone law has won his case in court. This, after a judge affirms that ham radio gear is not hone the same as a mobile phone. We have more in this report:
--
Back on May 30th Steve Bozak, WB2IQU, of Clifton Park, New York, was operating his station while mobile when an officer in Troy New York pulled him over and cited him under the states cellular phone ban while driving law. Bozak, whose mobile was a hand held transceiver protested. Rather than paying the $100 fine he decided to take the matter to court. When he initially lost in Traffic Court he appealed the matter to the Troy City Court. It was there on September 8th that judge Matthew Turner found in Bozak's favor and dismissed the charge. In rendering his decision the judge found that the Vehicle and Traffic Law defines a Mobile Telephone as a device used by subscribers and other users of wireless telephone service to access such services. Also that a Wireless Telephone Service is defined as two-way real time voice telecommunications service that is interconnected to a public switched telephone network and is provided by a commercial mobile radio service. The judge then continued by noting that a review of 47 C.F.R.20.3 reveals that Citizens Band Radio Service and by inference Amateur Radio as well is defined as a private mobile radio service not commercial mobile radio service. Therefore, the court found that the use of an amateur radio device does not fit the definition of a mobile telephone as defined under the Vehicle and Traffic Law and granted Bozak's motion to dismiss. For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--
At airtime, it is not known if the city of Troy will appeal the judges decision in Bozak's favor or will simply let the matter drop. And while there have been several attempts at getting the law changed to specifically exclude radio amateurs operating mobile, to date there has been no interest on the part of the legislature to do so. This means that any amateur cited under it has to challenge it as Seve Bozak did or simply pay the fine. (KS4BZ, others)
**
RADIO LAW: NEW CANADIAN DISTRACTED DRIVING LAW EXEMPTS HAM HT'S UNTIL 2013 Hams in Canada have are living under a time-limited exemption to a

distracted driver law. Under Ontario Regulation 366/09, that took effect last September 29th, drivers who hold a valid radio operator certificate issued under the Radiocommunication Act of Canada may drive a motor vehicle on a Canadian highway while holding or using a hand held two-way radio such as an H-T. Unfortunately, this exemption will be revoked on January 1st, 2013. However, there seems to be a way to continue to use an HT as a mobile radio after that date. Another section of the law deals with remote control of cell phones and other two-way devices. It says that a person may drive a motor vehicle on a Canadian highway while pressing a button on a device that is worn on his or her head or hung over or placed inside his or her ear or is attached to his or her clothing and is linked to a hand-held wireless communication device. This, in order to make, answer or end a cell phone call or to transmit or receive voice communication on a two-way radio, a hand microphone or portable radio. But those who use two-way radios that are permanently mounted and have push to talk microphones fare better. According to the language of the law, a person may drive a motor vehicle on a highway while pressing a button on a hand-held wireless communication device to make, answer or end a cell phone call or to transmit or receive voice communication on a two-way radio. But only if the device is placed securely in or mounted to the motor vehicle so that it does not move while the vehicle is in motion and the driver can see it at a quick glance and easily reach it without adjusting his or her driving position. (IC, QRZ.com)
**
RESCUE RADIO: ESA DEVELOPS EMCOMM SATELLITE GUIDED MICROPLANE

An unmanned rescue radio aircraft system guided by computer has been developed within the European Space Agency's Business Incubation Centre. This, to provide rapid monitoring of land areas and disaster zones.

A German start-up company called MAVinci developed the new system with European Space Agency that uses autonomous micro-air vehicles or MAV's with a wingspan of less than two meters to inspect land areas.

MAVinci is hosted by ESA's Technology Transfer Programme Office in Darmstadt, Germany. That's where ESA engineers provided expertise on attitude-determination algorithms and exploiting satellite navigation data to guide the aircraft by radio. ESA's optical lab in the Netherlands also helps MAVinci with the calibration of their optical camera.

The micro aircraft's autopilot controls the plane from takeoff to landing, and uses while using satellite navigation to follow a planned track, triggering the camera to image the target area. From the ground, the plane is followed by radio by a safety pilot who can take over the controls at anytime.

The MAVinci aircraft have already helped Spanish farmers in Andalusia fight land erosion. They will also likely become another tool in assessing damage caused by floods, landslides, hurricanes along with

other natural and man caused disasters. (ScienceDaily)

RESCUE RADIO: HAM RADIO HELPS BRING SIERRA MADRE CA EMCOMM STATION ON THE AIR Officials of Sierra Madre, California have launched the city's first-ever emergency radio station. Broadcasting on 1630 kHz in the AM broadcast band, the station is designed to issue alerts and other vital communications during floods, fires, quakes and other emergencies. The project was spearheaded by Hank Landsberg, WB6MEU. Landsberg, who was the winner of the city's 2010 Public Safety Award, helped cut the ribbon at the new radio station inside City Hall. Landsberg tells Newsline that it was a project that he enjoyed contributing to:
--
WB6MEU: "You can use TIS (Travlers Information Stations) for either traveler's information, community information, public service announcements as well as emergency information. So I pursued it a bit and we got the license from the FCC in October 2009 and then the city gave us the go-ahead to design and build the station which is what I did."
--
Landsberg says that in addition to the radio station that Sierra Madre also is bringing back its famous warning horn. Three blasts from the horn will notify residents to tune into 1630 kHz for up-to-date emergency information. In all, Sierra Madre spent about $24,000 to help create the station, with residents and local businesses contributing another $13,000 to make the project a reality. A complete interview with Hank Landsberg, WB6MEU, about the new station can be heard on this weeks Rain Report. Its on-line now at www.therainreport.com. (ARNewsline, Pasadena Star News)

NAMES IN THE NEWS: HH2JR HONORED WITH BAD BENTHEIM GOLDEN ANTENNA AWARD Some names n the news. The town of Bad Bentheim in Germany has been presented Jean-Robert Gaillard, HH2JR, with the Golden Antenna award. This in recognition of his work in the aftermath of the Haiti earthquake. He was presented with his award by Christel Somberg who is the Deputy Mayor of Bad Bentheim. In making the presentation Somberg noted that HH2JR became the voice of Haiti in the aftermath of last January's earthquake that destroyed large parts of his homeland and claimed many lives. That's when HH2JR used his amateur radio station to tell the world about the disaster. He was assisted by two U.S. hams identified as W3ZU, of Inverness, Florida, and WA1RTK, in New Hampshire. The town of Bad Bentheim in Germany makes an award every year to the amateur or amateur group who has made exceptional effort following accidents or natural disasters. (Southgate, DARC)
**
NAMES IN THE NEWS: K6P ON THE AIR FOR NATIONAL POW MIA RECOGNITION DAY

Mark McMullin, KM6HB, will operate as special event station K6P for the 6th straight year to commemorate National POW-MIA Recognition Day. Listen out for Mark between September 17th and the 19th on 3.785, 7.250, 14.253 and 18.150 Mhz plus or minus an Q-R-M. The commemorative QSL for this operation will be a 2 part picture card. If you work him, send yours to KM6HB, Mark McMullen, P.O. Box 27271,Santa Ana, California 92799,in the USA.

THE CHANGING OF THE GUARD: ARRL HONARY VICE PRESIDENT HUGH TURNBULL, W3ABC - SK

The changing of the guard in amateur radio continues. This with word that ARRL Honorary Vice President Hugh Turnbull, W3ABC, of Silver Spring, Maryland, became a silent key on Tuesday, September 14th.

Hugh Turnbull served the ARRL as Atlantic Division Vice Director from 1980 to1982 and as Director from 1982 to 1996. The ARRL Board named him as a Vice President in 1996 and Honorary Vice President in 2000.

Aside from his long and distinguished service to the ARRL, W3ABC was actively involved in several Washington DC-area amateur radio clubs and organizations, including the Foundation for Amateur Radio. This is agroup of clubs from the Maryland, Washington, DC and Northern Virginia area that awards scholarships to deserving radio amateurs.

A licensed and active radio amateur since 1932, Hugh's engineering career included employment with the FCC, the Voice of America and NASA.

According to his daughter, Karen Shangraw, Hugh Turnbull will be buried with full military honors at Arlington National Cemetery. At the time of his passing,W3ABC was age 93. (ARRL)

EMERGING TECHNOLOGY: CHATTANOOGA ELECTRIC POWER CHOOSES FIBER OPTICS FOR INTERNET SERVICE Chattanooga Tennessee's city-owned electrical utility has started offering an Internet service that is among the fastest in the world, but its not using Broadband over Powerline technology. The Chattanooga Electric Power Board's new Fiber Optics network will provide a 1 gigabit-per-second Internet service. The utility said the service is more than 200 times faster than the average national download speed today but will not come cheap. Priced at $350 a month, it's also much more expensive than the typical

residential plan. The full story is on-line at tinyurl.com/39n5vmy (Yahoo News, N6ZXJ)

**

EMERGING HAM TECHNOLOGY: WSJT BETA VER 9.0 NOW AVAILABLE

A beta release of WSJT 9.0 is now available for free download on the WSJT Home Page. The new version by author Joe Taylor, K1JT, has more than a half dozen new or improved features that include enhanced performance for FSK441, calculation of EME Doppler spread caused by lunar librations and simplification and clarification of the user interface.

K1JT asks that after gaining some experience with the beta release of WSJT 9.0, please share your views and opinions about it. Of course, bug reports are also welcome

More details on this new version can be found in the on-line WSJT 9.0 Supplement to User's Guide. A link to download the new version can be found at tinyurl.com/wsjt9. (K1JT)

CONTEST CORNER: THE FALL VHF/UHF SPRINTS ARE HERE

>From the contest corner word that the Fall 2010 VHF and UHF Sprints are here. The 144 MHz Sprint is on Monday, September 20th from 7 to 11pm your local time. Next up is the 222 MHz Sprint on Tuesday, September. 28th which is followed by the 432 MHz Sprint on Wednesday, October 6thth All three of these run from 7 to 11 pm your local time.

The Microwave Sprint for 902 MHz and up will happen on Saturday, October 16th, from 6am to noon local. The last will be the 50 MHz Sprint running from 2300 UTC on Saturday, October 30th until 0300 UTC on Sunday, October 31st. The 50 MHz event follows UTC time due to the possible inter-timezone and international contacts that might take place anytime on 6 meters.

The Fall VHF/UHFSprints are again being sponsored by the Southeastern VHF Society. More information on all these Sprints is on-line at tinyurl.com/2adk39l (KC9BQA, VHF Reflector)

**

CONTEST CORNER: VA THAI CONTEST CALL TO SHARE

Charlie Harpole, HS0ZCW, has informed the Ohio Penn DX Newsletter that the Radio Amateur Society of Thailand has received permission from the radio governing body of Thailand to utilize the special callsign of E2E for use in any contest. There is no expiration date for the callsign. The Radio Amateur Society of Thailand says that it will share the callsign with its members on a rotational basis. QSL to HS0AC, which is the other the Radio Amateur Society of Thailand valid callsign. (OPDX)

**

DX

In DX, VK4AN will be active as 3D2A from Viti Levu Island between October 27th and November 14th. Operation will be on 160 through 10 meters including 30, 17 and 12 meters using CW, SSB, RTTY and PSK31. QSL via VK4AN

K3PLV will be active portable MJ from Jersey Island through September 22nd. His operation will be on 160 through 10 meters using CW, SSB and RTTY. QSL via his home callsign, either direct or by the Bureau.

DJ5AA and DL2DXA will be active portable EA8 from La Palma through September 24th. Operation will be holiday style on 80 through 10 meters QSL via their home callsigns, either direct or via the bureau.

Lastly, word that IZ8EDJ will activate the Agropoli Lighthouse during the a lighthouse special event on September 26th. For more details, see the following Web page at www.strangeradioteam.com.

(Above from various DX news sources)

THAT FINAL ITEM: THE 2010 NEWSLINE LISTENER SURVEY

And finally this week, it has been over a decade since we ran a survey to find out what repeaters and nets around the world are playing these weekly Amateur Radio Newsline reports. We were about to start one a few years back, but unfortunately our then Surveymaster, the late Karl Pagel, N6BVU, took ill and was hospitalized.

As regular listeners know, Karl became a Silent Key last November 10th. Since then performing a new survey has been on hold. Now, the Newark Radio Society in New Jersey has offered to take over the responsibilities of conducting a 2010 Amateur Radio Newsline Bulletin Station Survey, and it has set up a special e-mail account to begin the process.

If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, you are invited to be a part of this review. What we need you to do is to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day or days of the week it is broadcast, the time zone and the estimated audience you think you have. Please e-mail that information along with your name and callsign to arnschedule at gmail dot com. Once again that's arnschedule (at) gmail (do)t com.

We will keep the survey open through the end of November and hopefully by years end we will have a new schedule of when and where you can hear Amateur Radio Newsline on the air. Our thanks to Leon Grauer, N0TAZ and the Newark Radio Society for their taking on this rather daunting task.

And once again, please send your survey response by e-mail to arnschedule (at) gmail (dot) com. We and the Newark Radio Society look

forward to hearing from you. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Fred Vobbe, W8HDU, saying 73 from Lima, Ohio, and we thank you for listening.

List of Solutions Manuals

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES & BHUTAN".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=VQJ2M78Y

I do not review the forums, just send me an email.

- Mechanics, Mechanical Engineering & Aerospace Engineering:

Solution Manual Classical Mechanics (Douglas Gregory)
Solution Manual Advanced Dynamics (Donald T. Greenwood)
Solution Manual Principles of Dynamics (2nd Ed., Donald T. Greenwood)
Solution Manual Advanced Engineering Dynamics (2nd Ed., Jerry Ginsberg)
Solution Manual Classical Dynamics (Jorge V. José)
Solution Manual Impact Mechanics (W.J. Stronge)
Solution Manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution Manual Introduction to Continuum Mechanics (4th Ed., W. Michael Lai, David Rubin & Erhard Krempl)
Solution Manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cassiday)
Solution Manual Introduction to Mechanical Engineering (Rizza)
Solution Manual Engineering Fundamentals and Problem Solving (4th Ed., Eide, Jenison, Mashaw & Northup)
Solution Manual Engineering Fundamentals and Problem Solving (5th Ed., Eide, Jenison, Northup & Mickelson)
Solution Manual Mechanical Engineering Principles (Bird & Ross)
Solution Manual Dynamics of Mechanical Systems (C.T.F. Ross)
Solution Manual Mechanics of Solids (C.T.F. Ross)

Solution Manual Introduction to Engineering Analysis (1st Ed., Hagen)
Solution Manual Introduction to Engineering Analysis (2nd Ed., Hagen)
Solution Manual Introduction to Engineering Analysis (3rd Ed., Hagen)
Solution Manual Engineering Design (Rudolph J. Eggert)

Solution Manual Non-Newtonian Flow : Fundamentals and Engineering Applications (R.P. Chhabra & J F Richardson)
Solution Manual Computational Techniques for Fluid Dynamics (Srinivas, K., Fletcher, C.A.J.)
Solution Manual Introduction to Computational Fluid Dynamics (A.W. Date)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Robotic Mechanical Systems : Theory, Methods, and Algorithms (3rd Ed., Jorge Angeles)
Solution Manual Kinematic Chains and Machine Components Design (Dan B. Marghitu)

Solution Manual Kinematics, Dynamics, and Design of Machinery (2nd Ed., Waldron & Kinzel)
Solution Manual Kinematics and Dynamics of Machinery (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Kinematics and Dynamics of Machinery - SI Units (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (3rd Ed., Myszka)
Solution Manual Mechanism Design : Analysis and Synthesis (4th Ed., Erdman, Sandor & Kota)
Solution Manual Mechanical Design : A Components Approach (2nd Ed., Peter Childs)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (1st Ed., Collins)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (2nd Ed., Collins, Busby & Staab)
Solution Manual Fundamentals of Machine Component Design (3rd Ed., Juvinall)
Solution Manual Fundamentals of Machine Component Design (4th Ed., Juvinall)
Solution Manual Design of Machine Elements (8th Ed., Spotts)
Solution Manual Machine Elements in Mechanical Design (4th Ed., Mott)
Solution Manual Machine Elements in Mechanical Design - SI Units (4th Ed., Mott)
Solution Manual Mechanical Design : An Integrated Approach (1st Ed., Ansel Ugural)
Solution Manual Design of Machinery (3rd Ed., Norton)
Solution Manual Design of Machinery (4th Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (3rd Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (4th Ed., Norton)
Solution Manual Mechanical Engineering Design (6th Ed., Shigley)
Solution Manual Mechanical Engineering Design (7th Ed., Shigley, Mischke & Budynas)
Solution Manual Shigley's Mechanical Engineering Design (8th Ed., Budynas & Nisbett)
Solution Manual Shigley's Mechanical Engineering Design (9th Ed., Budynas & Nisbett)
Solution Manual Fundamentals of Machine Elements (1st Ed., Hamrock)
Solution Manual Fundamentals of Machine Elements (2nd Ed., Hamrock)
Solution Manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution Manual Mechanics of Materials (3th Ed., Beer)
Solution Manual Mechanics of Materials (5th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (6th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (7th Ed., Gere & Goodno)
Solution Manual Mechanics of Materials (Ansel Ugural)
Solution Manual Mechanics of Materials : An Integrated Learning System

(1st Ed., Timothy Philpot)
Solution Manual Mechanics of Materials : An Integrated Learning System (2nd Ed., Timothy Philpot)
Solution Manual Mechanics of Materials (2nd Ed., Roy R. Craig)
Solution Manual Simplified Mechanics and Strength of Materials (6th Ed., James Ambrose)
Solution Manual Engineering Applications of Dynamics (Dean Karnopp & Donald Margolis)
Solution Manual Engineering Mechanics : Statics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Dynamics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Statics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Vector Mechanics for Engineers : Statics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Statics (8th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (8th Ed., Ferdinand Beer)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium (Sheppard & Tongue)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium - Update Edition (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (2nd Ed., Sheppard & Tongue)
Solution Manual Statics and Mechanics of Materials : An Integrated Approach (2nd Ed., Riley, Sturges & Morris)
Solution Manual Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
Solution Manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)

Solution Manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution Manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution Manual Deformable Bodies and Their Material Behavior (Haslach & Armstrong)
Solution Manual Intermediate Mechanics of Materials (1st Ed., Barber)
Solution Manual Elasticity (2nd Ed., J.R. Barber)
Solution Manual Elasticity : Theory, Applications, and Numerics (1st Ed., Martin Sadd)
Solution Manual Elasticity : Theory, Applications, and Numerics (2nd Ed., Martin Sadd)
Solution Manual Elasticity in Engineering Mechanics (2nd Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (6th Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (2nd Ed., Cook & Young)
Solution Manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution Manual Applied Mechanics for Engineering Technology (8th Ed., Keith M. Walker)
Solution Manual Applied Statics and Strength of Materials (5th Ed. Limbrunner & Spiegel)
Solution Manual Statics and Strength of Materials (Robert Mott)
Solution Manual Applied Strength of Materials (4th Ed., Mott)
Solution Manual Applied Strength of Materials (5th Ed., Mott)
Solution Manual Intermediate Dynamics for Engineers (Marcelo R.M & Crespo da Silva)
Solution Manual Engineering Mechanics : Statics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Dynamics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Statics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Engineering Mechanics : Dynamics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Elastic And Inelastic Stress Analysis (Irving Shames)
Solution Manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution Manual Strength of Materials - A New Unified Theory for the 21st Century (Surya Patnaik & Dale Hopkins)
Solution Manual Statics and Strengths of Materials (6th Ed., Morrow & Kokernak)
Solution Manual Engineering Mechanics : Statics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics (12th Ed., Hibbeler)

Solution Manual Engineering Mechanics : Statics - SI Units (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (12th Ed., Hibbeler)
Solution Manual Mechanics of Materials (4th Ed., Hibbeler)
Solution Manual Mechanics of Materials (6th Ed., Hibbeler)
Solution Manual Mechanics of Materials (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials (8th Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (Beer, Johnston, DeWolf & Mazurek)
Solution Manual Statics and Mechanics of Materials (Bedford, Liechti & Fowler)
Solution Manual Statics and Mechanics of Materials (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (3rd Ed., Hibbeler)
Solution Manual Energy Principles and Variational Methods in Applied Mechanics (2nd Ed., Reddy)
Solution Manual The Physics of Vibrations and Waves (6th Ed., Pain)
Solution Manual Engineering Vibrations (3rd Ed., Inman)
Solution Manual Mechanical Vibrations (4th Ed., Singiresu S. Rao)
Solution Manual Mechanical Vibrations - SI Units (4th Ed., Singiresu S. Rao)
Solution Manual Theory of Vibration : An Introduction (2nd Ed., A.A. Shabana)
Solution Manual Vibration of Discrete and Continuous Systems (2nd Ed., Ahmed Shabana)
Solution Manual Introduction to Finite Element Vibration Analysis (Maurice Petyt)
Solution Manual Vibrations and Stability : Advanced Theory, Analysis, and Tools (2nd Ed., Jon J. Thomsen)
Solution Manual Dynamics and Vibration : An Introduction (Magd Abdel Wahab)
Solution Manual Mechanical Vibration (William J. Palm, III)
Solution Manual Random Vibrations : Analysis of Structural and Mechanical Systems (Loren Lutes & Shahram Sarkani)
Solution Manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution Manual Fundamentals of Structural Integrity : Damage Tolerant Design and Nondestructive Evaluation (Alten F. Grandt)
Solution Manual A First Course in the Finite Element Method (4th Ed., Daryl L. Logan)
Solution Manual Finite Element Analysis Theory and Application with ANSYS (3rd Ed., Moaveni)
Solution Manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution Manual Fundamentals of Finite Element Analysis (1st Ed.,

David V. Hutton)
Solution Manual The Finite Element Method in Engineering (4th Ed., Rao)
Solution Manual The Finite Element Method and Applications in Engineering Using ANSYS (Madenci & Guven)
Solution Manual Introduction to Finite Element Analysis and Design (Nam-Ho Kim, Bhavani V. Sankar)
Solution Manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution Manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution Manual Fundamental Finite Element Analysis and Applications : with Mathematica and Matlab Computations (Asghar Bhatti)
Solution Manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution Manual Modeling and Analysis of Dynamic Systems (3rd Ed., Close)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual System Dynamics (1st Ed., William J Palm III)
Solution Manual System Dynamics (2nd Ed., William J Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual System Dynamics : Modeling and Simulation of Mechatronic Systems (4th Ed., Karnopp, Margolis & Rosenberg)
Solution Manual Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
Solution Manual Finite Element Modeling for Stress Analysis (Robert Cook)
Solution Manual Fracture Mechanics : Fundamentals and Applications (2nd Ed., T.L. Anderson)
Solution Manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (W.F. Hosford)
Solution Manual Mechanical Behavior of Materials (Keith Bowman)
Solution Manual Theory and Design for Mechanical Measurements (4th Ed., Figliola & Beasley)
Solution Manual Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)
Solution Manual Measurement and Data Analysis for Engineering and Science (Patrick Dunn)
Solution Manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution Manual Work Systems : The Methods, Measurement & Management of Work (Mikell P. Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (2nd Ed., Groover)
Solution Manual Automation, Production Systems, and Computer-

Integrated Manufacturing (3rd Ed., Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution Manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution Manual Design for Manufacturing : A Structured Approach (Corrado Poli)
Solution Manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution Manual Engineering Materials Science (Milton Ohring)
Solution Manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution Manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution Manual Materials Science for Engineering Students (Traugott Fischer)
Solution Manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution Manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution Manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution Manual Materials Selection in Mechanical Design (3rd Ed., Michael Ashby)
Solution Manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)

Solution Manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution Manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution Manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution Manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution Manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing Processes for Engineering Materials - SI Units (5th Ed. Kalpakjian, Smith & Chih-Wah Kok)
Solution Manual Manufacturing, Engineering & Technology (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology (6th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology - SI Units (6th Ed. Kalpakjian & Smith)
Solution Manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution Manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution Manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution Manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution Manual Applied Manufacturing Process Planning : With Emphasis on Metal Forming and Machining (Nelson, Schneider)
Solution Manual Mastering CAD/CAM (1st Ed., Ibrahim Zeid)
Solution Manual Principles of CAD/CAM/CAE (Kunwoo Lee)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Introduction to Computer Numerical Control (4th Ed., Valentino & Goldenberg)
Solution Manual Linear State-Space Control Systems (Robert L. Williams, II & Douglas A. Lawrence)
Solution Manual Gas Turbine Theory (6th Ed., H.I.H. Saravanamuttoo, G.F.C. Rogers, H. Cohen & Paul Straznicky)
Solution Manual Rocket Propulsion Elements (7th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Rocket Propulsion Elements (8th Ed., George P. Sutton & Oscar Biblarz)

Solution Manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution Manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution Manual Atmospheric and Space Flight Dynamics : Modeling and Simulation with MATLAB and Simulink (Ashish Tewari)
Solution Manual Flight Dynamics Principles (2nd Ed., by Cook)
Solution Manual Mechanics of Flight (1st Ed., Warren F. Phillips)
Solution Manual Mechanics of Flight (2nd Ed., Warren F. Phillips)
Solution Manual Fundamentals of Airplane Flight Mechanics (David G. Hull)
Solution Manual Dynamics of Flight : Stability and Control (3rd Ed., Bernard Etkin & Lloyd Duff Reid)
Solution Manual Aircraft Rescue and Firefighting (5th Ed., IFSTA)
Solution Manual Aircraft Propulsion (Saeed Farokhi)
Solution Manual Aircraft Performance (Maido Saarlas)
Solution Manual Flight Performance of Fixed and Rotary Wing Aircraft (Antonio Filippone)
Solution Manual Fundamentals Of Aircraft Structural Analysis (Howard Curtis)
Solution Manual Aircraft Control and Simulation (2nd Ed., Brian Stevens & Frank Lewis)
Solution Manual Aircraft Structures for Engineering Students (3rd Ed., T.H.G. Megson)
Solution Manual Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
Solution Manual Introduction to Aircraft Structural Analysis (T.H.G. Megson)
Solution Manual Mechanics of Aircraft Structures (2nd Ed, C. T. Sun)
Solution Manual Principles of Helicopter Aerodynamics (1st Ed., Leishman)
Solution Manual Fundamentals of Aerodynamics (2nd Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (3th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (4th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (5th Ed., Anderson)
Solution Manual Aerodynamics for Engineers (5th Ed., John Bertin & Russell Cummings)
Solution Manual Introduction to Flight (5th Ed., Anderson)
Solution Manual Introduction to Flight (6th Ed., Anderson)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution Manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)

Solution Manual Gas Dynamics (3rd Ed., John & Keith)
Solution Manual Fundamentals of Gas Dynamics (2nd Ed, Robert D. Zucker)
Solution Manual Theory of Ground Vehicles (3rd Ed., J. Y. Wong)
Solution Manual Theory of Ground Vehicles (4th Ed., J. Y. Wong)
Solution Manual Vehicle Dynamics : Theory and Application (Reza Jazar)
Solution Manual Internal Combustion Engines : Applied Thermosciences (2nd Ed., Ferguson & Kirkpatrick)
Solution Manual Advanced Engine Performance Diagnosis (4th Ed., James Halderman)
Solution Manual Automotive Engines (8th Ed., Crouse)
Solution Manual Automotive Heating & Air Conditioning (5th Ed., Tom Birch)
Solution Manual Diagnosis and Troubleshooting of Automotive Electrical, Electronic, and Computer Systems (5th Ed., James Halderman)
Solution Manual Automotive Brake Systems Package (4th Ed., Rehkopf)
Solution Manual Automotive Brake Systems (4th Ed., Halderman)
Solution Manual Automotive Engine Performance (2nd Ed., Halderman)
Solution Manual Automotive Engines : Theory and Servicing (6th Ed., James Halderman)
Solution Manual Automotive Fuel and Emissions Control Systems (2nd Ed., James Halderman & James Linder)
Solution Manual Automotive Science and Mathematics (Allan Bonnick)
Solution Manual Automotive Mathematics (Jason Rouvel)
Solution Manual Automotive Service Management (Andrew Rezin)
Solution Manual Automotive Technology : Principles, Diagnosis, and Service (3rd Ed., Halderman)
Solution Manual Automotive Steering, Suspension, and Alignment (4th Ed., Halderman)
Solution Manual Automatic Transmissions & Transaxles (4th Ed., Tom Birch & Chuck Rockwood)
Solution Manual Hybrid and Alternative Fuel Vehicles (Halderman & Martin)
Solution Manual Manual Drivetrains and Axles (5th Ed., Birch & Rockwood)
Solution Manual Blueprint Reading for the Machine Trades (6th Ed., Schultz & Smith)
Solution Manual Modern Welding Technology (6th Ed., Cary & Helzer)
Solution Manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution Manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution Manual Tissue Mechanics (Cowin, Doty)
Solution Manual Technology and Society (3rd Ed., Hjorth, Eichler, Khan & Morello)
Solution Manual BTEC First Engineering Curriculum Support Pack (Mike Tooley)
Solution Manual BTEC First Engineering (Mike Tooley)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer &

William Keat)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution Manual Engineering Science (5th Ed., W. Bolton)
Solution Manual Principles of Energy Conversion (2nd Ed., Archie W. Culp)
Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo da Rosa)
Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo da Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris Kalogirou)
Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Concepts in Engineering (Holtzapple & Reece)
Solution Manual Concepts in Engineering (2nd Ed., Holtzapple & Reece)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)
Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chastain)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & Short)
Solution Manual Autodesk Inventor (James M. Leake)
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visualization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in Musculoskeletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt & Robert Rothery)
Solution Manual Electrical Engineering : Principles and Applications (3rd Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th Ed., Hambley)

Solution Manual Electrical Engineering : Principles and Applications (5th Ed., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics and Communications for Scientists and Engineers (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. Forouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. Forouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)
Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Analog Integrated Circuits for Communication : Principles, Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kime)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenmark)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., Karl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineering (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approach (Stuart Wentworth)
Solution Manual Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digital Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale Engineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences (7th Ed., Jay L. DeVore)
Solution Manual Probability and Stochastic Processes : A Friendly

Introduction for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodman)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney Colella, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benjamin C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Canadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richard S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bishop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenming C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed., Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed., Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed., Hodges)
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy Öberg)
Solution Manual Principles of Communications: Systems, Modulation, and Noise (5th Ed., R.E. Ziemer & W.H. Tranter)

Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits : Laplace Early (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas, Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson, Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Mandal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard Woods)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, Ronald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Schafer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hybrid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitris K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani)
Solution Manual Digital Signal Processing : Fundamentals and

Applications (Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlomo Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Paulo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Ambardar)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel & Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementation (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Daniel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Bernard C. Levy)
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cathey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sadiku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Approach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded DSP Processor Design : Application Specific Instruction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Greg Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introduction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd Ed., Jonathan W. Valvano)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jerome Saltzer & M. Frans Kaashoek)

Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Network (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C++ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Approach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faulkner, FitzGerald, Dennis & Miller)
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Hans van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Braude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Braude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulations (José Principe, Neil Euliano & W. Curt Lefebvre)
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer & Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of Modular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smith)
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd

Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Brown & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Douglas R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover and Mulukutla S. Sarma)
Solution Manual Power Electronics : Converters, Applications, and Design (3rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual An Introduction to Digital and Analog Communications (2nd Ed., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)
Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. Crilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. Crilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates

to C & beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Papadimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3rd Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4th Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Modeling (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Terry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed., Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Testability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Using Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design (Sivarama P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravindra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peterson & Davie)

Solution Manual Digital Design and Computer Architecture (David Harris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor Design (Michael J. Flynn)
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., Hennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applications, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kamber)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammeraal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teorey, Lightstone & Nadeau)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (2nd Ed., Wayne Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Processes (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Industry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodroffe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Designing Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol Britton & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Computer Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque)
Solution Manual Communication Networking : An Analytical Approach (Anurag Kumar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally & Towles)
Solution Manual Game Physics (David Eberly)

Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, and the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & Lorentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramaswami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramaswami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approach (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnick)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bird)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed., Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language (Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological Applications (Leif Sörnmo & Pablo Laguna)
Solution Manual Foundations of Analog and Digital Electronic Circuits (Anant Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : From DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for Engineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & Martinsen)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok & Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, TV and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV Production (Anthony Artis)

Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film and DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to Content Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guide for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrine Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production (3rd Ed., Gloman & Tom LeTourneau)
Solution Manual Film Directing Fundamentals : See Your Film Before Shooting (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (Jan Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animation Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hirsch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., Reese, Gross & Gross)
Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David Reed)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., Tony Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., Bohl & Rynn)

Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jonathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual Web Technologies : A Computer Science Perspective (Jeffrey C. Jackson)
Solution Manual Mastering the Internet, XHTML and JavaScript (2nd Ed., Ibrahim Zeid)
Solution Manual Weaving a Website : Programming in HTML, Java Script, Perl and Java (Susan Anderson-Freed)
Solution Manual Simply C++ : An Application-Driven Tutorial Approach (Harvey & Paul Deitel)
Solution Manual Visual C# 2005 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Visual C# 2008 How to Program (3rd Ed., Harvey & Paul Deitel)
Solution Manual Simply C# : An Application-Driven Tutorial Approach (Harvey & Paul Deitel, Hoey & Yaeger)
Solution Manual Java : An Introduction to Problem Solving and Programming (4th Ed., Walter Savitch)
Solution Manual Java : An Introduction to Problem Solving and Programming (5th Ed., Savitch & Carrano)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Java How to Program (7th Ed., Harvey & Paul Deitel)
Solution Manual Java For Students (5th Ed., Bell & Parr)
Solution Manual Java, Java, Java, Object-Oriented Problem Solving (3rd Ed., Morelli & Walde)
Solution Manual Java : An Eventful Approach (Bruce, Danyluk & Murtagh)
Solution Manual Introduction to Java Programming with JBuilder (3rd Ed., Y. Daniel Liang)
Solution Manual Starting Out with Visual Basic 2008 (4th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Visual Basic 2010 (5th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Python (Tony Gaddis)

Solution Manual Object-Oriented Programming in Python (Goldwasser & Letscher)
Solution Manual Introduction to MathCAD 11 (Ronald W. Larsen)
Solution Manual Introduction to MathCAD 13 (2nd Ed., Ronald W. Larsen)
Solution Manual MatLAB Programming (David Kuncicky)
Solution Manual Introduction to Maple 8 (David Schwartz)
Solution Manual Introduction to FORTRAN 90 (2nd Ed., Larry R. Nyhoff & Sanford Leestma)
Solution Manual Fortran 95/2003 Scientists and Engineers (3rd Ed., Stephen J. Chapman)
Solution Manual Introduction to Java (Stephen J. Chapman)
Solution Manual Java Software Solutions for AP Computer Science A (2nd Ed., Lewis, Loftus & Cocking)
Solution Manual Business Data Networks and Telecommunications (6th Ed., Raymond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Raymond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Analysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean Ponce)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Daniel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. & Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn & M. Pauline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Interaction Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wendy Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan Lazar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenbaum)
Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip Irvine)

Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvine)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehensive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Topi)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Topi)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Thomas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Approach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jain)
Solution Manual Computer Security : Principles and Practice (William Stallings & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, Anzaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibbs & Edward Oakes)
Solution Manual Network Defense and Countermeasures : Principles and Practices (Chuck Easttom)
Solution Manual Corporate Computer and Network Security (1st Ed., Raymond Panko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond Panko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Cheryl Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Michael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Tanenbaum & Van Steen)

Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Operating Systems Design and Implementation (3rd Ed., Andrew Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & David Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)
Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell Programming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: College Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applications (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (Raj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applications (3rd Ed., Austin Hughes)
Solution Manual Modern Processor Design : Fundamentals of Superscalar Processors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols for Network Design (N. Olifer & V. Olifer)
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)

Solution Manual CMOS Digital Integrated Circuits : Analysis and Design (3rd Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (2nd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (3rd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic and Computer Design (Alan B Marcovitz)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank Petruzella)
Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (Fredric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Quinn)
Solution Manual Data Communications and Network Security (Houston H. Carr & Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)

Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bentley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Marakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed., William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed., William Collins)
Solution Manual Data Structures and the Standard Template Library (William Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Sudarshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in C♯.Net (1st Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual C♯ 2005 (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows & Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe &

Charles Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Valda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mullin)
Solution Manual Internet Marketing : Building Advantage in a Networked Economy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed., Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia & Indra Widjaja)
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Safa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Safa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to

Signal Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about Systems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (David J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Performance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik Larsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jon Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse & Pramod Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak H. Ning)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor Structures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M. Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed.,

Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Simon M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Simon M. Sze)
Solution Manual Physics of Semiconductor Devices (3rd Ed., Simon M. Sze, Kwok K. Ng)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Systems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices (3rd Ed., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donald Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Neamen)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralph Ford & Chris Coulston)
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems (Cha, Rosenberg, Dym)
Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Methods (Elbert Hendricks, Ole Jannerup & Paul Haase Sørensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (Anthony Zaknich)
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., Conte, Moog & Perdon)
Solution Manual Discrete-Time Control Systems (2nd Ed., K. Ogata)
Solution Manual Modern Control Engineering - Problems B (3rd Ed., K. Ogata)
Solution Manual Modern Control Engineering (4th Ed., K. Ogata)
Solution Manual Modern Control Engineering (5th Ed., K. Ogata)
Solution Manual Modern Control Engineering - International Version (5th Ed., K. Ogata)

Solution Manual LabVIEW 8 Student Edition (Bishop)
Solution Manual LabVIEW 2009 Student Edition (Bishop)
Solution Manual Learning with LabVIEW 2009 (Bishop)
Solution Manual Introduction to Feedback Control (Li Qiu & Kemin Zhou)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual Feedback Control of Dynamic Systems (4th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (5th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems - International Version (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Predictive Control with Constraints (Jan Maciejowski)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Engineering Problem Solving with C (3rd Ed., Etter)
Solution Manual Engineering Problem Solving with C++ (2nd Ed., Etter)
Solution Manual Process Control Instrumentation Technology (8th Ed., Johnson)
Solution Manual Electrical Power and Controls (2nd Ed., Skvarenina & DeWitt)
Solution Manual Electronics and Computer Math (8th Ed., Deem & Zannini)
Solution Manual Circuits, Signals, and Systems for Bioengineers : A MATLAB-Based Introduction (John Semmlow)
Solution Manual VLSI Test Principles and Architectures : Design for Testability (Laung-Terng Wang, Cheng-Wen Wu & Xiaoqing Wen)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Machine Vision : Theory, Algorithms, Practicalities (3rd Ed., E. R. Davies)
Solution Manual Essential Java for Scientists and Engineers (Brian D. Hahn & Katherine M. Malan)
Solution Manual Guide to Microsoft Excel 2002 for Scientists and Engineers (3rd Ed., Bernard V. Liengme)
Solution Manual 10-Key Touch Key : Developing Speed and Accuracy (Burton)
Solution Manual Introduction to C++ Programming, Brief Version (Y. Daniel Liang)
Solution Manual Introduction to C++ Programming, Comprehensive (Y. Daniel Liang)
Solution Manual C++ for Business Programmers (2nd Ed., John C. Molluzzo)
Solution Manual Introduction to Java Programming - Brief Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version -

International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (6th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming : Fundamentals First (6th Ed., Y. Daniel Liang)
Solution Manual Objects First With Java : A Practical Introduction Using BlueJ (3rd Ed., Barnes & Kolling)
Solution Manual Simply Java Programming : An Application-Driven™ Tutorial Approach (Deitel)
Solution Manual Java : An Introduction to Computing (Joel Adams, Larry R. Nyhoff & Jeffrey Nyhoff)
Solution Manual Advanced Java™ 2 Platform How to Program (Deitel & Santry)
Solution Manual SQL for SQL Server (Bijoy Bordoloi & Douglas B. Bock)
Solution Manual An Introduction to Programming Using Visual Basic 2005 (6th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2008 (7th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2010 (8th Ed., Schneider)
Solution Manual Simply Visual Basic .NET (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Simply Visual Basic 2005 (2nd Ed., Harvey & Paul Deitel & Associates)
Solution Manual Simply Visual Basic 2008 (3rd Ed., Harvey & Paul Deitel & Associates)
Solution Manual Visual Basic 2005 How to Program (3rd Ed., Deitel & Associates)
Solution Manual Visual Basic 2008 How to Program (4th Ed., Deitel & Associates)
Solution Manual An Introduction to Programming with Visual Basic 6.0 (4th Ed., Schneider)
Solution Manual Visual Basic.Net Programming (2nd Ed., Jeffrey Tsay)
Solution Manual Simply Visual Basic .NET (Harvey & Paul Deitel & Nieto)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual PC Systems, Installation and Maintenance (2nd Ed., R.P. Beales)
Solution Manual Introduction to Linear Programming (Leonid N. Vaserstein)
Solution Manual Electric Circuits Fundamentals (8th Ed., Thomas Floyd)
Solution Manual Introductory Circuit Analysis (11th Ed., Robert L. Boylestad)
Solution Manual Introductory Circuit Analysis (12th Ed., Robert L.

Boylestad)
Solution Manual Principles of Electric Circuits : Conventional Current Version (8th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Conventional Current Version (9th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (8th Ed., Thomas L. Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (9th Ed., Thomas L. Floyd)
Solution Manual Contemporary Electric Circuits : Insights and Analysis (2nd ed., Strangeway, Petersen, Gassert & Lokken)
Solution Manual Introductory Electronic Devices and Circuits : Electron Flow Version (7th Ed., Paynter)
Solution Manual Introductory Electronic Devices and Circuits : Conventional Flow Version (7th Ed., Paynter)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (2nd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (3rd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (2nd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (3rd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Introductory DC/AC Circuits (6th Ed., Nigel P. Cook)
Solution Manual Introductory DC/AC Electronics (6th Ed., Nigel P. Cook)
Solution Manual Electronic Devices : Conventional Current Version (7th Ed., Floyd)
Solution Manual Electronic Devices : Conventional Current Version (8th Ed., Floyd)
Solution Manual Electronic Devices : Electron Flow Version (7th, Floyd)
Solution Manual Electronic Devices : Electron Flow Version (8th, Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (7th Ed., Thomas L. Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (8th Ed., Floyd & Buchla)
Solution Manual Electronic Devices and Circuit Theory (9th Ed., Boylestad, Nashelsky)
Solution Manual Electronic Devices and Circuit Theory (10th Ed., Boylestad, Nashelsky)
Solution Manual The Science of Electronics : DC/AC (David M. Buchla, Thomas L. Floyd)
Solution Manual The Science of Electronics : Digital (Floyd & Buchla)
Solution Manual The Science of Electronics: Analog Devices (Floyd & Buchla)
Solution Manual Digital Electronics : A Practical Approach (7th Ed., Kleitz)
Solution Manual Digital Electronics : A Practical Approach (8th Ed.,

Kleitz)
Solution Manual Digital Systems : Principles and Applications (10th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Electronics with VHDL - Quartus II Version (Kleitz)
Solution Manual Digital Fundamentals (9th Ed., Floyd)
Solution Manual Digital Fundamentals (10th Ed., Floyd)
Solution Manual Digital Fundamentals with PLD Programming (Thomas L. Floyd)
Solution Manual The 8051 Microcontroller (4th Ed., MacKenzie & Chung-Wei Phan)
Solution Manual The 8051 Microcontroller and Embedded Systems (2nd Ed., Muhammad Ali Mazidi, Janice Mazidi & Rolin McKinlay)
Solution Manual INTEL Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium, Prentium ProProcessor, Pentium II, III, 4, (7th Ed., Barry B. Brey)
Solution Manual Microcontroller Technology : The 68HC11 (5th Ed., Peter Spasov)
Solution Manual PIC Microcontroller (Muhammad Ali Mazidi, Rolin McKinlay & Danny Causey)
Solution Manual HCS12 Microcontrollers and Embedded Systems : Using Assembly and C with CodeWarrior (Muhammad Ali Mazidi, Danny Causey & Janice Mazidi)
Solution Manual The x86 PC : Assembly Language, Design, and Interfacing (5th Ed., Muhammad Ali Mazidi, Janice Mazidi & Danny Causey)
Solution Manual The AVR Microcontroller and Embedded Systems : Using Assembly and C (Muhammad Ali Mazidi, Sarmad Naimi & and Sepehr Naimi)
Solution Manual Industrial Electronics (James A. Rehg, Glenn J. Sartori)
Solution Manual Programmable Controllers Using the Allen-Bradley SlC-500 Family (2nd Ed., Dave Geller)
Solution Manual Programmable Logic Controllers (James A. Rehg, Glenn J. Sartori)
Solution Manual Fundamentals of Programmable Logic Controllers, Sensors, and Communications (3rd Ed., Jon Stenerson)
Solution Manual An Introduction to Programming with Visual Basic 6.0, Update Edition (4th Ed., Schneider)
Solution Manual C++ Programming Today (1st Ed., Barbara Johnston)
Solution Manual C++ Programming Today (2nd Ed., Barbara Johnston)
Solution Manual Introduction to Data Communications and Networking (Wayne Tomasi)
Solution Manual Introduction to Telecommunications (2nd Ed., Martha Rosengrant)
Solution Manual Network Security Essentials : Applications and Standards (3rd Ed., William Stallings)
Solution Manual Network Security Essentials : Applications and Standards (4th Ed., William Stallings)
Solution Manual Information Security: Principles and Practices (Mark Merkow, James Breithaupt)

Solution Manual Principles and Practice of Information Security (Linda Volonino, Stephen R. Robinson)
Solution Manual Principles of Electronic Communication Systems (3rd Ed., Louis E. Frenzel)
Solution Manual Modern Electronic Communication (8th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Modern Electronic Communication (9th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Electronic Communications for Technicians (2nd ed., Tom Wheeler)
Solution Manual Concepts In Systems and Signals (2nd Ed., John D. Sherrick)
Solution Manual Understanding Fiber Optics (5th Ed., Jeff Hecht)
Solution Manual Understanding UNIX/LINUX Programming : A Guide to Theory and Practice (Bruce Molay)
Solution Manual Applying PIC18 Microcontrollers : Architecture, Programming, and Interfacing using C and Assembly (Barry Brey)
Solution Manual Electrical Power and Controls (2nd Ed., Timothy L. Skvarenina, William E. DeWitt)
Solution Manual Process Control Instrumentation Technology (8th Ed., Curtis Johnson)
Solution Manual Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
Solution Manual Introduction to Vacuum Technology (David M. Hata)
Solution Manual Electronic Project Design and Fabrication (6th Ed., Ronald A. Reis)
Solution Manual Technology and Society (3rd Ed., Linda Hjorth, Barbara A. Eichler, Ahmed S. Khan, John Morello)
Solution Manual Solid State Electronic Devices (6th Ed., Ben Streetman, Sanjay Banerjee)
Solution Manual Approaching Quantum Computing (Dan C. Marinescu & Gabriela M. Marinescu)
Solution Manual Foundations of MEMS (Chang Liu)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (6th Ed., Ulaby, Michielssen & Ravaioli)
Solution Manual Basic Electromagnetics with Applications (Nannapaneni Narayana Rao)
Solution Manual Elements of Engineering Electromagnetics (6th Ed., Nannapaneni Narayana Rao)
Solution Manual Fundamentals of Electromagnetics for Electrical and Computer Engineering (Nannapaneni Narayana Rao)
Solution Manual Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
Solution Manual Digital Design : Principles and Practices Package (4th Ed., John F. Wakerly)
Solution Manual VHDL: A Starter's Guide (2nd Ed., Sudhakar Yalamanchili)
Solution Manual Computer Organization and Architecture : Designing for

Performance (7th Ed., William Stallings)
Solution Manual Computer Organization and Architecture : Designing for Performance (8th Ed., William Stallings)
Solution Manual Parallel Programming : Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
Solution Manual Fundamentals of Parallel Processing (Harry F. Jordan & Gita Alaghband)
Solution Manual Digital and Analog Communication Systems (7th Ed., Leon W. Couch)
Solution Manual Digital Communications (4th Ed., John Proakis)
Solution Manual Digital Communications (5th Ed., John Proakis)
Solution Manual Principles of Digital Communication and Coding (Andrew J. Viterbi, Jim K. Omura)
Solution Manual Modern Wireless Communications (Simon Haykin, Michael Moher)
Solution Manual Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
Solution Manual ISDN and Broadband ISDN with Frame Relay and ATM (4th Ed., William Stallings)
Solution Manual Data and Computer Communications (8th Ed., William Stallings)
Solution Manual Cryptography and Network Security (4th Ed., William Stallings)
Solution Manual Cryptography and Network Security : Principles and Practice (5th Ed., William Stallings)
Solution Manual Computer Networking with Internet Protocols (William Stallings)
Solution Manual Local and Metropolitan Area Networks (6th Ed., William Stallings)
Solution Manual Probabilistic Systems and Random Signals (Abraham Haddad)
Solution Manual Error Control Coding (2nd Ed., Shu Lin & Daniel J. Costello)
Solution Manual Wireless Communications & Networks (2nd ed., William Stallings)
Solution Manual Wireless Communications and Networking (Jon W. Mark, Weihua Zhuang)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual Signals, Systems, and Transforms (3rd Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms - International Version (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Edward Kamen & Bonnie Heck)
Solution Manual Adaptive Filter Theory (4th Ed., Simon Haykin)
Solution Manual Neural Networks and Learning Machines (3rd Ed., Simon

Haykin)
Solution Manual Spectral Analysis of Signals (Petre Stoica & Randolph L. Moses)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (2nd Ed., Snyder)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (3rd Ed., Snyder)
Solution Manual Fluency with Information Technology, Brief Edition (Lawrence Snyder)
Solution Manual Excel 2003 Volume II: Advanced Concepts in Excel (5th Ed., Karen Jolly)
Solution Manual Focus on Excel 2003 (Julie Hayward Spooner)
Solution Manual Comprehensive Excel 2002 for Office XP (4th Ed., Karen Jolly)
Solution Manual Ethics for the Information Age (2nd Ed., Michael Quinn)
Solution Manual Ethics for the Information Age (3rd Ed., Michael Quinn)
Solution Manual Computer Science : An Overview (8th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (9th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (10th Ed., J. Glenn Brookshear)
Solution Manual Excel 2003 Volume 1 : Core Concepts in Excel (5th Ed., Karen J. Jolly)
Solution Manual Concise Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Concise Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Extended Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Extended Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Logic and Design of Computer Programs (Jim Messinger)
Solution Manual Absolute C++ (2nd Ed., Walter Savitch)
Solution Manual Absolute C++ (3rd Ed., Walter Savitch)
Solution Manual Absolute C++ (4th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ : The Object of Programming (5th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (6th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (7th Ed., Walter Savitch)
Solution Manual Problem Solving, Abstraction, and Design using C++ (4th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Problem Solving, Abstraction & Design Using C++ (5th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Starting Out with C++ : From Control Structures through Objects (5th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (6th Ed., Tony Gaddis)

Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (6th Ed., Tony Gaddis)
Solution Manual Starting out with C++ Brief Version Updated (4th Ed., Gaddis & Krupnow)
Solution Manual Starting out with C++ Brief Version (5th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Brief Version Update, Visual C++ .NET (4th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Early Objects (5th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (6th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (7th Ed., Gaddis, Walters & Muganda)
Solution Manual C++ By Dissection (Ira Pohl)
Solution Manual Essential C++ for Engineers and Scientists (2nd Ed., Jeri Hanly)
Solution Manual C++ Coach : Essentials for Introductory Programming (Jeff Salvage)
Solution Manual C++ Primer (4th Ed., Stanley Lippman, Josée Lajoie & Barbara Moo)
Solution Manual Engineering Computation with MATLAB (1st Ed., David Smith)
Solution Manual Engineering Computation with MATLAB (2nd Ed., David Smith)
Solution Manual Absolute Java (1st Ed., Walter Savitch)
Solution Manual Absolute Java (2nd Ed., Walter Savitch)
Solution Manual Absolute Java (3rd Ed., Walter Savitch)
Solution Manual Absolute Java (4th Ed., Walter Savitch)
Solution Manual The Art and Science of Java (Eric Roberts)
Solution Manual Building Java Programs : A Back to Basics Approach (Stuart Reges & Martin Stepp)
Solution Manual Introduction to Programming in Java : An Interdisciplinary Approach (Robert Sedgewick & Kevin Wayne)
Solution Manual Java Foundations: Introduction to Program Design and Data Structures (John Lewis, Peter DePasquale & Joe Chase)
Solution Manual Starting Out with Java : Early Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (4th Ed., Gaddis)
Solution Manual Java Software Solutions (Java 5.0 version) : Foundations of Program Design (4th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (5th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (6th Ed., Lewis & Loftus)
Solution Manual Starting Out with Java : From Control Structures through Data Structures (Gaddis & Muganda)

Solution Manual Object of Java, The: Introduction to Programming Using Software Engineering Principles (2nd Ed, David Riley)
Solution Manual Object-Oriented Programming in Java : A Graphical Approach, Preliminary Edition (Kathryn E. Sanders & Andy van Dam)
Solution Manual Starting Out with Java 5 : Control Structures to Objects (Tony Gaddis)
Solution Manual Starting Out with Java 5 : Early Objects (Tony Gaddis)
Solution Manual Introduction to Programming Using Java : An Object-Oriented Approach (2nd Ed., David Arnow, Scott Dexter & Gerald Weiss)
Solution Manual Computing with Java (2nd Ed., Art Gittleman)
Solution Manual Problem Solving with Java, Update (2nd Ed., Elliot B. Koffman & Ursula Wolz)
Solution Manual Starting Out with Alice : A Visual Introduction to Programming (Tony Gaddis)
Solution Manual Problem Solving and Program Design in C (4th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (5th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (6th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Starting Out with Visual Basic 2005 (3rd Ed., Tony Gaddis & Kip Irvine)
Solution Manual Starting Out with Visual Basic 6 (Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Starting Out with Visual Basic.Net (2nd Ed., Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Computer Programming Fundamentals with Applications in Visual Basic® 6.0 (Mitchell Kerman & Ronald Brown)
Solution Manual Advanced VB.NET Alternate with VB.Net CD's (3rd Ed., Kip Irvine & Tony Gaddis)
Solution Manual Advanced Visual Basic 2005 (4th Ed., Kip Irvine & Tony Gaddis)
Solution Manual C# Software Solutions : Foundations of Program Design (John Lewis)
Solution Manual Problem Solving, Abstraction and Design Using C++, Visual C++.NET Edition (Frank Friedman & Elliot Koffman)
Solution Manual Ada 95 : Problem Solving and Program Design (3rd Ed., Michael Feldman & Elliot Koffman)
Solution Manual Programming and Problem Solving with Delphi (Mitchell Kerman)
Solution Manual C Program Design for Engineers (2nd Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Data Abstraction & Problem Solving with C++ (5th ed., Frank Carrano)
Solution Manual Data Structures and Algorithm Analysis in C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in C++ (3rd Ed., Mark Allen Weiss)
Solution Manual Data Abstraction and Problem Solving with C++ : Walls and Mirrors (4th Ed., Frank Carrano)

Solution Manual Data Structures and Problem Solving Using C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in Java (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures in Java : From Abstract Data Types to the Java Collections Framework (Simon Gray)
Solution Manual Data Abstraction and Problem Solving with Java (2nd Ed., Frank Carrano & Janet Prichard)
Solution Manual Data Structures and Other Objects Using Java (3rd Ed., Michael Main)
Solution Manual Data Structures and Problem Solving Using Java (3rd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Problem Solving Using Java (4th Ed., Mark Allen Weiss)
Solution Manual Java Software Structures : Designing and Using Data Structures (2nd Ed., John Lewis, Joseph Chase)
Solution Manual The Object of Data Abstraction and Structures (using Java) (David Riley)
Solution Manual Classic Data Structures in Java (Timothy Budd)
Solution Manual Data Structures in Java (Thomas A. Standish)
Solution Manual Data Structures, Algorithms and Software Principles in C (Thomas A. Standish)
Solution Manual Introduction to the Design and Analysis of Algorithms (1st Ed., Anany Levitin)
Solution Manual Introduction to the Design and Analysis of Algorithms (2nd Ed., Anany Levitin)
Solution Manual Algorithm Design (Jon Kleinberg & Éva Tardos)
Solution Manual Data Structures and Algorithm Analysis in C (2nd Ed., Mark Allen Weiss)
Solution Manual Computer Algorithms : Introduction to Design and Analysis (3rd Ed., Sara Baase & Allen Van Gelder)
Solution Manual Artificial Intelligence : Structures and Strategies for Complex Problem Solving (6th Ed., George Luger)
Solution Manual Artificial Intelligence : A Modern Approach (2nd Ed., Stuart Russell & Peter Norvig)
Solution Manual The Complete A+ Guide to PC Repair (3rd Ed., Cheryl Schmidt)
Solution Manual The Complete A+ Guide to PC Repair (4th Ed., Cheryl Schmidt)
Solution Manual Complete Computer Repair Textbook (4th Ed., Cheryl Schmidt)
Solution Manual Computer Systems Organization and Architecture (John D. Carpinelli)
Solution Manual CMOS VLSI Design: A Circuits and Systems Perspective (3rd Ed., Neil Weste & David Harris)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (4th Ed., Edward Angel)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (5th Ed., Edward Angel)
Solution Manual File Structures : An Object-Oriented Approach with C++

(3rd Ed., Michael J. Folk, Bill Zoellick & Greg Riccardi)
Solution Manual Oracle 10g Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Databases, Types and the Relational Model (3rd Ed., C. J. Date & Hugh Darwen)
Solution Manual Fundamentals of Database Systems (5th Ed., Ramez Elmasri & Shamkant Navathe)
Solution Manual Database Systems : An Application-Oriented Approach, Introductory Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual Database Systems : An Application Oriented Approach, Complete Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (4th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (5th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual Database Systems : The Complete Book (2nd Ed., Hector Garcia-Molina, Jeffrey D. Ullman, Jennifer Widom)
Solution Manual A First Course in Database Systems (3rd Ed., Jeffrey D. Ullman, Jennifer Widom)
Solution Manual Fundamentals of Database Systems/Oracle 9i Programming (4th Ed., Ramez Elmasri, Shamkant B. Navathe & Rajshekhar Sunderraman)
Solution Manual An Introduction to Database Systems (8th Ed., C.J. Date)
Solution Manual Oracle 9i Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Elements of Information Theory (1st Ed., Thomas M. Cover & Joy A. Thomas)
Solution Manual Principles of Database Systems with Internet and Java Applications (Greg Riccardi)
Solution Manual Introduction to Data Mining (Pang-Ning Tan, Michael Steinbach & Vipin Kumar)
Solution Manual Data Mining: A Tutorial Based Primer (Richard Roiger & Michael Geatz)
Solution Manual Learning SQL : A Step-by-Step Guide Using Access (Sikha Bagui, Richard Earp)
Solution Manual Learning SQL : A Step-By-Step Guide Using Oracle (Richard Earp, Sikha Bagui)
Solution Manual Access 2007 Guidebook (6th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Access 2003 Guidebook for Office XP (5th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Implementing Databases in Oracle 9i (John Day & Craig Van Slyke)
Solution Manual Web 101: Making the Net Work for You (2nd Ed., Wendy Lehnert)
Solution Manual Web 101 (3rd Ed., Wendy G. Lehnert & Richard L. Kopec)

Solution Manual Web Developer Foundations : Using XHTML (2nd Ed., Terry Felke-Morris)
Solution Manual Web Development & Design Foundations With XHTML (3rd Ed., Terry Felke-Morris)
Solution Manual Web Development and Design Foundations with XHTML (4th Ed., Terry Felke-Morris)
Solution Manual Internet Effectively : A Beginner's Guide to the World Wide Web (Tyrone Adams & Sharon Scollard)
Solution Manual Light on the Web : Essentials to Making the 'Net Work for You (Wendy G. Lehnert)
Solution Manual Programming the World Wide Web (3rd Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (4th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (5th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation (Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., Xiaoping Jia)
Solution Manual Introduction to the Team Software Process (Watts S. Humphrey)
Solution Manual Software Project Management : A Real-World Guide to Success (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Applications in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented Approach (Evelyn Stiller & Cathie LeBlanc)

Solution Manual Engineering of Software, The: A Technical Guide for the Individual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebesta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittleman)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldner)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Developers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. Liu)
Solution Manual Distributed Operating Systems and Algorithm Analysis (Randy Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Internet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James Kurose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose)
Solution Manual Network Management : Principles and Practice (Mani Subramanian)

Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual How to Break Software Security (James A. Whittaker &
Herbert H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP
(Michael Quinn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber &
Runstein)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing
Audiences News, Talk, Information & Personality Broadcast, HD,
Satellite & Internet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth
Creech)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle
& Starr)
Solution Manual Convergent Journalism an Introduction: Writing and
Producing Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News
Packages (Mindy McAdams)

List of Solutions Manuals

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES & BHUTAN".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=VQJ2M78Y

I do not review the forums, just send me an email.

- Math, Statistics & Probability :

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn James)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., Henry J. Ricardo)
Solution manual Elementary Differential Equations (7th Ed., Boyce)
Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (7th Ed., Boyce & Diprima)

Solution manual Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method: Theory, Programming and Applications (Erik G. Thompson)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (3rd., Anthony Croft & Robert Davison)
Solution manual Measurement and Data Analysis for Engineering and Science (Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & David Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton & Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations (6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)

Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johnson)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johnson)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cryptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Applications (2nd Ed., Kenneth Falconer)
Solution manual Analytical and Computational Methods of Advanced Engineering Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (5th Ed., Daniel Solow)
Solution manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James Solberg)
Solution manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Applied Statistics for Engineers and Physical Scientists (3rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubele)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubele)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montgomery)

Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Squaring the Circle : Geometry in Art and Architecture (Paul Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul Calter & Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fernández, Haedeh Gooransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments (Gary W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgomery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgomery)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canavos & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)
Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof with Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles (4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numerical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramaniam)

Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramaniam)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos Gilat)
Solution manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed., Jonathan D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William J Palm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William J Palm III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Raymond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (2nd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William Navidi)
Solution manual Principles of Statistics for Engineers and Scientists

(William Navidi)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandran & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers and Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Bragg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Salzman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Salzman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Martin-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & Bragg)
Solution manual Introductory Algebra through Applications (2nd Ed., Akst & Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen R. Angel)

Solution manual Intermediate Algebra with Applications & Visualization (3rd Ed., Rockswold & Krieger)
Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGinnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay)
Solution manual College Geometry : Using The Geometer's Sketchpad - Preliminary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applications (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed., John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number Systems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Calvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Long, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daffer, Charles, Cooney, Dossey & Schielack)

Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckmann)
Solution manual Finite Mathematics and Calculus with Applications (7th Ed., Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed., Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences and Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbogen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thomas, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Problems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penney)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saff & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode & Annin)
Solution manual Discrete Mathematical Structures (6th Ed., Kolman, Busby & Ross)

Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penna & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L. Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. Grimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & Charles T. Ryan)
Solution manual Discrete Mathematics (5th ed., John Dossey, Albert Otto, Lawrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yannotta)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric

Connally & Deborah Hughes-Hallett)
Solution manual Algebra : Form and Function, Preliminary Edition (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughes-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Texas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gleason)
Solution manual Functions Modeling Change : A Preparation for Calculus (2nd Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Survival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Stephen Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Understanding Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuhaä, L.E. Meester)
Solution manual Statistical Methods for the Analysis of Repeated Measurements (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayesian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations to Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)

Solution manual Methods of Multivariate Statistics (Muni Srivastava)
Solution manual Regression Analysis : Theory, Methods, and Applications (Ashish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliffe)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed., Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaas)
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaas)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David Mayers)
Solution manual Fundamentals of Engineering Numerical Analysis (Parviz Moin)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Berger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robert, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & George Casella)
Solution manual Introduction to Mathematical Structures and Proofs (Larry J. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)
Solution manual Fundamentals of Complex Analysis with Applications to Engineering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (6th Ed., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers (7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers (8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald,

Patrick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedberg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolman & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th Ed., Kolman & Hill)
Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra for Engineers and Scientists Using Matlab (Hardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard Bronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematical Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)
Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michael III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Benjamin M. Perles)
Solution manual Statistics : The Art and Science of Learning From Data (Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larson & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larson & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)

Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Mendenhall)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga & Brenda Gunderson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbiel & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbiel & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Benson & Sincich)
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)
Solution manual Statistics for Managers Using Microsoft Excel (4th Ed., Levine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (7th Ed., Newbold, Carlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Krehbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications (7th Ed., Miller)
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tanis)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tanis)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
Solution manual Introduction to Mathematical Statistics and Its

Applications (4th Ed., Larsen & Marx)
Solution manual A Brief Course in Mathematical Statistics (Hogg & Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, Anderson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, Anderson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Brian Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Brian Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shiavi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routines (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduction to the FEM and Adaptive Error Analysis for Engineering Students (J. Akin)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary Attenborough)
Solution manual Probability and Random Processes : With Applications to Signal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Peter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications With Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assisted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacques)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., Moore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller &

Clendenen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller & Clendenen)
Solution manual Basic College Mathematics with Early Integers (K. Elayn Martin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. Kosmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr., Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Slater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen Angel)
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Struve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Robert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)

Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Essentials of Introductory and Intermediate Algebra for College Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)
Solution manual College Algebra : An Early Functions Approach (Robert F. Blitzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robert Blitzer)
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)
Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (1st Ed., Michael Sullivan III &

Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Joseph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Michael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Package (4th Ed., Cathcart, Pothier, Vance & Bezuk)
Solution manual Understanding the Math You Teach: Content and Methods for Prekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Missouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis & C. Henry Edwards)
Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry

Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, David Schneider, David Lay)
Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry Farlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess & David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Goodaire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agresti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For the TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus

Calculator (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Essentials of Statistics (2nd Ed., Mario Triola)
Solution manual Essentials of Statistics (3rd Ed., Mario Triola)
Solution manual Essentials of Statistics (4th Ed., Mario Triola)
Solution manual Introductory Statistics (7th Ed., Neil Weiss)
Solution manual Introductory Statistics (8th Ed., Neil Weiss)
Solution manual Intro Stats (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Intro Stats (3rd Ed., De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Elementary Statistics Using Excel (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (4th Ed., Mario Triola)
Solution manual Stats : Modeling the World (2nd Ed., Bock, Velleman & De Veaux)
Solution manual Stats : Modeling the World (3rd Ed., Bock, Velleman & De Veaux)
Solution manual Statistical Reasoning for Everyday Life (2nd Ed., Bennett, Briggs & Triola)
Solution manual Statistical Reasoning for Everyday Life (3rd Ed., Bennett, Briggs & Triola)
Solution manual Business Statistics (Triola & Franklin)
Solution manual Business Statistics (Sharpe, De Veaux & Velleman)
Solution manual Business Statistics : A First Course (Sharpe, De Veaux & Velleman)
Solution manual Biostatistics for the Biological and Health Sciences with Statdisk (Marc Triola & Mario Triola)
Solution manual Biostatistics : A Guide to Design, Analysis and Discovery (2nd Ed., Ronald Forthofer, Eun Lee, Mike Hernandez)
Solution manual A Course in Probability (Neil A. Weiss)
Solution manual Probability and Statistics (3rd Ed., DeGroot & Schervish)
Solution manual Statistics for Science and Engineering (John Kinney)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (1st Ed., Chartrand, Polimeni & Zhang)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (2nd Ed., Chartrand, Polimeni & Zhang)
Solution manual Elementary Number Theory (5th Ed., Kenneth H. Rosen)
Solution manual History of Mathematics : Brief Version (Victor J. Katz)
Solution manual Geometry : An Investigative Approach (2nd Ed., Phares

G. O'Daffer & Stanley Clemens)
Solution manual A First Course in Abstract Algebra (7th Ed., John Fraleigh)
Solution manual Complex Variables with Applications (3rd Ed., David Wunsch)
Solution manual Numerical Analysis with CD-ROM (Timothy Sauer)
Solution manual Numerical Analysis and Scientific Computation (Jeffery Leader)
Solution manual Linear Algebra and Differential Equations (Gary Peterson & James Sochacki)
Solution manual Elementary Differential Equations (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Elementary Differential Equations with Boundary Value Problems (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Fundamentals of Differential Equations (6th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Fundamentals of Differential Equations and Boundary Value Problems (4th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Linear Algebra and Its Applications with CD-ROM, Update (3rd Ed., David C. Lay)
Solution manual Introduction to Linear Algebra (5th ed., Lee W. Johnson, R. Dean Riess & Jimmy T. Arnold)
Solution manual Calculus for the Life Sciences (Marvin L. Bittinger, Neal Brand & John Quintanilla)
Solution manual Calculus with Applications for the Life Sciences (Raymond N. Greenwell, Nathan P. Ritchey & Margaret L. Lial)
Solution manual Calculus : An Integrated Approach to Functions and Their Rates of Change, Preliminary Edition (Robin J. Gottlieb)
Solution manual Calculus (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Thomas' Calculus, Alternate Edition (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Calculus : A Complete Course (2nd Ed., Ross L. Finney, Franklin D. Demana, Bert K. Waits & Daniel Kennedy)
Solution manual Calculus (Elgin H. Johnston & Jerry Mathews)
Solution manual Thomas' Calculus, Updated (10th Ed., George B. Thomas, Jr., Ross L. Finney, Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Thomas' Calculus Early Transcendentals (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual University Calculus (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual University Calculus : Alternate Edition (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual Thomas' Calculus, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus, Early Transcendentals, Media Upgrade

(11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Calculus with Applications (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Calculus with Applications, Brief Version (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Finite Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematical Ideas (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (3rd Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (4th Ed., Bennett & Briggs)
Solution manual A Problem Solving Approach to Mathematics (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Survey of Mathematics with Applications (7th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (7th Ed., Angel, Abbott & Runde)
Solution manual Mathematics All Around (3rd Ed., Tom Pirnot)
Solution manual Mathematics for Elementary School Teachers (3rd Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary School Teachers (4th Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary Teachers with Activities (Sybilla Beckmann)
Solution manual Mathematics for Elementary Teachers plus Activities Manual (2nd Ed., Sybilla Beckmann)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (8th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for

Elementary School Teachers (10th Ed., Billstein, Libeskind & Lott)
Solution manual Essentials of Using and Understanding Mathematics : A Quantitative Reasoning Approach (Jeffrey Bennett & William Briggs)
Solution manual Technical Calculus with Analytic Geometry (4th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus Metric Version (8th Ed., Allyn Washington)
Solution manual Introduction to Technical Mathematics (5th Ed., Washington, Triola & Reda)
Solution manual A Graphical Approach to Precalculus (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits (3rd Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Precalculus : Functions and Graphs (5th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphical, Numerical, Algebraic (7th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Functioning in the Real World : A Precalculus Experience (2nd Ed., Gordon, F. Gordon, Tucker & Siegel)
Solution manual Precalculus with Modeling and Visualization (3rd Ed., Gary K. Rockswold)
Solution manual Precalculus with Modeling and Visualization (4th Ed., Gary K. Rockswold)
Solution manual Precalculus (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Mark Dugopolski)
Solution manual Precalculus (4th Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (2nd Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (3rd Ed., Mark Dugopolski)
Solution manual Fundamentals of Precalculus (Mark Dugopolski)
Solution manual Trigonometry (1st Ed., Mark Dugopolski)
Solution manual Trigonometry (2nd Ed., Mark Dugopolski)

Solution manual Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual Trigonometry (8th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry (9th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry : A Circular Function Approach (Marie Aratari)
Solution manual A Graphical Approach to Algebra and Trigonometry (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Algebra and Trigonometry (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Algebra and Trigonometry : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Algebra and Trigonometry (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Algebra and Trigonometry (3rd Ed., Beecher, Penna & Bittinger)
Solution manual College Algebra and Trigonometry (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry (4th Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry : A Unit Circle Approach (5th Ed., Mark Dugopolski)
Solution manual Algebra and Trigonometry with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Algebra and Trigonometry with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual College Algebra and Trigonometry (3rd Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra and Trigonometry (4th Ed., Lial, Hornsby & Schneider)
Solution manual A Graphical Approach to College Algebra (4th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual A Graphical Approach to College Algebra (5th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual College Algebra : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra (J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual College Algebra with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual Essentials of College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Essentials of College Algebra (Lial, Hornsby & Schneider)

Solution manual Essentials of College Algebra, Alternate Edition (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra (3rd Ed., Mark Dugopolski)
Solution manual College Algebra (4th Ed., Mark Dugopolski)
Solution manual College Algebra (5th Ed., Mark Dugopolski)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (1st Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (2nd Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra (2nd Ed., Judith Beecher, Judith Penna & Marvin Bittinger)
Solution manual College Algebra (9th Ed., Margaret Lial, John Hornsby & David Schneider)
Solution manual Essentials of Geometry for College Students (2nd Ed., Margaret Lial, Barbara Brown, Arnold Steffenson & L. Murphy Johnson)
Solution manual Algebra for College Students (5th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Elementary and Intermediate Algebra (1st Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory and Intermediate Algebra : A Combined Approach (2nd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra through Applications (2nd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Elementary and Intermediate Algebra (1st Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra : Concepts and

Applications (4th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Beginning and Intermediate Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Foundations of Mathematics (Marvin Bittinger & Judith Penna)
Solution manual Intermediate Algebra (9th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra (10th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra : Graphs & Models (3rd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra with Applications and Visualization (2nd Ed., Gary Rockswold & Terry Krieger)
Solution manual Intermediate Algebra (Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra: Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Beginning Algebra (10th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Prealgebra and Introductory Algebra (Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory Algebra (9th Ed., Marvin Bittinger)
Solution manual Introductory Algebra (10th Ed., Marvin Bittinger)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Margaret Lial, John Hornsby, Terry McGinnis & Diana Hestwood)
Solution manual Prealgebra and Introductory Algebra (3rd Ed., Margaret Lial, Diana Hestwood, John Hornsby & Terry McGinnis)
Solution manual Elementary Algebra with Early Systems of Equations (Tom Carson & Ellyn Gillespie)
Solution manual Elementary Algebra : Concepts and Applications (6th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra : Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (Richelle Blair)
Solution manual Introductory Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory Algebra (9th Ed., Margaret Lial, John

Hornsby & Terry McGinnis)
Solution manual Beginning Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Integrated Arithmetic and Basic Algebra (3rd Ed., Bill Jordan & William Palow)
Solution manual Introductory Algebra through Applications (Geoffrey Akst & Sadie Bragg)
Solution manual Prealgebra (3rd Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra (5th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Prealgebra (2nd Ed., Tom Carson)
Solution manual Basic Mathematics (9th Ed., Marvin Bittinger)
Solution manual Basic Mathematics (10th Ed., Marvin Bittinger)
Solution manual Basic Mathematics Preliminary Edition (Robert Prior)
Solution manual Basic Mathematics with Early Integers (Marvin Bittinger & Judith Penna)
Solution manual Basic College Mathematics (7th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic College Mathematics (8th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Fundamental Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Wave Motion (J. Billingham & A. C. King)
Solution manual Solving ODEs with MATLAB (L. F. Shampine, I. Gladwell & S. Thompson)
Solution manual Numerical Solution of Partial Differential Equations: An Introduction (2nd Ed., K. W. Morton & D. F. Mayers)
Solution manual Measure Theory and Filtering : Introduction and Applications (Lakhdar Aggoun & Robert J. Elliott)
Solution manual Mathematical Models in Biology : An Introduction (Elizabeth S. Allman & John A. Rhodes)
Solution manual Insurance Risk and Ruin (David C. M. Dickson)
Solution manual Data Analysis and Graphics Using R : An Example-based Approach (2nd Ed., John Maindonald & John Braun)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Convex Optimization (Stephen Boyd & Lieven Vandenberghe)
Solution manual Concrete Abstract Algebra : From Numbers to Gröbner Bases (Niels Lauritzen)
Solution manual A Concrete Approach to Abstract Algebra : From the Integers to the Insolvability of the Quintic (Jeffrey Bergen)
Solution manual Calculus : Concepts and Methods (Ken Binmore & Joan

Davies)
Solution manual An Introduction to Partial Differential Equations (Yehuda Pinchover & Jacob Rubinstein)
Solution manual An Introduction to Ordinary Differential Equations (James C. Robinson)
Solution manual An Introduction to Mathematical Physiology and Biology (2nd Ed., J. Mazumdar)
Solution manual An Introduction to Financial Option Valuation : Mathematics, Stochastics and Computation (Desmond Higham)
Solution manual An Interactive Introduction to Mathematical Analysis (Jonathan Lewin)
Solution manual An Introduction to Mathematical Finance: Options and Other Topics (1st Ed., Sheldon M. Ross)

- Physics & Astronomy :

Solution manual Introduction to Solid State Physics (8th Ed., Charles Kittel)
Solution manual Quantum Physics (3rd Ed., Stephen Gasiorowicz)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Fundamentals of Electromagnetics with Engineering Applications (Stuart M. Wentworth)
Solution manual Physics (7th Ed. by Paul E. Tippens)
Solution manual Physics (6th Ed., Cutnell & Johnson)
Solution manual Physics (7th Ed., Cutnell & Johnson)
Solution manual Physics (8th Ed., Cutnell & Johnson)
Solution manual Essentials of Physics (Cutnell & Johnson)
Solution manual Understanding Physics (1st Ed., Cummings, Laws, Redish & Cooney)
Solution manual Introductory Physics : Building Understanding (Jerold Touger)
Solution manual Physics Matters : An Introduction to Conceptual Physics (James Trefil & Robert Hazen)
Solution manual How Things Work : The Physics of Everyday Life (3rd Ed., Louis Bloomfield)
Solution manual An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
Solution manual Foundations of Astrophysics (Barbara Ryden & Bradley Peterson)
Solution manual Physics (5th Ed., Halliday, Resnick, Krane)
Solution manual Fundamentals of Physics (6th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (8th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (9th Ed., David Halliday,

Robert Resnick & Jearl Walker)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (3rd Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (4th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (5th Ed., Thomas Griffith)
Solution manual Physics of Everyday Phenomena : A Conceptual Introduction to Physics (6th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual Integrated Science (2nd Ed., Tillery et al.)
Solution manual Integrated Science (3rd Ed., Tillery et al.)
Solution manual Integrated Science (4th Ed., Tillery et al.)
Solution manual Physical Science (5th Ed., Tillery)
Solution manual Physical Science (6th Ed., Tillery)
Solution manual Physical Science (7th Ed., Tillery)
Solution manual Physical Science (8th Ed., Tillery)
Solution manual The Physical Universe (11th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual The Physical Universe (12th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual Physics of the Life Sciences (Jay Newman)
Solution manual Physics in Biology and Medicine (3rd Ed., Paul Davidovits)
Solution manual Optics (1st Ed., Ajoy Ghatak)
Solution manual Optics (4th Ed., Eugene Hecht)
Solution manual Nonlinear Optics (3rd Ed., Robert Boyd)
Solution manual Introduction to Optics (3rd Ed., Frank L Pedrotti, Leno M Pedrotti & Leno S Pedrotti)
Solution manual Principles of Physical Optics (Charles Bennett)
Solution manual Optics : Principles and Applications (Kailash Sharma)
Solution manual Continuum Electromechanics (James R. Melcher)
Solution manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution manual Matter and Interactions I : Modern Mechanics (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 1 : Modern Mechanics (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions II : Electric and Magnetic Interactions (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 2 : Electric and Magnetic Interactions (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution manual Introduction to Statistical Physics (Kerson Huang)
Solution manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution manual An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
Solution manual Equilibrium and Non-Equilibrium Statistical Thermodynamics (Michel Le Bellac, Fabrice Mortessagne & G. George

Batrouni)
Solution manual Elements of Statistical Mechanics: With an Introduction to Quantum Field Theory and Numerical Simulation (Ivo Sachs & Siddhartha Sen)
Solution manual Quantum Transport (2nd Ed., Supriyo Datta)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution manual Quantum Mechanics (Gennaro Auletta, Mauro Fortunato & Giorgio Parisi)
Solution manual Applied Quantum Mechanics (1st Ed., A. F. J. Levi)
Solution manual Applied Quantum Mechanics (2nd Ed., A. F. J. Levi)
Solution manual Fundamentals of Quantum Mechanics (C.L. Tang)
Solution manual Astronomy : A Physical Perspective (2nd Ed., Marc L. Kutner)
Solution manual Classical Mechanics (Douglas Gregory)
Solution manual Electromagnetic Field Theory Fundamentals (2nd Ed., Singh Guru & Hiziroglu)
Solution manual Special Relativity : From Einstein to Strings (P.M. Schwarz & J.H. Schwarz)
Solution manual Gravity : An Introduction to Einstein's General Relativity (James Hartle)
Solution manual A Short Course in General Relativity (James Foster & J. David Nightingale)
Solution manual Statistical Thermodynamics (Normand Laurendeau)
Solution manual Statistical Thermodynamics and Microscale Thermophysics (Van P. Carey)
Solution manual Thermal Physics (Ralph Baierlein)
Solution manual Topics in Atomic Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Foundations of Quantum Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Applied Physics (8th Ed., Dale Ewen, Ronald Nelson, Neill Schurter & Erik Gundersen)
Solution manual Applied Physics (9th Ed., Dale Ewen, Neill Schurter & Erik Gundersen)
Solution manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cassiday)
Solution manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution manual Diagnostic Ultrasound Imaging : Inside Out (Thomas Szabo)
Solution manual Astronomy : A Beginner's Guide to the Universe (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual The Cosmic Perspective (5th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (4th

Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual Astronomy Today (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual Astronomy Today (6th Ed., Eric Chaisson & Steve McMillan)
Solution manual Conceptual Physical Science (3rd Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Physical Science (4th Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Integrated Science (Paul G. Hewitt, Suzanne Lyons, John A. Suchocki & Jennifer Yeh)
Solution manual Physics : Concepts & Connections (4th Ed., Art Hobson)
Solution manual Conceptual Physics (10th Ed., Paul Hewitt)
Solution manual Conceptual Physics Fundamentals (Paul G. Hewitt)
Solution manual College Physics (6th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (7th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (8th Ed., Young & Geller)
Solution manual Modern Physics (2nd Ed., Randy Harris)
Solution manual Modern Physics for Scientists and Engineers (John Morrison)
Solution manual Solid State Physics : Essential Concepts (David Snoke)
Solution manual Physics with Mastering Physics (3rd Ed., James Walker)
Solution manual Physics with Mastering Physics (4th Ed., James Walker)
Solution manual Active Learning Guide (Alan Van Heuvelen & Eugenia Etkina)
Solution manual E&M TIPERs : Electricity & Magnetism Tasks (C. J. Hieggelke, D. P. Maloney, T. L. O'Kuma & Steve Kanim)
Solution manual Physics : Principles with Applications (6th Ed., Douglas C. Giancoli)
Solution manual Physlet® Physics : Interactive Illustrations, Explorations and Problems for Introductory Physics (Wolfgang Christian & Mario Belloni)
Solution manual University Physics with Modern Physics with Mastering Physics (11th Ed., Hugh Young & Roger Freedman)
Solution manual University Physics with Modern Physics with Mastering Physics (12th Ed., Hugh Young & Roger Freedman)
Solution manual Physics for Scientists and Engineers (3rd Ed., Douglas C. Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (3rd Ed., Douglas Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (4th Ed., Douglas Giancoli)

Solution manual Physlet® Quantum Physics : An Interactive Introduction (Mario Belloni, Wolfgang Christian & Anne Cox)
Solution manual Introduction to Electrodynamics (3rd Ed., David J. Griffiths)
Solution manual Introduction to Quantum Mechanics (2nd Ed., David Griffiths)
Solution manual Quantum Mechanics : An Accessible Introduction (Robert Scherrer)
Solution manual Modern Quantum Mechanics (J. J. Sakurai)
Solution manual The Physics of Sound (3rd Ed., Richard Berg & David Stork)
Solution manual Electromagnetism : Principles and Applications (1st Ed., Paul Lorrain, Dale R. Corson)
Solution manual Classical Electromagnetism (Jerrold Franklin)
Solution manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution manual An Introduction to Astrobiology (Iain Gilmour & Mark Sephton)
Solution manual An Introduction to Galaxies and Cosmology (Mark HJones & Robert Lambourne)
Solution manual An Introduction to the Solar System (Neil McBride & Iain Gilmour)
Solution manual Quantum Physics (Michel Le Bellac)
Solution manual Laser Fundamentals (2nd Ed., William T. Silfvast)
Solution manual Laser Electronics (3rd Ed., Joseph T. Verdeyen)
Solution manual Introductory Quantum Optics (Christopher Gerry & Peter Knight)
Solution manual Introduction to Plasma Physics: With Space and Laboratory Applications (D. A. Gurnett & A. Bhattacharjee)
Solution manual A Short Introduction to Quantum Information and Quantum Computation (Michel Le Bellac)
Solution manual A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
Solution manual A First Course in String Theory (Barton Zwiebach)
Solution manual A First Course in Computational Physics and Object-Oriented Programming with C++ (David Yevick)
Solution manual A Course in Modern Mathematical Physics : Groups, Hilbert Space and Differential Geometry (Peter Szekeres)
Solution manual Ultrasonic Nondestructive Evaluation Systems: Models and Measurements (Lester W. Schmerr & Sung-Jin Song)
Solution manual Explorations : Stars Galaxies and Planets (1st Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (2nd Ed., Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (3rd Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (4th Ed.

Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (5th Ed.
Updated, Thomas Arny)
Solution manual Astronomy : Journey to the Cosmic Frontier (3rd Ed.,
John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (4th Ed.,
John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (5th Ed.,
John D. Fix)
Solution manual Pathways to Astronomy with Starry Night Pro (Steven
Schneider & Thomas T Arny)
Solution manual From Molecules to Networks (2nd Ed., John Byrne &
James Roberts)
Solution manual Biotechnology (David Clark & Nanette Pazdernik)
Solution manual Light and Video Microscopy (Randy Wayne)

List of Solutions Manuals

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES & BHUTAN".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=VQJ2M78Y

I do not review the forums, just send me an email.

- Civil Engineering and Architecture :

Solution manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution manual Fundamentals of Structural Analysis (1st Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (2nd Ed., Leet & Uang)
Solution manual Fundamentals of Structural Analysis (3rd Ed., Leet & Uang)
Solution manual A Structures Primer (Harry F. Kaufman)
Solution manual Steel Design (4th Ed., William T. Segui)
Solution manual Structural and Stress Analysis (2nd Ed., Megson)
Solution manual Structural Steel Design ASD Method (4th Ed., Jack McCormac)
Solution manual Structural Steel Design (4th Ed., Jack McCormac)
Solution manual Structural Steel Design : A Practice Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Unified Design of Steel Structures (Louis Geschwindner)
Solution manual Steel Structures : Behavior and LRFD (1st Ed., Ramulu Vinnakota)

Solution manual The Engineering of Foundations (1st Ed., Rodrigo Salgado)
Solution manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins & Sanjeev Khanna)
Solution manual Analysis and Design of Shallow and Deep Foundations (Lymon Reese, William Isenhower & Shin-Tower Wang)
Solution manual Elementary Structures for Architects and Builders (5th Ed., Ronald Shaeffer)
Solution manual Statics and Strength of Materials for Architecture and Building Construction (3rd Ed., Onouye & Kane)
Solution manual Finite Element Techniques in Structural Mechanics (C. T. F. Ross)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual Adjustment Computations : Spatial Data Analysis (4th Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Surveying (5th Ed., Jack McCormac)
Solution manual Surveying with Construction Applications (6th Ed., Barry Kavanagh)
Solution manual Surveying with Construction Applications (7th Ed., Barry Kavanagh)
Solution manual Surveying : Principles and Applications (8th Ed., Barry Kavanagh)
Solution manual Surveying Fundamentals and Practices (6th Ed., Jerry Nathanson, Michael Lanzafama & Philip Kissam)
Solution manual Structural Analysis (5th Ed., Hibbeler)
Solution manual Structural Analysis (7th Ed., Hibbeler)
Solution manual Structural Analysis - SI Units (7th Ed., Hibbeler)
Solution manual Dynamics of Structures (3rd Ed., Chopra)
Solution manual Principles of Geotechnical Engineering (6th Ed., Braja M. Das)
Solution manual Geotechnical Engineering: Principles and Practices (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Geotechnical Engineering: Principles and Practices - International Version (2nd Ed., Donald P. Coduto, Man-chu Ronald Yeung & William A. Kitch)
Solution manual Fundamentals of Structural Stability (George Simitses & Dewey Hodges)
Solution manual Fundamentals of Structural Mechanics (2nd Ed., keith D. Hjelmstad)
Solution manual Fundamentals of Structural Dynamics (2nd Ed., Roy Craig & Andrew Kurdila)
Solution manual Design of Concrete Structures (13th Ed., Nilson, Darwin & Dolan)
Solution manual Design of Concrete Structures (14th Ed., Nilson,

Darwin & Dolan)
Solution manual Structures (6th Ed., Daniel Lewis Schodek & Martin Bechthold)
Solution manual Concrete Structures (Mehdi Setareh & Robert Darvas)
Solution manual Reinforced Concrete Design : A Practical Approach (Brzev & Pao)
Solution manual Reinforced Concrete : A Fundamental Approach (6th Ed., Edward Nawy)
Solution manual Reinforced Concrete Design (6th Ed., Chu-Kia Wang, Charles Salmon)
Solution manual Reinforced Concrete Design (7th Ed., Chu-Kia Wang, Charles Salmon & José Pincheira)
Solution manual Reinforced Concrete Design (6th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete Design (7th Ed., George Limbrunner & Abi Aghayere)
Solution manual Reinforced Concrete : Mechanics and Design (4th Ed., James MacGregor & James Wight)
Solution manual Reinforced Concrete : Mechanics and Design (5th Ed., James Wight & James MacGregor)
Solution manual Reinforced Concrete : Mechanics and Design - International Version (5th Ed., James Wight & James MacGregor)
Solution manual Structural Concrete : Theory and Design (3rd Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Structural Concrete : Theory and Design (4th Ed., M. Nadim Hassoun & Akthem Al-Manaseer)
Solution manual Design of Reinforced Concrete (6th Ed., Jack McCormac & James Nelson)
Solution manual Design of Reinforced Concrete (7th Ed., ACI 318-05 Code Edition, by Jack McCormac)
Solution manual Design of Reinforced Concrete (8th Ed., Jack McCormac & Russell Brown)
Solution manual Structural Analysis : Using Classical and Matrix Methods (3rd Ed., James Nelson, Jr., Jack McCormac)
Solution manual Structural Analysis : Using Classical and Matrix Methods (4th Ed., Jack McCormac)
Solution manual Pavement Design and Materials (A. T. Papagiannakis, E. A. Masad)
Solution manual Traffic Engineering (4th Ed., Roger P. Roess, Elena S. Prassas, William R. McShane)
Solution manual Principles of Highway Engineering and Traffic Analysis (3rd Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Principles of Highway Engineering and Traffic Analysis (4th Ed., Fred Mannering, Walter Kilareski & Scott Washburn)
Solution manual Highway Engineering (7th Ed., Paul Wright & Karen Dixon)
Solution manual Soil Mechanics : Concepts and Applications (2nd Ed., William Powrie)
Solution manual Unsaturated Soil Mechanics (Ning Lu & William Likos)
Solution manual Soil Mechanics and Foundations (2nd Ed., Muniram

Budhu)
Solution manual Soils and Foundations - SI Units (6th Ed., Liu & Evett)
Solution manual Soils and Foundations (7th Ed., Liu & Evett)
Solution manual Fundamentals of Soil Mechanics for Sedimentary and Residual Soils (Laurence Wesley)
Solution manual Essentials of Soil Mechanics and Foundations : Basic Geotechnics (7th Ed., David McCarthy)
Solution manual Foundations and Earth Retaining Structures (Muniram Budhu)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydraulic Control Systems (Noah Manring)
Solution manual Open Channel Hydraulics (A. Osman Akan)
Solution manual Open Channel Hydraulics (Terry Sturm)
Solution manual Open Channel Hydraulics (2nd Ed., Terry Sturm)
Solution manual Open-Channel Flow (2nd Ed., M. Hanif Chaudhry)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Transportation Engineering : An Introduction (3rd Ed., C. Jotin Khisty, B. Kent Lall)
Solution manual Introduction to Transportation Engineering (2nd Ed., Banks)
Solution manual Urban Transportation Planning (2nd Ed., Meyer & Miller)
Solution manual Transportation Engineering and Planning (3rd Ed., Papacostas & Prevedouros)
Solution manual Structural Wood Design : A Practice-Oriented Approach (Abi Aghayere & Jason Vigil)
Solution manual Simplified Design of Wood Structures (6th Ed., James Ambrose & Patrick Tripeny)
Solution manual Simplified Design of Steel Structures (8th Ed., James Ambrose & Patrick Tripeny)
Solution manual Materials and Components of Interior Architecture (7th Ed., J. Rosemary Riggs)
Solution manual Olin's Construction : Principles, Materials, and Methods (8th Ed., H. Leslie Simmons)
Solution manual Basic Construction Materials (8th Ed., Theodore Marotta, John C. Coffey, Cynthia LaFleur-Brown & Christine LaPlante)
Solution manual Fundamentals of Residential Construction (2nd Ed., Edward Allen & Rob Thallon)
Solution manual Fundamentals of Building Construction : Materials and Methods (4th Ed., Edward Allen & Joseph Iano)

Solution manual Fundamentals of Building Construction : Materials and Methods (5th Ed., Edward Allen & Joseph Iano)
Solution manual Composites for Construction : Structural Design with FRP Materials (Lawrence Bank)
Solution manual Building Construction : Principles, Materials, and Systems (Madan Mehta, Diane Armpriest & Walter Scarborough)
Solution manual Construction Contracts (2nd Ed., Jimmie Hinze)
Solution manual Sustainable Construction and Design (Regina Leffers)
Solution manual Global Engineering and Construction (J. K. Yates)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Materials for Civil and Construction Engineers (3rd Ed., Michael S. Mamlouk & John P. Zaniewski)
Solution manual Construction Management (3rd Ed., Daniel Halpin)
Solution manual Construction Management Fundamentals (1st Ed., Schexnayder & Mayo)
Solution manual Construction Management Fundamentals (2nd Ed., Knutson, Schexnayder, Fiori & Mayo)
Solution manual Construction Planning, Equipment, and Methods (6th Ed., Peurifoy & Schexnayder)
Solution manual Construction Planning, Equipment, and Methods (7th Ed., Peurifoy, Schexnayder & Shapira)
Solution manual Construction Planning, Equipment, and Methods (8th Ed., Peurifoy, Schexnayder, Shapira & Schmitt)
Solution manual Construction Methods and Management (7th Ed., Stephens Nunnally)
Solution manual Construction Methods and Management (8th Ed., Stephens Nunnally)
Solution manual Construction Project Administration (8th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Administration (9th Ed., Edward Fisk, Wayne Reynolds)
Solution manual Construction Project Management (3rd Ed., Gould & Joyce)
Solution manual The Management of Construction : A Project Lifecycle Approach (F. Lawrence Bennett)
Solution manual Construction Accounting and Financial Management (1st Ed., Steven Peterson)
Solution manual Construction Accounting and Financial Management (2nd Ed., Steven Peterson)
Solution manual Principles and Practices of Commercial Construction (8th Ed., Cameron K. Andres & R.C. Smith)
Solution manual Cost Analysis and Estimating for Engineering and Management (Phillip Ostwald & Timothy McLaren)
Solution manual Construction Estimating Using Excel (Stephen J. Peterson)
Solution manual Heating and Cooling of Buildings : Design for Efficiency (2nd Ed., Jan Kreider, Peter Curtiss & Ari Rabl)
Solution manual Heating, Cooling, Lighting : Sustainable Design Methods for Architects (3rd Ed., Norbert Lechner)
Solution manual Mechanical and Electrical Systems in Architecture,

Engineering and Construction (5th Ed., Frank R. Dagostino & Joseph B. Wujek)
Solution manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution manual Introduction to Naval Architecture : Formerly Muckle's Naval Architecture for Marine Engineers (4th Ed., E.C. Tupper)
Solution manual Architectural Drawing and Light Construction (8th Ed., Philip A. Grau, III & Edward J. Muller)
Solution manual NEW Autodesk Civil 3D : Procedures & Applications (Harry O. Ward)
Solution manual Structural Health Monitoring with Piezoelectric Wafer Active Sensors (Victor Giurgiutiu)
Solution manual Architecture Design Notebook (2nd Ed., Peter Fawcett)
Solution manual Civil Drafting Technology (7th Ed., David A. Madsen, Terence M. Shumaker & David P. Madsen)
Solution manual Introduction to Homeland Security (2nd Ed., Bullock & George Haddow)

- Environmental Engineering, Earth and Environmental Sciences :

Solution manual Principles of Environmental Engineering and Science (1st Ed., Mackenzie Davis & Susan Masten)
Solution manual Principles of Environmental Engineering and Science (2nd Ed., Mackenzie Davis & Susan Masten)
Solution manual Introduction to Environmental Engineering (Richard Mines & Laura Lackey)
Solution manual Introduction to Environmental Engineering (4th Ed., MacKenzie Davis & David Cornwell)
Solution manual Introduction to Environmental Engineering and Science (2nd Ed., Gilbert Masters)
Solution manual Introduction to Environmental Engineering and Science (3rd Ed., Gilbert Masters & Wendell Ela)
Solution manual Solar Energy Engineering (Soteris Kalogirou)
Solution manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution manual Energy Technology and Directions for the Future (Fanchi)
Solution manual Environmental Engineering : Fundamentals, Sustainability, Design (James Mihelcic, Julie Zimmerman)
Solution manual Environmental Engineering Science (Nazaroff & Alvarez - Cohen)
Solution manual Environmental Engineering (4th Ed., Ruth Weiner & Robin Matthews)
Solution manual Environmental Pollution and Control (4th Ed., Peirce,

Vesilind & Weiner)
Solution manual Introduction to Engineering and the Environment (1st Ed., Edward Rubin)
Solution manual Basic Environmental Technology : Water Supply, Waste Management & Pollution Control (5th Ed., Jerry Nathanson)
Solution manual Water and Wastewater Technology - SI Units (5th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Technology (6th Ed., Mark J. Hammer, Sr. & Mark Hammer, Jr.)
Solution manual Water and Wastewater Engineering (Mackenzie L. Davis)
Solution manual Water Supply and Pollution Control (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Supply and Pollution Control - International Version (8th Ed., Viessman Jr., Hammer, Perez & Chadik)
Solution manual Water Treatment : Principles and Design (2nd Ed., by MWH)
Solution manual Water Resources Engineering (Ralph A. Wurbs & Wesley P. James)
Solution manual Water Resources Engineering 2005 Edition (Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Larry W. Mays)
Solution manual Water Resources Engineering (2nd Ed., Chin)
Solution manual Water Chemistry (Benjamin)
Solution manual Plant Pathology (5th Ed., George Agrios)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Principles of Sequence Stratigraphy (Octavian Catuneanu)
Solution manual The Earth's Ionosphere : Plasma Physics & Electrodynamics (2nd Ed., Michael Kelley)
Solution manual Atmosphere, Ocean and Climate Dynamics : An Introductory Text (Marshall & Plumb)
Solution manual Atmospheric Science : An Introductory Survey (2nd Ed., John Wallace, Peter Hobbs)
Solution manual Environmental Issues : An Introduction to Sustainability (3rd Ed., McConnell & Abel)
Solution manual Environmental Science : Toward A Sustainable Future (10th Ed., Wright & Nebel)
Solution manual Hazard City : Assignments in Applied Geology (3rd Ed., King, Carpenter & Wilson)
Solution manual Introduction to Environmental Geology (4th ERd., Edward Keller)
Solution manual The Science of Grapevines : Anatomy and Physiology (Markus Keller)
Solution manual Geoenvironmental Engineering : Site Remediation, Waste Containment, and Emerging Waste Management Technologies (Hari Sharma & Krishna Reddy)
Solution manual Natural Hazards : Earth's Processes as Hazards, Disasters and Catastrophes (2nd Ed., Keller & Blodgett)
Solution manual Essentials of Oceanography (9th Ed., Trujillo &

Thurman)
Solution manual Exercises for Weather and Climate (6th Ed., Greg Carbone)
Solution manual Fundamentals of Ground Water (Franklin Schwartz & Hubao Zhang)
Solution manual Practical Problems in Groundwater Hydrology (Scott Bair & Terry Lahm)
Solution manual Groundwater Hydrology (3rd Ed., David Keith Todd & Larry Mays)
Solution manual Groundwater Science (Charles Fitts)
Solution manual Frozen Ground Engineering (2nd Ed., Orlando Andersland & Branko Ladanyi)
Solution manual Stormwater Management for Land Development : Methods and Calculations for Quantity Control (Thomas A. Seybert)
Solution manual Urban Hydrology, Hydraulics, and Stormwater Quality : Engineering Applications and Computer Modeling (A. Osman Akan & Houghtalen)
Solution manual Hydraulics in Civil and Environmental Engineering (4th Ed. Andrew Chadwick)
Solution manual Fundamentals of Hydraulic Engineering Systems (4th Ed., Robert Houghtalen, A. Osman Akan, Ned H. C. Hwang)
Solution manual Agriculture's Ethical Horizon (Robert Zimdahl)
Solution manual Environmental Contaminants : Assessment and Control (Daniel Vallero)
Solution manual A Problem-Solving Approach to Aquatic Chemistry (James Jensen)
Solution manual Hazardous Waste Management (2nd Ed., Michael LaGrega, Phillip Buckingham & Jeffrey Evans)
Solution manual Environmental Biotechnology : Principles and Applications (1st Ed., Bruce Rittmann & Perry McCarty)
Solution manual Chemistry for Environmental Engineering and Science (5th Ed., Clair Sawyer, Perry McCarty & Gene Parkin)
Solution manual Geology for Engineers and Environmental Scientists (3rd Ed., Alan Kehew)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Hydrology : Water Quantity and Quality Control (2nd Ed., Wanielista, Kersten & Eaglin)
Solution manual Hydrology and Floodplain Analysis (4th Ed., Philip Bedient, Wayne Huber & Baxter Vieux)
Solution manual Hydrology : An Introduction (Brutsaert)
Solution manual Applied Atmospheric Dynamics (Amanda H. Lynch & John J. Cassano)
Solution manual Mid-Latitude Atmospheric Dynamics : A First Course (Jonathan E. Martin)
Solution manual Adjustment Computations : Spatial Data Analysis (4th

Ed., Charles Ghilani & Paul Wolf)
Solution manual Adjustment Computations : Spatial Data Analysis (5th Ed., Charles Ghilani)
Solution manual Ecology (4th Ed., Manuel C. Molles)
Solution manual Industrial Ecology and Sustainable Engineering (T. E. Graedel & Braden R. Allenby)
Solution manual Principles of Environmental Science : Inquiry and Applications (4th Ed., Cunningham)
Solution manual Principles of Environmental Science : Inquiry and Applications (5th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (9th Ed., Cunningham)
Solution manual Environmental Science : A Global Concern (10th Ed., Cunningham)
Solution manual Essential Environmental Science (1st Ed., Edward Keller & Daniel Botkin)
Solution manual Environmental Science : Earth as a Living Planet (6th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet (7th Ed., Daniel Botkin & Edward Keller)
Solution manual Environmental Science : Earth as a Living Planet, Canadian Edition (Daniel Botkin & Edward Keller & Isobel Heathcote)
Solution manual Introduction to Marine Biogeochemistry (2nd Ed., Susan Libes)
Solution manual Farm Management (5th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Farm Management (6th Ed., Ronald Kay, William Edwards & Patricia Duffy)
Solution manual Environmental Geology (6th Ed., Carla Montgomery)
Solution manual Environmental Geology (7th Ed., Carla Montgomery)
Solution manual Environmental Geology (8th Ed., Carla Montgomery)
Solution manual Natural Disasters (4th Ed., Patrick Abbott)
Solution manual Natural Disasters (5th Ed., Patrick Abbott)
Solution manual Natural Disasters (6th Ed., Patrick Abbott)
Solution manual Geography Information Systems (2nd Ed., Kang-tsung Chang)
Solution manual Meteorology (2nd Ed., Danielson et al.)
Solution manual Fundamentals of Oceanography (4th Ed., Duxbury, Sverdrup)
Solution manual Fundamentals of Oceanography (5th Ed., Duxbury, Sverdrup)
Solution manual Introduction to Geography (8th Ed., Getis et al.)
Solution manual Introduction to Geography (9th Ed., Getis et al.)
Solution manual Introduction to Geography (10th Ed., Getis et al.)
Solution manual Introduction to Geography (11th Ed., Getis et al.)
Solution manual Physical Geology : The Earth Revealed (4th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology : The Earth Revealed (6th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology : Earth Revealed (7th Ed., Plummer,

McGeary & Carlson)
Solution manual Physical Geology (9th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (10th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (11th Ed., Plummer, McGeary & Carlson)
Solution manual Physical Geology (12th Ed., Plummer, McGeary & Carlson)
Solution manual Exploring the World Ocean (W. Sean Chamberlin & Tommy Dickey)
Solution manual Mastering ArcGIS (3rd Ed., Maribeth Price)
Solution manual Mastering ArcGIS (4th Ed., Maribeth Price)
Solution manual An Introduction to the World's Oceans (7th Ed., Sverdrup et al.)
Solution manual An Introduction to the Worlds Oceans (8th Ed., Sverdrup et al.)
Solution manual An Introduction to the Worlds Oceans (9th Ed., Sverdrup & Armbrust)
Solution manual An Introduction to the Worlds Oceans (10th Ed., Sverdrup & Armbrust)
Solution manual Laboratory Studies in Earth History (8th Ed., Brice et al.)
Solution manual Laboratory Studies in Earth History (9th Ed., Brice et al.)
Solution manual Exploring Geology (1st Ed., Reynolds et al.)
Solution manual Manual of Mineral Science (23rd Ed., Cornelis Klein & Barbara Dutrow)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Earth Science : Understanding Environmental Systems (Edgar Spencer)
Solution manual Fundamentals of Weed Science (3rd Ed., Robert Zimdahl)
Solution manual Field and Laboratory Exercises in Animal Behavior (Tillberg, Breed & Hinners)
Solution manual Soils : An Introduction (6th Ed., Michael Singer & Donald Munns)
Solution manual Soils, Land, and Life (Stan Buol)
Solution manual Soils in Our Environment (10th Ed., Raymond Miller & Duane Gardiner)
Solution manual Soils in Our Environment (11th Ed., Raymond Miller & Duane Gardiner)
Solution manual Soil Microbiology, Ecology and Biochemistry (3rd Ed., Eldor Paul)
Solution manual Soil in the Environment : Crucible of Terrestrial Life (Daniel Hillel)
Solution manual Design Analysis in Rock Mechanics (William G. Pariseau)
Solution manual Forest Management and Planning (Bettinger, Boston, Siry & Grebner)
Solution manual Agricultural Systems : Agroecology and Rural

Innovation for Development (Sieglinde Snapp & Barry Pound)
Solution manual Plant Systematics (Michael Simpson)
Solution manual The Nature and Properties of Soils (14th Ed., Nyle Brady & Raymond Weil)
Solution manual Elements of the Nature and Properties of Soils (2nd Ed., Nyle Brady & Ray Weil)
Solution manual Materials and the Environment : Eco-informed Material Choice (Michael Ashby)

- Chemistry and Chemical Engineering :

Solution manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution manual Principles and Modern Applications of Mass Transfer Operations (Jaime Benitez)
Solution manual Diffusion : Mass Transfer in Fluid Systems (2nd Ed., Cussler)
Solution manual Separation Process Principles (1st Ed, Seader & Henley)
Solution manual Separation Process Principles (2nd Ed, Seader & Henley)
Solution manual Analysis, Synthesis and Design of Chemical Processes (3rd Ed., Turton, Bailie, Whiting & Shaeiwitz)
Solution manual Principles of Chemical Separations with Environmental Applications (Richard D. Noble)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Evaluation (2nd Ed., Seider, Seader & Lewin)
Solution manual Product and Process Design Principles : Synthesis, Analysis, and Design (3rd Ed., Seider, Seader, Lewin & Widagdo)
Solution manual Principles and Practices of Automatic Process Control (3rd Ed., Smith & Corripio)
Solution manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution manual Process Dynamics and Control (2nd Ed., Seborg, Edgard & Mellichamp)
Solution manual Process Dynamics and Control (3rd Ed., Seborg, Edgard, Mellichamp & Doyle)
Solution manual Process Control : A First Course with MATLAB (P.C. Chau)
Solution manual Plant Design and Economics for Chemical Engineers (5th Ed., Peters & Timmerhaus)
Solution manual Basic Principles and Calculations in Chemical Engineering (7th Ed., Himmelblau)
Solution manual Unit Operations of Chemical Engineering (6th Ed., McCabe & Smith)
Solution manual Unit Operations of Chemical Engineering (7th Ed., McCabe & Smith)
Solution manual Transport Phenomena in Biological Systems (1st Ed., George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena in Biological Systems (2nd Ed.,

George Truskey, Fan Yuan & David Katz)
Solution manual Transport Phenomena : A Unified Aprroach (Robert S. Brodkey & Harry C. Hershey)
Solution manual Modeling in Transport Phenomena : A Conceptual Approach (2nd Ed., Ismail Tosun)
Solution manual Transport Phenomena (2nd Ed., Bird & Stewart)
Solution manual Solutions to Class 1&2 - Transport Phenomena (Bird)
Solution manual Chemical Engineering Design (Gavin Towler)
Solution manual Chemical Engineering Design (Coulson & Richardson's Chemical Engineering - Volume 6) - (4th Ed., Sinnott)
Solution manual Chemical Engineering Design - SI Edition (5th Ed., Sinnott & Towler)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Chemical Engineering Design and Analysis : An Introduction (Duncan & Reimer)
Solution manual Introduction to Chemical Reactor Analysis (R.E. Hayes)
Solution manual Kinetics of Catalytic Reactions (Albert Vannice)
Solution manual An Introduction to Chemical Engineering Kinetics and Reactor Design (Charles G. Hill)
Solution manual Chemical Reactions and Chemical Reactors (George W. Roberts)
Solution manual Chemical Reaction Engineering (3rd Ed., Levenspiel)
Solution manual Fundamentals of Chemical Reaction Engineering (1st Ed., Davis)
Solution manual Conceptual Design of Distillation Systems (1st Ed., Doherty & Malone)
Solution manual Fluid Mechanics for Chemical Engineers (3rd Ed., Noel de Nevers)
Solution manual Introduction to Chemical Processes : Principles, Analysis, Synthesis (1st Ed., Regina M. Murphy)
Solution manual Optimization of Chemical Processes (2nd Ed., Edgar & Himmelblau)
Solution manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)
Solution manual Chemical and Engineering Thermodynamics (3rd Ed., Stanley I. Sandler)
Solution manual Chemical, Biochemical, and Engineering Thermodynamics (4th Ed., Stanley I. Sandler)
Solution manual Introduction to Chemical Engineering Thermodynamics (6th Ed., Smith & Van Ness)
Solution manual Introduction to Chemical Engineering Thermodynamics (7th Ed., Smith & Van Ness)
Solution manual Engineering and Chemical Thermodynamics (Koretsky)
Solution manual Introduction to Chemical Principles (9th Ed., Stephen Stoker)
Solution manual Basic Chemistry (2nd Ed., K. Timberlake & W. Timberlake)

Solution manual Phase Equilibria, Phase Diagrams and Phase Transformations : Their Thermodynamic Basis (2nd Ed., Mats Hillert)
Solution manual Principles of Chemical Kinetics (2nd Ed., James House)
Solution manual Elementary Principles of Chemical Processes (3rd Ed., Felder & Rousseau)
Solution manual Elements of Chemical Reaction Engineering (3rd Ed., Fogler)
Solution manual Principles Of Polymer Systems (5th Ed., by Ferdinand Rodriguez, Claude Cohen, Christopher Ober, Lynden Archer)
Solution manual Group Theory with Applications in Chemical Physics (Patrick Jacobs)
Solution manual Food Analysis (3rd Ed., Suzanne Nielsen)
Solution manual Introduction to Physical Chemistry (3rd Ed., Ladd)
Solution manual General Chemistry: Principles and Modern Applications (10th Ed., Ralph H. Petrucci, F. Geoffrey Herring, Jeffry D. Madura, Carey Bissonnette)
Solution manual Virtual ChemLab : General Chemistry Student Lab Manual / Workbook, v2.5, 3rd Ed. (Brian Woodfield & Matthew Asplund)
Solution manual Introductory Chemistry (2nd Ed., Nivaldo J. Tro)
Solution manual Introductory Chemistry (3rd Ed., Nivaldo J. Tro)
Solution manual Conceptual Integrated Science (Hewitt, Lyons, Suchocki & Yeh)
Solution manual Introductory Chemistry: Concepts and Connections (4th Ed., Charles Corwin)
Solution manual Prentice Hall Lab Manual Introductory Chemistry (4th Ed., Charles Corwin)
Solution manual Modern Organic Synthesis : An Introduction (George S. Zweifel, Michael H. Nantz)
Solution manual General, Organic and Biological Chemistry : Structures of Life (2nd Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (9th Ed., Karen Timberlake)
Solution manual Chemistry : An Introduction to General, Organic, and Biological Chemistry (10th Ed., Karen Timberlake)
Solution manual Conceptual Chemistry (3rd Ed., John A. Suchocki)
Solution manual Explorations in Conceptual Chemistry : A Student Activity Manual (Jeffrey Paradis)
Solution manual Criminalistics : An Introduction to Forensic Science (9th Ed., Richard Saferstein)
Solution manual Physical Chemistry (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry for the Life Sciences (Engel, Drobny & Reid)
Solution manual Quantum Chemistry and Spectroscopy with Spartan Student Physical Chemistry Software (Thomas Engel & Philip Reid)
Solution manual Themodynamics, Statistical Thermodynamics, and Kinetics (Thomas Engel & Philip Reid)
Solution manual Physical Chemistry (7th. Ed., Peter Atkins & Julio de Paula)
Solution manual Physical Chemistry (2nd Ed., Robert Mortimer)
Solution manual Physical Chemistry (3rd Ed., Robert Mortimer)

Solution manual Chemistry (4th Ed., Olmsted & Williams)
Solution manual Chemistry : Structure and Dynamics (3rd Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry : Structure and Dynamics (4th Ed., Spencer, Bodner & Rickard)
Solution manual Chemistry (3rd Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual Chemistry (4th Ed., Catherine E. Housecroft & Edwin Constable)
Solution manual General Chemistry : The Essential Concepts (4th Ed., Raymond Chang)
Solution manual Principles of General Chemistry (2nd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (3rd Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (4th Ed., Martin Silberberg)
Solution manual Chemistry : The Molecular Nature of Matter and Change (5th Ed., Martin Silberberg)
Solution manual General, Organic and Biochemistry (3rd ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (4th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (5th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual General, Organic and Biochemistry (6th ed., Katherine Denniston, Joseph Topping & Robert Caret)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (8th Ed., Hein, Peisen, Ritchey, Pattison & Arena)
Solution manual Introduction to General, Organic and Biochemistry in the Laboratory: Laboratory Manual (9th Ed., Hein, Pattison, Arena & Best)
Solution manual Introduction to General, Organic and Biochemistry (8th Ed., Hein, Best, Pattison & Arena)
Solution manual Introduction to General, Organic and Biochemistry (9th Ed., Hein, Pattison, Arena & Best)
Solution manual General, Organic and Biological Chemistry : An Integrated Approach, Laboratory Experiments (Macaulay, Bauer & Bloomfield)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (1st Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (2nd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : An Integrated Approach (3rd Ed., Kenneth W. Raymond)
Solution manual General, Organic, and Biological Chemistry : A Guided Inquiry (Michael Garoutte)
Solution manual Biophysical Chemistry (James P. Allen)
Solution manual Fundamentals of Chemistry (3rd Ed., David Goldberg)

Solution manual Fundamentals of Chemistry (4th Ed., David Goldberg)
Solution manual Fundamentals of Chemistry (5th Ed., David Goldberg)
Solution manual Chemistry : A Guided Inquiry (4th Ed., Richard Moog & John Farrell)
Solution manual Chemistry : Matter and Its Changes (4th Ed., Brady & Senese)
Solution manual Chemistry : The Study of Matter and Its Changes (5th Ed., Brady & Senese)
Solution manual Chemistry : An Everyday Approach to Chemical Investigation (Sally Solomon, Susan Rutkowsky & Charles Boritz)
Solution manual Organic Chemistry (8th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (9th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Organic Chemistry (10th Ed., T. W. Graham Solomons & Craig B. Fryhle)
Solution manual Advanced Organic Chemistry Part A : Structure and Mechanisms (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Advanced Organic Chemistry Part B : Reaction and Synthesis (5th Ed., Francis Carey & Richard Sundberg)
Solution manual Modern Analytical Chemistry (Harvey)
Solution manual General Chemistry Lab Manual (Petra A. M. van Koppen)
Solution manual Organic Structure Determination Using 2-D NMR Spectroscopy : A Problem-Based Approach (Jeffrey Simpson)
Solution manual Practical Interfacing in the Laboratory : Using a PC for Instrumentation, Data Analysis and Control (Stephen E. Derenzo)
Solution manual Bioprocess Engineering Principles (Pauline M. Doran)
Solution manual Isotopes : Principles and Applications (3rd Ed., Gunter Faure & Teresa Mensing)
Solution manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution manual Chemistry Case Studies for Allied Health (Colleen Kelley & Wendy Weeks)
Solution manual The Extraordinary Chemistry of Ordinary Things (4th Ed., Carl Snyder)
Solution manual The Art and Science of Chemical Analysis (Christie Enke)
Solution manual Spectrometric Identification of Organic Compounds (7th Ed., Robert Silverstein, Francis Webster, David Kiemle)
Solution manual Bioinstrumentation (John G. Webster)
Solution manual Medical Instrumentation Application and Design (4th Ed., John G. Webster)
Solution manual Microscale General Chemistry Laboratory : with Selected Macroscale Experiments (2nd Ed., Zvi Szafran, Ronald Pike, Judith Foster)
Solution manual Microscale Organic Laboratory : with Multistep and Multiscale Syntheses (4th Ed., Dana Mayo, Ronald Pike, Peter Trumper)
Solution manual Laboratory Manual for Principles of General Chemistry (8th Ed., Jo Allan Beran)

- Industrial Engineering, Business, Economics and Finance :

Solution manual Basics of Engineering Economy (1st Ed., Leland T Blank & Anthony Tarquin)
Solution manual Engineering Economy (5th Ed., Leland T Blank & Anthony Tarquin)
Solution manual Engineering Economy (6th Ed., Leland T Blank & Anthony Tarquin)
Solution manual Contemporary Engineering Economics (4th Ed., Chan Park)
Solution manual Contemporary Engineering Economics (5th Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics (2nd Ed., Chan Park)
Solution manual Fundamentals of Engineering Economics : International Version (2nd Ed., Chan Park)
Solution manual Engineering Economy (13th Ed, Sullivan, Wicks & Luxhoj)
Solution manual Engineering Economy (14th Ed, Sullivan, Wicks & Koelling)
Solution manual Engineering Economics : International Version (14th Ed., Sullivan, Wicks & Koelling)
Solution manual Recursive Methods in Economic Dynamics (C. Irigoyen)
Solution manual Engineering Design (Rudolph J. Eggert)
Solution manual Engineering Design : A Project-Based Introduction (2nd Ed., Clive L. Dym & Patrick Little)
Solution manual Engineering Design : A Project-Based Introduction (3rd Ed., Clive L. Dym & Patrick Little)
Solution manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Freuler, Kinzel & Fromm)
Solution manual Introduction to Statistical Quality Control (5th Ed., Douglas C. Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Douglas C. Montgomery)
Solution manual An Introduction to Investment Banks, Hedge Funds, and Private Equity : The New Paradigm (David Stowell)
Solution manual Financial and Economic Analysis for Engineering and Technology Management (2nd Ed., Henry E. Riggs)
Solution manual Introduction to Operations Research (7th Ed., Hillier and Lieberman)
Solution manual Introduction to Operations Research (8th Ed., Hillier and Lieberman)
Solution manual Introduction to Operations Research (9th Ed., Hillier and Lieberman)
Solution manual Methods, Standards, and Work Design (11th Ed., Niebel & Freivalds)
Solution manual Niebel's Methods, Standards and Work Design (12th Ed., Freivalds & Niebel)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)

Solution manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution manual Quality Control (8th Ed., Dale Besterfield)
Solution manual Introduction to Optimum Design (2nd Ed., Jasbir Arora)
Solution manual Numerical Optimization (2nd Ed., Jorge Nocedal & Stephen Wright)
Solution manual Optimization : Foundations and Applications (Ronald E. Miller)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution manual Quantitative Methods For Management (William E. Pinney, Donald B. McWilliams, Joe Ormsby, Mark Atchison)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Managing Engineering and Technology (4th, Morse & Babcock)
Solution manual Managing Engineering and Technology (5th, Morse & Babcock)
Solution manual Quality Planning and Analysis : From Product Development through Use (4th Ed., Gryna)
Solution manual Juran's Quality Planning and Analysis for Enterprise Quality (5th Ed., Gryna, Chua & DeFeo)
Solution manual Quality (4th Ed., Summers)
Solution manual Quality (5th Ed., Summers)
Solution manual Quality Management (2nd Ed., Summers)
Solution manual Quality Management (5th Ed., Goetsch & Davis)
Solution manual Quality Management for Organizational Excellence : Introduction to Total Quality (6th Ed., David Goetsch & Stanley Davis)
Solution manual Applied Econometric Time Series (2nd Ed., Walter Enders)
Solution manual Applied Econometric Time Series (3rd Ed., Walter Enders)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Econometric Analysis (5th Ed., William H. Greene)
Solution manual Econometric Analysis (6th Ed., William H. Greene)
Solution manual Management : A Practical Introduction (4th Ed., Angelo Kinicki & Brian Williams)
Solution manual Forest Management and Planning (Pete Bettinger, Kevin Boston, Jacek Siry & Donald Grebner)

Solution manual Foundations of Multinational Financial Management (5th Ed., Shapiro)
Solution manual Foundations of Multinational Financial Management (6th Ed., Shapiro & Sarin)
Solution manual Multinational Financial Management (8th Ed., Shapiro)
Solution manual Multinational Financial Management (9th Ed., Shapiro)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Modern Portfolio Theory and Investment Analysis (7th Ed., Elton, Gruber, Brown & Goetzmann)
Solution manual Modern Portfolio Theory and Investment Analysis (8th Ed., Elton, Gruber, Brown & Goetzmann)
Solution manual Accounting : What the Numbers Mean (6th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (7th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (8th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Accounting : What the Numbers Mean (9th Ed., David Marshall, Wayne McManus, Dan Viele)
Solution manual Global Accounting and Control : A Managerial Emphasis (Gray, Salter, Radebaugh)
Solution manual International Accounting and Multinational Enterprises (6th Ed., Radebaugh, Gray, Black)
Solution manual Quality : A Corporate Force, Managing for Excellence (C. Harold Aikens)
Solution manual Quality Inspired Management : The Key to Sustainability (C. Harold Aikens)
Solution manual Value Driven Product Planning and Systems Engineering (H. E. Cook & L. A. Wissmann)
Solution manual Work Systems : The Methods, Measurement & Management of Work (Mikell Groover)
Solution manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution manual Occupational Safety and Health for Technologists, Engineers, and Managers (5th Ed., Goetsch)
Solution manual Occupational Safety and Health for Technologists, Engineers, and Managers (6th Ed., Goetsch)
Solution manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Fundamentals of Forensic Science (Max Houck & Jay Siegel)
Solution Manual Project Management for Business and Engineering : Principles and Practice (2nd Ed., John Nicholas)
Solution Manual Project Management for Business and Engineering : Principles and Practice (3rd Ed., John Nicholas)

Solution Manual CIMA Official Learning System Integrated Management (4th Ed., Ann Norton)
Solution Manual CIMA Official Learning System Enterprise Management (6th Ed., Ann Norton & Jenny Hughes)
Solution Manual CIMA Official Learning System Financial Operations (6th Ed., Jo Watkins)
Solution Manual CIMA Official Learning System Financial Management (6th Ed., Luisa Robertson)
Solution Manual CIMA Official Learning System Enterprise Strategy (6th Ed., Neil Botten)
Solution Manual CIMA Official Learning System Fundamentals of Business Maths (4th Ed., Graham Eaton)
Solution Manual CIMA Official Learning System Financial Analysis (4th Ed., Catherine Gowthorpe)
Solution Manual CIMA Official Learning System Fundamentals of Financial Accounting (2nd Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Fundamentals of Financial Accounting (6th Ed., Henry Lunt)
Solution Manual CIMA Official Learning System Performance Management (6th Ed., Jo Avis)
Solution Manual CIMA Official Learning System Fundamentals of Management Accounting (2nd Ed., Janet Walker)
Solution Manual CIMA Official Learning System Management Accounting Financial Strategy (4th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Financial Strategy (6th Ed., John Ogilvie)
Solution Manual CIMA Official Learning System Organisational Management and Information Systems (4th Ed., Bob Perry)
Solution Manual CIMA Learning System Enterprise Operations (Bob Perry)
Solution Manual CIMA Learning System Management Accounting - Performance Evaluation (4th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System - Performance Operations (6th Ed., Robert Scarlett)
Solution Manual CIMA Official Learning System Fundamentals of Business Economics (2nd Ed., Steve Adams & Paul Periton)
Solution Manual Operations Management in Context (2nd Ed., Rowbotham, Azhashemi & Galloway)
Solution Manual Accounting for Business Studies (Aneirin Sion Owen)
Solution Manual ISO 9001 : 2000 Quality Registration Step-by-Step (3rd Ed., Fred Dobb)
Solution Manual Systems for Planning and Control in Manufacturing (D. K. Harrison & D. J. Petty)
Solution Manual Facilities Planning (3rd Ed., Tompkins, White, Bozer & Tanchoco)
Solution Manual Facilities Planning (4th Ed., Tompkins)
Solution Manual Facilities Planning and Design (Alberto Garcia-Diaz & J. MacGregor Smith)
Solution Manual Planning and Control of Manufacturing Operations (John Kenworthy)
Solution Manual Professionalism: Real Skills for Workplace Success

(Anderson & Bolt)
Solution Manual Customer Service : Career Success Through Customer Loyalty (4th Ed., Timm)
Solution Manual Customer Service : A Practical Approach (3rd Ed., Harris)
Solution Manual Customer Service : A Practical Approach (4th Ed., Harris)
Solution Manual Serving Internal and External Customers (Anne Swartzlander)
Solution Manual The Theory of Interest (3rd Ed., Stephen G. Kellison)
Solution Manual Customer Relationship Management : The Bottom Line to Optimizing Your ROI (Anton & Petouhoff)
Solution Manual Engineering Economy and the Decision-Making Process (Joseph C. Hartman)
Solution Manual Engineering Management : Challenges in the New Millennium (C. M. Chang)
Solution Manual Cost Analysis and Estimating for Engineering and Management (Phillip F. Ostwald & Timothy S. McLaren)
Solution Manual Supply Chain Management (3rd Ed., Sunil Chopra & Peter Meindl)
Solution Manual Supply Chain Management (4th Ed., Sunil Chopra & Peter Meindl)
Solution Manual Supply Chain Management : From Vision to Implementation (Stanley E. Fawcett, Lisa M. Ellram, Jeffrey A. Ogden)
Solution Manual Industrial Safety and Health Management (5th Ed., C. Ray Asfahl)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Jon S. Stenerson & Kelly Curran)
Solution Manual Introduction to Management Science (8th Ed., Bernard W. Taylor)
Solution Manual Introduction to Management Science (9th Ed., Bernard W. Taylor)
Solution Manual Introduction to Management Science (10th Ed., Bernard W. Taylor)
Solution Manual Operations Research : An Introduction (8th Ed., Taha)
Solution Manual Decision Support Systems and Intelligent Systems (7th Ed., Turban, Aronson, Ting-Peng Liang)
Solution Manual Decision Support and Business Intelligence Systems (8th Ed., Turban, Aronson, Ting-Peng Liang & Sharda)
Solution Manual Introduction to Information Systems : Canadian Edition (Rainer, Turban, Splettstoesser-Hogeterp, Sanchez-Rodriguez)
Solution Manual Introduction to Information Systems : Supporting and Transforming Business (1st Ed., Rainer, Turban, Potter)
Solution Manual Introduction to Information Systems : Supporting and Transforming Business (2nd Ed., Rainer, Turban)
Solution Manual Information Technology for Management : Transforming Organizations in the Digital Economy (5th Ed., Turban, Leidner, McLean, Wetherbe)
Solution Manual Information Technology for Management : Transforming Organizations in the Digital Economy (6th Ed., Turban, Leidner,

McLean, Wetherbe)
Solution Manual Information Technology for Management : Improving Performance in the Digital Economy (7th Ed., Turban & Volonino)
Solution Manual Operations Management (7th Ed., Krajewski, Ritzman)
Solution Manual Operations Management : Process and Value Chains (8th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management : Process and Supply Chains - Global Edition (9th Ed., Krajewski, Ritzman & Malhotra)
Solution Manual Operations Management (8th Ed., Jay Heizer & Render)
Solution Manual Operations Management (9th Ed., Jay Heizer & Render)
Solution Manual Operations Management (10th Ed., Jay Heizer & Render)
Solution Manual Introduction to Operations and Supply Chain Management with Advanced Decision Support Tools (1st Ed., Cecil Bozarth)
Solution Manual Introduction to Operations and Supply Chain Management (2nd Ed., Cecil Bozarth, Robert B. Handfield)
Solution Manual Managing Business Process Flows : Principles of Operations Management (2nd Ed., Anupind, Chopra, Deshmukh, et al)
Solution Manual Principles Of Operations Management (6th Ed., Heizer & Render)
Solution Manual Principles Of Operations Management (7th Ed., Heizer & Render)
Solution Manual Principles Of Operations Management (8th Ed., Heizer & Render)
Solution Manual Foundations of Operations Management (Ritzman & Krajewski)
Solution Manual Foundations of Operations Management - Canadian Edition (2nd Ed., Ritzman, Krajewski, Malhotra & Klassen)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (16th Ed., Perreault, Cannon & McCarthy)
Solution Manual Basic Marketing : A Marketing Strategy Planning Approach (17th Ed., Perreault, Cannon & McCarthy)
Solution Manual Foundations of Financial Management (11th Ed., Block & Hirt)
Solution Manual Foundations of Financial Management (12th Ed., Block & Hirt)
Solution Manual Foundations of Financial Management (13th Ed., Block, Hirt & Danielsen)
Solution Manual Decision Modeling with Microsoft® Excel (6th Ed., Moore & Weatherford)
Solution Manual Managing Quality : Integrating The Supply Chain (3rd Ed., S. Thomas Foster)
Solution Manual Six Sigma : Basic Tools and Techniques (Donna C.S. Summers)
Solution Manual A First Course in Quality Engineering (KS Krishnamoorthi)
Solution Manual Statistical Quality Design and Control (2nd Ed., DeVor, Chang & Sutherland)
Solution Manual Economics : A Tool for Critically Understanding

Society (7th Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Economics : A Tool for Critically Understanding Society (8th Ed., Riddell, Shackelford, Stamos & Schneider)
Solution Manual Introduction to Economic Reasoning (6th Ed., William D. Rohlf, Jr.)
Solution Manual Introduction to Economic Reasoning (7th Ed., William D. Rohlf, Jr.)
Solution Manual Economics (9th Ed., Michael Parkin)
Solution Manual Essential Foundations of Economics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Essential Foundations of Economics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Understanding Modern Economics (Roger LeRoy Miller)
Solution Manual The Economics of Macro Issues (3rd Ed., Roger LeRoy Miller & Daniel K. Benjamin)
Solution Manual Foundations of Economics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Economics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual International Economics (8th Ed., Dominick Salvatore)
Solution Manual International Economics (9th Ed., Dominick Salvatore)
Solution Manual International Economics (10th Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (1st Ed., Dominick Salvatore)
Solution Manual Introduction to International Economics (2nd Ed., Dominick Salvatore)
Solution Manual Economics Today (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View - Canadian Edition (4th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Macro View (15th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View - Canadian Edition (4th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (13th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (14th Ed., Roger LeRoy Miller)
Solution Manual Economics Today : The Micro View (15th Ed., Roger LeRoy Miller)
Solution Manual Economics (Michael A. Leeds, Peter von Allmen & Richard C. Schiming)
Solution Manual Economics : Private Markets and Public Choice (7th Ed., Ekelund, Jr., Ressler & Tollison)
Solution Manual Principles of Economics, 7th Ed. (Roy J. Ruffin & Paul

R. Gregory)
Solution Manual The Economics of Public Issues (14th Ed., Miller, Benjamin & North)
Solution Manual The Economics of Public Issues (15th Ed., Miller, Benjamin & North)
Solution Manual Macroeconomics (7th Ed., Michael Parkin)
Solution Manual Macroeconomics (8th Ed., Michael Parkin)
Solution Manual Macroeconomics (9th Ed., Michael Parkin)
Solution Manual Foundations of Microeconomics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Microeconomics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Macroeconomics (3rd Ed., Robin Bade & Michael Parkin)
Solution Manual Foundations of Macroeconomics (4th Ed., Robin Bade & Michael Parkin)
Solution Manual Microeconomic Theory (Andreu Mas-Colell, Michael D. Whinston, Jerry R. Green)
Solution Manual Microeconomics MyEconLab Homework Edition (Leeds, von Allmen & Schiming)
Solution Manual Macroeconomics MyEconLab Homework Edition (Leeds, von Allmen & Schiming)
Solution Manual Microeconomics (7th Ed., Michael Parkin)
Solution Manual Microeconomics (8th Ed., Michael Parkin)
Solution Manual Microeconomics (9th Ed., Michael Parkin)
Solution Manual Microeconomics (6th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Microeconomics (7th Ed., Robert Pindyck & Daniel Rubinfeld)
Solution Manual Macroeconomics (2nd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics (3rd Ed., Stephen D. Williamson)
Solution Manual Macroeconomics Update Edition (5th Ed., Andrew B. Abel, Ben S. Bernanke)
Solution Manual Macroeconomics (6th Ed., Andrew B. Abel, Ben S. Bernanke & Dean Croushore)
Solution Manual Macroeconomics (10th Ed., Robert J. Gordon)
Solution Manual Macroeconomics (11th Ed., Robert J. Gordon)
Solution Manual Macroeconomics - Canadian Edition (3rd Ed., Olivier Blanchard & David R. Johnson)
Solution Manual Macroeconomics (4th Ed., Olivier Blanchard)
Solution Manual Macroeconomics - Canadian Edition (4th Ed., Olivier Blanchard & David R. Johnson)
Solution Manual Macroeconomics (5th Ed., Olivier Blanchard)
Solution Manual Systems Engineering and Analysis (5th Ed., Benjamin Blanchard & Wolter Fabrycky)
Solution Manual Economic Growth (1st Ed., David N. Weil)
Solution Manual Economic Growth (2nd Ed., David N. Weil)
Solution Manual Money, the Financial System, and the Economy (5th Ed., R. Glenn Hubbard)
Solution Manual Money, the Financial System, and the Economy (6th Ed.,

R. Glenn Hubbard)
Solution Manual Money, Banking and Financial Markets (2nd Ed., Stephen G. Cecchetti)
Solution Manual The Economics of Money, Banking and Financial Markets (8th Ed., Frederic S. Mishkin)
Solution Manual The Economics of Money, Banking and Financial Markets (9th Ed., Frederic S. Mishkin)
Solution Manual Principles of Money, Banking, and Financial Markets (11th Ed., Ritter, Silber & Udell)
Solution Manual Principles of Money, Banking, and Financial Markets (12th Ed., Ritter, Silber & Udell)
Solution Manual Fundamentals of Corporate Finance (Parrino & Kidwell)
Solution Manual Financial Institutions, Markets, and Money (9th Ed., Kidwell, Blackwell, Whidbee & Peterson)
Solution Manual Financial Institutions, Markets, and Money (10th Ed., Kidwell, Blackwell, Whidbee & Peterson)
Solution Manual International Economics (3rd Ed., James Gerber)
Solution Manual International Economics (4th Ed., James Gerber)
Solution Manual International Economics (5th Ed., James Gerber)
Solution Manual International Economics (7th Ed., Steven Husted & Michael Melvin)
Solution Manual International Economics (8th Ed., Steven Husted & Michael Melvin)
Solution Manual International Economics (3rd Ed., W. Charles Sawyer & Richard L. Sprinkle)
Solution Manual World Trade and Payments : An Introduction (9th Ed., Caves, Frankel & Jones)
Solution Manual World Trade and Payments : An Introduction (10th Ed., Caves, Frankel & Jones)
Solution Manual International Economics : Theory and Policy (7th Ed., Krugman & Obstfeld)
Solution Manual International Economics : Theory and Policy (8th Ed., Krugman & Obstfeld)
Solution Manual International Money and Finance (7th Ed., Michael Melvin)
Solution Manual Economic Development (9th Ed., Todaro & Smith)
Solution Manual Microeconomics (4th Ed., Jeffrey M. Perloff)
Solution Manual Microeconomics (Don E. Waldman)
Solution Manual Microeconomics : Theory and Applications with Calculus (Jeffrey M. Perloff)
Solution Manual Microeconomic : Theory and Applications (9th Ed., Browning & Zupan)
Solution Manual Microeconomic : Theory and Applications (10th Ed., Browning & Zupan)
Solution Manual Environmental Economics and Policy (5th Ed., Tom Tietenberg)
Solution Manual Environmental and Natural Resource Economics (7th Ed., Tom Tietenberg)
Solution Manual Health Economics (3rd Ed., Charles E. Phelps)
Solution Manual Industrial Organization : Theory and Practice (3rd

Ed., Waldman & Jensen)
Solution Manual Modern Industrial Organization (4th Ed., Carlton & Perloff)
Solution Manual Modern Labor Economics : Theory and Public Policy (9th Ed., Ehrenberg & Smith)
Solution Manual Law and Economics (4th Ed., Cooter & Ulen)
Solution Manual Law and Economics (5th Ed., Cooter & Ulen)
Solution Manual Market Regulation (Roger Sherman)
Solution Manual Public Finance and the American Economy (2nd Ed., Neil Bruce)
Solution Manual The Economics of Sports (2nd Ed., Leeds & von Allmen)
Solution Manual The Economics of Sports (3rd Ed., Leeds & von Allmen)
Solution Manual Introduction to Econometrics, Brief Edition (James H. Stock & Mark W. Watson)
Solution Manual Introduction to Econometrics (2nd ed., James H. Stock & Mark W. Watson)
Solution Manual Econometrics : A Modern Introduction (Michael P. Murray)
Solution Manual Using Econometrics : A Practical Guide (5th Ed., A.H. Studenmund)
Solution Manual Mathematical Methods for Economics (2nd Ed., Michael Klein)
Solution Manual Personal Finance with Financial Planning Software (3rd Ed., Jeff Madura)
Solution Manual Finance : Investments, Institutions, and Management - Update (2nd Ed., Stanley G. Eakins)
Solution Manual Introduction to Finance (Lawrence J. Gitman & Jeff Madura)
Solution Manual Principles of Managerial Finance Brief (4th Ed., Lawrence J. Gitman)
Solution Manual Principles of Managerial Finance (11th Ed., Lawrence J. Gitman)
Solution Manual Corporate Finance (Jonathan Berk & Peter DeMarzo)
Solution Manual Corporate Finance (7th Ed., Stephen A. Ross, Randolph W. Westerfield, Jeffrey Jaffe)
Solution Manual Principles of Corporate Finance (7th Ed., Richard A. Brealey, Stewart C. Myers)
Solution Manual Risk Takers : Uses and Abuses of Financial Derivatives (John Marthinsen)
Solution Manual Theory of Asset Pricing (George Pennacchi)
Solution Manual Multinational Business Finance (10th Ed., Eiteman, Stonehill & Moffett)
Solution Manual Multinational Business Finance (11th Ed., Eiteman, Stonehill & Moffett)
Solution Manual Fundamentals of Multinational Finance (1st Ed., Moffett, Stonehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (2nd Ed., Moffett, Stonehill & Eiteman)
Solution Manual Fundamentals of Multinational Finance (3rd Ed., Moffett, Stonehill & Eiteman)

Solution Manual Cases in International Finance (2nd Ed., Dufey & Giddy)
Solution Manual Fundamentals of Investing (9th Ed., Gitman & Joehnk)
Solution Manual Fundamentals of Investing (10th Ed., Gitman & Joehnk)
Solution Manual OTIS : Online Trading (Wharton Learning Lab)
Solution Manual Derivatives Markets (2nd Ed., Robert L. McDonald)
Solution Manual Principles of Risk Management and Insurance (9th Ed., George E. Rejda)
Solution Manual Principles of Risk Management and Insurance (10th Ed., George E. Rejda)
Solution Manual Financial Markets and Institutions (5th Ed., Frederic S. Mishkin & Stanley G. Eakins)
Solution Manual Financial Markets and Institutions (6th Ed., Frederic S. Mishkin & Stanley G. Eakins)
Solution Manual Statistical Analysis of Financial Data in S-PLUS (Rene A. Carmona)
Solution Manual Statistics and Finance : An Introduction (David Ruppert)
Solution Manual Mathematical Statistics for Economics and Business (Ron C. Mittelhammer)
Solution Manual Job Hazard Analysis (James E. Roughton & Nathan Crutchfield)
Solution Manual Managerial Issues of Enterprise Resource Planning Systems (David L. Olson)
Solution Manual Business Driven Technology (1st Ed., Haag et al.)
Solution Manual Business Driven Technology (2nd Ed., Haag et al.)
Solution Manual Operations Management : An Integrated Approach (2nd Ed., R. Dan Reid & Nada Sanders)
Solution Manual Operations Management : An Integrated Approach (3rd Ed., R. Dan Reid & Nada Sanders)
Solution Manual Operations Management (4th Ed., R. Dan Reid & Nada Sanders)
Solution Manual Commercial Banking: The Management of Risk (3rd Ed., Gup & Kolari)
Solution Manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences (8th Ed., Hoffmann & Bradley)
Solution Manual Calculus for Business, Economics, and the Social and Life Sciences (9th Ed., Hoffmann & Bradley)

1> Time to change the header.

So why didn't you?

1> This has nothing to do with timing chains.

It also has nothing to do with OS/2, yet you posted it to an OS/2
newsgroup anyway, dgk.

What do your classic unsubstantiated and erroneous claims have
to do with OS/2, James?

24> It also has nothing to do with 2600, yet you posted it to the A26
newsgroup
24> anyway, Boilover.

Take it up with kb9rqz, who included both comp.os.os2.advocacy and atl.
2600
in the newsgroup distribution when the thread suddenly appeared in the
OS/2
newsgroup, James.

On this day, 21 Sep 2010. tholen@antispam.ham, another Scientologist from alt.2600, working with LRH's tech failed to clear any of their engrams or body thetans. Therefore tholen@antispam.ham is a PTS and will go to the Comm Ev due to out-ethics. tholen@antispam.ham's overts must be declared to get back on source.

> Take it up with kb9rqz, who included both c<WHACK>

What does your hard for pre-teen boys on have to do with A26, Pedoposter?

--
Fearing his life, the grand architect Hiram Abiff yelled these three words, so all could hear - Mahabone, Tubal Cain, and IAOM to the rogues. With this the key to King Solomon's Temple had been given to all, brothers or not.

Actually, companies can do just that.
Being owned by a French company means nothing.
If the company policy says you may not use two way radios on that property,then you can be charged with trespassing for doing so.

Can a company deny an officer of the law entry because he is armed?
Yes they can. Companies that produce hazardous materials do it all the time.
I do not know the legality behind the issue of a search warrant, if a company can then deny entrance as long as the officers are armed.
After all, a company has the legal right to protect itself and it's employees from possible harm by outsiders who could possibly ignite the place on fire.

Not in my house. Without my permission to enter they would have to obtain a search warrant served by an actual officer of the law.
They are private citizens. They have no authority.
When the FCC makes a bust, they do so with the local cops who do the actual charging.

Simply by the fact that you own an RF device does not legally grant them entry. An inspection is not probable cause to enter without a warrant.

I'm sure some have been busted for illegal radio uses and fined but that was only because the judge wasn't educated on the subject.

After all, just how many inspections can a handfull of people do?

In some areas of the country, failure to abide by Company Rules can result
in the CEO calling in the Police, who can charge you with Malicious
Trespass. The police can then confiscate your radio and, if you resist, they
can charge you with Resisting Law Enforcement, which can be a low-grade
Felony charge. And subsequent to an Arrest, according to the Supreme Court,
the officers are then allowed to do do a search of your vehicle.

> > Then I'd like to see them try and tell the federal marshalls they're
> > not allowed to operate their radios or have guns on their propery even

> > and they as owners of the privaye property don't allow two way radios
> > on their private property and don't allow guns on their private
> > property.
>
Federal Officers are obliged by law to turn off their radios when on private
company properties where the CEO has banned the use of two way radios.
If the U.S. Marshals refuse to do so, the CEO can then call in the local
Prosecuting Attorney who can then cite the Federal Officers and confiscate
their radios if necessary.
The Prosecutor, if the CEO files charges, can also cite the Federal Officers
for carrying weapons on restricted property...usually a misdemeanor that
results on only a small fine and thirty days in jail. They only have to
surrender their weapons for thirty days and will have them returned upon
release.
The law also states that the local Sheriff MUST record the serial numbers of
the Federal Officers' weapons and that it is incumbent upon the Sheriff of

the County to secure these weapons "in a safe and secure manner". Since these weapons are Federal Property, and should the Sheriff fail in his duties, said Sheriff can be charged with Neglect of Office and can be subject to criminal charges.

> > when the feds come to arrest them for illegally operating cb radios
> > advertised as "10 meter radios" with illegal linear amplifiers pumping
> > out two thousand watst or more hooked up.
>
Little known fact is that the Feds lack arrest authority on private property. They MUST call local law enforcement to make an arrest and the Feds have to show a Warrant, which the local PD is obliged by law to verify before taking anybody into custody.

> Actually, companies can do just that.
> Being owned by a French company means nothing.
> If the company policy says you may not use two way radios on that
> property,then you can be charged with trespassing for doing so.

The same holds for cell phones, which ARE two way radios.
This as been upheld in several court cases, such as Detective Lon Smith vs. Walmart in 2006.
Walmart Security confiscated the Detective's cell phone when the Detective was calling for backup when needing assistance with his arrest of a group of Gypsies who had stolen several leather coats. Walmart security confiscated the Detective's cell phone before he could complete the call for backup and the Court ruled that this act was well within the paramaters of the rules and regulations set forth by Walmart. The Detective was subsequently terminated for violating company rules.

> Can a company deny an officer of the law entry because he is armed?
> Yes they can. Companies that produce hazardous materials do it all the
> time.

Companies that have high security in mind can not only bar law enforcement officers from entering their sites, they can use physical force to disarm any sworn, armed law enforcement officer who demands to enter their sites. Some companies can even have the law enforcement officers' squad cars towed to a private storage facility and charge a Storage Fee to the agency in question.
In fact, in many states the Company can, if the Agency does not pay the storage fee within 72 hours, legally dismantle the squad car, part for part, and sell the items in auction.
However, Federal Law prohibits the private company from selling any firearms or ammunition that may be in the car. That, by law, must be inventoried and returned to the Agency within 45 days of the confiscation.
Also, as per a mandate put in place by the Attorney General's office in 2007, all emergency lighting and sirens must be returned to the Agency in question.

Also, posession and use of CB radios in Manufacturing areas is no longer a chargeable offense. The Teamsters Union petitoned for, and was successful in

their efforts to force the FCC to change that portion of the Law.
This change, however, applies to trucks that are over ten tons gross vehicle weight. It does not apply to pickup trucks or most vans and it does not apply to passenger vehicles.

I hope by posting this that I can make radioguy aware of the new laws, Federal and State.
I want him and his followers to be on firm, legal ground when reading these posts.

Download eComStation and burn the ISO to a CD-Rom. It's is the new OS/
2 and still sucks donkey balls.

Most interesting. Thanks for the information. Mr. Platt should be along
soon to kick your ass. He is a self appointed and educated criminal
attorney.

However, I will beg to differ with you on some points. Such as the walmart
affair. As walmart has no posted signs about cell phone usage, walmart can
not legally confiscate any person's cell phone for any reason. The security
person should have been charged with interfering with a police officer.

You state that federal officers can not make busts on private property.
Care to back that up with the actual law cite?
Seems to me they do it on a daily basis.

"I'm a federal officer sir, here to arrest you, but I can't do that right
here because federal law says I can't you bust you at your desk. Would you
mind stepping outside onto the street?"

Actually NO, the FCC would bring a Federal Marshal with them to do the
Heavy Lifting, in such a case. The FCC Field Agent does NOT have Police
Powers and therefor requires the Federal Marshal to do the arresting, or
if it is a on a boat or Marine vessel, they would get a USCG Officer.
they would only use the local Police, if no Federal Marshal was
available, and the need was critical, and urgent.

A reTired FCC Field Agent... who has called on both the Federal Marshals
and USCG, to provide the Muscle on various occasions.

The question is, can an FCC inspector legally enter a home on the ruse to
inspect an RF device, with the home owner forced to comply?
Not in my house you won't. I don't give a damn how many marshals you got
with you. No search warrant, no entry. The court would side with me.
If the lower court sided with you, then I'd have to take the issue to a
higher court before you got a dime.

See the 4th amendment. "Citizens have the right to be secure in their
home....".

Would you allow a cop to enter your home because he wanted to see if you
had any drugs with no search warrant?
This is precisely why we have the 4th amendment.

I am sure that radioguy is well aware of the rules.

Section 97.1 13(a)(4) of the FCC rules prohibits "messages in codes or ciphers intended to obscure the meaning thereof, except as otherwise provided herein.. ."

Therefore the use of something like Morse code is perfectly legal

Morse code is not ciphering, it is a valid means of communication.

==> + ON THE AIR: UNITED STATES SUPPORTS SECONDARY AMATEUR RADIO
ALLOCATION AT 461-469 AND 471-478 KHZ

The Federal Communications Commission and the National
Telecommunications and Information Administration -- the spectrum
regulators for United States private sector and government users,
respectively -- have agreed to support a secondary MF allocation to the
Amateur Radio Service at 461-469 kHz and 471-478 kHz at the 2012 World
Radiocommunication Conference (WRC-12), to be held in Geneva,
Switzerland from January 23-February 17. FCC and NTIA officials
formally presented the proposal at a meeting of the Second Permanent
Consultative Committee of the Inter-American Telecommunication
Commission, held August 30-September 3 in Fortaleza, Brazil. Read more
here
<http://www.arrl.org/news/united-states-supports-secondary-amateur-radio-allo

cation-at-461-469-and-471-478-khz>.

==> ARRL AWARDS COMMITTEE MAKES STATEMENT ON DISSOLUTION OF NETHERLANDS ANTILLES

To clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined that at 0400 UTC (12:00 AM local time in the islands) on October 10, 2010, the two Netherland Antilles DXCC entities will be deleted. Commencing at 0400 UTC (12:00 AM local time) on October 10, 2010, operation from the islands of Curacao, Bonaire, Sint Maarten, Saba and St Eustatius will count for a yet-to-be-determined number of new entities under the DXCC List Criteria and Political Entities, Rule 1 and/or Rule 2 Geographic Separation Entities. When the Awards Committee determines what Rule 1 or Rule 2 actions apply, it will announce the final disposition of the entities on the DXCC list. The DXCC desk will not accept confirmations for these new entities until after January 1, 2011.

==> + PUBLIC SERVICE: 2010 ATLANTIC HURRICANE SEASON PROVES TO BE A BUSY ONE FOR HAMS

So far, with nine tropical storms and four hurricanes, the 2010 Atlantic hurricane season has indeed been a busy one. Beginning with Hurricane Alex in June, hams at WX4NHC -- the Amateur Radio station at the National Hurricane Center in Miami, Florida -- and weather spotters around the country have kept an eye on these storms. Hurricane Earl came in late August and early September, Hurricane Karl in September and now Hurricane Igor is making its way across the Canadian Maritimes. The 2010 Atlantic hurricane season officially began on June 1 and will continue through November 30. Read more here <http://www.arrl.org/news/2010-atlantic-hurricane-season-proves-to-be-a-busy-one-for-hams>.

==> + HQ HAPPENINGS: FIVE NEW SECTION MANAGERS TO MEET IN NEWINGTON FOR TRAINING

This weekend, five newly elected or appointed Section Managers are in Newington for an orientation workshop. The primary purposes of the workshop sessions are to share ideas and to provide basic administrative, management, leadership and motivational training.

"The Section Manager Workshop is an orientation and training event for new Section Managers that have come on board within the last year or so," said ARRL Field Organization Team Supervisor Steve Ewald, WV1X. "The ARRL has conducted this training each year at HQ for the past several years, and it has been well received by past participants. The Membership and Volunteer Programs Department Staff and its Field Organization Team are the lead coordinators of the event. We also cover the responsibilities and functions of the Section Manager position, and the SMs are able to visit with ARRL Headquarters staff members and learn more about the many programs that the ARRL supports. The workshop

sessions are presented by several ARRL Headquarters staff members who are experts in their respective areas."

The following five Section Managers are attending the orientation workshop: Nebraska Section Manager Art Zygielbaum, K0AIZ; North Carolina Section Manager Bill Morine, N2COP; Oklahoma Section Manager Kevin O'Dell, N0IRW; South Carolina Section Manager Marc Tarplee, N4UPF, and Southern Florida Section Manager David Fowler, K4DLF. Zygielbaum, Morine and Tarplee are current Section Managers; O'Dell and Fowler begin their terms October 1.

==> + TIM DUFFY, K3LR, TO RECEIVE RCA'S GOLDWATER AWARD

The Radio Club of America (RCA) has named Tim Duffy, K3LR, of West Middlesex, Pennsylvania, as the recipient of its Barry Goldwater Amateur Radio Award. The Goldwater Award is given to an RCA member who is also a licensed amateur in recognition of a long record of service to the public through the use of Amateur Radio. He will receive the award at the RCA's 101st annual awards banquet held November 19 in New York City. Duffy -- an ARRL Life Member who became an RCA member in 1999 and serves on the RCA Board of Directors, as well as chairman of its Marketing Committee -- will also be inducted as an RCA Fellow this year. Read more here <http://www.arrl.org/news/tim-duffy-k3lr-to-receive-rca-s-goldwater-award>.

==> + NOMINATIONS NOW BEING ACCEPTED FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

At its July 2009 meeting, the ARRL Board of Directors established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-the-george-hart-distinguished-service-award>.

==> ON THE WEB: HAMFESTS AND CONVENTIONS

This week, we've made several improvements to the Hamfest and Convention pages <http://www.arrl.org/hamfests-and-conventions-calendar> on our Web site, including quick and easy links to the Hamfest Planner, Application <http://www.arrl.org/hamfest-convention-application> and Sanctioning information <http://www.arrl.org/files/file/New%20Convention%20Hamfest%20Rules.pdf>, as well as an updated version of the Speaker's Bureau <http://www.arrl.org/speakers-bureau>.

Other highlights:

- Added a clearer description of the benefits of ARRL Sanctioning
- Added more call outs to Hamfest section
- Links to the Hamfest Application from the ARRL Sanctioned page, as
well as links to the Rules and Regulations.
- One other improvement of note, if you visit www.arrl.org/get-involved
<http://www.arrl.org/get-involved>, you'll see a direct link to the
Hamfest pages from the first panel of the carousel.

==> + PBS SHOW FEATURES HISTORY MYSTERY WITH AN AMATEUR RADIO TWIST

In the PBS show History Detectives, a group of researchers helps
people to seek answers to various historical questions they have,
usually centering around a family heirloom, an old house or other
historic object or structure. So when Chuck Roedel, WA2MXR, of Beverly
Hills, Florida, had what he thought may be an artifact from the turning
point in the US space race against Soviet Russia, he called on the
detectives to help him sort it all out. The show featured Roedel and
his history mystery back in June, and his segment was just made
available to the public on the History Detectives Web site. Read more
here
<http://www.arrl.org/news/pbs-show-features-history-mystery-with-an-amateur-r
adio-twist>.

==> + ARRL TO WELCOME USTTI STUDENTS

Next week -- September 27-October 1 -- the ARRL will welcome
students who want to learn how to administer and regulate Amateur Radio
programs in their home countries. This course, offered by the United
States Telecommunications Training Institute (USTTI) for learners from
developing countries, will help the participants create, administer and
foster an Amateur Radio Service in their countries. Read more here
<http://www.arrl.org/news/arrl-to-welcome-ustti-students-1>.

==> + SOLAR UPDATE

Tad "There's a little black spot on the Sun today
<http://www.youtube.com/watch?v=aw1MNBgLw0w>" Cook, K7RA, reports: The
autumnal equinox occurred early today at 0309 UTC. Conditions were good
this week, with sunspots visible every day -- and with very little
geomagnetic activity. The average daily sunspot numbers rose more than
24 points to 40, and average daily solar flux was up nearly five points
to 82.9. The solar flux is expected to rise to 88 for the next few
days, September 23-27. Geomagnetic activity should be unsettled to
active for today and tomorrow, September 23-24, with the planetary A
index for September 23-30 at 18, 18, 12, 6, 6, 8, 10 and 5. Bill
Magruder, KD7KST, sent in an interesting link that allows the user to
view live aurora from Yellowknife in Canada's Northwest Territories,
which is at 62.433 degrees north latitude. Go here
<http://www.asc-csa.gc.ca/eng/astronomy/auroramax/connect.asp> to have
a look -- after dark, of course. Look for more information on the ARRL
Web site on Friday, September 24. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation
page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad

Cookism" is brought to you by Gordon Sumner's King of Pain
<http://en.wikipedia.org/wiki/King_of_Pain>.

==> THIS WEEK ON THE RADIO

This week:

- September 24 -- NCCC Sprint Ladder
- September 25-26 -- CQ Worldwide DX Contest (RTTY); Texas QSO Party
- September 25 -- AGCW VHF/UHF Contest
- September 27 -- QRP Homebrewer Sprint
- September 28 -- 222 MHz Fall Sprint (local time)

Next week:

- October 2 -- TARA PSK Rumble Contest; F9AA Cup (CW); EU Autumn
Sprint (SSB)
- October 2-3 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
California QSO Party; EPC Russia DX Contest; Oceania DX Contest (SSB);
International HELL-Contest
- October 3 -- F9AA Cup (SSB); UBA ON Contest (SSB); RSGB 21/28 MHz
Contest; German Telegraphy Contest
- October 5 -- ARS Spartan Sprint
- October 6 -- 432 MHz Fall Sprint (local time)
- October 7 -- SARL 80 Meter QSO Party

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS

- October 15-17 -- ARRL Pacific Division Convention
<http://www.pacificon.org/>, San Ramon, California

Amateur Radio Newsline(tm) Report 1728 - September 24 2010 Amateur Radio Newsline report number 1728 with a release date of Friday, September 24 2010 to follow in 5-4-3-2-1. The following is a Q-S-T. The United States will support a new ham band near 500 kHz at WARC 2012, the World Radiosport Team Championship is coming back to U.S. soil in 2014, the FCC ramps up enforcement in ham radio and a Minnesota ham club is awarded a grant from Pepsi Cola to buy new radio gear. Find out who on Amateur Radio Newsline(tm) report number 1728 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: US TO SUPPORT NEW MEDIUM WAVE HAM BAND PROPOSAL AT WRC 2012

A new ham Medium Frequency allocation could be in ham radios future. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The ARRL reports that the United States is supporting new secondary Amateur Radio allocation at 461 to 469 kHz and 471 to 478 kHz. This after both the Federal Communications Commission and the National Telecommunications and Information Administration spectrum regulators have agreed to support this secondary Medium Frequency allocation to the at the 2012 World Radiocommunication Conference to be held in Geneva, Switzerland.

The FCC and NTIA formally presented the proposal at a meeting of the Second Permanent Consultative Committee of the Inter-American Telecommunication Commission held a few weeks ago in Brazil. However the proposal will likely draw opposition from maritime interests domestically and internationally. They have expressed opposition to any amateur allocation in the 415 to 526.5 kHz spectrum.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the City of Angels.

--

The full story is on-line at tinyurl.com/2a4zwry which is a direct link to the ARRL web news item. (Southgate, ARRL)

**

RESCUE RADIO: GAREC 2010 CONFERENCE UPDATE

As previously reported, the 2010 Global Amateur Radio Emergency Communications Conference or GAREC 2010 is scheduled for October 11th to the 12th on the Caribbean island of Curacao. Its now been announced that one of the highlights of this years conference will be an actual emergency communications exercise. This as a way of exploring how information sharing across borders can be improved.

The Global Amateur Radio Emergency Communications Conference supported by the International Amateur Radio Union, all three IARU Regions and the ARRL. With its theme of "Learning through Practicing," this year's conference is an important opportunity for emergency communicators to discuss recent events, discover technical solutions to problems and how to cooperate with professional partners. (Southgate)

RADIOSPORTS: USA TO HOST 2014 WORLD RADIOSPORT TEAM CHAMPIONSHIP

The 2014 World Radiosport Team Championship games will be held in the United States and two former participants will be heading up the event. Bruce Tennant is here with the details:

--

Hosting rights for the 2014 World Radiosport Team Championship or WRTC have been awarded to the New England WRTC 2014 Organizing Committee. This organization is a newly-formed independent group, and not part of any existing organization, national society, or club.

Heading up the group are former WRTC participants Doug Grant K1DG as Chairman and Randy Thompson K5ZD as Co-Chairman. They are joined by a committee made up of some of the worlds greatest contesters and DX'ers including CQ Magazine's John Dorr, K1AR, Kids Day creator Larry "Tree" Tyree N6TR and ARRL New England Director Tom Frenaye, K1KI, to mention only three.

According to Doug Grant, K1DG, writing on the groups news blog, since the first Radiosport Team Championship in Seattle, Washington, back in 1990 there have been six W-R-TC events, with a total of 234 teams and 468 operator spots. Grant adds that those 468 operator positions have been occupied by 353 different operators from 49 different DXCC entities.

For the Amateur Radio Newsline, I,m Bruce Tennant, K6PZW, in Los Angeles.

--

More about planning and how to qualify a team for the 2014 competition is on line at www.rtc2014.org (wrtc2014)

RESCUE RADIO: NATIONAL EAS TEST AGAIN DELAYED

Radio World On-Line says that the long anticipated and firstever national EAS test will likely not be scheduled in early 2011. A federal source confirmed to the magazine that reason for the delay is to allow time for additional outreach and education with the public, with broadcasters, with state and local emergency management and federal partners. The on-line magazine says that the extra outreach will enable the alert and warning community to be better prepared for the nationwide exercise when it finally does take place. (RW)

**

ENFORCEMENT: SBE FINDS ARCO COMMERCIAL TRIPS EAS DECODERS AT RADIO STATIONS

British Petrolium has pulled an ad for subsidiary Arco that used what sounded like Emergency Activation or EAS tones. This, after members of the Society of Broadcast Engineers EAS Committee and participants in SBE's EAS Exchange identified a radio commercial as the source of unexpected triggering of EAS alert receivers.

The commercial started with effects that sounded like a shortened EAS header tone followed by the spoken phrase, "The following alert is from ARCO." The EAS like headers were partial, but contained enough information to mimic the start of an real EAS header, because it used the proper frequencies and data rate. When this commercial was played by a station that is being monitored as a local EAS source, it may cause some decoder equipment to un-mute and print a partial message.

For those not aware of how EAS messahes work while the internal monitor speaker is un-muted, the alert is not relayed by the EAS unit on the monitoring station. Although the problem will only affect stations that both monitor a station that airs the ARCO commercial material and that have a particular type of EAS equipment, the SBE had recommended fpr stations check the affected commercial material.

It should be noted that the existence of EAS header data in this commercialmight be considered an FCC violation when aired. Regulation 11.45 says that no person may transmit or cause to transmit the EAS codes or Attention Signal, or a recording or simulation thereof, in any circumstance other than in an actual National, State or Local Area emergency or authorized test of the EAS system.

Though the spot did not use actual EAS tones ad agency Ogilvy and Mather Worldwide which created the commercial stated it regretted confusion the spot may have caused. For those who have not heard it, an MP3 of the commercial can be downloaded at tinyurl.com/arcospot (CGC Communicator, SBE Website, others.)

ENFORCEMENT: FCC WARNING LETTER ISSUED IN NET INTERFERENCE CASE

The FCC has sent a Warning Notice to an Ohio ham alleging him of being the source of interference to a 75 meter net. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The Warning Notice dated September 3rd was sent to Charles A. Hathaway, W8ROX, by FCC Special Counsel Laura Smith. In it Smith says that the Commission received several complaints of interference to the Century Club Net operating on 3902 KHz. At her request, the staff at the Commission's monitoring station began investigating in order to determine the location of this interference. Over the next month, the monitoring station confirmed that the interference was taking place and used its direction finding equipment to determine that the signal was coming from a location north of Athens, Ohio.

The Commission's Detroit Field Office was notified and they began a field investigation into the matter. On July 21st at approximately 10:20 PM, the field agents heard an audible transmission interrupt the ongoing Century Club Net. They began using their vehicle's direction finding equipment to determine the location of the offending transmitter. At 12:40 AM, they had a positive Direction Find to a beam antenna. At that time, they knocked on the door and attempted to inspect the station. No one answered the door. They returned the next day at 4:21 PM and at that time were able to inspect the station.

During the inspection, Hathaway indicated to the agents that he was unaware that his station had been transmitting during the time in question. This was because he had been having problems with his push to talk button getting turned on accidentally.

As part of the inspection, the agents took pictures of Hathaway's equipment, including a close up of his push to talk button and its relative position to his microphone and the rest of his equipment.

In her letter, Smith told Hathaway that his argument that he was unaware that his station had been transmitting during the time in question because of this problem with his push to talk button was unpersuasive. She wrote that one of the Commission's field agents specifically noted in his report that the push to talk button is not located on or near the rest of Hathaway's equipment. Rather that it was strung through the handle of his desk drawer and away from the desk top where the remainder of his equipment is located. Moreover, according to the agents, the push to talk button appeared to be in

working order during the inspection.

Smith concluded by telling Hathaway that his alleged operation as described in the Warning Letter, and verified by the Commission's field staff, is contrary to the basis and purpose of the amateur radio service. This as it is set out in Section 97.1 of the Commission's rules. Also, that it is a violation of Section 97.101(d) of the rules. She then warned Hathaway that the Commission expects him to abide by its rules. As such, her letter to him serves notice that, if operation of this type reoccurs, Hathaway could be subject to severe penalties. These include anything from a modification proceeding to restrict the frequencies upon which he may operate, to a fine or even revocation of his license.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, following this FCC enforcement action from Scottsdale, Arizona.

--

A link to the FCC Warning Letter can be found at www.fcc.gov/eb/AmateurActions/files/Hatha10_09_2 1_5203.html. (FCC)

ENFORCEMENT FOLLOW-UP: FCC AFFIRMS $10000 FINE AGAINST FLORIDA UNLICENSED STATION

A follow-up to our story several months ago about to Christopher M. Myers, whom the FCC claimed they found to be operating an unlicensed broadcast station on 95.9 MHz of Lauderhill, Florida. On September 9th, the regulatory agency affirmed a $10,000 fine issued to Myers as a Notice of Apparent Liability for Monetary Forfeiture on July 12th. Amateur Radio Newsline's Fred Vobbe, W8HDU, has more:

--

By way of background, back on August 14, 2008, the Enforcement Bureau's Miami Office issued a Notice of Unlicensed Operation to Christopher M. Myers for operating an FM broadcast station from his residence on 91.7 MHz without a license. The notice warned him that continued operation could subject him to further enforcement action.

On July 21, 2009, in response to a complaint that Myers was still operating an unlicensed station at his residence in Lauderhill, Florida, agents from the Miami Office used direction-finding to locate the source of broadcast transmissions on the frequency 95.9 MHz. It was traced to the same building from which Myers previously operated an unlicensed radio station on 91.7 MHz. In the ensuing months the FCC says it received continued complaints regarding this operation.

On March 7, 2010, the agents from the Miami Office inspected the unlicensed station, which was located in a condominium unit owned Myers. The agents observed a coaxial cable that connected a roof-mounted antenna on the condominium building to an FM radio

transmitter operating on the frequency 95.9 MHz located inside Myers's condominium unit. The agents also observed that Christopher Myers was the only person present inside his unit at the time of the Commission's inspection.

This past July 12th, the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Myers. In the time since then Myers had not filed a response to the NA L. Now, based on the information before it the FCC has again affirmed the forfeiture and given Myers the customary 30 days to pay or to file a further appeal.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

At airtime, it's unknown in Myers has contacted the FCC regarding this matter or if he has paid the fine. (FCC)

RADIO CRIME: CALIFORNIA STATION LOOSES GROUND SYSTEM A SECOND TIME

For the second time in two years copper thieves have struck the Butte Broadcasting Company's KKXX AM transmitter site in Paradise, California. According to the Oroville Mercury Register, this time the thieves made of with about 22,000 feet of Number 10 wire from the ground system, which was apparently bundled into lengths of 10 to 20 feet and then carted away.

Station manager Andrew Palmquist said the transmitter was able to remain on the air. Palmquist told the paper that the thieves apparently knew what they were doing. They left just enough wire for the ground system to allow the station to continue to broadcast. Palmquist told the paper the thieves took a back road to the tower, avoiding a locked gate.

After the first wire theft in 2008, Palmquist said copper grounding wires were replaced and a concrete footing was poured about every 10 to 15 feet along the length of the wire in hopes of discouraging future thefts. However this time, the thieves cut and removed the wires between the concrete.

According to a scrap copper website, with the worlds economy still not very stable, that kind of wire is only is fetching between $1.22 and $2.75 a pound. So the thieves went to a lot of work and risked their lives to get very little in return.

KKXX management is asking anyone with knowledge about the copper theft to contact the station. (RW)

ELECTRONICS INDUSTRY: GE CLOSING ITS LAST INCANDESCENT US LAMP FACTORY

The General Electric Company is closing its last incandescent light bulb factory in the United States. This, to comply with the Energy Independence and Security Act of 2007.

According to news reports, the resulting savings in energy and greenhouse-gas emissions are expected to be immense. But the move also had unintended consequences. Rather than setting off a long predicted surge in the domestic manufacture of replacement lights such as Compact Fluorescents, many are already being manufactured overseas. Most come from China and are assembled at a low cost that domestic manufacturers cannot match. (Published news reports)

WOIRLDBEAT: CHANGES AT RADIO AMATEURS OF

CANADA

Radio Amateurs of Canada has announced that Chris Wiesner, VA3SM has assumed the position of Office Coordinator and Dave Parks, VE3AV, is continuing in his role as Membership Administrator. Chris is full-time while Dave is part-time. Offices hours are Monday to Friday from 10:00 to 16:00 Eastern Time and the telephone number is 613-244-4367 or toll-free 877-273-8304. With these changes Radio Amateurs of Canada says that it is looking forward to offering: "improved service to Canadian Amateurs in general and our members in particular." (VE4BAW)

**

HAM RADIO IN SPACE: ISS ATV ACTIVATED BRIEFLY ON SEPTEMBER 14th

In ham radio news from space, word that the crew on-board the International Space Station activated the Slow Scan Television experiment on September 14th. G8ATE in Leichester, England, reports having received 4 good images from the I-S-S during the 12:32 and 14:06 UTC passes before the crew switched back to packet operation. (ANS)

**

HAM RADIO IN SPACE: ARISSAT 1 NEAR COMPLETION

ARISSat Project Manager Gould Smith, WA4SXM, says that the ARISSat-1 satellite is completed and is currently undergoing vibration testing in Orlando, Florida. Smith notes that the shipping container for both the flight unit and a back-up is under construction which will lead to the shipping of the two flight ready satellites to Houston in the very near future.

>From Houston, NASA will be sending the satellites on to Russia at the end of the month. Once there, the Kursk Experiment will be attached, additional testing done and then the entire flight package will be transported to the Baikonur Cosmodrome for launch.

ARISSat-1, which is the former SuitSat 2 is scheduled to transported to the International Space Station in January 2011. It will be manually released into orbit during a space walk sometime next February. (AMSAT-NA, WA4SXM)

**

HAM RADIO NEAR SPACE: BALLOON LAUNCH ASSISTANCE NEEDED

Amateur radio operators in the Maryland, Virginia and Washington D.C. area may be interested in becoming a team member of the 'Small High-Altitude Expendable Balloon Launch.' Pat Kilroy, N8PK, is assembling his team starting and says he needs hams who are willing to establish one or more effective ground stations.

N8PK held an initial planning session at the Carroll County Amateur Radio Club meeting in Westminster, Maryland on September 13th, complete with a demo of the three different PICetSat transponder modules. Two of the modules have their telemetry downlink in Morse Code 433.920 MHz FM and the other uses Packet Radio. The team will later choose to fly.

The launch of the Small High-Altitude Expendable Balloon is planned for the Mason-Dixon Hamfest on Sunday, October 24th. If you want to volunteer please send him an e-mail to Patrick.L.Kilroy at nasa dot gov. (ANS)

**

ON THE AIR: VC1J TO CELEBRATE THE 65th ANNIVERSARY OF THE UN

On the air, word from up North that Canada's Westcumb Amateur Radio Club in Amherst, Nova Scotia has been granted the callsign VC1J. This for the special event station celebrating the 65th Anniversary of the United Nations and UNESCO. The club will be activating VC1J from the Joggins Fossil Cliffs which became a UNESCO site last year. Operations will be on Sunday October 24th on various bands and modes. A special event QSL card will be available for those who contact VC1J on that date. (RAC)

**

THE CONTEST CORNER: REVISED RULES IN OCEANIA DX CONTEST

The Oceania DX Contest, Australia's Premier international amateur radio contest, is coming up on the first two weekends of October. October 2nd and 3rd sees the SSB competition with the C-W segment on the 9th and the 10th. This year there are some slight changes to the rules. The category of multiple operators with one transmitter means that anyone with a station can enter with some additional operators as only one transmitter is used. The other new category is 2 transmitters. (VK4TI)

**

ON THE AIR: CANADIAN COASTAL STATION CG3MUG

The Thunder Bay MCTS Centre of the Canadian Coast Guard Radio system will celebrate 100 years of service in November and ham radio will be a part of the celebration.

Constructed by the Canadian Marconi Company wireless station, MUG Port Arthur was the first Canadian Great Lakes Marconi station built. In 1912, following the success of MUG, the Canadian government constructed a chain of marine radio stations from Port Arthur down to Kingston, Ontario.

Now, during November of 2010, radio amateurs at the Center will be operating special event station CG3MUG to celebrate this achievement. Throughout this period there will be several chances for both ham's and SWL's to obtain a special 100th anniversary CG3MUG QSL card. For more information, please visit tinyurl.com/38k8mc on the World Wide Web. (VA3ROM, VE3VAI)

**

DX

In DX, a group of German operators will be active from the Madiera Islands as CR3L during the CQ World Wide DX RTTY Contest on September 25th and 26th. Operators will probably be active as CT9 slash their home call before and after the contest. QSL via DJ6QT

VK4AN will be active as 3D2A from Viti Levu Island between October 27th and November 14th. Operation will be on 160 through 10 meters including 30, 17 and 12 meters using CW, SSB, RTTY and PSK31. QSL via VK4AN

Members of the Storstockholms Radioamat"rer Club will be active as SK0ZA slash OH0 from the Aland Island between September 24th to the 26th. Operations will be on all bands and modes. Visit their web page at www dot sk0za dot se.

W8FV will be returning to Tanzania and will be active as 5H9PD between October 2nd to the 30th. Operation will probably be on 40 through 10 meters, depending on propagation, mostly CW with thew possibility of some PSK31. QSL via his home callsign.

Members of the Safari DX Activators Club of Azerbaijan will be activating two different Nature Reserves between September 20th and October 3rd. The operators and participants are representatives of the countries of Latvia, Russia and Azerbaijan. There will be two different teams, callsigns and QSL routes. Use the directions given to you on the air.

VK5MAV will be active slash 5 or possibly using a special callsign or prefix from Flinders Island between September 21st to the 27th. Operations will be on 40, 20, 15 and 10 meters mainly using CW. QSL via his home callsign, either direct or by the Bureau.

Lastly, members of the Czech and Slovak Contest Crew have announced a DXpedition to The Gambia to take place between November 17th and the 30th. They will be using renewed callsigns from their previous 2007 operation as C50C or C52C. Also, the special callsign C5A will be reserved for the CQ World Wide DX CW Contest. QSL by the Bureau or direct to: Branislav Daras, P.O.Box 6, SK-820 08, Bratislava 28, Slovak Republic.

Above from various DX newsw sources.)

THAT FINAL ITEM: PEPSI AWARDS GRANT TO MINNESOTA HAM RADIO CLUB

And finally this week, word that the Pepsi-Cola Company of Rochester, Minnesota, has awarded the Rochester Amateur Radio Club a grant of $2,355. This to fund new radio equipment that will allow the club to better assist in emergency and community communications in downtown Rochester.

By way of background, the Rochester Amateur Radio Club is a Minnesota non-profit corporation and holds Federal tax exempt status by the Internal Revenue Service as well. It is an ARRL affiliated group and has the stated purposes to advance general interest and knowledge of amateur radio, to promote cooperation and exchange of information between members and to provide public service support for community activities. To accomplish this, the club maintains two VHF repeaters a UHF repeater, and three APRS digipeaters.

The Pepsi-Cola Company of Rochester a franchise beverage distributor of the Gillette Group Inc., recently awarded another $15,000 in local Pepsi Refresh Grants to area organizations. In all, the company planned to award up to $100,000 to local communities in 2010. To find out more about the Pepsi Refresh Grants, you can take your web browser to www.refresheverything.com. The Rochester Amateur Radio club can be found on-line at www.rarchams.org (Rochester Post- Bulletin)

These people need to have their butts kicked hard in court.
No HOA has authority to persecute someone who has not signed the agreement.
They sure as hell don't have authority outside of their property, which is
what a public street is.
If a judge is siding with the HOA, then that means the judge is taking
kickbacks from them.

You need to research the state law on what all it allows an HOA to enforce.
That clause you give sounds fishy and may not be legal.

What do they do when a cop shows up at a house? Have his car towed and fine
him for the infractions?

Here's something you can try. Gather up 20 or so CB'ers and have them come park in front of your house on the street. Make sure they all have visibile antennas. When the tow truck shows up, advise the HOA people he's violating the clause because of his two way radios. Not to mention his 'Obnoxious activity'. Then, call the cops and file charges of grand theft auto on them.

BTW, aren't HOA's requried to have elections for the board of directors? What's preventing you from getting involved and getting on the board?

My brother is on his HOA's board now and he wasn't even looking for the job.

It's time you took legal action these assholes.

What does you getting your bloody dick bitten right off to a stump by the zombe girl in this video: http://www.youjizz.com/videos/porn-of-the-dead-2166406.html have to do with A26, Chewed Prick?

--
Fearing his life, the grand architect Hiram Abiff yelled these three words, so all could hear - Mahabone, Tubal Cain, and IAOM to the rogues. With this the key to King Solomon's Temple had been given to all, brothers or not.

If this is in arizona here's some legal information for you.

Section 1. Title 33, chapter 16, article 1, Arizona Revised Statutes, is amended by adding section 33-1815, to read:

33-1815. Community authority over public roadways

Notwithstanding any provision in the community documents, an association has no authority over and shall not regulate any roadway, easement or other area for which the ownership or use has been dedicated to a governmental entity or that is otherwise under the legal authority of a governmental entity. An association has jurisdiction over only those roadways, easements

and other areas that remain under the ownership of the association.

So if you are now fined by the HOA, take the bastards to court and challenge.
IOW, the HOA can not legally fine anyone, resident or not, for any parking infraction on a public roadway. Even if they use the "obnoxious activity" clause.
They would have to prove that the roadway is their property and has never been "dedicated" as public use. If the community is not gated, nor have the streets marked as "private property", they are screwed.

>Where is the alleged irony, dizzy?

Your inability to realize that your strategy is a failing one, tholen.

(Cue more unexplained, unsubstantiated, ridiculous tholen claims of
some "erroneous presupposition" or failure of logic on my part.)

>1156> How well has your strategy, to keep c.o.o.a. on-topic, worked,
>tholen?
>
>Classic erroneous presupposition.

Wow. What a kook you are, tholen. You just got done justifying your
behavior by stating your expectation to find OS/2 content in an OS/2
newsgroup, tholen.

(Cue insane amounts of tholen tholing, a total tholen kook-out, to
evade the issue.)

>See what I mean about logic not being your strong suit, dizzy?

More irony from tholen, the King of the Kooks.

2600

1157> tholen tholed:

What was allegedly endured while writing, dizzy?

1157> Your inability to realize that your strategy is a failing one,
tholen.

What does your classic erroneous presupposition have to do
with OS/2, dizzy?

1157> (Cue more unexplained, unsubstantiated, ridiculous tholen claims
of
1157> some "erroneous presupposition" or failure of logic on my part.)

What does your classic erroneous presupposition of some
ridiculous claim on my part have to do with OS/2, dizzy?
Rather ironic, coming from the person making ridiculous
claims.

1157> Wow.

What does your amazement have to do with OS/2, dizzy?

1157> What a kook you are, tholen.

What does your classic unsubstantiated and erroneous claim
have to do with OS/2, dizzy? There is nothing kooky about
an OS/2 user reading an OS/2 newsgroup and expecting to
find OS/2 content in that newsgroup. There is something
plenty kooky about non-OS/2 users continually posting
non-OS/2 content to an OS/2 newsgroup, dizzy, especially
over a thousand times. Of course, logic has never been
your strong suit, dizzy.

1157> You just got done justifying your behavior by stating
1157> your expectation to find OS/2 content in an OS/2
1157> newsgroup, tholen.

Classic illogic. Suppose Person A lives in Atlanta and
Person B, a former high school classmate of Person A, lives
in Seattle. Further suppose that Person A runs into Person B

while shopping at an Atlanta mall and asks the question "What are you doing in Atlanta?" You conclude that the question represents a strategy to keep Person B out of Atlanta. What a ridiculous conclusion. See what I mean about logic not being your strong suit, dizzy?

1157> (Cue insane amounts of tholen tholing,

I'm well aware that I'm enduring an insane amount of your illogic, dizzy. No need to tell me about it.

1157> a total tholen kook-out,

How ironic, coming from the person having a kook-out, as evidenced by the ongoing stream of illogic flowing from his mind.

1157> to evade the issue.)

Where is the alleged evasion, dizzy? Rather ironic, coming from the person who continually evades the question about what was allegedly endured while writing.

1157> More irony from tholen,

Where is the alleged irony, dizzy?

1157> the King of the Kooks.

What does your classic unsubstantiated and erroneous claim have to do with OS/2, dizzy? There is nothing kooky about an OS/2 user reading an OS/2 newsgroup and expecting to find OS/2 content in that newsgroup. There is something plenty kooky about non-OS/2 users continually posting non-OS/2 content to an OS/2 newsgroup, dizzy, especially over a thousand times. Of course, logic has never been your strong suit, dizzy.

OS/2

A typical OS/2 Warp 4 desktop
Company / developer IBM & Microsoft (v. 1.0 - 1.2)
Programmed in April 1987
OS family OS/2
Working state Historical, now developed as eComStation
Source model Closed source
Latest stable release 4.52 / December 2001
Marketing target Professionals, servers
Available language(s) English, German, Spanish, Portuguese
Available programming languages(s) REXX, Object Rexx, Java
Package manager Solid
Supported platforms x86
Kernel type Hybrid kernel
Default user interface Workplace Shell Graphical user interface
License Proprietary
OS/2 is a computer operating system, initially created by Microsoft
and IBM, then later developed by IBM exclusively. The name stands for
"Operating System/2," because it was introduced as part of the same
generation change release as IBM's "Personal System/2 (PS/2)" line of
second-generation personal computers. OS/2 is no longer marketed by
IBM, and IBM standard support for OS/2 was discontinued on 31 December
2006.[1] Currently, Serenity Systems sells OS/2 under the brand name
eComStation.

OS/2 was intended as a protected mode successor of PC-DOS. Notably, basic system calls were modeled after MS-DOS calls; their names even started with "Dos" and it was possible to create "Family Mode" applications: text mode applications that could work on both systems.[2] Because of this heritage, OS/2 shares similarities with Unix, Xenix, and Windows in many ways.

[edit] Development history

[edit] Enthusiastic beginnings

The development of OS/2 began when IBM and Microsoft signed the Joint Development Agreement in August 1985.[3] It was code-named "CP/DOS" and it took two years for the first product to be delivered.

OS/2 1.0 was announced in April 1987 and released in December as a textmode-only OS. However, it featured a rich API for controlling the video display (VIO) and handling keyboard and mouse events so that programmers writing for protected-mode no longer had to call the BIOS or access hardware directly. In addition, development tools included a subset of the video and keyboard APIs as linkable libraries so that family mode programs were able to run under MS-DOS. A task-switcher named Program Selector was available through the Ctrl-Esc hotkey combination, allowing the user to select among multitasked text-mode sessions (or screen groups; each could run multiple programs).[4]

Communications and database-oriented extensions were delivered in 1988, as part of OS/2 1.0 Extended Edition: SNA, X.25/APPC/LU 6.2, LAN Manager, Query Manager, SQL.

The promised GUI, Presentation Manager, was introduced with OS/2 1.1 in October, 1988.[5] It had a similar user interface to Windows 2.1. The interface was replaced in versions 1.2 and 1.3 by a tweaked GUI closer in appearance to Windows 3.1.

The Extended Edition of 1.1, sold only through IBM sales channels, introduced distributed database support to IBM database systems and SNA communications support to IBM mainframe networks.

Version 1.2 introduced Installable Filesystems and notably the HPFS filesystem. HPFS provided a number of improvements over the older FAT filesystem, including long filenames and a form of alternate data streams called Extended Attributes.[6] In addition, extended attributes were also added to the FAT file system.[7]

Installation Disk A of Microsoft OS/2 1.3 (3.5" floppy disk).The Extended Edition of 1.2 introduced TCP/IP and Ethernet support.

OS/2 and Windows-related books of the late 1980s acknowledged the existence of both systems and promoted OS/2 as the system for the future.[8]

[edit] Breakup
The collaboration between IBM and Microsoft unraveled in 1990, between the releases of Windows 3.0 and OS/2 1.3. Initially, at least publicly, Microsoft continued to insist the future belonged to OS/2. Steve Ballmer of Microsoft even took to calling OS/2 "Windows Plus".[9] However, during this time, Windows 3.0 became a tremendous success, selling millions of copies in its first year.[10] Much of its success was because Windows 3.0 (along with MS-DOS) was bundled with most new computers.[11] OS/2, on the other hand, was only available as an expensive stand-alone software package. In addition, OS/2 lacked device drivers for many common devices such as printers, particularly non-IBM hardware.[12] Windows, on the other hand, supported a much larger variety of hardware. The increasing popularity of Windows prompted Microsoft to shift its development focus from cooperating on OS/2 with IBM to building a franchise based on Windows.[13] Several technical and practical reasons contributed to this breakup:

Differences in culture and vision: Microsoft favored the open hardware system approach that contributed to its success on the PC; IBM sought to use OS/2 to drive sales of its own hardware, including systems that could not support the features Microsoft wanted. Microsoft programmers also became frustrated with IBM's bureaucracy and its use of lines of code to measure programmer productivity.[14] IBM developers complained about the terseness and lack of comments in Microsoft's code, while Microsoft developers complained that IBM's code was bloated[citation needed].
Differences in API: OS/2 was announced when Windows 2.0 was near completion, and the Windows API already defined. However, IBM requested that this API be significantly changed for OS/2.[15] Therefore, issues surrounding application compatibility appeared immediately. OS/2 designers hoped for source code conversion tools, allowing complete migration of Windows application source code to OS/2 at some point. However, OS/2 1.x did not gain enough momentum to allow vendors to avoid developing for both OS/2 and Windows in parallel. IBM's involvement was much more successful in redefining Windows' visual appearance after the 1.0 release, giving it what is today

perceived as the "Windows 3.0 look".
OS/2 1.x targeted the 80286 processor: IBM insisted on supporting the Intel 80286 processor, with its 16-bit segmented memory mode, due to commitments made to customers who had purchased many 80286-based PS/2's because of IBM's promises surrounding OS/2.[16] Until release 2.0 in April 1992, OS/2 ran in 16-bit protected mode and therefore could not benefit from the Intel 80386's much simpler 32-bit flat memory model and virtual 8086 mode features. This was especially painful in providing support for DOS applications. While, in 1988, Windows/386 2.1 could run several cooperatively multitasked DOS applications, including expanded memory (EMS) emulation, OS/2 1.3, released in 1991, was still limited to one 640KB "DOS box".
Given these issues, Microsoft started to work in parallel on a version of Windows which was more future-oriented and more portable. The hiring of Dave Cutler, former VMS architect, in 1988 created an immediate competition with the OS/2 team, as Cutler did not think much of the OS/2 technology and wanted to build on his work at Digital rather than creating a "DOS plus". His "NT OS/2," was a completely new architecture.[17]

The OS/2 2.0 upgrade box.IBM grew concerned about the delays in development of OS/2 2.0 and the diversion of IBM funds earmarked for OS/2 development towards Windows[citation needed]. Initially, the companies agreed that IBM would take over maintenance of OS/2 1.0 and development of OS/2 2.0, while Microsoft would continue development of OS/2 3.0. In the end, Microsoft decided to recast NT OS/2 3.0 as Windows NT, leaving all future OS/2 development to IBM. From a business perspective, it was logical to concentrate on a consumer line of operating systems based on DOS and Windows, and to prepare a new high-end system in such a way as to keep good compatibility with existing Windows applications. While waiting for this new high-end system to develop, Microsoft would still receive licensing money from Xenix and OS/2 sales. Windows NT's OS/2 heritage can be seen in its initial support for the HPFS filesystem, text mode OS/2 1.x applications, and OS/2 LAN Manager network support. Some early NT materials even included OS/2 copyright notices embedded in the software[citation needed]. One example of NT OS/2 1.x support is in the WIN2K resource kit. OS/2 support also includes Presentation Manager support with the addition of the Windows NT Add-On Subsystem for Presentation Manager.[18]

[edit] 32-bit era
OS/2 2.0 was released in April 1992. It provided a 32-bit API for native programs, though the OS itself was a mixture of 16-bit and 32-bit code. It included a new GUI environment called the Workplace Shell. This was a fully object-oriented GUI that was a significant departure from the previous GUI. Rather than merely providing an environment for program windows (such as the Program Manager), the Workplace Shell provided an environment in which a user could manage programs, files and devices by manipulating objects on the screen.

[edit] DOS compatibility
OS/2 2.0 was touted by IBM as "a better DOS than DOS and a better Windows than Windows".[19] For the first time, OS/2 was able to run more than one DOS application at a time. This was so effective that it allowed OS/2 to actually run a modified copy of Windows 3.0, itself a DOS extender, including Windows 3.0 applications.

Because of the limitations of the Intel 80286 processor, OS/2 1.x could run only one DOS program at a time, and did this in a way that allowed the DOS program to have total control over the computer. A problem in DOS mode could crash the entire computer. In contrast, OS/2 2.0 could benefit from the virtual 8086 mode of the Intel 80386 processor in order to create a much safer virtual machine in which to run DOS programs. This included an extensive set of configuration options to optimize the performance and capabilities given to each DOS program. Any real mode operating system (such as Xenix) could also be made to run using OS/2's virtual machine capabilities, subject to certain direct hardware access limitations.

Like most 32-bit environments, OS/2 could however not run protected-mode DOS programs using the older VCPI interface, unlike the Standard mode of Windows 3.1; it only supported programs written according to DPMI. (Microsoft discouraged the use of VCPI under Windows 3.1, however, due to performance degradation.[20])

Unlike Windows NT, OS/2 also always gave DOS programs the possibility of masking real hardware interrupts, so any DOS program could deadlock (hang) the machine this way. OS/2 could however use a hardware watchdog on selected machines (notably IBM machines) to break out of such a deadlock. Later, release 3.0 leveraged the enhancements of newer Intel 486 and Intel Pentium processors—the Virtual Interrupt Flag (VIF), which was part of the Virtual Mode Extensions (VME)—to solve this problem.

[edit] Windows 3.x compatibility
Compatibility with Windows 3.0 (and later Windows 3.1) was achieved by adapting Windows user-mode code components to run inside a virtual DOS machine. Originally, a nearly complete version of Windows code was included with OS/2 itself: Windows 3.0 in OS/2 2.0, and Windows 3.1 in OS/2 2.1. Later, IBM developed versions of OS/2 that would use whatever Windows version the user had installed previously, patching it on the fly, and sparing the cost of an additional Windows license.[21] It could either run full-screen, using its own set of video drivers, or "seamlessly," where Windows programs would appear directly on the OS/2 desktop. The process containing Windows was given fairly extensive access to hardware, especially video, and the result was that switching between a full-screen WinOS/2 session and the Workplace Shell could occasionally cause issues.[22]

Because OS/2 only ran the user-mode system components of Windows, it was not compatible with Windows device drivers (VxDs) and applications needing them.

Multiple Windows applications ran in a single Windows session, just as they would under native Windows. To achieve true isolation between Windows 3.x programs, OS/2 could run multiple copies of Windows in parallel. This approach required considerable system resources, especially memory. It was possible to use DDE between OS/2 and Windows applications, and OLE between Windows applications only.[23]

[edit] The "Warp" years

The OS/2 Warp 3 startup screen.OS/2 version 3.0, released in 1994, was labelled as "OS/2 Warp" to highlight the new performance benefits, and generally to freshen the product image. "Warp" had originally been the internal IBM name for the release: IBM claimed that it had used Star Trek terms as internal names for past OS/2 releases, and that this one seemed appropriate for external use as well.

At the launch of OS/2 Warp in 1994, Patrick Stewart was to be the Master of Ceremonies; however Kate Mulgrew[24] of the then-upcoming series Star Trek: Voyager was substituted at the last minute.[25]

OS/2 Warp offered a host of benefits over OS/2 2.1, notably broader hardware support, greater multimedia capabilities, Internet-compatible networking, and it included a basic office application suite known as IBM Works. It was released in two versions: the less expensive "Red Spine" and the more expensive "Blue Spine" (named for the color of their boxes). "Red Spine" was designed to support Microsoft Windows applications by finding and using Windows already installed on the computer's hard drive. For this reason, the Red Spine version was also known informally and humorously as the "Ferengi" version, a reference to the Star Trek character species, because of this version's "exploitation" of existing MS Windows installations to increase OS/2's usefulness and appeal, much as a Ferengi might do. The nickname was also an homage to its immediate predecessor, "OS/2 for Windows" version 2.1, whose internal IBM codename was indeed "Ferengi".[26] "Blue Spine" included Windows support in its own installation, and so could support Windows applications without a Windows installation. As most computers were sold with Microsoft Windows pre-installed, "Red Spine" was the far more popular product. OS/2 Warp Connect — which had full LAN client support built-in — followed in mid-1995. Warp Connect only came with Windows support built in as well and was nicknamed "Grape".[5]

In OS/2 2.0, most performance-sensitive subsystems, including the graphics (Gre) and multimedia (MMPM/2) systems, were updated to 32-bit code in a fixpack, and included as part of OS/2 2.1. Warp 3 brought about a fully 32-bit Windowing system, while Warp 4 introduced the object-oriented 32-bit GRADD display driver model.

Mozilla 1.7.13 for OS/2 Warp 4.
Firefox 3.5.4 for OS/2 Warp 4.In 1996, Warp 4 added Java and speech recognition software. IBM also released server editions of Warp 3 and Warp 4 which bundled IBM's LAN Server product directly into the operating system installation. A personal version of Lotus Notes was

also included, with a number of template databases for contact management, brainstorming, and so forth. The UK-distributed free demo CD-ROM of OS/2 Warp essentially contained the entire OS and was easily, even accidentally, cracked, meaning that even people who liked it didn't have to buy it. This was seen as a backdoor tactic to increase the number of OS/2 users, in the belief that this would increase sales and demand for third-party applications, and thus strengthen OS/2's desktop numbers[citation needed]. This suggestion was bolstered by the fact that this demo version had replaced another which was not so easily cracked, but which had been released with trial versions of various applications[citation needed]. In 2000 the July edition of Australian Personal Computer magazine bundled software CD-ROMs, included a full version of Warp 4 that required no activation and was essentially a free release.

IBM also released a version of OS/2 that ran on its PowerPC workstations, and promised to produce low-cost PC style machines with the PowerPC processor. However, the PowerPC version of OS/2 was dropped less than a month after its release, and plans for supporting machines were scuttled. Such moves were seen in the industry as indicative of IBM's lack of long-term commitment to the operating system. Ironically, Microsoft Windows NT provided support for PowerPC — a chip co-developed and promoted by IBM — for over five years.

Warp 4 was the last widely distributed version of OS/2, and IBM soon announced the end of marketing the operating system to individual users.

[edit] Fading out

An ATM in Australia running OS/2 Warp.Overall, OS/2 failed to catch on in the mass market and is today little used outside certain niches where IBM traditionally had a stronghold. For example, many bank installations, especially Automated Teller Machines, run OS/2 with a customized user interface; French SNCF national railways used OS/2 1.x in thousands of ticket selling machines. Telecom companies such as Nortel use OS/2 in some voicemail systems. Nevertheless, OS/2 still maintains a small and dedicated community of followers. IBM, unlike Microsoft, charged ISVs for the OS/2 development kit (Microsoft gave the Windows SDK away for free)[citation needed] .

Although IBM began indicating shortly after the release of Warp 4 that OS/2 would eventually be withdrawn, the company did not end support until 2006-12-31.[27] Sales of OS/2 stopped on 2005-12-23. The latest IBM version is 4.52, which was released for both desktop and server systems in December 2001. A company called Serenity Systems has been reselling OS/2 since 2001, calling it eComStation. Version 1.2 was released in 2004. After a series of preliminary "release candidates," version 2.0 GA (General Availability) was released on 15 May, 2010.

IBM is still delivering defect support for a fee.[28] IBM urges customers to migrate their often highly complex applications to e-

business technologies such as Java in a platform-neutral manner. Once application migration is completed, IBM recommends migration to a different operating system, suggesting Linux as an alternative.

[edit] Virtualization
As of 2008[update], support for running OS/2 under virtualization appears to be improving in a number of third-party products. OS/2 has historically been more difficult to run in a virtual machine than most other legacy x86 operating systems because of its extensive reliance on the full set of features of the x86 CPU[citation needed]. During a pre-launch session (ESX3) with VMware in Oslo, Norway, December 2005, they specifically said that OS/2's use of the CPU's ring 2 was the reason that it would not run in VMware. A beta of VMWare Workstation 2.0 released in January 2000 was the first hypervisor that could run OS/2 at all. Later, the company decided to drop official OS/2 support[29], presumably because it would require serious work that cannot be economically justified. Although, it is still possible to boot OS/2 by setting guestOS = "os2experimental" in the .vmx file of the VM (checked with VMware Workstation 3.0 and 5.5), but trying to run different versions of OS/2 leads to frustrating problems[original research?]. Specifically, one can run OS/2 Warp 4 at Fixpack 5, but installing later Fixpacks will make the virtual machine unusable. eComStation 1.2 and 2.0 beta 4 will not install.[30] Versions 1.x will crash immediately with a "TRAP 0000". Versions 2.x are too ancient to recognize the simulated IDE CD-ROM, do not recognize the virtual SCSI hardware and can crash with "TRAP 000C" after some operations. Version 3.0 (Red) and Version 4.0 (Warp 4) seem to work fine under VMWare Server 1.04, however the 'guestOS = "os2experimental"' setting will cause an error. Changing the vmx file setting to guestOS = "other" seems to work just as well for both of these versions. Microsoft continues to support OS/2 as a hosted operating system in its Virtual PC product. OS/2 and eComStation can both be installed in Microsoft VirtualPC (checked with VPC 2004)[original research?], although a virtual machine built in VPC 2004 would not run in VPC 2007. These operating systems can be installed under VPC 2007, with and without hardware-assisted virtualization. OS/2, eCS and other operating systems should work fine with the hardware-assisted virtualization checkbox grayed out (claiming that it's enabled when it actually isn't) with Pentium III class emulation and MMX, SSE2 and Intel VT processor features[citation needed].

VirtualBox from Oracle Corporation currently supports OS/2 Warp 3, 4 and 4.5 as well as eComStation as guests. It also provides “additions” code in both Virtual PC and Virtual Server which greatly improves host-guest OS interactions in OS/2. However, attempting to run OS/2 and eComStation can still be difficult, if not impossible to run, because of the strict requirements of VT-x/AMD-V hardware-enabled virtualization and only MCP2 is reported to work in a reliable manner. [31]

QEMU and Bochs also support running OS/2 as they're full x86 system emulators and not virtualization software, and thus emulates the entire x86 architecture instead of relying on the host CPU, essentially allowing OS/2 unrestricted access to Ring 2, albeit an emulated one[citation needed].

The difficulties in efficiently running OS/2 have, at least once, created an opportunity for a new virtualization company. A large bank in Moscow needed a way to use OS/2 on newer hardware that OS/2 did not support. As virtualization software is an easy way around this, the company desired to run OS/2 under a hypervisor. Once it was determined that VMware was not a possibility, it hired a group of Russian software developers to write a host-based hypervisor that would officially support OS/2. Thus, the Parallels, Inc. company and their Parallels Workstation was born.[32]

[edit] ATMs
ATM vendors NCR Corporation and Diebold Incorporated have both adopted Microsoft Windows XP as their migration path from OS/2.

Diebold Incorporated initially shipped XP Embedded Edition exclusively, but following extensive pressure from customer banks to support a common OS, switched to XP Professional to match their primary competitor NCR Corporation[citation needed].

[edit] Security niche
OS/2 has very few native computer viruses[33]; while it is not invulnerable by design, its reduced market share appears to have discouraged virus writers. There are, however, OS/2-based antivirus programs, dealing with DOS viruses and Windows viruses that could pass through an OS/2 server.

[edit] Future
Wikinews has related news: Fans of OS/2 want IBM to release it as open-source software
There is a community of OS/2 users and developers, along with loyal company customers, hoping that IBM will release OS/2 or a significant part of it as open source. These petitions were held in 2005 and 2007, but IBM refused these petitions, citing legal and technical reasons.[34] It is unlikely that the entire OS will be open at some point in the future, because it contains third-party code, much of it from Microsoft.

In addition, IBM once made a deal with Commodore to license Amiga technology for OS/2 2.0 and above in exchange for the REXX scripting language.[35] This means OS/2 may have code not written by IBM, which can prevent the OS from being open-sourced in the future.[36][37]

OS/2 version 2.0 had such a long design cycle that its design started while OS/2 1.1 was still under development, and thus, portions of it were developed in conjunction with Microsoft, even though Microsoft never released a branded version of 2.0 (although they did release a beta in their name). IBM's contribution to versions 1.2 and earlier

mostly resides in the GUI components; however, bug fixes and substantial performance changes to the entire system in 1.3 were made by IBM [citation needed], and much more of the overall system (including the kernel) for 2.0 was developed by IBM[citation needed].

The scrapped PowerPC port did not involve Microsoft at all, and has been proposed as the basis for an open-source 64-bit version of OS/2[citation needed].

Still, the community has suggested that, even if only the IBM portion of it is made open, the missing parts could be written by the same community to form a next-generation version of the OS. Code could perhaps be integrated from the Wine or ReactOS projects. Many developers believe that these missing parts include many of the legacy 16-bit components not revised since OS/2 1.x, and are exactly the parts that should be rewritten anyway. There is an ongoing petition to open parts of the OS arranged by OS2World.com.[38] With the possibility of an open-source future for OS/2, the OS may be given a new lease of life. IBM's current and heavy involvement with several open source projects indicate that opening parts of OS/2 will not be difficult for the company. But until then, OS/2's future remains in limbo.

Open source operating systems such as Linux have already profited from OS/2 indirectly through IBM's release of the improved JFS file system which was ported from the OS/2 code base. As IBM didn't release the source of the OS/2 JFS driver developers ported the Linux driver back to eComStation and added the functionality to boot from a JFS partition. This new JFS driver has been integrated into eComStation v2.0, the successor of OS/2.

OSFree is an attempt to recreate the OS/2 Operating System (Specifically OS/2 Warp 4) from scratch and licensed under the GNU GPL. [39]

[edit] Technology
The graphic system has a layer named Presentation Manager that manages windows, fonts, and icons. This is similar in functionality to a non-networked version of X11 or the Windows GDI. On top of this lies the Workplace Shell (WPS) introduced in OS/2 2.0. WPS is an object-oriented shell allowing the user to perform traditional computing tasks such as accessing files, printers, launching legacy programs, and advanced object oriented tasks using built-in and third-party application objects that extended the shell in an integrated fashion not available on any other mainstream operating system. WPS follows IBM's Common User Access user interface standards.

Hardware vendors were reluctant to support device drivers for alternative operating systems including OS/2 and Linux, leaving users with few choices from a select few vendors. To relieve this issue for video cards, IBM licensed a reduced version of the Scitech display drivers, allowing users to choose from a wide selection of cards

supported through Scitech's modular driver design[citation needed].

WPS represents objects such as disks, folders, files, program objects, and printers using the System Object Model (SOM), which allows code to be shared among applications, possibly written in different programming languages. A distributed version called DSOM allowed objects on different computers to communicate. DSOM is based on CORBA. The object oriented aspect of SOM is similar to, and a direct competitor to, Microsoft's Component Object Model, though it is implemented in a radically different manner; for instance, one of the most notable differences between SOM and COM is SOM's support for inheritance (one of the most fundamental concepts of OO programming) — COM does not have such support. SOM and DSOM are no longer being developed.

OS/2 also includes a radical advancement in application development with compound document technology called OpenDoc, which was developed with Apple. OpenDoc proved interesting as a technology, but was not widely used or accepted by users or developers. OpenDoc is also no longer being developed.

The multimedia capabilities of OS/2 are accessible through Media Control Interface commands. The last update (bundled with the IBM version of Netscape Navigator plugins) added support for MPEG files. Support for newer formats like PNG, progressive JPEG, DivX, Ogg, MP3 comes from third parties. Sometimes it is integrated with the multimedia system, but in other offers it comes as standalone applications.

The TCP/IP stack is based on the open source BSD stack[citation needed].

[edit] Problems
Some problems were classic subjects of comparison with other operating systems:

Synchronous input queue (SIQ): if a GUI application was not servicing its window messages, the entire GUI system could get stuck and a reboot was required. This problem was considerably reduced with later Warp 3 fixpacks and refined by Warp 4, by taking control over the application after it had not responded for several seconds.[40]
No unified object handles (OS/2 v2.11 and earlier): The availability of threads probably led system designers to overlook mechanisms which allow a single thread to wait for different types of asynchronous events at the same time, for example the keyboard and the mouse in a "console" program. Even though select was added later, it only worked on network sockets. In case of a console program, dedicating a separate thread for waiting on each source of events made it difficult to properly release all the input devices before starting other programs in the same "session". As a result, console programs usually polled the keyboard and the mouse alternately, which resulted in wasted CPU and a characteristic "jerky" reactivity to user input. In

OS/2 3.0 IBM introduced a new call for this specific problem.[41]
[edit] Historical uses
OS/2 was widely used in Brazilian banks. Banco do Brasil had a peak 10,000 machines running OS/2 Warp in the 1990s. OS/2 was used in automated teller machines until 2006. The workstations and automated teller machines have been migrated to Linux.[42]

OS/2 is still used in the banking industry. Suncorp bank in Australia still ran its ATM network on OS/2 as late as 2002. ATMs in Perisher Blue used OS/2 as late as 2009, and even the turn of the decade.[43]

OS/2 also was widely adopted by accounting professionals and auditing companies. In mid-1990s native 32-bit accounting software were well developed and serving corporate markets.

OS/2 ran the faulty baggage handling system and Denver's new airport to replace Stapleton. The OS was eventually scrapped, but led to massive delays in the opening of the new airport.

OS/2 was used by radio personality Howard Stern. He once had a 10 minute on-air rant about OS/2 versus Windows 95 and recommended OS/2. He also used OS/2 on his IBM 760CD laptop.

OS/2 is still used by Shell New Zealand Petroleum Stations as the main operating system.

OS/2 was used as part of the Satellite Operations Support System (SOSS) for NPR's Public Radio Satellite System. SOSS was a computer-controlled system using OS/2 that NPR member stations used to receive programming feeds via satellite. SOSS was introduced in 1994 using OS/2 3.0, and was retired in 2007, when NPR switched over to its successor, the ContentDepot.

OS/2 is still used to control the SkyTrain automated light rail system in Vancouver, Canada.

OS/2 is still used by The Co-operative Bank in the UK for its domestic call centre staff, as a bespoke program was created to access customer accounts which cannot easily be migrated to Windows.

OS/2 is still used by the Stop N Shop supermarket chain (and has been installed in new stores as recently as March 2010).

> management, brainstorming, and so forth. The UK-distributed free demo
> CD-ROM of OS/2 Warp essentially contained the entire OS and was
> easily, even accidentally, cracked, meaning that even people who liked
> it didn't have to buy it. This was seen as a backdoor tactic to
> increase the number of OS/2 users, in the belief that this would
> increase sales and demand for third-party applications, and thus
> strengthen OS/2's desktop numbers[citation needed]. This suggestion
> was bolstered by the fact that this demo version had replaced another
> which was not so easily cracked, but which had been released with
> trial versions of various applications[citation needed]. In 2000 the
> July edition of Australian Personal Computer magazine bundled software
> CD-ROMs, included a full version of Warp 4 that required no activation
> and was essentially a free release.
>
> IBM also released a version of OS/2 that ran on its PowerPC
> workstations, and promised to produce low-cost PC style machines with
> the PowerPC processor. However, the PowerPC version of OS/2 was
> dropped less than a month after its release, and plans for supporting
> machines were scuttled. Such moves were seen in the industry as
> indicative of IBM's lack of long-term commitment to the operating
> system. Ironically, Microsoft Windows NT provided support for PowerPC
> — a chip co-developed and promoted by IBM — for over five years.
>
> Warp 4 was the last widely distributed version of OS/2, and IBM soon
> announced the end of marketing the operating system to individual
> users.
>
> [edit] Fading out
>
> An ATM in Australia running OS/2 Warp.Overall, OS/2 failed to catch on

> in the mass market and is today little used outside certain niches
> where IBM traditionally had a stronghold. For example, many bank
> installations, especially Automated Teller Machines, run OS/2 with a
> customized user interface; French SNCF national railways used OS/2 1.x
> in thousands of ticket selling machines. Telecom companies such as
> Nortel use OS/2 in some voicemail systems. Nevertheless, OS/2 still
> maintains a small and dedicated community of followers. IBM, unlike
> Microsoft, charged ISVs for the OS/2 development kit (Microsoft gave
> the Windows SDK away for free)[citation needed] .
>
> Although IBM began indicating shortly after the release of Warp 4 that
> OS/2 would eventually be withdrawn, the company did not end support
> until 2006-12-31.[27] Sales of OS/2 stopped on 2005-12-23. The latest
> IBM version is 4.52, which was released for both desktop and server
> systems in December 2001. A company called Serenity Systems has been
> reselling OS/2 since 2001, calling it eComStation. Version 1.2 was
> released in 2004. After a series of preliminary "release candidates,"
> version 2.0 GA (General Availability) was released on 15 May, 2010.
>
> IBM is still delivering defect support for a fee.[28] IBM urges
> customers to migrate their often highly complex applications to e-
> business technologies such as Java in a platform-neutral manner. Once
> application migration is completed, IBM recommends migration to a
> different operating system, suggesting Linux as an alternative.
>
> [edit] Virtualization
> As of 2008[update], support for running OS/2 under virtualization
> appears to be improving in a number of third-party products. OS/2 has
> historically been more difficult to run in a virtual machine than most
> other legacy x86 operating systems because of its extensive reliance
> on the full set of features of the x86 CPU[citation needed]. During a
> pre-launch session (ESX3) with VMware in Oslo, Norway, December 2005,
> they specifically said that OS/2's use of the CPU's ring 2 was the
> reason that it would not run in VMware. A beta of VMWare Workstation
> 2.0 released in January 2000 was the first hypervisor that could run
> OS/2 at all. Later, the company decided to drop official OS/2
> support[29], presumably because it would require serious work that
> cannot be economically justified. Although, it is still possible to
> boot OS/2 by setting guestOS = "os2experimental" in the .vmx file of
> the VM (checked with VMware Workstation 3.0 and 5.5), but trying to
> run different versions of OS/2 leads to frustrating problems[original
> research?]. Specifically, one can run OS/2 Warp 4 at Fixpack 5, but
> installing later Fixpacks will make the virtual machine unusable.
> eComStation 1.2 and 2.0 beta 4 will not install.[30] Versions 1.x will
> crash immediately with a "TRAP 0000". Versions 2.x are too ancient to
> recognize the simulated IDE CD-ROM, do not recognize the virtual SCSI
> hardware and can crash with "TRAP 000C" after some operations. Version
> 3.0 (Red) and Version 4.0 (Warp 4) seem to work fine under VMWare
> Server 1.04, however the 'guestOS = "os2experimental"' setting will

> cause an error. Changing the vmx file setting to guestOS = "other"
> seems to work just as well for both of these versions. Microsoft
> continues to support OS/2 as a hosted operating system in its Virtual
> PC product. OS/2 and eComStation can both be installed in Microsoft
> VirtualPC (checked with VPC 2004)[original research?], although a
> virtual machine built in VPC 2004 would not run in VPC 2007. These
> operating systems can be installed under VPC 2007, with and without
> hardware-assisted virtualization. OS/2, eCS and other operating
> systems should work fine with the hardware-assisted virtualization
> checkbox grayed out (claiming that it's enabled when it actually
> isn't) with Pentium III class emulation and MMX, SSE2 and Intel VT
> processor features[citation needed].
>
> VirtualBox from Oracle Corporation currently supports OS/2 Warp 3, 4
> and 4.5 as well as eComStation as guests. It also provides “additions”
> code in both Virtual PC and Virtual Server which greatly improves host-
> guest OS interactions in OS/2. However, attempting to run OS/2 and
> eComStation can still be difficult, if not impossible to run, because
> of the strict requirements of VT-x/AMD-V hardware-enabled
> virtualization and only MCP2 is reported to work in a reliable manner.
> [31]
>
> QEMU and Bochs also support running OS/2 as they're full x86 system
> emulators and not virtualization software, and thus emulates the
> entire x86 architecture instead of relying on the host CPU,
> essentially allowing OS/2 unrestricted access to Ring 2, albeit an
> emulated one[citation needed].
>
> The difficulties in efficiently running OS/2 have, at least once,
> created an opportunity for a new virtualization company. A large bank
> in Moscow needed a way to use OS/2 on newer hardware that OS/2 did not
> support. As virtualization software is an easy way around this, the
> company desired to run OS/2 under a hypervisor. Once it was determined
> that VMware was not a possibility, it hired a group of Russian
> software developers to write a host-based hypervisor that would
> officially support OS/2. Thus, the Parallels, Inc. company and their
> Parallels Workstation was born.[32]
>
> [edit] ATMs
> ATM vendors NCR Corporation and Diebold Incorporated have both adopted
> Microsoft Windows XP as their migration path from OS/2.
>
> Diebold Incorporated initially shipped XP Embedded Edition
> exclusively, but following extensive pressure from customer banks to
> support a common OS, switched to XP Professional to match their
> primary competitor NCR Corporation[citation needed].
>
> [edit] Security niche
> OS/2 has very few native computer viruses[33]; while it is not

> invulnerable by design, its reduced market share appears to have
> discouraged virus writers. There are, however, OS/2-based antivirus
> programs, dealing with DOS viruses and Windows viruses that could pass
> through an OS/2 server.
>
> [edit] Future
> Wikinews has related news: Fans of OS/2 want IBM to release it as
> open-source software
> There is a community of OS/2 users and developers, along with loyal
> company customers, hoping that IBM will release OS/2 or a significant
> part of it as open source. These petitions were held in 2005 and 2007,
> but IBM refused these petitions, citing legal and technical reasons.
> [34] It is unlikely that the entire OS will be open at some point in
> the future, because it contains third-party code, much of it from
> Microsoft.
>
> In addition, IBM once made a deal with Commodore to license Amiga
> technology for OS/2 2.0 and above in exchange for the REXX scripting
> language.[35] This means OS/2 may have code not written by IBM, which
> can prevent the OS from being open-sourced in the future.[36][37]
>
> OS/2 version 2.0 had such a long design cycle that its design started
> while OS/2 1.1 was still under development, and thus, portions of it
> were developed in conjunction with Microsoft, even though Microsoft
> never released a branded version of 2.0 (although they did release a
> beta in their name). IBM's contribution to versions 1.2 and earlier
> mostly resides in the GUI components; however, bug fixes and
> substantial performance changes to the entire system in 1.3 were made
> by IBM [citation needed], and much more of the overall system
> (including the kernel) for 2.0 was developed by IBM[citation needed].
>
> The scrapped PowerPC port did not involve Microsoft at all, and has
> been proposed as the basis for an open-source 64-bit version of OS/
> 2[citation needed].
>
> Still, the community has suggested that, even if only the IBM portion
> of it is made open, the missing parts could be written by the same
> community to form a next-generation version of the OS. Code could
> perhaps be integrated from the Wine or ReactOS projects. Many
> developers believe that these missing parts include many of the legacy
> 16-bit components not revised since OS/2 1.x, and are exactly the
> parts that should be rewritten anyway. There is an ongoing petition to
> open parts of the OS arranged by OS2World.com.[38] With the
> possibility of an open-source future for OS/2, the OS may be given a
> new lease of life. IBM's current and heavy involvement with several
> open source projects indicate that opening parts of OS/2 will not be
> difficult for the company. But until then, OS/2's future remains in
> limbo.
>

> Open source operating systems such as Linux have already profited from
> OS/2 indirectly through IBM's release of the improved JFS file system
> which was ported from the OS/2 code base. As IBM didn't release the
> source of the OS/2 JFS driver developers ported the Linux driver back
> to eComStation and added the functionality to boot from a JFS
> partition. This new JFS driver has been integrated into eComStation
> v2.0, the successor of OS/2.
>
> OSFree is an attempt to recreate the OS/2 Operating System
> (Specifically OS/2 Warp 4) from scratch and licensed under the GNU GPL.
> [39]
>
> [edit] Technology
> The graphic system has a layer named Presentation Manager that manages
> windows, fonts, and icons. This is similar in functionality to a non-
> networked version of X11 or the Windows GDI. On top of this lies the
> Workplace Shell (WPS) introduced in OS/2 2.0. WPS is an object-
> oriented shell allowing the user to perform traditional computing
> tasks such as accessing files, printers, launching legacy programs,
> and advanced object oriented tasks using built-in and third-party
> application objects that extended the shell in an integrated fashion
> not available on any other mainstream operating system. WPS follows
> IBM's Common User Access user interface standards.
>
> Hardware vendors were reluctant to support device drivers for
> alternative operating systems including OS/2 and Linux, leaving users
> with few choices from a select few vendors. To relieve this issue for
> video cards, IBM licensed a reduced version of the Scitech display
> drivers, allowing users to choose from a wide selection of cards
> supported through Scitech's modular driver design[citation needed].
>
> WPS represents objects such as disks, folders, files, program objects,
> and printers using the System Object Model (SOM), which allows code to
> be shared among applications, possibly written in different
> programming languages. A distributed version called DSOM allowed
> objects on different computers to communicate. DSOM is based on CORBA.
> The object oriented aspect of SOM is similar to, and a direct
> competitor to, Microsoft's Component Object Model, though it is
> implemented in a radically different manner; for instance, one of the
> most notable differences between SOM and COM is SOM's support for
> inheritance (one of the most fundamental concepts of OO programming) —
> COM does not have such support. SOM and DSOM are no longer being
> developed.
>
> OS/2 also includes a radical advancement in application development
> with compound document technology called OpenDoc, which was developed
> with Apple. OpenDoc proved interesting as a technology, but was not
> widely used or accepted by users or developers. OpenDoc is also no
> longer being developed.

>
> The multimedia capabilities of OS/2 are accessible through Media
> Control Interface commands. The last update (bundled with the IBM
> version of Netscape Navigator plugins) added support for MPEG files.
> Support for newer formats like PNG, progressive JPEG, DivX, Ogg, MP3
> comes from third parties. Sometimes it is integrated with the
> multimedia system, but in other offers it comes as standalone
> applications.
>
> The TCP/IP stack is based on the open source BSD stack[citation
> needed].
>
> [edit] Problems
> Some problems were classic subjects of comparison with other operating
> systems:
>
> Synchronous input queue (SIQ): if a GUI application was not servicing
> its window messages, the entire GUI system could get stuck and a
> reboot was required. This problem was considerably reduced with later
> Warp 3 fixpacks and refined by Warp 4, by taking control over the
> application after it had not responded for several seconds.[40]
> No unified object handles (OS/2 v2.11 and earlier): The availability
> of threads probably led system designers to overlook mechanisms which
> allow a single thread to wait for different types of asynchronous
> events at the same time, for example the keyboard and the mouse in a
> "console" program. Even though select was added later, it only worked
> on network sockets. In case of a console program, dedicating a
> separate thread for waiting on each source of events made it difficult
> to properly release all the input devices before starting other
> programs in the same "session". As a result, console programs usually
> polled the keyboard and the mouse alternately, which resulted in
> wasted CPU and a characteristic "jerky" reactivity to user input. In
> OS/2 3.0 IBM introduced a new call for this specific problem.[41]
> [edit] Historical uses
> OS/2 was widely used in Brazilian banks. Banco do Brasil had a peak
> 10,000 machines running OS/2 Warp in the 1990s. OS/2 was used in
> automated teller machines until 2006. The workstations and automated
> teller machines have been migrated to Linux.[42]
>
> OS/2 is still used in the banking industry. Suncorp bank in Australia
> still ran its ATM network on OS/2 as late as 2002. ATMs in Perisher
> Blue used OS/2 as late as 2009, and even the turn of the decade.[43]
>
> OS/2 also was widely adopted by accounting professionals and auditing
> companies. In mid-1990s native 32-bit accounting software were well
> developed and serving corporate markets.
>
> OS/2 ran the faulty baggage handling system and Denver's new airport
> to replace Stapleton. The OS was eventually scrapped, but led to

> massive delays in the opening of the new airport.
>
> OS/2 was used by radio personality Howard Stern. He once had a 10
> minute on-air rant about OS/2 versus Windows 95 and recommended OS/2.
> He also used OS/2 on his IBM 760CD laptop.
>
> OS/2 is still used by Shell New Zealand Petroleum Stations as the main
> operating system.
>
> OS/2 was used as part of the Satellite Operations Support System
> (SOSS) for NPR's Public Radio Satellite System. SOSS was a computer-
> controlled system using OS/2 that NPR member stations used to receive
> programming feeds via satellite. SOSS was introduced in 1994 using OS/
> 2 3.0, and was retired in 2007, when NPR switched over to its
> successor, the ContentDepot.
>
> OS/2 is still used to control the SkyTrain automated light rail system
> in Vancouver, Canada.
>
> OS/2 is still used by The Co-operative Bank in the UK for its domestic
> call centre staff, as a bespoke program was created to access customer
> accounts which cannot easily be migrated to Windows.
>
> OS/2 is still used by the Stop N Shop supermarket chain (and has been
> installed in new stores as recently as March 2010).

6> Why does Tholen enjoy shit play as much as my Morkie?

What does your classic erroneous presupposition of a question have
to do with OS/2, Gavi?

==> + AMATEUR RADIO TECHNOLOGY: SOFTWARE-DEFINED RADIO DOMINATES THE
2010 ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE

The ARRL/TAPR Digital Communications Conference (DCC) was held
September 24-26 near Portland, Oregon. The ARRL/TAPR DCC is an
international forum for radio amateurs to meet, publish their work and
present new ideas and techniques. Presenters and attendees had the
opportunity to exchange ideas and learn about recent hardware and
software advances, theories, experimental results, and practical
applications. Click here
<http://www.arrl.org/news/sdr-dominates-the-2010-arrl-tapr-digital-communicat
ions-conference>
to read Ward Silver's, N0AX, take on the event.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 IN SATELLITE FINAL PREPARATION
```

Having successfully completed vibration testing this week, the ARISSat-1/RadioSkaf V satellite will soon be on its way to Russia for final preparation and launch to the International Space Station. In Russia, the Kursk experiment will be added and the satellite will undergo additional testing. A new Russian Orlan suit battery will be shipped to the ISS separately to be installed into the satellite. ARISSat-1 is scheduled to be sent to the ISS aboard Russian Progress vehicle 41P in January 2011 and deployed during EVA (extra-vehicular activity, commonly called a spacewalk) R-28 in February 2011. Read more here <http://www.arrl.org/news/arissat-1-in-satellite-final-preparation>.

==> + ARDF UPDATE: THREE MEDALS FOR TEAM USA AT THE 2010 ARDF WORLD CHAMPIONSHIPS

By ARRL ARDF Coordinator Joe Moell, K0OV

ARDF Team USA has just returned from Croatia, the site of this year's World Championships of Amateur Radio Direction Finding (ARDF). Three team members have new medals for their collections, the most medals ever earned in the World Championships by the USA. ARDF -- also called foxhunting and radio-orienteering -- requires map-and-compass proficiency, stamina and speed, as well as skill using direction-finding gear. It is done entirely on foot. Each day, the competitors set forth into a 1700 acre woods containing five "fox" transmitters in unknown locations. The foxes for each band are all on the same frequency and each one comes on the air for 60 seconds at a time in rotating sequence. Only men and women in the prime age category are required to look for all five; those in the other age/gender categories search for fewer, in accordance with International Amateur Radio Union rules. Read more here <http://www.arrl.org/news/ardf-update-three-medals-for-team-usa-at-the-2010-ardf-world-championships>.

==> + INTERNATIONAL SPOTLIGHT: INDIAN STATE TO USE AMATEUR RADIO TO ASSIST IN LOCAL ELECTIONS

In one of the remotest parts of India, there are virtually no communication sources -- no cell phone towers, no landlines, no Internet access. But in democracies, elections are the key, even in the most isolated parts of the world. The Indian state of Kerala -- located on the western side of India's southern coast near the tip of the subcontinent -- will be holding its local elections -- called panchayat -- in October. The tribal hamlet of Idamalakkudi is located in Idukki, one of Kerala's 14 districts. It is to this village where upwards of 1400 people will gather to cast their votes for their local leadership for the Idamalakkudi tribal Grama Panchayat. And as isolated as the village is, members of the Emergency Communication Society and Idukki Ham Radio Club will be on hand to assist. Read more here <http://www.arrl.org/news/indian-state-to-use-amateur-radio-to-assist-in-local-elections>.

==> + PUBLIC SERVICE: NOMINATIONS NOW BEING ACCEPTED FOR THE GEORGE HART DISTINGUISHED SERVICE AWARD

At its July 2009 meeting, the ARRL Board of Directors established the George Hart Distinguished Service Award to be given to an ARRL member whose service to the League's Field Organization is of the most exemplary nature. The Distinguished Service Award is named in honor of George Hart, W1NJM, long-time Communications Manager at ARRL Headquarters and chief developer of the National Traffic System. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-the-george-hart-distinguished-service-award>.

==> + SOLAR UPDATE

Tad "Magnificent strong Sun...so prodigally generous of pristine light <http://www.iowrock.demon.co.uk/clearspot/gascoyne.html>" Cook, K7RA, reports: Conditions were good over the past week, with the average daily sunspot numbers up more than 5 points to 45.3, and the average solar flux rising 1.5 points to 84.4. On Wednesday, September 29, the solar flux was 90.7. The last time it was nearly this high was August 7 at 90.5, and it last topped this value at 91.8 on March 13, 2010. Despite dire predictions from some for a Maunder Minimum <http://en.wikipedia.org/wiki/Maunder_Minimum> and no more sunspots, Solar Cycle 24 continues to progress. A coronal wind on September 24 provided the moderate geomagnetic activity for the week, with the planetary A index rising to 13. Look for more information on the ARRL Web site on Friday, October 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by David Gascoyne's September Sun <http://www.iowrock.demon.co.uk/clearspot/gascoyne.html>.

==> ON THE WEB: HOW TO DELETE PAGES FROM THE "YOUR FAVORITES" FEATURE

In the past, we have discussed the "Your Favorites" feature <http://www.arrl.org/arrlletter%3Fissue%3D2010-08-26#toc02> -- a way to "bookmark" certain pages on the ARRL Web site -- and how to add your favorite pages to the "Your Favorites" drop-down menu. But what about when you want to delete these favorites? You may want to do this because you may have a duplicate Favorite listed or there's a page you no longer need to access quickly. You can delete any of your favorites in your Member Profile by following these simple steps:

- Click "Edit your profile," located just below the "Your Favorites" drop-down menu.
- Under the "Edit Info" tab, select the "Edit Favorites" section
- On the right hand side, you will see the "Remove" link next to each of your favorites. When you click on the "Remove" link, that page will then be deleted from the "Your Favorites" listing.

==> + ON THE AIR: JAPANESE AND CANADIAN AMATEURS CLAIM FIRST 2200 METER JA-VE QSO

Kunikazu Togashi, JA7NI, in Daisen, Akita, Japan, and Scott Tilley, VE7TIL, of Vancouver, British Columbia, completed a transpacific QSO on 2200 meters (137 kHz) on September 28. Tilley called this a first between Canada and Japan. The distance between CN89dk (VE7TIL) and QM09fl (JA7NI) is 7162 km. While not the DX record for 2200 meters, Tilley told the ARRL that the QSO comes in second to the distance achieved in 2004 by operators at the Wellington Amateur Radio Club Quartz Hill User Group, ZM2E, in New Zealand and Vladimir Burakov, UA0LE, in Vladivostok, Russia. Read more here <http://www.arrl.org/news/first-2200-meter-ve-ja-qso-claimed>.

==> THIS WEEK ON THE RADIO

This week:

- October 2 -- TARA PSK Rumble Contest; F9AA Cup (CW); EU Autumn Sprint (SSB)
- October 2-3 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; California QSO Party; EPC Russia DX Contest; Oceania DX Contest (SSB); International HELL-Contest
- October 3 -- F9AA Cup (SSB); UBA ON Contest (SSB); RSGB 21/28 MHz Contest; German Telegraphy Contest
- October 5 -- ARS Spartan Sprint
- October 6 -- 432 MHz Fall Sprint (local time)
- October 7 -- SARL 80 Meter QSO Party

Next week:

- October 8-10 -- YLRL DX/NA YL Anniversary Contest
- October 9 -- FISTS Fall Sprint; EU Autumn Sprint (CW)
- October 9-10 -- Arizona QSO Party; Pennsylvania QSO Party; CQ SA SSB Contest; Makrothen RTTY Contest; Oceania DX Contest (CW); Scandinavian Activity Contest (SSB); WAB HF Phone Contest
- October 10 -- SKCC Weekend Sprint; North American Sprint (RTTY); 10-10 International 10-10 Day Sprint; UBA ON Contest (CW)
- October 13 -- NAQCC Straight Key/Bug Sprint
- October 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> + SILENT KEY: FRANK CLEMENT, W6KPC (SK)

HF antenna pioneer A. J. F. (Frank) Clement, W6KPC, of Bakersfield, California, died September 23 as a result of a highway accident. He was 93 and an ARRL Life Member. A former owner of Tri-Ex Tower, Clement designed and built a number of high performance HF arrays over the course of several decades. The June 1980 issue of QST featured his article describing the Collinear Yagi Sextet. As he described it,

"[t]he antenna systems at W6KPC and OH8OS are computer controlled. The computer is programmed to search through the eight modes to see which receives the incoming signal best." His other state-of-the-art antenna projects appeared in the September 1951, May 1958 and November 1978 issues. Read more here <http://www.arrl.org/news/frank-clement-w6kpc-sk>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

<http://www.arrl.org/multimedia>

- October 15-17, 2010 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California
- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano, Texas

Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

ENFORCEMENT: FCC COMES TO AID OF HAM SUFFERING INTERFERENCE

The Federal Communications Commission has come to the aid of a ham
radio operator who has been suffering interference believed to be
coming from a neighbor's home. Amateur Radio Newsline's Norm
Seeley, KI7UP, is here with the details::

--

In its September 3rd letter to the unidentified homeowner, FCC's
Special Counsel Laura Smith wrote that the agency had received a
complaint that an electrical device, possibly a faulty doorbell
transformer, apparently located on the homeowners property may be
causing harmful radio interference to a near-by ham radio operators
station.

In her letter, Smith noted that the agency's rules state that if the
interference is caused by faulty consumer equipment the FCC has the
responsibility to require that such problems be rectified within a
reasonable time. She noted that under FCC rules, certain types of
equipment are classified as "unintentional radiators." These are
devices that generate radio frequency energy but do not intentionally
radiate it. Some common examples include computers, radio receivers
and television sets. She went on to note that some of these devices
are imported and do not comply with Commission certification standards,
and thereby result in interference to other radio services.

Smith continued by telling the homeowner that if the source of the
interference is an unintentional radiator and if the device has FCC

approval, that it should have a silver FCC label on the unit showing a certification number. But writes Smith, even an approved device can only be operated legally if it is not causing harmful interference to a licensed radio service.

Smith notes that the ham who filed the complaint has attempted unsuccessfully to resolve this problem and as a result the matter has been referred to her office. She goes on to warn the homeowner that while the Commission has confidence that most people are able to resolve these issues voluntarily, it wants to make the homeowner aware that this unresolved problem may be a violation of the agency's rules and could result in a monetary forfeiture or fine for each occurrence.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona

--

Smith then gave the homeowner the customary 30 days to advise her office as to what steps have been taken to correct this interference problem. The entire letter to the homeowner is on-line at http://www.fcc.gov/eb/AmateurActions/files/RFI-N10_09_21_5201.html (FCC)

RESCUE RADIO: HAM RADIO COORDINATES ARIZONA SCOUT RESCUE Authorities say a Phoenix Arizona Boy Scout troop had been rescued near the city of Prescott. This after radioing for help via amateur radio. The Yavapai County Sheriff's Office says one troop became stranded in the Pine Mountain Wilderness. The scouts were reportedly close to running out of drinking water and one scout had fallen ill when they radioed for help. According to a newspaper account, one troop leader was able to relay G-P-S coordinates to a Prescott resident received the troop's call for assistance on his ham radio station. He in turn notified county authorities. The scouts were rescued by a state Department of Public Safety helicopter on Saturday night, September 25th. Authorities say the scouts and the their leaders were all in good condition and did not require medical attention. The scouting troop included two adults and six children under the age of 15. They were in the mountains with other scout teams, learning to use signal mirrors in case of an emergency and climb different peaks to signal one another. But in the end it was ham radio rather than mirrors that lead to their rescue. Due to the ages of those involved, no names or call signs were included in news stories on this Arizona mountain rescue. (Arizona Republic, AZCentral.com, KOLD-TV)

RADIO POLITICS: DXCC AND THE DISSOLUTION OF THE NETHERLANDS ANTILLIES

Turning to the geo-political scene, when the Netherlands Antilles is dissolved on October 10th, it will have a major impact on amateur radio

in general and the ARRL's DXCC awards program in particular. Now, in a statement released by the ARRL, the League says that to clarify the administrative process by which the anticipated changes to the two existing Netherlands Antilles DXCC entities will be made, the ARRL Awards Committee has determined the following policies.

First, at 0400 UTC on October 10th, the two current Netherlands Antilles DXCC entities will be deleted. At the exact same time, operation from the islands of Curacao, Bonaire, Sint Maarten, Saba and St Eustatius will count for a yet-to-be-determined number of new entities. This, under the DXCC List Rule 1 for Criteria and Political Entities, and/or Geographic Rule 2. The latter deals with Separation of Entities. When the Awards Committee determines what Rule 1 or Rule 2 actions apply in each case, it will announce the final disposition of the entities on the DXCC list.

Finally, the DXCC desk says that it will not accept confirmations for these new entities until after January 1st, 2011. (ARRL, various DX newsletters)

RADIO LAW: HEMPSTEAD NY ALL BUT BANS NEW CELLPHONE TOWERS A town in suburban New York has imposed restrictions on the placement of new cellular telephone towers that are said to be among the toughest in the United States. The town of Hempstead, just east of New York City on Long Island, is a notable example on a list of municipalities tightening rules on where cell phone companies can place antennas. Despite a 1996 federal law prohibiting municipalities from considering health issues in approving locations for cellular antennas, a group of mothers concerned about what they consider risky cell towers outside their children's schools successfully lobbied the town of Hempstead. The town board claims that it adhered to FCC regulations to not consider possible health effects by instead describing the vote as a quality of life issue. The ordinance passed unanimously by the Hempstead town board prohibits wireless companies from installing equipment closer than 1,500 feet to homes, day care centers, schools and houses of worship, unless they submit compelling evidence that there is an absolute need. The town has also hired Richard Comi of the Center for Municipal Solutions as a consultant to review applications of cellular companies seeking to install new antennas or towers. Comi's company advises municipalities in 32 states on cellular tower regulations. A spokesman for one cellular provider told the press that ther new Hempstead ordenance effectively bans new cellular site construction in that township. Some observers believe that the cellular industry will have no choice other than to challenge the legality of this new Hempstead law through the Federal courts.
And while there is no mention of any other radio service being impacted by the Hempstead ordinace there arre no exemptions either.

RADIOSPORTS: THE WORLD T-HUNT CHAMPIONSHIP

A group of transmitter hunters from the USA is returning from Croatia with some medals for their efforts. Newsline's Joe Moell, K0OV has the full report.

--

The world championship of Amateur Radio Direction Finding, also called ARDF and radio-orienteering, has just concluded. It took place in beautiful forests near the Adriatic Sea coast of Croatia. According to rules of the International Amateur Radio Union, competitors had to find up to five transmitters on courses that were up to 4 miles point-to-point. They had maps and compasses, but the transmitters weren't marked on the map, of course. 386 radio-orienteers from 32 countries took part, including 14 from the USA. Our team's ages ages ranged from 25 to 68.

On the first of two competition days, Karla Leach KC7BLA of Bozeman, Montana and Ruth Bromer WB4QZG of Raleigh, North Carolina took silver medals in the team competition for women over age 60 on the 80-meter band. They didn't actually team up on the course -- that's not allowed. Everyone must find the transmitters individually, with no help. But their combined scores were second only to the Russian team's, and that's how team winners are determined. It's an excellent showing, because the Russians and other east Europeans such as Ukrainians and Czechs have been doing this for fifty years and have help from the government and the military. On the other hand, this is only USA's 7th trip to the World Championships.

On the second competition day, George Neal KF6YKN captured a bronze medal in the category for men ages 50 through 59 on 80 meters. This is George's second medal for the USA -- he got one two years ago at the World Championships in Korea.

Team USA members earned their positions by being the best at the USA national championships last year in Boston and this spring near Cincinnati. Watch for the announcement of next year's national championships, which I will be making soon. Meanwhile, you can read more about the team and see photos of them in action at www.homingin.com. That's HOMINGIN, as one word.

>From southern California this is Joe Moell, K0OV for Amateur Radio Newline.

--

Our congratulations to the winners and all who took part in this international T-Hunting event. (K0OV, ARNewsline(tm))

RADIO LOSS: HAM STATION APPARENTLY CAUGHT IN COLORADO FIRE

What may have been a large contest or DX station appears to have been lost in a fire burning last week in Colorado. Those watching the Weather Channel report to have seen video footage of a house burning. As the camera on board the news helicopter widened its shot there were three towers and antennas clearly visible on the property. At airtime, there's been no conclusive identity as to whom the house and the towers belonged to. (Various sources)

**

RADIO LAW: FCC APPROVES USE OF WHITE SPACES FOR LONG RANGE WIFI

The Federal Communications Commission has approved the use of unlicensed broadcast spectrum known as "white spaces" that the agency hopes will amount to longer-range Wi-Fi-like connections for mobile devices. In a unanimous vote on Thursday, September 23rd, the five-member FCC said the unused spectrum between TV stations will be used for such mobile broadband services in the hope of providing improved service to consumers on the go.

Technology companies including Google and Microsoft had advocated the concept while it was generally opposed by broadcasters and entertainment venues. The latter had had hoped for the same spectrum for wireless microphones displaced from other bands. Instead, the Commission reserved two vacant UHF channels for wireless microphones and other low power auxiliary service devices in all areas of the country. (CGC, PostTech.com)

**
COMMUNICATIONS SCAMS: THE MALWARE SCAM DOWN UNDER

A computer scam involving criminals targeting random computer users has been discovered in Australia, but could easily spread world-wide. Graham Kemp, VK4BB, of the WIA News has the story about how these swindlers work:

-

The scam involves a victim receiving a phone call from a person purporting to represent well known computer company, most commonly Microsoft or a company contracted by Microsoft telling the person they have a problem with their computer. The caller outlines the victim's computer is infected with a virus that has been brought to the company's attention -often via the Microsoft fault reporting process.

The caller then offers to assist the victim and will "fix the problem" by directing them to a website where the caller remotely takes over the victim's computer. The representative then shows the victim the

"issues" with their computer and suggests they pay a fee to have the problem fixed or need to purchase software to prevent this from happening in the future.

This is all just a scam. Microsoft has confirmed they are not cold-calling members of the community regarding viruses, computer problems or any other issue.

Quite simply, these offenders are just looking to trick you into giving them money," Detective Superintendent Brian Hay of the Queensland Crime Operations Command's Fraud and Corporate Crime Group said.

Giving someone you don't know remote access to your computer is basically the same as handing your credit card details over to them. With this access, an offender can easily search your computer for banking or personal details or quite easily load Malware or Trojan software onto your computer.

For the Amateur Radio Newsline, I'm Graham Kemp, of the WIA news reporting frim Ausrralia.

-

The bottom line: No matter where you are in the world, if you get a call from anyone telling you that your computer has a virus or some other problem with it, just tell them to get lost and hang up the phone. And if such a warning comes in the form of an e-mail, never under any circumstances click on a provided link. Instead, simply delete the message. You, your computer and your wallet will be happy that you did. (WIA News)

**

RADIO HAPPENINGS: NOT A LOT OF CELLPHONE FM RADIO USE

The National Association of Broadcasters has found that very few cellular handsets that have FM radio chips in them have activated the feature. In a study commissioned by NAB's Fastroad technology advocacy program and conducted by Insight Research, the trade group wanted to know how many cell phones with activated FM radio chips were sold in the U.S. in 2008 and 2009. NAB also wanted an estimate of the prospects for FM enabled cell phones and other hand-held devices in the future.

In its findings, Insight Research estimates that in 2008, 6% of the handsets sold in the U.S. were FM-enabled. This increased to about 9.5% in 2009. A previous NAB study looked at the market in 2007 and estimated that 8% of wireless devices shipped had an FM radio chip installed, though not necessarily activated.

Though several manufacturers have integrated FM into their cell phones, the only way to know for sure the percent of handsets with an installed FM chip would be to match each handset with its associated chipset. That would require reverse engineering of all handsets on the market in

2008 and 2009. According to Insight; that was beyond the scope of this study. (RW)

**

RESCUE RADIO: HOMELAND SECURITY GRANT BRINGS RACES TO COUNTY DISPATCH CENTER A Home Land Security grant is making it possible for the Ionia County Michigan Radio Amateur Civil Emergency Services to acquire new equipment and move in to an office located at the County Central Dispatch Center. Roger Packard, KD8KLUI, is the RACES and Amateur Radio Emergency Services Emergency Coordinator for Ionia County. He says that this new gear gives his group the capability to talk locally, within the state and quite literally around the world. According to the Ionia Centinal Standard, equipment began arriving last week. It adds that the Ionia County Radio Amateur Civil Emergency Services is getting the gear un-boxed and ready for operation. The newspaper added that with the amateur radio groups and emergency service organizations in Ionia County working together, it allows for more information to be gathered, and this in turn helps to keep the area safe. (Ionia Centinal Standard)

NAMES IN THE NEWS: RAC ELECTION RESULTS

Radio Amateurs of Canada has announced the re-election of several of its Directors for another two year term beginning on January 1st, 2011. Elected are William Gipps, VE7ISV and VE7XS as the Radio Amateurs of

Canada Director for British Columbia and the Yukon; Derek Hay, VE4HAY as Director for Midwest; Bill Unger, VE3XT, as the Director for Ontario North East and Everett Price, VO1DK who will serve as Director for Atlantic. All ran unopposed eliminating the need for a balloted election. (VO1PRB)

**

NAMES IN THE NEWS: AA2TX REPLACES N6GHZ ON AMSAT BOD A big surprise on the AMSAT Board of Directors. This with the announcement that Bill Ress, N6GHZ, has tendered his resignation from the Board effective September 20th. In his letter of resignation Ress noted that his business demands are leaving him with very little extra time to properly serve as a member of the AMSAT Board. In accordance with AMSAT By-Laws, Tony Monteiro, AA2TX as First Alternate will immediately assume the position of Director until the next Board election in 2011. Monteiro also serves as AMSAT's Vice President of Engineering. (WA4SCA)

**
NAMES IN THE NEWS: K3LR NAMED TO RECEIVE RCA 2010 BARRY GOLDWATER AMATEUR RADIO AWARD

And the Radio Club of America has announced that Tim Duffy, K3LR, will be the recipient of its Barry Goldwater Amateur Radio Award. The Goldwater Award is given to an RCA member in recognition of a long record of service to the public through the use of Amateur Radio. Duffy joins Richard G. Somers, W6NSV, who, as reported last week has been named to receive the Radio Club of America's Special Recognition Award. Both Duffy and Sommers will receive their honors at the organizations 101st annual Awards Banquet to be held November 19th in New York City. Duffy will also be inducted as an RCA Fellow this year. (RCA)

THE CONTEST CORNER: PA QSO PARTY OCT 9 - 10

>From the contest corner comes word that the 2010 Pennsylvania QSO Party is literally right around the corner. Amateur Radio Newsline's Mark Abramovich, N-T-3-V is here with the details:

-

They call it "the friendly party" because operators here in Pennsylvania are helpful on the bands in letting others work rare

stations and counties, even if they happen to be holding the frequency.

Michael Coslo, N3LI, vice president of the Nittany Amateur Radio Club and manager of the PA QSO Party, says he's expecting lots of activity for the contest the weekend of Oct. 9 and 10.

Coslo says for those who have worked the PA party in the past, there is one significant change in the scoring.

"We got rid of the 1.5 point QSOs for CW. We've changed that to 2 points for each CW QSO," Coslo says.

It used to be only 80-meter CW QSOs were valued at 2 points. Coslo says the change was recommended and made because it will make it easier to log and compile the final score sheets.

Coslo says there will also be a special event station on the air worth 200 points for each contact.

"The Skyview Radio Society will be operating under K3MJW and they are celebrating their 50th anniversary this year, which is a large part of why we had them do that," Coslo says. "And, they also are recovering very nicely from disaster that hit them last year in October when they had some early snowfalls which took a lot of their antennas out."

Coslo says the club is based in Westmoreland County in western Pennsylvania, but also is planning to send out some stations to rare counties nearby.

So, if you've never worked a state QSO party, this is one worth trying out.

Hope to hear you on the air.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

RADIO IN SPACE: THE NEW SOLAR SAIL PROJECT

Turning to radio news from space, word that the Planetary Society is building a spacecraft that will sail on sunlight alone and hopes to have it completed by the end of 2010. The new solar sail project, boosted by a one-million-dollar anonymous donation, is the beginning of an innovative program that will eventually launch three separate spacecraft over the course of several years.

The program starts with LightSail-1, which will demonstrate that sunlight can propel a spacecraft in Earth orbit. LightSail 2 and 3,

more ambitious and aim to reach farther into space.

Sailing on light pressure from lasers rather than sunlight is the only known technology that might carry out practical interstellar flight, helping pave our way to the stars. The project also has many practical applications that include

The solar sail propulsion is simple in concept. Light photons bounce onto a mirror-like aluminized Mylar sail. As each photon hits, its momentum is transmitted to the spacecraft. Photons have no mass but lots of energy, so a solar sail space probe requires no onboard fuel. The force acts continuously, meaning a solar sail can eventually reach speeds five to ten times greater than any chemical rocket.

Some of the objects of the new solar sail project include monitoring the Sun for solar storms, providing stable Earth observation platforms, and exploring our solar system without carrying heavy propellants.

For more information on this fascinating project take your web browser to www.tinyurl.com/solarsailing (Planetary Society, VK7TL)

**

ON THE AIR: ROYAL NAVAL AMATEUR RADIO SOCIETY CELEBRATES 50 YEARS

On the air, word that the Royal Naval Amateur Radio Society is celebrating its 50th anniversary this year with the special event callsign GB50RN on the air through October 9th. The station will operate on CW and SSB on 80 through 10 meters and on FM locally on the 2 meter and 70 cm bands. A special Anniversary Award is available to listeners and licensed amateurs who hear or contact Royal Naval Amateur Radio Society members and the special event station during the remainder of 2010. Full details can be found on the society website at www.rnars.org.uk. (GB2RS, Southgate)

**

DX

In DX, K8ND and W9VA will be the first team to arrive at Signal Point Station on Curacao between October 10th and 18th, just before the October 10th date of dissolution of the Netherlands Antilles to operate stroke PJ2. The callsign PJ2T will be used after 0400 UTC on October 10th, when Curacao becomes an autonomous country within the Kingdom of the Netherlands. QSL via reach operators home callsign.

KM0O will be operational stroke 9M6 from East Malaysia between November 26th and the 30th. His main activity will be the CQWW DX CW Contest on November 27th and 28th as a Single-Operator All Band entry. QSL to KM0O via his information on QRZ.com or electronically using Logbook of the world.

AA5UK will be operational portable EA6 from Ibiza in the Baleric Islands from October 16th to the 27th. His activity will be holiday

style on 160 through 10 meters using mostly SSB and various Digital modes. Also, look for satellite operation on various birds. QSL to his home call direct, via the bureau or electronically using either Logbook of the World or eQSL.

DG5MMW will be active as stroke 3B8 from Mauritius Island between November 1st and the 6th. His operation will likely be holiday style on the HF bands. QSL to his home call direct or via the bureau. And for those of you who have been asking for a definition of the term holiday style, it means the operator is likely on vacation and will not plan an y specific hour of the day or day of the week to take to the air.

Lastly, N3QQ plans to activate two rare locations within the next few weeks. His plans are to travel to Enewetak Atoll on October 9th. He will likely operate from Enewetak between October 12th to the 15th and then travel to Ujelang Atoll which has never been on the air. He plans to activate that rock from October 16th to the 19th. His requested callsigns are 73RRC for Ujelang Island and V73QQ for Enewetak Island. N3QQ adds that plans on this one are subject to change with little or no notice. Again, QSL as directed on the air.

(Above from vartious DX news sources)

THAT FINAL ITEM: COMMUNICATIONS WITH DANCE

And finally this week, we are all familiar with the use of RF to communicate with one another using two-way radios, but have you ever thought that it can also play a part in the creative process in developing dance? Well Sonia Cillari, who is an artist in residence at the Steim Studio for Electro Instrumental Music in Amsterdam, has.

Working with a team of engineers and software programmers, Cillari is using electronics, radio frequency energy and computer control to develop a new performance based on her own thoughts, feelings and ideas, coupled with the latest in radio technology:

--

Sonia Cillari: "I use technology because it permits me to create the illusion. So usually I do not start from technology investigating technology. That is the contrary. So usually I make my own technical devices because they are for the aim of reaching that specific research."

--

Sonia Cillari is only one of a growing number of dancers and other artists around the world who are integrating the world of electronics and communications into what they create.

And less we forget, our sincere thanks to Marlon Barrios Solano and Dance-Tech Net for making the sound clip of Sonia Cillari available to us. For those interested in the arts, more on Dance-Tech Net can be found on-line at www.dance-tech.net. (Dance-Tech.net, ARNewsline(tm))

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

In sexual language if a woman is into 'greek' that means she likes to
be fucked in her ass.

indeed not just womans tood like it too

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

==> + INTERNATIONAL SPOTLIGHT: IARU ADMINISTRATIVE COUNCIL UPDATES
WRC-12 PLANS

The Administrative Council (AC) of the International Amateur Radio
Union held its annual meeting on October 1-2 in Salinitas, El Salvador.
The AC is responsible for the policy and management of the IARU and
consists of the three IARU international officers and two
representatives from each of the three IARU regional organizations. The
IARU Region 2 General Assembly -- held October 4-8 -- also in
Salinitas, immediately follows the AC meeting. Read more here
<http://www.arrl.org/news/iaru-administrative-council-updates-wrc-12-plans>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTE EXPANDS
TO INCLUDE SPACE, ELECTRONICS IN THE CLASSROOM
```

This summer, the ARRL offered two advanced ARRL Teachers Institutes on Wireless Technology (TI-2) sessions. One session focused on how to integrate space into the classroom, while the other concentrated on basic and more advanced electronics concepts and ham radio operations. "As we gain experience as to what content is need to help teachers to better integrate basic electronics, the science of radio, microcontrollers and robotics into their curriculum, the TI program continues to be refined and expanded," said ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME. "The TI-2 program is an offshoot of that effort and provides a 'graduate level' opportunity for graduates of the regular Teachers Institute sessions." Read more here <http://www.arrl.org/news/arrl-teachers-institute-expands-to-include-space-electronics-in-the-classroom>.

==> AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES GRANT FUNDING FOR SEVEN SCHOOLS

In May 2010, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program, awarding nearly $6400 to seven schools. More than 475 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. The Executive Committee reviews applications for equipment and resource grants twice each year, in December and May. Read more here <http://www.arrl.org/news/arrl-executive-committee-approves-grant-funding-for-seven-schools>.

==> + AT THE WORKBENCH: GET READY FOR THE ARRL HOMEBREW CHALLENGE III

The ARRL has sponsored two Homebrew Challenges in the past, designed to test our members' design and construction skills by making useful amateur gear at low cost -- and sharing their results with our members. Our first ARRL Homebrew Challenge, announced in QST for August 2006, required the construction of a 40 meter, 5 W voice and CW transceiver built for less than $50 of new parts. The Second Homebrew Challenge, announced in February 2009, resulted in a number of creative designs of low cost 50 W linear amplifiers to follow the transceiver -- two for about $30, as well as a multiband amplifier with many features for somewhat more.

This time, we announce a challenge to build a transceiver in celebration of the (slow) return of sunspots. This challenge will be in two parts and readers can enter into either or both:

- A single band 25 W SSB and CW transceiver for 10 or 6 meters (Option 1), with a prize of $200.
- A 25 W SSB and CW transceiver that can be switched between 10 and 6 meters, using one or two switches (Option 2), with a prize of $300.

Read more here <http://www.arrl.org/news/get-ready-for-the-arrl-homebrew-challenge-iii>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of September -- includes seeking protection of amateur frequencies with the FCC, representing the ARRL at the local, regional and national level, training Field Organization leaders, administering ARRL awards programs and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-26>.

==> AMATEUR RADIO IN SPACE: SUMBANDILA OSCAR 67 SATELLITE ACTIVE OVER THE AMERICAS

The FM repeater aboard the South African Sumbandila OSCAR 67 (SO-67 <http://www.amsat.org/amsat-new/satellites/satInfo.php?satID=71&retURL=/satellites/status.php>)
satellite will be activated over North and South America until Sunday, October 10. According to the announcement from AMSAT-NA Vice President of Operations Drew Glasbrenner, KO4MA, the repeater will be available for 15 minutes beginning at the following times (UTC):

- October 7: 11:55, 14:51 and 17:57
- October 8: 13:04, 16:06, and 19:10
- October 9: 11:18, 14:14 and 17:20
- October 10: 10:58, 13:56 and 17:02

The SO-67 repeater receives at 145.875 MHz FM (233.6 CTCSS) and re-transmits at 435.345 MHz FM. Local pass predictions are available from AMSAT-NA's online calculator <http://www.amsat.org/amsat-new/tools/predict/>. -- Activity periods calculated by Ed Clayo, N8BBQ

==> DX NEWS: PJ PANDEMONIUM -- OPENING OCTOBER 10 ON AN HF BAND NEAR YOU

By H. Ward Silver, N0AX

No, it's not a colorized re-release of a 1960s B-grade beach movie <http://en.wikipedia.org/wiki/B_movie>. On Sunday, October 10, five islands in the Caribbean are all changing their governmental status at the same time: Saba, St Eustatius, Bonaire, St Maarten and Curacao. Known collectively as the Netherlands Antilles, these islands have up to now been an autonomous part of the Kingdom of the Netherlands. Some will remain within the Netherlands as "special municipalities" and some will become independent nations within the Kingdom of the Netherlands, just as the island nation of Aruba did back in 1986. What this means for the HF bands is a lot of interference as the new DXCC entities are born: Two DXCC entities (the island pair of Bonaire & Curacao and the three-island group of St Maarten, Saba and St Eustatius) will be deleted from the DXCC list of active entities and be replaced by up to five new entities! Read more here <http://www.arrl.org/news/pj-pandemonium-opening-october-10-on-an-hf-band-nea

r-you>.

==> + PUBLIC SERVICE: NOMINATIONS NOW BEING ACCEPTED FOR THE 2010 ARRL INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2010 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-2010-arrl-humanitarian-award>.

==> + ON THE AIR: AMATEURS ARE ON THE AIR IN CELEBRATION OF NATIONAL WILDLIFE REFUGE WEEK

Amateur Radio operators will be on the air in observance of the 2010 National Wildlife Refuge Week <http://www.arrl.org/news/nwrweek-radio.info>, scheduled for October 9-17. This event will coincide with festivals and special events at refuges that help connect people with nature at the country's more than 500 National Wildlife Refuges. Combining Amateur Radio's communication capabilities with enjoyment of the outdoors to help others learn about the National Wildlife Refuge System (NWRS) is the goal of the amateur stations participating in the nine-day event. Hams begin operating from a number of wildlife refuges this week under guidelines established in cooperation with the US Fish and Wildlife Service (USFWS). Only those stations that have authorized, responsible access to refuges are sanctioned by this event. For the first time, the US Senate has passed a resolution officially recognizing National Wildlife Refuge Week. The resolution "recognizes the importance of national wildlife refuges to wildlife conservation and the protection of imperiled species and ecosystems" and "reaffirms the support of the Senate for wildlife conservation and the National Wildlife Refuge System." Visit the National Wildlife Refuge Week Ham Radio Web site <http://nwrweek-radio.info> for more information and a list of participating ham radio stations.

==> + SOLAR UPDATE

Tad "Here comes the Sun King; everybody's laughing, everbody's happy <http://www.youtube.com/watch?v=tgLCGurproA>" Cook, K7RA, reports: Solar activity quieted over the past week. There were no sunspots on Wednesday, October 6, and the average daily sunspot number declined nearly 18 points to 27.6, compared to the previous week. The average daily solar flux values were off more than 3 points to 81. The predicted solar flux for the next 10 days -- October 7-16 -- is 75, 76, 78, 78, 80, 79, 80, 80, 82 and 81. Looking at the STEREO image early Thursday morning <http://stereo.gsfc.nasa.gov/> shows an active region in our Sun's southern hemisphere, just over the eastern horizon.

Perhaps this will bring more sunspots. Look for more information -- including an updated solar forecast and reports on 15 meter activity -- on the ARRL Web site on Friday, October 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Lennon's Here comes the Sun King <http://www.youtube.com/watch?v=tgLCGurproA>.

==> ON THE WEB: HOW TO SUBMIT A NEWS STORY

Visit the News Tips <http://www.arrl.org/news-tips> page on the ARRL Web site to submit a news story to our Editorial team. Your Amateur Radio-related news tip could end up in QST, online or in The ARRL Letter.

Here are a few hints from QST Managing Editor Joel Kleinman, N1BKE:

- Include contact information: If the person sending the tip isn't the main point of contact, be sure to include that person's contact information.
- Photos: When a story has a photo or two included, attach it to an e-mail message addressed to news@arrl.org and include caption information, as well as the name and call sign of the photographer.

For those submitting a complete item rather than just a tip, it's best to include the usual suspects:

- Who? Who was involved?
- What? What happened (what's the story)?
- When? When did it take place?
- Where? Where did it take place?
- Why? Why did it happen?
- How? How did it happen?

==> THIS WEEK ON THE RADIO

This week:

<http://www.arrl.org/multimedia>

- October 8-10 -- YLRL DX/NA YL Anniversary Contest
- October 9 -- FISTS Fall Sprint; EU Autumn Sprint (CW)
- October 9-10 -- Arizona QSO Party; Pennsylvania QSO Party; CQ SA SSB Contest; Makrothen RTTY Contest; Oceania DX Contest (CW); Scandinavian Activity Contest (SSB); WAB HF Phone Contest
- October 10 -- SKCC Weekend Sprint; North American Sprint (RTTY); 10-10 International 10-10 Day Sprint; UBA ON Contest (CW)
- October 13 -- NAQCC Straight Key/Bug Sprint
- October 13-14 -- CWops Mini-CWT Test

Next week:

- October 16 -- Iowa QSO Party; Feld Hell Sprint; Microwave Fall Sprint (local time)
- October 16-17 -- New York QSO Party; JARTS WW RTTY Contest; ARCI Fall QSO Party; Worked All Germany Contest; PODXS 070 Club 160 Meter Great Pumpkin Sprint (local time)
- October 17 -- Asia-Pacific Fall Sprint (CW)
- October 17-18 -- Illinois QSO Party; Run for the Bacon QRP Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

- October 15-17, 2010 -- ARRL Pacific Division Convention <http://www.pacificon.org/>, San Ramon, California
- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>&#65533; featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano, Texas

Amateur Radio Newsline(tm) Report 1730 - October 8 2010

Amateur Radio Newsline report number 1730 with a release date of
Friday, October 8 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. The IARU Administrative Council meets in El
Salvador to prepare for W-R-C 12; a true world-wide ham license could
be on its way; license restructuring comes to South Africa and
Indonesia to launch a pair of ham-sats in 2011. Find out the details on
Amateur Radio Newsline(tm) report number 1730 coming your way right
now.

RADIO POLITICS: IARU ADMINISTRATIVE COUNCIL UPDATES WRC-12 PLANNING
The Administrative Council of the International Amateur Radio Union or
IARU held its annual meeting on October 1st and 2nd in El Salvador.
Amateur Radio Newsline's Norm Seeley, KI7UP, takes a look at what was
accomplished:
--
The Administrative Council is responsible for the policy and management
of the IARU. It is made up of the three IARU international officers
and two representatives from each of the three regional organizations.
And this group covered a lot of ground in the two days that they were
allotted to them. Perhaps most important issue faced was the IARU
positions on relevant agenda items for the 2012 World
Radiocommunication Conference also known as WRC-12. These items were
reviewed and updated in light of developments since the 2009
Administrative Council meeting. Desired agenda items for future World
Radiocommunication Conference were also considered while progress on
the action plan for developing support for amateur radio frequency
allocations were reviewed and the plan updated for the period through
the WRC-12 meeting. With electromagnetic compatibility issues becoming
more and more of a problem for radio amateurs world-wide, a need was
identified for an IARU coordinator to handle this issue. A
sub-committee of the Administrative Council will develop suitable terms
of reference for this. Future involvement by the IARU in the Global
Amateur Radio Emergency Communications or GAREC Conference was
discussed. The decision was to request additional information from the
conference organizers. The theme "Amateur Radio: The first
technology-based social network" was adopted for the next World Amateur
Radio Day. That's slated for April 18, 2011. Lastly, a report was
received from the IARU 2025 Committee, which is developing a concept

for a new organizational structure for the IARU. The committee was asked to refine its report into a form that can be presented to member-societies for their consideration. This is only a quick overview of what was discussed at the conference. For a more detailed report, please take your web browser to tinyurl.com/2ayetpw For the Amateur Radio Newsline, I'm Norm Seely, KI7UP, watching the ham radio political scene from Scottsdale, Arizona.
--
The next scheduled in-person meeting of the IARU Administrative Council will be held in the vicinity of Sun City, South Africa, on August 19th and 20th of 2011. This, in conjunction with the IARU Region 1 Conference that will take place August 13th to the 18th at or near the same location. (Southgate)
**
RADIO POLITICS: WORLD HAM RADIO LICENSE MAY BE ON ITS WAY

In other news out of the conference, Radio Amateurs of Canada reports that a true world wide ham radio license could be in the hobby's future.

Daniel Lamoureux, VE2KA, is the Vice President International Affairs for Radio Amateurs of Canada. He says that El Salvador's Superintendent of Communications surprised everyone at the end of his speech by announcing that his nation had decided to sign the International Amateur Radio Permit or IARP Agreement.

For those of you not aware, the IARP Agreement is designed to allow ham radio operation in certain countries of the Americas without seeking a special license or permit to enter and operate from that country. According to Lamoureux, this move by El Salvador is a very significant and means that in a short time the IARPand the pan-European Conference of Postal and Telecommunications Administrations or CEPT International Amateur licenses might be harmonized and become one. (RAC, VE2KA)

**

RADIOS FUTURE: MAJOR SURVEY OF UK HAMS LAUNCHED BY RSGB

At the recent Radio Society of Great Britain National Hamfest the U-K national society announced the launch a major survey of all United Kingdom radio amateurs. The objective of the survey is to gather as much information as possible on 21st century amateur radio operation in that nation.

According to the announcement, the survey, which is internet based, will run for three months. The data collected will be used to determine the direction that amateur radio takes over the next 10 to 20 years.

Full details of the survey will shortly appear in the amateur radio press while notices of invitation will be placed on all amateur radio reflectors and will appear shortly on the RSGB website. (RSGB)

**

RESTRUCTURING: SOUTH AFRICA FACES MAJOR LICENSE STRUCTURE CHANGES

A new round of amateur radio license restructuring appears to be taking pace in South Africa. This, with word that ICASA, the Independent Communications Authority of South Africa has published the draft of proposed changes to that nations radio regulations in the September 26th Government Gazette. We have more in this report from Bruce Tennant, K6PZW:

--

According to the South African Radio League, there are some significant changes to regulations pertaining to telecommunications in general and amateur radio in particular contained in the Independent Communications Authority of South Africa draft rules revision proposal. These include the disappearance of the Zed R license prefix and, with that, the requirements for one of the five upgrade criteria.

Those having passed the Class A examination will be allocated a Zed-S callsign. The South African Radio League says that it plans to discuss with ICASA the procedure by which Zed-R license holders will be able to upgrade to Zed-S at the next liaison meeting.

But this is not where the restructuring will end. If placed into communications law, there will be a new age restriction placed on the South African class B license. The Class B license will be available only to those under the age of 20. Holders of this license will be expected to take and pass the nations class A examination before they reach age 25. After that, the Class B license along with its Zed U prefix will be cancelled.

As to reaction from the South African ham radio community? The South African Radio League says that these are significant changes to regulations affecting to amateur radio in that nation. It says that the organization will study the draft regulations and will hold a discussion during the President's Net. That's slated to be held on Sunday, October 17th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--

The Independent Communications Authority of South Africa says that it will be holding a public hearing on the new rules on December 1st and 2nd. Soon after that date the final regulations are expected to be enacted into law. (SARL)

RESCUE RADIO: NEW NEVADA RADIO STATION TO INCLUDE HAM STATION A tower is in place for a new broadcast radio station that will have a ham radio connection. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:
--
The station is KQLN on 91.3 MHz FM and will serve Alamo, Nevada, in the Pahranagat Valley. This, from a site that sits on Nevada Highway 93 with coverage expected to be 50 miles in all directions. The owner of KQLN is Harvey Caplan, KD7FJJ. Jerry Fuge, KC6ILH the Emergency Coordinator in Nevada's Northern Nye County says that Caplan is a member of the regions ARES/RACES organization that already has a repeater located at another of Caplan's radio stations. That one is located in the town of Pahrump. Thats a city made famous by overnight talk show host Art Bell, W6OBB. In a recent interview, Caplan told the Lincoln County Record that the stations transmitter site will house both KQLN along with an amateur radio station that will have coverage over most of the populated area of the valley. The ham station will be battery-powered and charged by a solar power panel. Caplan told the newspaper that almost everyone associated with the station called Alamo Radio is not only a licensed amateur radio operator, but also a member of Amateur Radio Emergency Service. He describes ARES as a national organization trained to respond to community emergencies by setting up two-way radio stations in hospitals, public safety areas, or even on mountain tops. Kaplan notes that amateur radio can get messages through when conventional public safety radio systems fail, or to help when such systems may become overloaded. He says that some messages can be urgent, to fire or police, or simply relay health and welfare information to relatives of those in a disaster zone. Either way says Caplan, they could be life saving. For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.
--
In the newspaper article Caplan added that he hopes that others will want to serve the community and the valley by becoming licensed radio amateurs. He also looks forward to having KQLN-FM operating by the time of the November elections if at all possible. (Lincoln County Record, Nevada ARES)

ENFORCEMENT: TWO BOSTON UNLICENSED BROADCASTERS FINED $15000 EACH

The FCC fined two Boston area men for operating an unlicensed station on 99.7 MHz.

The story goes back to the fall of 2009. That's when the local FCC office received a complaint from one of the city's licensed stations about the unlicensed stations operation. Field agents traced the signal to an apartment building in the Mattapan neighborhood of the city. The agents saw a roof mounted antenna with its coaxial feed line leading to a basement window. The agents took field strength measurements and

determined that the signals exceeded the limits for unlicensed Part 15 operation.

Some time later, two men identified as Lloyd Morris and Robert Brown, met with the FCC agents. According to the agency, it was at that meeting that the pair admitted they owned and operated the station. The agents explained the potential penalties for such a violation and Morris and Brown agreed to shut off the transmitter and did.

On October 15th of 2009, the Boston Office issued Notices of Unlicensed Operation to Morris and Brown by mail. According to the FCC it never received a response from either man. And that's where the matter stood until this past February when the FCC again receiving complaints that the same unlicensed station was back on the air. Agents located the source as the same building and again documented the antenna on the roof, he coaxial downlead and the stations signal strength as again exceeding what is permitted by Part 15 of its rules.

Now, acting on the evidence before it the FCC has issued Morris and Brown each a Notice of Apparent Liability to Monetary Forfeiture in the amount of $15,000 each. The two were given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT: HELP NEEDED IN FINDING CHURCHES ON 10 METER FM Illegal broadcast transmitters in churches are again being heard across the great Atlantic pond, and your help is needed to find them. Ger McNamara, EI4GXB, is the Irish Radio Transmitters Society's IARU Intruder Watch coordinator. He is asking hams and SWL's to again keep an ear on 28.265 FM. This, based on incursions by churches on this frequency heard throughout Europe with signals equaling 59 +20db. In addition, McNamara days that there have also been reports of a Church in the Dublin area transmitting on 28.030 Mhz. This is in the CW portion of the 10 meter band. No matter where in the world you are, if you hear either of these illegal operations, please send a detailed report to EI4GXB. His e-mail is ei4gxb (at) gmail (dot) com. If you live in Ireland please also copy your report to telecommunications regulator ComReg as well. (IRTS)
**
RADIO LAW: SENATE BACKS HOUSE ON TV VOLUME LAW The United States Senate unanimously passed a bill late Wednesday, September 27th to require television stations and cable companies to keep commercials at the same volume as the programs they interrupt. The legislation, sponsored by Senator Sheldon Whitehouse of Rhode Island requires the FCC to adopt its recommendations as regulations within a year and begin enforcing them a year later. The House of Representatives had already passed similar legislation. Before it can become law, minor differences between the two versions have to be worked out when Congress returns to Washington after the November 2nd election. Oh yes, the title of this law is the Commercial Advertisement Loudness Mitigation Act, better known by the acronym CALM. (Published reports)

**

EMERGING TECHNOLOGY: CCTC IMAGE PROCESSING TO COUNTER TERRORISM

The VTT Technical Research Centre of Finland is developing image processing technology that will improve surveillance of abandoned luggage in public places.

Its well known that across Europe there are numerous Closed Circuit TV systems in use in public places. These installations have the ability to gather large amounts of image material. But at this time there are no effective ways to analyze the mass of video data automatically and recognize potential risk situations.

Now comes VTT which is involved in a European Union research project called SUBITO. SUBITO is aimed at developing Information Technology or I-T solutions. An example might be luggage left in a public place which may contain explosives or other dangerous substances. Terror attacks based on this tactic have already claimed taken place. Now, with the help of an application developed as part of the project, cameras recognize abandoned luggage automatically and rapidly identify, locate and track the person who left it there.

VTT says that SUBITO enhances security in a cost-efficient manner, since the new technology can be built on the foundations of existing Closed Circuit TV systems. Individual privacy issues are thus easier to take into account, because the end users must already take note of them in operating the system. (Science OnLine)

RETRO RADIO: 6 METER AM IN THE SACRAMENTO VALLEY

If you operate 6 meter AM on the Pacific Coast, then you might want to point your beam toward the central part of the state of California. Larry Hogue, W6OMF, reports over the VHF Reflector that Mondays at 7 PM Pacific time there is a gathering of the AM enthusiasts on 50.4 Mhz. Most stations are in the Sacramento valley area with net control in the town of Camino. And if 6 meters magically opens up as it does from time to time, this is a chance to snag what's quickly becoming a historic mode of VHF's past. (VHF Reflector)

NAMES IN THE NEWS: TALK RADIO HOST ART BELL W6OBB REPORTED ACTIVE FROM MANILA

Some names in the news. First up this week is famed overnight talk radio host Art Bell, W6OBB. The Ohio Penn DX Newsletter reports that Bell has recently been heard as 4F1AB from Manila, in the Philippines where he now lives. His activity seems to be on 20 and 15 meters SSB after 1200 UTC. Information on QRZ.com states that he is active on 40 through 10 meters, and he often listens on 14.315 MHz. QSL's go to W6OBB via his Nevada address. (OPDX)

**

NAMES IN NTHE NEWS: VA6KM APPOINTED AS RAC ALBERTA SECTION TRAINING COORDINATOR

And Ken McPherson VA6KM has been appointed as Radio Amateurs of Canada's Training Coordinator for the organizations Alberta Section. McPherson has been a radio amateur since 1993. He served as a Naval Combat Information Operator as well as in the Armored Reserves in Ottawa. His background in training includes time as a Cadet Instructor, First Aid Instructor and Scuba Instructor. (RAC)

THE CHANGING OF THE GUARD: FORMER TRI-EX TOWER OWNER FRANK CLEMENT, W6KPC, S.K.

The changing of the guard continues with the sad news that High Frequency antenna pioneer Frank Clement, W6KPC, of Bakersfield, California, has become a Silent Key. Clement, age 93, died on September 23rd as a result of a highway accident.

Frank Clement, W6KPC, was best known in ham radio circles as the former owner of Tri-Ex Towers. He also designed and built a number of high performance High Frequency antenna arrays over the course of several decades.

In 2006, The Radio Club of America honored W6KPC with its Barry M. Goldwater Amateur Radio Award. The award recognized his accomplishments in designing and manufacturing towers and designing and constructing his famed Yagi Sextet. The Sextet was once described as North America's largest amateur radio phased HF Yagi system.

Frank Clement is survived by his wife, Chong Ye. A graveside service was held on October 4 in, Delano, California. Memorial contributions can be made to The A. J. F. Clement Memorial Fund, Kern Schools Federal Credit Union, PO Box 9506, Bakersfield, CA 93389. (QCWA, RCA, ARRL, others)

**
HAM RADIO IN SPACE: INDONESIA TO LAUNCH TWO HAMSATS A news report out of Jakarta says that the Indonesian National Institute of Aeronautic and Space will launch two satellites carrying amateur radio transponders in the second quarter of 2011. Known as LAPAN-A2 and

LAPAN-ORARI,, the report appears to indicate that the satellites will be carried to orbit on board a domestic Indonesian manufactured rocket. An earlier report in February indicated that LAPAN-ORARI would be launched from India. But the article comments on the effect of import restrictions which has led the National Institute to develop local production to enable the country to have an independent rocket launch facility. The entire report is on-line at tinyurl.com/lapan (Southgate, others)
**

HAM RADIO IN SPACE: AO-51 BACK ON LINE

The AMSAT OSCAR 51 ham satellite is back on the air following a software crash on September 26th. According to control station Mark Hammond, N8MH, reloading software was completed and as of September 29th, and the bird is in good operating condition.

According to AMSAT, the AO-51 Command Team has configured the satellite for simultaneous operation of both the S-band and U-band transmitters. The tradeoff is that U-band will be low in power at around 250 milliwatts.

Also, please notice that 145.880 MHz is being used as the uplink. However, the satellites operational configuration could be updated or changed without much advance notice. (AMSAT)

**

DX

In D-X, word that members of the Algarve STAR DX Team will be active as CR6A from South Lourenzo Fortress located inside Ria Formosa Natural Park between Armona Island and Culatra Island. Activity will be on all bands as possible on CW and SSB. This Fortress is totally submerged except in the lower tide. QSL via CT1GFK.

NE8Z will be operational as C6AEZ from New Providence Island between October 11th and the 16th. Activity will be on 80 through 10 meters using CW and SSB. QSL via NE8Z.

Members of the Isle of Man Amateur Radio Society will be active as GT1IOM from the town of Douglas between October 16-17th. This operation is taking place during the 53rd Scouting Jamboree on the Air. QSL via GD1MIP.

Lastly, the South Korea's Cheonan Asan Ham Club and possibly other guest operators will be active as D7G20 between October 29th and November 28th. This, to celebrate the upcoming G20 Summit Meering in Seoul. Operations by D7G20 are expected to be on 80 through 6 meters using CW, SSB and RTTY. QSL to the G20 Seoul Summit 2010 Special Callsign, P.O. Box 90, Cheonan, 330-600, South Korea.

(Above from various DX news sources)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Library of Congress, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline'sT only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm David Black, KB4KCH, at the South-East bureau in Birmingham, Alabama, saying 73 and we thank you for listening.

no one mentioned coded messafges except you,, only ciphers and
ciphering.

Of course, NOW I see the emcom people finally got their anti-technical
attitude passed into fcc law (or fcc rules, if you prefer),

ever since the FCC allowed emergency drills by employees, that's about
all I hear on ham radio anymore in the evenings and on weekends.

No more technical discussions. just practice emcom drills.

Nothing wrong with emcom drills, but

no more technical talk is allowed on ham radio since it's against FCC rules. You can no longer cipher the formulas for the value of resistors, capacitors, and other electronic circxuits because as several people in the newsgroups have already said, "ciphering on ham radio is illegal" and "ciphering isn't allowed on ham radio", and "ciphering on gham radio is against FCC rules".

Emcom finally got their way to eliminate all technical talk from ham radio.

Which was one of the main purposes of ham radio for decades and throughout the whole 20'th century, but no more in the 21'st century.

I can't believe someone can be as ignorant as you sound in this post. I have heard non of the drills you speak of on the air. maybe they are local repeaters where you live - but they are also not allowed to do this every weekend - that would still be against the rules. As for the technical talk BS you are spewing - you're a candidate for the nuthouse.

It's a Fuckwit

He seems to be trying to pull some pity for himself
Buggered if I know for what though

But apparently driving around the streets like a fuckwit and getting
pulled over for driving like a fuckwit has nothing to do with his
driving like a fuckwit. It's because he has a CB antenna on his car

Some "Home Owner Associations" pick on him, not because he's an annoying
fuckwit who disturbs the neighbours by acting like a fuckwit. It's
because he has a CB antenna on his car

Seems to me that if he didn't act like a fuckwit he wouldn't have to get
on here and complain about all the people who have a problem with him
acting like a fuckwit

He's also a lying fuckwit
he said he was going and not going to post here anymore

just ignore the fuckwit

Kev

Has anyone noticed how all the low life bottom feeders are always ready to put down the Jews? Anyone who has been to Eretz Israel can attest to what I say. The Jewish men and women there are very beautiful especially the Sabras that are born on Eretz Israel. All you have to do is visit Israel and you can see for yourself one reason HaShem has picked the Jews as His precious treasured people. If I could marry a Jewish Sabra I'd be in seventh heaven. Not only are the Sabra Jewish women extremely beautiful but they are very modest, kind and generous and they can cook better than any beings in existence. Jewish women are good women. Instead of acting like whores and getting all tattooed up with piercing and such all over their bodies like the repulsive heathen women the Jewish women concentrate and being good cooks and good wives because they know the best way to secure a man's love is by feeding him well.

"Sabra" jew girls are just like any other circumcised ragheads, Yochi:
hair on their arms, legs, back, and under their noses.

One of his many lies is the one about an ordinance that disallows a
homeowner from having vehicles if they are "Three model years or more" of
age. He left out the rest of the definition in which the ordinance states
that the vehicles must also be parked "in view of a public right-of-way and
are inoperable."
The guy is simply trying to stir the CB types with his silliness.

LOL!!!!

Thanks for all the entertainment you keep providing at your expense, day in
day out, you hilarious dumb miserable psycho!

Looking forward to your next idiotic and psychotic "replies"!

Your master

The Peeler

Anybody that starts their post with an "X-NO-ARCHIVE" is a troll
and needs to be ignored. It must be nice to be able to sit around
the abode all day and think of this silly stuff. Also notice how
he cross-posts the trolling to many news groups at the same time.

I agree with you.
I had long ago accused this person of being a Troll simply because it is so
easy to see through his scat.

He apparently enjoys his forays of misinformation and lies.
One would think that he has too much time on his hands.

==> + PUBLIC SERVICE: AMATEUR RADIO OPERATORS PROVIDE COMMUNICATIONS SUPPORT DURING CHILEAN MINE RESCUE

As the last of the 33 miners who were trapped 2300 feet deep inside the San Jos&#65533; Mine -- located about 27 miles from the Chilean town of Copiap&#65533; in the Atacama Desert -- rose to the surface at 0055 UTC on October 14, the world cheered in unison. The miners, who were underground for 69 days -- the longest time ever for miners to be trapped and survive -- all emerged relatively healthy. Amateurs with the Radio Club Copiap&#65533;, CE1CPI, provided communication support between the authorities and emergency equipment operators inside the San Jose Mine complex, as well as with family of the trapped miners in the

complex and authorities in Copiap&#65533;. Read more here
<http://www.arrl.org/news/amateur-radio-operators-provide-communications-support-during-chilean-mine-rescue>.

==> + DXCC NEWS: FOUR NEW ENTITIES PLACED ON DXCC LIST

With the dissolution of the Netherlands Antilles on October 10, two
now-deleted DXCC entities are now four new DXCC entities, effective
October 10, 2010. The island pair of Bonaire and Cura&#65533;ao (PJ2 and PJ4,
the Leeward Islands) and the three-island group of Sint Maarten, Saba
and St Eustatius (PJ5, PJ6 and PJ7, the Windward Islands) have been
deleted from the DXCC list of active entities and replaced with four
new entities. Not since the aftermath of World War II -- with so many
new European entities -- and the break-up of the French colonies in
Africa in the early 1960s -- have so many new DXCC entities come into
existence all at once.

On October 10, the US Department of State recognized the dissolution of
the Netherlands Antilles, placing the new entities on its Dependencies
and Areas of Special Sovereignty List, saying that "Cura&#65533;ao and Sint
Maarten (the Dutch two-fifths of the island of Saint Martin) became
autonomous territories of the Kingdom of the Netherlands. Bonaire,
Saba, and St Eustatius now fall under the direct administration of the
Netherlands."

According to the DXCC rules
<http://www.arrl.org/files/file/DXCC/DXCC%20Rules.pdf>, entities may be
added or removed from the DXCC List
<http://www.arrl.org/country-lists-prefixes> as a result of political
or geographic change. These new entities qualified to be listed on the
DXCC List under Section 2, Rule 1(b) of the DXCC rules: "The entity
contains a permanent population, is administered by a local government
and is located at least 800 km from its parent. To satisfy the
'permanent population' and 'administered by a local government'
criteria of this sub-section, an Entity must be listed on either (a)
the US Department of State's list of 'Dependencies and Areas of Special
Sovereignty' as having a local 'Administrative Center,' or (b) the
United Nations list of 'Non-Self-Governing Territories.'"

With so many DXCC entities all coming into being at the same time,
many amateurs made their way to Cura&#65533;ao (PJ2T, PJ2/OH1VR, PJ2/PB2T,
PJ2A and PJ2MI), Sint Maarten (PJ7E, PJ7MF), Bonaire (PJ4B, PJ4D, PJ4I,
PJ4LS and PJ4W), Saba (PJ6A) and St Eustatius (PJ5/AA4NC, PJ5/AH6HY and
PJ5/K1XM) to put these new ones on the air. Beginning at 0400 UTC on
October 10, the airwaves were filled with those looking to snag these
new entities; just days after the entities became "live," stations on
the islands had made more than 15,000 QSOs on SSB and CW.

Per the ARRL DXCC Desk, no confirmations for these new entities will be
accepted until after January 1, 2011; other administrative changes will
be announced as they are finalized. Look for more information on the

ARRL Web site, in upcoming editions of The ARRL Letter and in the December 2010 issue of QST.

==> + INTERNATIONAL SPOTLIGHT: ARRL MARKS 27TH YEAR OF HOSTING USTTI AMATEUR RADIO ADMINISTRATION COURSE

Students from the Philippines, Ethiopia, Ghana, Brazil and Nigeria attended the United States Telecommunications Training Institute (USTTI) Amateur Radio Administration Course at ARRL Headquarters September 27-October 1. ARRL Chief Technology Officer Brennan Price, N4QX, coordinated the session and led the course. ARRL Assistant to the Chief Executive Officer and Meeting Planner Lisa Kustosik, KA1UFZ, coordinated ARRL's participation with USTTI. Read more here <http://www.arrl.org/news/arrl-marks-27th-year-of-hosting-ustti-arac-course>.

==> INTERNATIONAL SPOTLIGHT: DR HAMADOUN TOUR&#65533;, HB9EHT, RE-ELECTED ITU SECRETARY-GENERAL

On October 7 during the morning session of the 18th ITU Plenipotentiary Conference -- held in Guadalajara, Mexico -- Member States of the International Telecommunication Union (ITU) re-elected Dr Hamadoun Tour&#65533;, HB9EHT, of Mali, as ITU Secretary-General. This will be his second four-year term. Dr Tour&#65533;, who ran unopposed, won the position with 151 votes, with 157 countries present and voting.

The next day, Fran&#65533;ois Rancy of France was elected as Director of the ITU's Radiocommunication Bureau <http://www.itu.int/plenipotentiary/2010/elections/results/index.html#br> (BR), capturing 90 of 157 votes. The BR plays a key role in global communications, managing the distribution of international frequency spectrum and the allocation of satellite orbits. According to the ITU, Rancy will face several challenges, including WRC-12. The conference will tackle issues that include a review of the international framework for radiocommunication (including Amateur Radio), the identification of appropriate mechanisms to address what the ITU called "the so-called digital dividend of radio spectrum" freed up by the switch to digital TV and the identification of spectrum resources for maritime, aeronautical, meteorological and climatology. Read more here <http://www.arrl.org/news/itu-secretary-general-deputy-secretary-general-elected-today-by-plenipotentiary-conference>.

==> + ARRL VEC LINKS UP WITH SOUTH POLE TO ADMINISTER TECHNICIAN EXAMS

While much of the United States was enjoying a beautiful autumn day on October 8, those who winter over at the Amundsen-Scott South Pole Station were experiencing a typical day for their clime, a day in the -70s (yes, you read that right -- 70 below 0 degrees Fahrenheit). But though the day was indeed frigid, six men and two women at Amundsen-Scott didn't feel the cold as they were too excited (and maybe just a touch nervous), knowing they were going to be part of the first Amateur Radio license exam session ever held at the South Pole. Read more here

<http://www.arrl.org/news/the-weather-outside-was-frightful-during-first-antarctic-ve-session>.

==> FIFTH ANNUAL ARRL ON-LINE AUCTION BEGINS NEXT WEEK

The Fifth Annual ARRL On-Line Auction <http://www.arrl.org/auction> will be open for preview beginning at 10:15 AM (EDT) on Friday, October 15, and will open for bidding at 10 AM (EDT) on Wednesday, October 20. According to Business Services Manager and Auction Coordinator Deb Jahnke, K1DAJ, there is a large assortment of ARRL Product Review items, donated new and vintage equipment, rare books, one-of-a-kind items and more. "If readers are interested in some great bargains and some great fun, you really need to check this out," she said. Jahnke also encouraged visitors to visit the site to preregister and scope out those "must-have" items. She expressed gratitude to the ARRL Business Partners and individual donors who have contributed items to this event. The 2010 ARRL On-Line Auction runs through 11:59 PM (EDT) October 25, 2010.

==> + ON THE AIR: JAMBOREE ON THE AIR

The 53rd Annual Jamboree on the Air (JOTA) will once agian provide an opportunity for Scouts to get on the air and get a taste of the fun and magic of radio. JOTA is an international scouting event organized by the World Scouting Bureau. While JOTA officially starts at 12 midnight local time Friday night/Saturday morning and goes until midnight Sunday local time, there will be plenty of stations on the air Friday evening. The official Scouting frequencies will be the center of operations. A listing of those frequencies, information about third party traffic restrictions and other details can be found on the ARRL Web site or on the World Scouting site. Each JOTA event provides an opportunity for a local club or Scout troop to get something started that can result in the beginning of a tradition of fun-filled activities. JOTA takes place starting Saturday at midnight local time, Saturday, October 16 and goes to 11.59 PM local time on Sunday, October 17. Some activity continues over from Friday to Monday to take advantage of long distance (DX) time differences Read more here <http://www.arrl.org/news/jamboree-on-the-air-coming-this-weekend-to-a-radio-near-you>.

==> + ON THE AIR: ARRL'S LOGBOOK OF THE WORLD: 300 MILLION QSOS -- AND COUNTING!

Congratulations to Victor Morozov, RD3PQ, for submitting QSO number 300 million to the ARRL Logbook of The World (LoTW)! His QSO with Ivan Gombos, SV2/OM3CGN, on October 5, 2010 did the trick. To date, Morozov has submitted nearly 6300 contacts to LoTW and will receive free DXCC and Worked All States awards for his well-placed log.

"We're very pleased with the high level of use and acceptance of LoTW from operators around the world," said ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N. "January 2011 marks the 10 year

anniversary of the ARRL's announcement of the LoTW system. While it has taken longer than anyone expected to return to building-out the system, progress is being made. ARRL's programmers are working hard to improve usability and to add support for the VUCC award, and we have received valuable assistance from volunteers in the development of the system and software." Read more here <http://www.arrl.org/news/logbook-of-the-world-300-million-qsos-and-counting> .

==> + CLUB NEWS: IRS OFFERS TOOLS FOR SMALL ORGANIZATIONS IN DANGER OF LOSING TAX EXEMPT STATUS

Back in May, we told you that the IRS could revoke the non-profit status <http://www.arrl.org/news/many-radio-clubs-could-lose-tax-exempt-status-in-2010> of small organizations -- including Amateur Radio clubs -- that have failed to file annual returns or reports for three years. According to ARRL Southwestern Division Director Marty Woll, N6VI, many clubs have, at some time in the past, applied for tax-exempt status as charitable organizations under Section 501(c)(3) <http://www.irs.gov/charities/charitable/article/0,,id=96099,00.html>, as civic leagues under Section 501(c)(4) <http://www.irs.gov/charities/nonprofits/article/0,,id=96178,00.html> or as recreational clubs using Section 501(c)(7) <http://www.irs.gov/charities/nonprofits/article/0,,id=96189,00.html>: "Years ago, any club with gross receipts averaging less than $25,000 per year was not required to file annual returns with the IRS; however, after 2006, such clubs had to file a Form 990-N <http://www.irs.gov/charities/article/0,,id=169250,00.html>, a simple 'electronic postcard' with minimal information, by the 15th day of the fifth month after the close of each fiscal year. Some clubs may not have been aware of this new requirement or didn't bother to comply. Even those that filed in a prior year may have neglected to keep up with the required filings as officers changed from year to year." Now the IRS is making several tools available to these organizations to help them maintain their tax-exempt status. Check out this page on the IRS Web site <http://www.irs.gov/charities/article/0,,id=227435,00.html> for links to a series of resources that clubs may find useful.

==> + SOLAR UPDATE

Tad "For tomorrow may rain, so I'll follow the Sun <http://www.youtube.com/watch?v=eq7DGPYzAvg>" Cook, K7RA, reports: Solar activity was down this week, although it is now gradually strengthening. The average daily sunspot numbers dropped nearly 16 points to 11.7, and the average daily solar flux declined more than 5 points to 75.8. Over the next two weeks, the solar flux is expected to gradually increase to 80 on October 14-16, 82 on October 17-21, 80 on October 22-25 and 85 on October 26-29. The increase is expected from

sunspot group 1112 -- emerging on October 9 -- and group 1113 that appeared on October 13, rotating over the Sun's eastern limb. The STEREO mission <http://stereo.gsfc.nasa.gov/> shows a series of magnetically active areas on our Sun's far side, which should rotate into view. Geomagnetic activity is expected to be stable, with the planetary A index moving between 5 and 8. The predicted planetary A index is 5 on October 14-15, 8 on October 16-17, 5 on October 18-20, 8 on October 21-22, 5 on October 23, 8 on October 24-25 and 5 on October 26-29. Over the past week, the geomagnetically active day was Monday, October 11, when the planetary A index was 20 and the planetary K index went as high as 5. Alaska's College A index was 49, based on a College K index as high as 7. This activity was pushed by a strong solar wind. Look for more information -- including a look at some methods for taking these numbers and predicting propagation for yourself from your location to any other worldwide location of interest, on any day or band -- on the ARRL Web site on Friday, October 15. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Paul McCartney's I'll Follow the Sun <http://www.youtube.com/watch?v=eq7DGPYzAvg>.

==> THIS WEEK ON THE RADIO

This week:

- October 16 -- Iowa QSO Party; Feld Hell Sprint; Microwave Fall Sprint (local time)
- October 16-17 -- New York QSO Party; JARTS WW RTTY Contest; ARCI Fall QSO Party; Worked All Germany Contest; PODXS 070 Club 160 Meter Great Pumpkin Sprint (local time)
- October 17 -- Asia-Pacific Fall Sprint (CW)
- October 17-18 -- Illinois QSO Party; Run for the Bacon QRP Contest

Next week:

- October 23 -- FOC QSO Party
- October 23-24 -- Stew Perry Topband Challenge; 10-10 International Fall Contest (CW); W/VE Islands QSO Party; Araucaria VHF Contest; SYLRA Contest
- October 27 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

- October 15-17, 2010 -- ARRL Pacific Division Convention
<http://www.pacificon.org/>, San Ramon, California
- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the
ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano,
Texas

Amateur Radio Newsline(tm) Report 1731 - October 15 2010

Amateur Radio Newsline report number 1731 with a release date of
Friday, October 15 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio plays a role in the Chilean mine
rescue, Radio Amateurs of Canada announces a survey for the hobby's
future, Scouting celebrates the 2010 Jamboree on the air and a historic
college amateur radio station is back on the air. Find out the details
on Amateur Radio Newsline(tm) report number 1731 coming your way right
now.

RESCUE RADIO: AMATEUR RADIO PLAYS ROLE IN SUPPORT OF CHILE MINE RESCUE

Amateur radio appears to have played a key supporting role in the
rescue of 33 miners trapped beneath Chilean soil for 69 days. Bill
Pasternak, WA6ITF, is in the newsroom with the latest:

--

Its being called the miracle of miracles. This as the world watched
live as 33 Chilean miners trapped some 2400 feet underground for 69
days were brought to the surface one at a time. This beginning on
October 13th and ending on October 14th using a tiny rescue capsule
dubbed the Phoenix and pulled by a hoist.

The saga began when the mine in San Jose, near the city of Copiapo
collapsed on August 5th and ended on October 14th when the last miner
rose to the surface at 0055 UTC. And while news reports heralded the
success of the rescuers, lost was the small but important contributions
made by that nations radio amateurs.

But Chilian hams were there throughout the entire ordeal doing what
they do best. That being another line of needed communications after
being called upon to provide it.

According to a report posted to the IARU Region 2 website by Ramon
Santoyo, XE1KK, it was the Radio Cub de Chile and the Radio Club
Copiapo that provided communication support between the authorities and
emergency equipment operators inside the San Jose Mine complex. Chilean
hams also provided liaison between the families of the trapped miners
and authorities as the rescue coordination center in Copiap&#65533;.

Perhaps the most important job performed by the Chilean radio amateurs was to establish an amateur radio communication system into the mine complex itself. The ARRL reports some of the 80 members of Radio Club Copiapo installed the equipment and then manned it with club volunteers beginning back on August 5th when the mine collapse took place. This radio system, together with mobile police stations, hospitals and fire battalions, kept everyone abreast of all the needs and urgent requirements of all involved in the rescue work.

No, the hams of Chile were not shown on the front pasge of the New York Time or the Chicago Tribune. Nor were they featured on NBC Nightly news. Their part of the story has been low key until now. None the less it was a job well done by amateur radio volunteers giving of themselves as hams do when their skill and services are needed. And for radio amateurs, that's what public service is all about.

>From the newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

Until the news release by XE1KK it was not known that ham radio was involved in this mining rescue. (IARU-R2, ARRL, ARNewsline(tm))

**

RESTRUCTURING: RADIO AMATEURS OF CANADA SURVEY FOR ITS FUTURE

Seemingly following in the footsteps of the Radio Society of Great Britain, the Board and Executive of the Radio Amateurs of Canada is asking current, past and future potential members as well as amateur radio clubs to provide thoughts and recommendations on the future of the hobby in that nation. This, by responding to a set of questions posted to the organizations website by October 20th.

Responses will be considered at a meeting at the end of October to develop a vision for the future of Radio Amateurs of Canada in the 21st century. In addition they will be establishing a two year operational plan for 2011 and 2012. Canadian hams wishing to take part in the survey should take their web browser to tinyurl.com/2c8l8wm and follow the instructions found there.

As reported here last week, the Radio Society of Great Britain has launch a major survey of all United Kingdom radio amateurs. The objective of the survey is to gather as much information as possible on 21st century amateur radio operation in that nation. (RAC)

**
INTRUDER WATCH: NEW WAY TO REPORT HAM-BAND INTRUDERS The latest issue of the International Amateur Radio Union's Region 1 Monitoring System newsletter is asking hams to use its new online 'Intruder Logger' and 'Intruder Alert System' to file reports of unwanted users of the ham radio bands. Those providing input should include source, time in UTC and mode being used. Short time intruders should be sent to the

Intruder Logger. More on this including on-line reporting forms can be found at the following URL's: IARU R1 Intruder Logger: http://peditio.net/intruder/bluechat.cgi IARU R1 Intruder Alert System Email Reflector: http://iaru-r1.org/mailman/listinfo/intruderalert_iaru-r1.org (IARU Region 1)
**
RADIO SCOUTING: GROUP CELEBRATES 20 YEARS OF JOTA

And around the world the 2010 Scouting Jamboree on the Air is underway as we go to air. For one group its the 20th year it has been taking part. Amateur Radio Newsline's Mark Abramowicz, NT3V- has the rest of the story:

--

They call themselves the SPARK Lodge and they're based at the Musser Scout Reservation outside of Green Lane in Montgomery County in suburban Philadelphia.

Rick Blank, WB3BSA, is president of the organization, which actually is a Scouting Venture Crew with its own call sign -K3BSA.

He says it's a special weekend not just because of the 20th anniversary of J-O-T-A operations for the group, but still being around to offer young people a program that uses amateur radio to teach international brotherhood is special.

"A lot of our contacts have been over in Europe or South America and when we get a station that we can talk to and put the kids on in a far-away place that's really a special thing because the kids get a really good charge out of that," Blank says.

He credits the longevity of the group to Philadelphia Scout officials who have been supportive of its efforts over the years and a dedicated group of ham operators.

"Well it really is a combination of all the time and effort that the volunteers have put into the building, the enthusiasm that the Scouts get about radio, and communications," Blank says.

"You know being out there in the camp in the nice facility that we turned that building is really just kind of special. We refer to the building now - it used to be called Cook's Cabin - we now call it SPARK Lodge and SPARK, for us, stands for Scouts Practicing Amateur Radio Knowledge."

Blank says SPARK Lodge has a very functionable set-up.

"We have two high-frequency operating positions, and those two operating positions we can use single-sideband and digital modes, Morse Code, and PSK-31 or Phase-Shift-Keying," Blank explains. "And, some of the other operating positions we have VHF, UHF, where we can use a computer to send and receive email through packet radio."

Wires serve as antennas, he says, and wind and ice storms do occasionally play havoc with those.

In addition to JOTA, Blank says SPARK Lodge also offers a year-round program of radio demonstrations at the camp and on special weekends provides a program for Radio merit badge as well as Computers, and Electricity. And, he even says, it's branching out into Railroading.

But Blank says JOTA will always be the premiere event for SPARK Lodge.

"Those that can participate are Scouts of all ages - Girl Scouts, Brownies, Cub Scouts, Boy Scouts, Venturers, Explorers - they can all come up and take part in the activity," Blank says. "It's an international Scouting event. It's the largest event in Scouting each year with nearly 500,000 Scouts participating worldwide."

You can learn more about SPARK Lodge by going to their website: www.k3bsa.org.

For the Amateur Radio Newsline, I'm Mark Abrams, NT3V, in Philadelphia.

--

And less we forget, if you happen to hear this weeks newscast before the 2010 Jamboree on the Air comes to an end, please get on the air and say hello to the scouts taking part, worldwide. (NT3V, ARNewsline(tm))

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9HSY repeater serving Madison Wisconsin.

(5 sec pause here)

**

ENFORCEMENT: KJ6CEY SENTENCED FOR JAMMING POLICE

An amateur radio operator from San Jacinto, California, who had admitted making a series of transmissions threatening the lives of local police officers and fire department personnel has learned her fate. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

On Friday, October 8th twenty-nine year old Irene Levy, KJ6CEY, pleaded guilty to seven charges involving interference to the Hemet California police and the Riverside County Fire Department. A judge in the city of Murrieta sentenced her to three years probation and gave her credit for the time she spent in jail since her arrest last spring. She was also ordered to undergo psychiatric care.

As previously reported here on Amateur Radio Newsline, last May 3rd police closed in on KJ6CEY just seconds after she made a transmission

on a Hemet police frequency using a commercial H-T. Investigators from the Hemet Police Department as well as Cal Fire said that the unauthorized, random transmissions were made from Levy's mobile home in San Jacinto. Her radio transmissions, which included bomb threats, were monitored on frequencies used by the Hemet police and the Riverside County Fire Department and that they went beyond nuisance calls.

At that time, Hemet Police Sargent Mark Richards was quoted by The Press-Enterprise newspaper in Riverside as saying Levy disguised her voice as a man and made references to the deaths of police and firefighters and made bomb threats. He said some of the transmissions came during a Cal Fire search and rescue call, a major traffic accident, and a brush fire.

Richards report stated the transmissions began May 1stand ended in the early morning hours of May 3rd. He said in the report that direction-finding equipment helped locate Levy, who in one of her transmissions on May 2 suggested "police would never find her." Richards report said that during the raid on her trailer, police seized 11 radios, seven scanners, radio frequency lists, computer equipment and other miscellaneous radio gear. He says in the report they also seized Levy's Technician class amateur radio license, showing it had been issued in September 2009.

On her now removed QRZ.com bio page, Irene Levy had claimed to have a General Mobile Radio Service license, but the call sign attached to it is actually registered to her husband, Michael Levy KE6ALV. She had also claimed to have monitored the Keller Peak repeater as well as the Hemet repeaters. Levy also said in that now gone QRZ bio she was active on Citizens Band radio prior to getting married and described herself as a CB'er at heart.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

But Irene Levy's problems may be far from over. At this point the FCC has not yet entered into the matter. If it does and decides to cite KJ6CEY, she could face a fine, a license suspension or even a hearing to determine if she should be permitted to continue as an FCC amateur radio licensee. (Inland Empire News, Press-Enterprise, ARNewsline(tm))

**

ENFORCEMENT: FLORIDA SHERIFF TAKES UNLICENSED BROADCASTER OFF THE AIR

Listeners of two South Florida radio stations got a surprise when their Christian and classical music stations were was interrupted with what authorities called rap music and profane language. On Thursday, October 7th, authorities found out why.

According to investigators, an unlicensed broadcaster had set up shop on a frequency between to twl licensed stations. The Broward County Sheriff's Office says the illegal signal came from a Lauderdale Lakes home where an aspiring rapper had attached a laptop, audio mixer and computer. This gear in turn ded a transmitter and antenna.

The station called itself Trap Radio was allegedly operated by Mikhaul Rhodd. Rhodd has been charged under Florida state law with unauthorized transmission or interference with public or commercial radio. At airtime, it's not known if the FCC has become involved in this case.

More is on-line at

ENFORCEMENT: NEW ZEALAND LOW POWER FM BROADCASTER FINED FOR INTERFERING WITH AIR TRAFFIC COMMUNICATIONS A Christchurch, New Zealand man who ran a hobby radio station has been fined $4000 and had his equipment confiscated after boosting his transmitter power to a level that interfered with an air traffic control frequency. According to news reports from down-under, Jeffrey Knowles owned low power non-commercial radio station Sounds FM which has now been shut down. When it was on the air, it legally broadcast music during the day and streamed BBC programs at night to the Shirley, Papanui and Parklands suburbs of Cristchurch. And in the past it had earned Knowles a community service award. Now, the 48 year old Knowles has admitted in Christchurch District Court he interfered with the air traffic control radio frequency. This, by broadcasting with excessive power using equipment that had a fault with its overall frequency stability. Knowles also admitted to a charge under the New ealand Radio Communications Act of transmitting outside the terms of his license. As a result, his broadcasts caused the closure of an air traffic frequency for 24 hours l,ast February by interfering with transmissions between aircraft and the control tower. Under New Zealand law, Knowles station is permitted to run as a low power FM hobby station. But in making its case, government prosecutors argued he increased the power to reach up to 45,000 listeners. The New Zealand Radio Broadcasters' Association reported to the court that they were losing advertising revenue because of Knowles station taking potential listeners away from commercial stations. Defense counsel Clayton Williams said Knowles accepted the equipment was faulty and did not oppose it being forfeited. He did however dispute the concerns about the amount of power used. In rendering his decision, Judge Gary MacAskill said Knowles had been warned that his broadcasting gear was faulty but had done nothing about it. He then imposed a fine of $4000 as well as court costs of $130 and a solicitor's fee of $250. Its unknown if Knowles will appeal. Also while a version of this story circulating on the Internet blogs identified Knowles as being a ham radio operator, a check of licenses shows that this is not the case. (Ontago Daily Times via ZL2BHF)

NTIA AWARDS $20 MILLION TO UPGRADE EMERGENCY RADIO AND TELEVISION

The National Telecommunications and Information Administration has issued approximately $20.45 million worth of Public Telecommunications Facilities Program grants so far this year. A total of 126 projects have been funded. Of those, 72 grants worth $9.9 million are to replace equipment at public radio and television stations while 30 grants for some $4.6 million will extend new public radio serviced.

Sixteen digital conversion grants were awarded for television, representing just over $4 million. Three digital conversion grants totaling a little over $202,000 were awarded for radio.

With the radio grants, stations in Arcata and San Diego will be able to purchase digital production equipment. Also, a station in Baton Rouge, Louisiana will be able establish an HD Radio multicast service. All together, the new radio service grants will extend service to a potential 500,000 people and provide additional service to almost 1.2 million other listeners.

Thirty-eight projects totaling more than $2.8 million will replace urgently needed equipment at public radio stations. One of these is a $20,407 grant to Cumberland Communities Communications Corporation. It was awarded on an emergency basis to replace an antenna that suffered catastrophic failure as a result of a lighting strike. (NTIA Release via RW)

**

WORLDBEAT: CANADIAN SET OCTOBER 16 AND 17

While its short warning, word that the Canadian Section Emergency Test or SET is coming the weekend, October 16 and 17. Radio Amateurs of Canada says that this is a great opportunity for ARES groups to practice the delivery of assistance to Canadian municipalities and served agencies. More in formation is on-line at www.rac.ca. (RAC)

**

RADIO TECHNOLOGY: NEW BLUETOOTH BASED TELE-MEDICAL SYSTEM ANNOUNCED

A telemedicine communications system based on a modified version of the Bluetooth wireless protocol can transfer patient data almost four times as fast as conventional Bluetooth. This, without intermittent connectivity problems according to a paper in the forthcoming issue of the International Journal of Medical Engineering and Informatics.

A team lead by two researchers at the PSG College of Technology in India, have devised a dedicated embedded system that uses the short-range Bluetooth wireless networking protocol to connect patient data to the network and then on to the healthcare provider. This avoids the problem of trying to ensure that a viable connection between

monitoring devices and the internet or cellular phone network is maintained constantly.

The team has already demonstrated a specific application of this technology. This one involved the transfer of patient medical images C-T scans to the healthcare provider's personal digital assistant device as an example of how Bluetooth might work for telemedicine. The team says that tests with these images of approximately 1.5 megabytes can be transferred using their modified Bluetooth system in just 120 seconds, as opposed to the 400 seconds for standard Bluetooth connections. (Science Daily, Science OnLine, others)

**

HAM RADIO TECHNOLOGY: NEW WB4MAK SDR RECEIVER IN ATLANTA GEORGIA

Mack Mc Cormick, WB4MAK, of Atlanta, Georgia, has made available a web-based 80, 40 and 20 meter SDR based receiver. We gave it a try from the Newsline office. Its tuning is very responsive and the first station we came across on 20 meters turned out to be a guest operator at the ARRL Headquarters station W1AW in Newington Connecticut. Take a listen:

-SDR audio. Please download the MP3 version of this newscast at www.arnewsline.org to hear it. -

We also heard W1AW contacting W6RO on board the Queen Mary ocean liner that's docked in Long Beach, California, but due to band conditions, we only heard the W1AW side of the contact.

-SDR Audio. Please download the MP3 version of this newscast at www.arnewsline.org to hear it. -

The WB4MAK SDR receiver can be a handy tool to check out radio propagation to mthe South-Eastern United States by anyone with a hifg speed Internet connection. You will find it on line at http://wb4mak.com. (Southgate)

CHALLENGER LEARNING CENTER INAUGURATES HAM STATION In ham radio space related news word that an amateur radio satellite ground station has been opened at the Challenger Learning Center in Oregon, Ohio. According to AMSAT North America the station will stimulate students' interest in math and science and will allow the youth oriented to contacts with the the Astronauts and Cosmonauts on-board the International Space Station. The Challenger Learning Center will provide lesson plans and activities on amateur radio to go along with the new ground station. It will also use the system during camps and workshops to demonstrate ham radio contacts to space. The Challenger Center in Oregon, Ohio is part of a series of space and science education centers around the world. The Challenger Center organization is an international, not-for-profit education group that was founded by the families of the astronauts lost during the last flight of the Challenger Space Shuttle in 1986. The station came at the Ohio location came on line on Monday October 4th. More is on line at tinyurl.com/29ljn7o (AMSAT-NA)
**
HAM RADIO IN SPACE: ARISSAT-1 ENROUTE TO RUSSIA An update on the ARISSat-1 project. Word from Project Manager, Gould Smith, WA4SXM, that the former Suit-Sat 2 flight package was shipped from Orlando, Florida to the Johnson Space Center in Houston and has arrived. From there it goes to Russia where will have the Kursk experiment added to the space frame. It will then be made ready for transport to the International Space Station next January. Deployment into space should take place during a space walk slated for February of 2011. (ARISS)
**
DX

In DX, keep an ear open for Look for W5JON, operating as V47JA, from the Calypso Bay, on St. Kitts, from October 20th to November 10th. His hillside location will overlook the Caribbean Sea and Atlantic Ocean.

He plans to be active on 160 through 10 including 60 meters. QSL to W5JON at his Callbook address.

The planned DXpedition to Jarvis Island has postponed. The Team has announced that due to the time required to establish the rules for amateur radio operation in the refuge, the last selection date, and the lead time required to schedule and prepare the MV Braveheart, the expedition has been postponed one year until 2011 November. Leaders say that November remains the best month to visit Jarvis Island from a propagation standpoint, with the largest combination of openings predicted to Europe on both 160 and 80 as well as on the 12 and 10 meter bands.

ON5JV and ON6AK will be active portable EA8 from Tijoco Bajo, on Tenerife Island between November 26th of this year and February 23rd of 2011. Operations will be on 40 through 10 meters during their evenings using CW and SSB. QSL via their home callsigns, either direct or via the bureau.

PA0RRS is active as 9M2MRS from Penang Island and will be there through April of 2011. Operations so far has been mainly on 20 and 17 meters CW. QSL to Richard Smeets, PA0RRS at his Netherlands Callbook address.

VE7RSV, will be operational from Broughton Island during the W/VE Islands Contest on October 23rd and 24th. His activity will be on all bands using SSB only. QSL direct to VE7RSV at his address on QRZ.com.

Time is running out to work VU3BPZ as AT10BP. He is the communications manager of the 29th Indian Expedition at the Antarctic Maitri Base station. He and his team have less than 2 months remaining on the island. Operations by AT10BP are SSB only and he is usually on the air around 1700 U-T-C somewhere between 14.276 to 14.280 MHz. QSL direct only via I1HYW.

(Above from various DX news sources.)

**

THAT FINAL ITEM: W7ASU BACK ON THE AIR FROM ASU

And finally this week, Arizona State University radio club station W7ASU is back on the air after a long hiatus. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details.

--

W7ASU dates back to the 1930s, and actually is one of Arizona State University's oldest student clubs. According to Nicholas Radtke, KC7MOD, the current president of W7ASU, there was a station on campus, with some breaks, until about 15 years ago. The clubOs station was in the old Technology Building with two towers and multiple antennas on top of the building. That building is now Psychology North.

Unfortunately, a series of events contributed to the clubOs going into limbo. First, through misunderstandings, the towers and antenna were removed and destroyed during two separate re-roofing projects. Second, most of the club members graduated and the advisers retired, leaving no one to lead the group through change. And finally, because of tight space on campus, the clubOs room was given to an academic department.

Radtke, who is a doctoral candidate in computer science explained that around 1997, a new group of students revived the club, and sponsored one major event per semester. They would put an antenna on the third-floor balcony of the Student Services Building, with the station out in front. They also tried doing a few events at club members' houses, using their personal ham radio stations. Attendance at these events was abysmal, with a common complaint being that members couldn't get to events off campus.

In February 2007, the Student Media offered the club space in Matthews Center, and the hams obtained permission to put up a temporary antenna for several events. But the club still needed a permanent antenna to operate, and that was not to be at Matthews Center.

In June of 2008, University space planners suggested that the club think about using several rooms in the Community Services Building, where they would be able to put up an antenna. Soon after, the family of Richard S. Juvet Jr., WB7CDK, who had been the clubOs faculty adviser in the 1970s and 80s, donated a tower and antenna and other equipment from his estate.

Now, with its shack set up and a tower in place right beside the Community Services Building, W7ASU is as they say (tm) ready to roll.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, not to far away in Scottsdale, Arizona.

--

The club still hopes to keep its room in Matthews Center to set up equipment to remotely control the station in the Community Services Building. The full story of the rebirth of the Arizona State University radio club station W7ASU is on-line at tinyurl.com/w7asu (ASU Newsletter)

Apparently Mr. Radioguy has never excictuted heard of a Federal Warrant
for Arrest, under Federal Law, served by US Marshals, who by their
charter, have jurisdiction ANYWHERE in US Territory.... A US Marshal is
the very LAST fellow you want after you, because he/she has CartBlanc in
locating you, and serving the warrant that he/she is operating under.
You NEVER mess with a US Marshal, PERIOD....

That is about the most absurd and funniest thing I have heard yet.
Morkie wouldn't know a "sesmis" wave from a doorknob, much less about
it's "progation". What an idiot.

...

Mark wrote at qrz.com:

"well myself it was alomst that easy but then I have Master degree in
Geo-physics and do most of my work looking at sesmis wave progation"

Well, now, Mark, that's interesting. A few questions:

What institution granted your degree, and what year?

What is the title of your Masters thesis?

Why do you hyphenate the word "geophysics?" It isn't hyphenated in
normal usage. A geophysicist would know that.

What are "sesmis" waves? Or do you mean "seismic?" And how do they
"progate?"

There's an old saying in baseball. You can bullshit the fans but you
can't bullshit the players.

That wasn't even a good try, Mark.

==> + IARU NEWS: INFORMATION EXCHANGE AND CAMARADERIE HIGHLIGHT IARU
REGION 2 CONFERENCE

The 58 delegates and observers who gathered in Salinitas, Sonsonate,
El Salvador for the 17th General Assembly of IARU Region 2 experienced
a busy and enjoyable week. The conference began on October 4 and
concluded on October 8. Twelve IARU Member-Societies in the Americas
were represented in person, with another seven represented by proxy.
President Kay Craigie, N3KN, served as the voting delegate for the ARRL
and was assisted by International Affairs Vice President Jay Bellows,
K0QB, and Executive Vice President David Sumner, K1ZZ. Observers from
IARU Regions 1 and 3 and the International Secretariat were present to
assist and to learn from the conferees. Read more here
<http://www.arrl.org/news/information-exchange-and-camaraderie-highlight-iaru
-region-2-conference>.

==> + ARRL EXECUTIVE COMMITTEE TO MEET THIS WEEKEND
```

At its January 2010 meeting, the ARRL Board of Directors decided to make the agendas of Board and Executive Committee meetings available on the ARRL Web site. The agenda for the October 23 meeting of the Executive Committee is now available <http://www.arrl.org/news/arrl-executive-committee-to-meet-in-st-louis-this-weekend>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 TOPS AGENDA AT AMSAT-NA'S ANNUAL MEETING

The development and next year's scheduled launch of ARISSat-1 were the main topics of discussion at the 2010 AMSAT-NA Space Symposium and Annual Meeting, held October 8-10, 2010, in Elk Grove, Illinois. ARISSat-1 has been delivered to NASA to undergo final preparations for delivery to the International Space Station. ARISSat-1 is scheduled to be manually released into orbit during an ISS spacewalk early next year. The ARISSat-1 project began when plans for SuitSat-2 had to be shelved for lack of a space suit <http://www.arrl.org/news/suitsat-2-now-called-arissat-1>. The development team undertook the task of housing the payload planned for SuitSat-2 in a more traditional housing adapted for manual deployment. A few units were developed to have on standby for future launch opportunities; one of these units was on display at the Symposium. Read more here <http://www.arrl.org/news/arissat-1-tops-agenda-at-amsat-na-s-annual-meeting>.

==> SUPPORT ARRL: ARRL ANNUAL ON-LINE AUCTION NOW OPEN FOR BIDDING

The Fifth Annual ARRL On-Line Auction <http://www.arrl.org/auction> opened for bidding at 10 AM (EDT) on Wednesday, October 20. According to Business Services Manager and ARRL On-Line Auction Coordinator Deb Jahnke, K1DAJ, there is a large assortment of ARRL Product Review items, donated new and vintage equipment, rare books, one-of-a-kind items and more. "If readers are interested in some great bargains and some great fun, you really need to check this out," she said. She expressed gratitude to the ARRL Business Partners and individual donors who have contributed items to this event. The 2010 ARRL On-Line Auction runs through 11:59 PM (EDT) October 25, 2010.

==> + DEFENDING THE AMATEUR RADIO SPECTRUM: EVERYONE'S RESPONSIBILITY

The second edition of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- has just been released on the ARRL Web site. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can do this by contributing generously to the ARRL Spectrum Defense Fund <http://www.arrl.org/arrl-donation-form>.

"We are facing very real and immediate challenges [to the amateur spectrum]," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Over

the past couple of months, we have addressed FCC spectrum management issues affecting our 430 MHz and 2.3 GHz bands, as well as interference from unlicensed stations operating in the lower part of 10 meters." But Sumner said that opportunities lurk among the challenges: "A possible new amateur band just below the AM broadcast band is on the agenda of the 2012 World Radiocommunication Conference. We face significant hurdles in getting what would be at best a secondary allocation, but we're working hard to persuade the radio services in this part of the spectrum that an amateur allocation is compatible with their future requirements. We recently gained crucial support [for this allocation] in the United States."

Sumner said that it takes what he called "a concerted global effort to protect Amateur Radio's access to the radio spectrum and guard against interference that reduces our ability to communicate." You can take an important step right now to support ARRL's commitment to defending the Amateur Radio Spectrum. According to ARRL Chief Development Officer Mary Hobart, K1MMH, the ARRL is almost $194,000 shy of its Spectrum Defense Fund goal of raising $325,000 by the December 31 deadline.

"Please make a generous contribution to the Spectrum Defense Fund by mail, on the Web <http://www.arrl.org/arrl-donation-form> or by phone," she said. "Perhaps you'll consider a very easy way to contribute by pledging $10 or $20 or $100 a month. Your financial commitment, over and above your annual dues, will ensure that ARRL has the resources to represent you and protect your operating frequencies." To make a donation via mail, please send to Spectrum Defense Fund, ARRL, 225 Main St, Newington, CT 06111. To make a contribution over the phone, or to discuss other giving options, please call 860-594-0397. ==> + ARRL HQ NEWS: DEWEY RYKARD, KI4RGD, JOINS ARRL STAFF AS INSTRUCTION AND RESOURCE COORDINATOR

The ARRL is pleased to welcome Instruction and Resource Coordinator Dewey Rykard II, KI4RGD, to the Headquarters staff in Newington. Rykard, who will be working in the League's Education Services Department, will focus on developing and identifying resources for ARRL instructors. He also will play an integral role in the annual series of Teachers Institutes in Wireless Technology, sponsored by the ARRL and held every spring and summer around the country.

In his position at ARRL HQ, Rykard will be assisting Education Services Manager Debra Johnson, K1DMJ. His responsibilities will include reviewing and organizing resources needed by instructors, teachers and Scout leaders, developing lesson plans to be utilized by ARRL Registered Instructors and for the ARRL's Education & Technology Program (ETP), providing guidance in the development of ARRL license study manuals and coordinating the ARRL's educational award program. In addition, Rykard will provide support for the ETP, participate in the Teachers Institute trainings, help to provide ongoing resource support

for teachers and assist with administration of the ETP. You may meet him at the ARRL booth at conventions where he will represent ARRL Education Services programs. Read more here <http://www.arrl.org/news/dewey-rykard-ki4rgd-joins-arrl-staff-as-instruction-and-resource-coordinator>.

==> + SOLAR UPDATE

Tad "The Sun is up, the sky is blue; it's beautiful and so are you <http://www.youtube.com/watch?v=M-2lMstw6qs>" Cook, K7RA, reports: The average sunspot numbers for the week were up nearly 44 points to 55.6, but the average solar flux readings were unchanged, at 84.9. A few days ago, the solar flux values rose above 90, but currently the projection from USAF and NOAA for solar flux over October 21-31 is 84, 83, 82, 82, 82, 80, 78, 80, 85, 80 and 80. Seven new sunspot groups arrived since October 9: group 1112 came on October 9; group 1113 on October 13; 1114 and 1115 on October 14; 1116 on October 17, and 1117 and 1118 on October 19. While the average sunspot number for the past week was 55.6, the greatest sunspot activity was over the past few days, with the daily sunspot numbers on October 17-20 at 61, 69, 65 and 61. Look for more information on the ARRL Web site on Friday, October 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Lennon's Dear Prudence <http://en.wikipedia.org/wiki/Dear_Prudence>.

==> THIS WEEK ON THE RADIO

This week:

- October 23 -- FOC QSO Party
- October 23-24 -- Stew Perry Topband Challenge; 10-10 International Fall Contest (CW); W/VE Islands QSO Party; Araucaria VHF Contest; SYLRA Contest
- October 27 -- SKCC Sprint

Next week:

- October 30-31 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; CQ Worldwide DX Contest (SSB); 10-10 International Fall Contest (Digital); 50 MHz Fall Sprint
- November 2 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-events>.

==> UPCOMING ARRL DIVISION CONVENTIONS AND EVENTS

- May 20-22, 2011 -- Dayton Hamvention <http://www.hamvention.org/>&#65533;
featuring ARRL EXPO, Trotwood, Ohio
- June 10-11, 2011 -- ARRL National Convention and ARRL EXPO at the
ARRL West Gulf Division Convention <http://www.hamcom.org/>, Plano,
Texas

Amateur Radio Newsline(tm) Report 1732 - October 22 2010

The following is a closed circuit and not necessarily for air. With a report on Amateur Radio Newsline's current finances here is our Producer Bill Pasternak, WA6ITF:

--

OK. Ill just take a second to thank all of you who responded to last months appeal. Thanks to you, we have enough in the account to hopefully hold us through the end of November if we watch our expenses carefully. Your generosity has been overwhelming and we only wish we had a way to thank each of you individually. Unfortunately we can't, so we can only say how grateful we really are via this message. And with that I say 73 and here's Jim Damron, N8TMW, with this weeks news.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1732 with a release date of Friday, October 22 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A wireless conference down-under will discuss the future of communications in New Zealand, more on the break-up of the Netherlands Antillies and its affect on DXing, U-K hams get van update on how some ham radio bands will be used for the 2012 Olympics and ham radio will take part in a major expo in Australia. All this and more on Amateur Radio Newsline(tm) report number 1732 coming your way right now.

RESTRUCTURING: CONFERENCE ON WIRELESS TECHNOLOGIES TO BE HELD IN ZL

The New Zealand Ministry of Economic Development is convening a seminar on Future Wireless Technologies, including Cognitive Radio, Software Defined Radio and Future Mobile and Broadcast Technologies to be held Thursday November 4th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is here with the details:

--

This year's seminar will be held here in the city of Auckland. It will immediately follow the 16th Asia Pacific Communications Conference being held at the same venue from October 30th to November 3rd.

The purpose of the seminar is to share knowledge among wireless equipment manufacturers, research institutions, service providers and government about emerging developments. It will also help in identifying the areas on which to focus future technical and regulatory work.

The program for this gathering will be published shortly on the Radio Spectrum Management website. More information on this event is on-line at apcc2010 dot aut dot ac dot nz.

Reporting from down under, Im Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

A similar event was held in September of 2009. It theme highlighted the importance of sharing information on the progress of such initiatives and developments in this area. (NZART News)

**

WORLDBEAT: BREAKUP OF THE NETHERLANDS ANTILLES AND THE CQ OPERATING EVENTS

With several groups operating from the new DX entities created by the breakup of the Netherlands Antilles ongoing, questions have arisen regarding their status for CQ DX awards and contests. To clarify the matter, CQ Editor Rich Moseson, W2VU, has issued the following statement which we paraphrase in part.

In regard to the CQ DX Awards program, each of the five islands involved in the change of status retains its previous PJ callsign prefix. According to CQ DX Awards Manager Billy Williams, N4UF, the previous entities of the Leeward Islands and Windward Islands Islands were deleted as of October 9, 2010. Four new entities - Curacao (PJ2), Sint Maarten (PJ7), Bonaire (PJ4) and Saba/St. Eustatius (PJ5/6) became active on October 10, for a net gain of two DX entities. Confirmations for contacts made with the new entities will be accepted for CQ award credit effective immediately.

Moseson went on to note that the country multiplier list for the CQ World Wide DX Contests is based on a combination of the ARRL's DXCC list and Germany's Deutscher Amateur Radio Club's Worked All Europe list. Since the ARRL has also made the same changes, effective October 10th, and these "new ones" will each count as separate country multipliers in the CQ sponsored events, Moseson said. (CQ)

NEWSLINE FOLLOW-UP: UK REGULATOR OFCOM UPDATE HAM SPECTRUM USE FOR 2012 GAMES

U-K telecommunications regulator Ofcom has published an updated spectrum plan for wireless communications at the London 2012 Olympic Games. This includes an update on the various demands for spectrum

and how they will be met in part by tapping into the VHD and UHF ham bands. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Frequencies in a number of bands allocated in the United Kingdom on a secondary basis to the Amateur Radio Service will be used at Olympic venues. This according to United Kingdom telecommunications regulator Ofcom who days that the 70 cm, 23 cm and 13 cm bands will be used.

Regarding the 430 MHz band the plan, Ofcom says that the 430 to 440 MHz band is managed by the Ministry of Defense and is used by Radio Amateurs. Ofcom notes RAYNET's support for the St John's Ambulance, Red Cross and other similar users as well as amateur radio special events stations for cultural events linked to the London 2012 Games will be considered.

According to Ofcom, as in past games, amateur radio bands, especially 430 to 440 MHz have been used and this remains a possibility for the London 2012 Games. This, if the demand requires it.

In the statement Ofcom says that it has identified the bands that could be used for land mobile radio, handheld communications and talkback. As such it is now able to provide more technical detail for use of those these bands. With regard to the Amateur-Satellite Service the document says that while Ofcom does not at this time think it will be necessary to use those frequency bands. However, it adds that it will retain the option to consider whether there is a requirement to use them as it develops its venue-specific spectrum plans.

Ofcom adds that it will continue to work closely with key stakeholders as it develops its spectrum utilization plans for the 2012 games.

Reporting from Scottsdale, Arizona, I'm Norm Seeley, KI7UP, for the Amateur Radio Newsline.
--
A final version of the Ofcom 2012 Olympic games radio plan and its impact on amateur radio will be published early next year. The current Ofcom news release is on line at tinyurl.com/33x8zcd (Southgate)

NAMES IN THE NEWS: HAM OPERATOR RE-ELECTED ITU SECRETARY GENERAL

Member states of the International Telecommunication Union have elected Dr. Hamadoun Tour&#65533;, HB9EHT, of Mali as Secretary-General of that organization for a second four-year term. Dr. Tour&#65533; won the position with 151 votes, with 157 countries present and voting.

Addressing the conference after the vote, HB9EHT told close to 1,500 conference participants from around the world that he will put a special emphasis on broadband access, as well as continuing to ensure that cyber-security is high on everyone's agenda.

Tour&#65533; has also pledged to ensure that small island developing states and land-locked countries get special attention. He also said that he will encourage more private sector involvement through public-private partnerships, both within ITU and in the field. (Various)

RADIO LAW: CQ WRITER TACKLES THE DEMISE OF THE FCC INDECENCY LAW

A writer for a major ham radio publication has tackled the recent court ruling that overturned the FCC's regulation on indecency in Broadcasting and what it might mean to ham radio enforcement. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

With the Federal courts having recently struck down the FCC's policy on broadcast indecency, many are wonder what impact if any that decision will have on the prosecution of wayward members of the ham radio community. Now, writing in his Washington Readout column in the October issue of CQ Magazine, columnist Fred Maia, W5YI, confronts this issue head on.

In his article, W5YI notes that in the past, the FCC has held that the indecency rules applying to radio and television broadcasting also applied to amateur radio transmissions. That in making obscenity or indecency determinations that the FCC staff analyzes what was actually said. If the FCC determines that the curse words transmitted actually violate its rules, it can issue a Notice of Apparent Liability or N-A-L which is a preliminary finding that the rules have been violated.

But says Maia, to date the FCC has never issued a citation or a N-A-L to a ham radio operator for solely violating its obscenity or indecency rules. The violation notice usually mentions other accompanying offenses which can be easily proven and do not involve controversial First Amendment issues.

Fred Maia is not an attorney but is a longtime FCC watcher and writer. He also possesses a very good understanding of communications law and has the ability to make it understandable to the general ham radio public. And he does that very well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

Fred Maia is best known as the founder of the W5YI V-E-C and was the longtime editor of the highly acclaimed W5YI Report ham radio newsletter. His very insightful commentary on the demise of the FCC's indecency policy and its affect on our hobby begins on page 54 of the October issue of CQ Magazine. It's an article well worth reading by all in the United States ham radio community. (CQ)

**

ENFORCEMENT IN SPACE: EARTH RESOURCES SATELLITE BLINDED BY ILLEGAL TERRESTRIAL OPERATIONS

And speaking about enforcement, here's a story of a different sort. The European Space Agency says that it has launched a behind-the-scenes campaign to shut down pirate radio and TV transmissions interfering with a major climate satellite.

According to ESA, its Soil Moisture and Ocean Salinity probe has been bugged by patches of interference from radar, TV and radio transmissions in what should be a protected band. The interference to the bird is at its peak as it passes over parts of southern Europe, Asia, the Middle East and some coastal zones.

ESA believes that the intrusion has two sources. One is a leak from other services into the spectrum from 1400 to1427 MHz. This is a portion of the so called L-band that has been assigned to space astronomy and Earth exploration satellites. The other source is believed to be illegal transmissions by TV, radio links and networks such as security systems that are operating in this radio band. ESA adds that terrestrial radars appear to cause interference as well.

The Soil Moisture and Ocean Salinity satellite reportedly cost some 315-million-euro's to develop and launch into space. (ESA)

**

HAM RADIO BUSINESS: MORE CHINA BUILT HAM GEAR ON ITS WAY

The sales success of the low priced Wouxon dual band hand held transceivers has aparenty not been lost on the well established ham radio retail trade. This with the announcement by the five member buying group Ham Pros will be selling both the Wouxon and other made-in-China ham radio gear under the banner of nowchinadirect dot com.

In addition to the Wouxon HT, other gear in their full psagre ad in the November QST Magazine include several metered power supplies, a pair of SWR and power meters and two hand held transceivers from TYT. These are the TH-F5 single bander that covers 2 meters and the UV-F1 that covers both 2 meters and 70 centimeters.

The ad notes that all of the H-T's carry Part 90 FCC certification. According to ARRL Counsel Christopher Imlay, W3KD, writing elsewhere in the same issue of QST, Wouxon and presumably other mainland China manufacturers who have obtained Part 90 certification for their

equipment can legally sell these units and hams. Also that hams can use them as long as they are operated strictly in the ham radio bands.

Imlay also notes that Wouxon U.S. has chosen to limit the range in which their HT's can transmit to the ham radio bands. He says that this is akin to good fences making for good neighbors.

You can read the entire text of Attorney Imlay's regulatory interpretation along with a full review of the Wouxon dual band HT beginning on Page 52 of the November issue of QST. More on the new mainland China manufactured equipment from Ham Pro's is on-line at nowchinadirect dot com. (ARNewsline(tm) from nowchinadirect.com, QST, others)

RESCUE RADIO: REBUILDING BROADCASTING FROM GROUND ZERO

An audio recording of the 2003 Audio Engineering Society conference detailing how radio and television broadcasting was returned to the metro New York City area following the September 11th 2001 terrorist attack by al-Quida is now on line at the AES website.

Immediately after the attack, broadcasters, especially TV stations, had to scramble to get back on the air or return their service to full coverage. A common solution was to broadcast from the Empire State Building, where many had been based before moving to the World Trade Center. Nearly two years later, the the 115th AES Convention featured a session titled "Rebuilding of New York Broadcasting." It examined the events from 9/11 through getting broadcasters back up onto the air and exploring ways to make the broadcast systems of the city safer and more secure.

Now, seven years later, audio of that two-hour session is available online at the AES website for anyone to hear. The panel included Joe Giardina of DSI RF Systems, John Lyons of property owner the Durst Organization, Kevin Plumb of WABC and WPLJ, Steve Shultis of WNYC Radio and Tom Silliman of tower builder and antenna installer ERI Inc.

You can hear the entire 2 hour and 18 minute Podcast at tinyurl.com/911radio (RW, AES-NY)

NAMES IN THE NEWS: RD3PQ UPLOADS QSL 300 MILLION TO LoTW

Some names in the news. First up is Victor Morozov, RD3PQ, of Tula, Russia who had the honor of uploading QSO number 300 million to ARRL's Logbook of the World electronic QSL service. Yhe League commenced operation of Logbook of the World in 2001. January 2011 will be a decade since the first digital log and confirmation of QSO's in this program were first published. As for Morozov, upload 300 million was his way of confirming a QSO with Ivan Gombos, OM3CGN operating portable SV2 that took place this past October 5th. (WIA News)

**

NAMES IN THE NEWS: G0JHC RECEIVES ROYAL ORDER AWARD

And Neil Carr, G0JHC, has been awarded the prestigious Royal Order of Transatlantic Brass Pounders trophy that recognizes outstanding and consistent DX work.

The Royal Order of Transatlantic Brass Pounders trophy was first awarded in 1924. The original Members of the Order were from those who operated transatlantic tests from 1921 to 1924.

As such, Neil Carr, G0JHC joins a small group of elite U-K operators who have earned this honor. RSGB President Dave Wilson, M0OBW and HF Awards Manager, John Dunnington, G3LZQ will visit G0JGC shortly to present the award. (RSGB)

EMERGING TECHNOLOGY: NIST DEVELOPS RHEOMETER ON A CHIP

Its being called a lab on a chip and its purpose is to experiment with elasticity in just about any material that you can think of. Even things found inside of your ham radio station. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

Researchers at the National Institute of Standards and Technology, better known in ham radio simply as the NIST have demonstrated a microminiaturized device that can make complex viscosity measurements on sample sizes as small as a few nano-liters. Currently a table-top prototype, the NIST Rheometer could be a particularly valuable tool for biotechnologists studying minute quantities of complex materials that must function in confined spaces.

Viscosity, elasticity and how materials flow when subject to a force is the subject of the science of Rheology. Measurements tell a lot about a complicated material like a gel in determining if it is more like a liquid or a solid and to what degree under what conditions by determining its visco-elasticity. For example, the popular children's toy known as Silly Putty is a classic example of complex visco-elasticity, bouncing better than a rubber ball under a sharp, sudden force but slumping into a puddle when left alone.

NIST's early prototype Rheometers include only the core sliding plate mechanism on a MEMS chip, and rely on a microscope and high-speed cameras for the actual measurements. According to the research team, in their more polished version the necessary sensors could be included on the MEMS chip and the entire instrument reduced to a handheld device.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD

--

The National Institute of Standards and Technology's Dynamic Rehometer is described in a new paper adptly titled - Lab on a Chip. (NIST, Science Daily, Science OnLine)

**

THE CONTEST CORNER: FINLAND GROUP SPONSORS FEMALES IN RADIO

Turning to the contest corner, the Scandinavian Young Ladies Radio Amateurs organization is sponsoring a have a contest to promote activity around the world by female radio amateurs as well as to encourage more amateur radio communication between women and men. This event takes place from 10.00 UTC on October 23rd to 10.00 UTC on October 24th. Rules for this one are on-line at contestclubfinland.com. (RCF)

**

THE CONTEST CORNER: NEXT CQIR CONTEST IN 2012

A Committee of the Irish Radio Transmitting Society or IRTS at its recent meeting confirmed that as part of the 2012 80th Celebrations of the founding of the organization will be in the form of a second CQIR International HF Contest. That event will be held over the St.Patricks Day weekend in 2012. This will be somewhat similar to the successful

1st CQIR Contest held as part of the 75th Anniversary celebrations. Planners say that with the rising sun spot numbers, HF conditions will be much better for the event. (IRTS)

ON THE AIR: CANADIAN HAMS CELEBRATE THE UN

On the air, a group of Canadian hams has decided to celebrate the anniversary of an important United Nations agency. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

The Westcumb Amateur Radio Club from Amherst, Nova Scotia has been granted the callsign VC1J for the special event station celebrating the 65th anniversary of the United Nations and its UNESCO organization on October 24th. They will be operating from the Joggins Fossil Cliffs in t Nova Scotia which became a UNESCO site last year. A route to obtain the special event QSL card will be announced later. I'm Fred Vobbe, W8HDU

--

UNESCO is an acronym that stands for the United Nations Educational Scientific and Cultural Organization. It's stated goal is to create the conditions for dialogue among civilizations, cultures and peoples, based upon respect for commonly shared values (RAC)

**

ON THE AIR:BV100 CELEBRATES THE 100th ANNIVERSARY OF THE REPUBLIC OF CHINA

Amateur radio operators from the Republic of China Centenary Foundation in Taiwan will be activating special event station BV100 between now and December 31st, 2011. This operation is to celebrate the 100th anniversary of the Republic of China. Operations will be on all bands and modes. QSL via BV2KI. (OPDX)

**

DX

In DX, DK7PE, will be on the air as 5X0CW from Kampala, Uganda, for one week starting October 27th. He plans to use his Elecraft K2 radio and jumper beam on 40 through 10 meters with his activity mainly on CW. QSL via his home callsign.

His operation will be followed by that of G3XAQ, who will be active as 5X1XA from Kampala between November 14th and December 1st. Operations will be CW only on the HF bands using 100 watts and small beam. QSL via G3SWH.

And starting October 24th, G3VDB will be active for two weeks from the Maldives as 8Q7EJ. On this trip he plans to operate from Bandos Island, however operations are subject to hotel permission. His activity will be holiday style mostly on 20 meters CW. QSL via his home callsign.

Operators KM9D and KF4TUG have been based in Sandakan, East Malaysia, for the past few months. Mike is currently active portable 9M6 and has been on 30, 20, 17, and 12 meters CW. The length of their stay is unknown. QSL via OM2SA.

Lastly, CX2CC, is now active as 9Q5OAR from the City of Goma, in the Democratic Republic of the Congo. He will be there for a year performing work for the United Nations and hopes to be active using slow speed CW SSB and the Digital modes. He has already been heard on 15, 12 and 10 meter SSB. QSL via his home callsign of CX2CC

THAT FINAL ITEM: ARENA OF WONDER - WIRES TO WIRELESS

And finally this week, word from down-under that ham radio will be part of a major expo at the end of October. Graham Kemp, VK4BB, has the details:

--

The Melbourne based Prahran Mechanics Institute 'Throughout History Week' is an annual event held at the groups Prahran offices. The 2010 display will take place over the week of the 25th to the 30th of October and features a WIA Centenary display prepared by well known WIA historian Peter Wolfenden VK3RV.

The display titled 'Arena of Wonder' from Wires to Wireless is advertised as an extraordinary collection of wireless equipment and memorabilia marking the 100th anniversary of the Wireless Institute of Australia.

For the Amateur radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News reportinbg from Brisbane, Ausatralia.

--

Again, those dates are the 25th to the 30th of October, for the Arena of Wonder expo where its now springtime in Australia. (WIA News)

Amateur Radio Newsline(tm) Report 1732 - October 22 2010

The following is a closed circuit and not necessarily for air. With a report on Amateur Radio Newsline's current finances here is our Producer Bill Pasternak, WA6ITF:

--

OK. Ill just take a second to thank all of you who responded to last months appeal. Thanks to you, we have enough in the account to hopefully hold us through the end of November if we watch our expenses carefully. Your generosity has been overwhelming and we only wish we had a way to thank each of you individually. Unfortunately we can't, so we can only say how grateful we really are via this message. And with that I say 73 and here's Jim Damron, N8TMW, with this weeks news.

--

Thanks Bill. Now, Amateur Radio Newsline report number 1732 with a release date of Friday, October 22 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. A wireless conference down-under will discuss the future of communications in New Zealand, more on the break-up of the Netherlands Antillies and its affect on DXing, U-K hams get van update on how some ham radio bands will be used for the 2012 Olympics and ham radio will take part in a major expo in Australia. All this and more on Amateur Radio Newsline(tm) report number 1732 coming your way right now.

RESTRUCTURING: CONFERENCE ON WIRELESS TECHNOLOGIES TO BE HELD IN ZL

The New Zealand Ministry of Economic Development is convening a seminar on Future Wireless Technologies, including Cognitive Radio, Software Defined Radio and Future Mobile and Broadcast Technologies to be held Thursday November 4th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is here with the details:

--

This year's seminar will be held here in the city of Auckland. It will immediately follow the 16th Asia Pacific Communications Conference being held at the same venue from October 30th to November

3rd.

The purpose of the seminar is to share knowledge among wireless equipment manufacturers, research institutions, service providers and government about emerging developments. It will also help in identifying the areas on which to focus future technical and regulatory work.

The program for this gathering will be published shortly on the Radio Spectrum Management website. More information on this event is on-line at apcc2010 dot aut dot ac dot nz.

Reporting from down under, Im Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

A similar event was held in September of 2009. It theme highlighted the importance of sharing information on the progress of such initiatives and developments in this area. (NZART News)

**

WORLDBEAT: BREAKUP OF THE NETHERLANDS ANTILLES AND THE CQ OPERATING EVENTS

With several groups operating from the new DX entities created by the breakup of the Netherlands Antilles ongoing, questions have arisen regarding their status for CQ DX awards and contests. To clarify the matter, CQ Editor Rich Moseson, W2VU, has issued the following statement which we paraphrase in part.

In regard to the CQ DX Awards program, each of the five islands involved in the change of status retains its previous PJ callsign prefix. According to CQ DX Awards Manager Billy Williams, N4UF, the previous entities of the Leeward Islands and Windward Islands Islands were deleted as of October 9, 2010. Four new entities - Curacao (PJ2), Sint Maarten (PJ7), Bonaire (PJ4) and Saba/St. Eustatius (PJ5/6) became active on October 10, for a net gain of two DX entities. Confirmations for contacts made with the new entities will be accepted for CQ award credit effective immediately.

Moseson went on to note that the country multiplier list for the CQ World Wide DX Contests is based on a combination of the ARRL's DXCC list and Germany's Deutscher Amateur Radio Club's Worked All Europe list. Since the ARRL has also made the same changes, effective October 10th, and these "new ones" will each count as separate country multipliers in the CQ sponsored events, Moseson said. (CQ)

NEWSLINE FOLLOW-UP: UK REGULATOR OFCOM UPDATE HAM SPECTRUM USE FOR 2012 GAMES

U-K telecommunications regulator Ofcom has published an updated spectrum plan for wireless communications at the London 2012 Olympic Games. This includes an update on the various demands for spectrum and how they will be met in part by tapping into the VHD and UHF ham bands. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Frequencies in a number of bands allocated in the United Kingdom on a secondary basis to the Amateur Radio Service will be used at Olympic venues. This according to United Kingdom telecommunications regulator Ofcom who days that the 70 cm, 23 cm and 13 cm bands will be used.

Regarding the 430 MHz band the plan, Ofcom says that the 430 to 440 MHz band is managed by the Ministry of Defense and is used by Radio Amateurs. Ofcom notes RAYNET's support for the St John's Ambulance, Red Cross and other similar users as well as amateur radio special events stations for cultural events linked to the London 2012 Games will be considered.

According to Ofcom, as in past games, amateur radio bands, especially 430 to 440 MHz have been used and this remains a possibility for the London 2012 Games. This, if the demand requires it.

In the statement Ofcom says that it has identified the bands that could be used for land mobile radio, handheld communications and talkback. As such it is now able to provide more technical detail for use of those these bands. With regard to the Amateur-Satellite Service the document says that while Ofcom does not at this time think it will be necessary to use those frequency bands. However, it adds that it will retain the option to consider whether there is a requirement to use them as it develops its venue-specific spectrum plans.

Ofcom adds that it will continue to work closely with key stakeholders as it develops its spectrum utilization plans for the 2012 games.

Reporting from Scottsdale, Arizona, I'm Norm Seeley, KI7UP, for the Amateur Radio Newsline.
--
A final version of the Ofcom 2012 Olympic games radio plan and its impact on amateur radio will be published early next year. The current Ofcom news release is on line at tinyurl.com/33x8zcd (Southgate)

NAMES IN THE NEWS: HAM OPERATOR RE-ELECTED ITU SECRETARY GENERAL

Member states of the International Telecommunication Union have elected Dr. Hamadoun Tour&#65533;, HB9EHT, of Mali as Secretary-General of that organization for a second four-year term. Dr. Tour&#65533; won the position with 151 votes, with 157 countries present and voting.

Addressing the conference after the vote, HB9EHT told close to 1,500 conference participants from around the world that he will put a

special emphasis on broadband access, as well as continuing to ensure that cyber-security is high on everyone's agenda.

Tour&#65533; has also pledged to ensure that small island developing states and land-locked countries get special attention. He also said that he will encourage more private sector involvement through public-private partnerships, both within ITU and in the field.

RADIO LAW: CQ WRITER TACKLES THE DEMISE OF THE FCC INDECENCY LAW

A writer for a major ham radio publication has tackled the recent court ruling that overturned the FCC's regulation on indecency in Broadcasting and what it might mean to ham radio enforcement. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

With the Federal courts having recently struck down the FCC's policy on broadcast indecency, many are wonder what impact if any that decision will have on the prosecution of wayward members of the ham radio community. Now, writing in his Washington Readout column in the October issue of CQ Magazine, columnist Fred Maia, W5YI, confronts this issue head on.

In his article, W5YI notes that in the past, the FCC has held that the indecency rules applying to radio and television broadcasting also applied to amateur radio transmissions. That in making obscenity or indecency determinations that the FCC staff analyzes what was actually said. If the FCC determines that the curse words transmitted actually violate its rules, it can issue a Notice of Apparent Liability or N-A-L which is a preliminary finding that the rules have been violated.

But says Maia, to date the FCC has never issued a citation or a N-A-L to a ham radio operator for solely violating its obscenity or indecency rules. The violation notice usually mentions other accompanying offenses which can be easily proven and do not involve controversial First Amendment issues.

Fred Maia is not an attorney but is a longtime FCC watcher and writer. He also possesses a very good understanding of communications law and has the ability to make it understandable to the general ham radio public. And he does that very well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels.

--

Fred Maia is best known as the founder of the W5YI V-E-C and was the longtime editor of the highly acclaimed W5YI Report ham radio newsletter. His very insightful commentary on the demise of the FCC's indecency policy and its affect on our hobby begins on page 54 of the October issue of CQ Magazine. It's an article well worth reading by all in the United States ham radio community. (CQ)

**

ENFORCEMENT IN SPACE: EARTH RESOURCES SATELLITE BLINDED BY ILLEGAL TERRESTRIAL OPERATIONS

And speaking about enforcement, here's a story of a different sort. The European Space Agency says that it has launched a behind-the-scenes campaign to shut down pirate radio and TV transmissions interfering with a major climate satellite.

According to ESA, its Soil Moisture and Ocean Salinity probe has been bugged by patches of interference from radar, TV and radio transmissions in what should be a protected band. The interference to the bird is at its peak as it passes over parts of southern Europe, Asia, the Middle East and some coastal zones.

ESA believes that the intrusion has two sources. One is a leak from other services into the spectrum from 1400 to1427 MHz. This is a portion of the so called L-band that has been assigned to space astronomy and Earth exploration satellites. The other source is believed to be illegal transmissions by TV, radio links and networks such as security systems that are operating in this radio band. ESA adds that terrestrial radars appear to cause interference as well.

The Soil Moisture and Ocean Salinity satellite reportedly cost some 315-million-euro's to develop and launch into space. (ESA)

**

HAM RADIO BUSINESS: MORE CHINA BUILT HAM GEAR ON ITS WAY

The sales success of the low priced Wouxon dual band hand held transceivers has aparenty not been lost on the well established ham radio retail trade. This with the announcement by the five member buying group Ham Pros will be selling both the Wouxon and other made-in-China ham radio gear under the banner of nowchinadirect dot com.

In addition to the Wouxon HT, other gear in their full psagre ad in the November QST Magazine include several metered power supplies, a pair of SWR and power meters and two hand held transceivers from TYT. These are the TH-F5 single bander that covers 2 meters and the UV-F1 that covers both 2 meters and 70 centimeters.

The ad notes that all of the H-T's carry Part 90 FCC certification. According to ARRL Counsel Christopher Imlay, W3KD, writing elsewhere in the same issue of QST, Wouxon and presumably other mainland China manufacturers who have obtained Part 90 certification for their equipment can legally sell these units and hams. Also that hams can use them as long as they are operated strictly in the ham radio bands.

Imlay also notes that Wouxon U.S. has chosen to limit the range in which their HT's can transmit to the ham radio bands. He says that this is akin to good fences making for good neighbors.

You can read the entire text of Attorney Imlay's regulatory interpretation along with a full review of the Wouxon dual band HT beginning on Page 52 of the November issue of QST. More on the new mainland China manufactured equipment from Ham Pro's is on-line at nowchinadirect dot com. (ARNewsline(tm) from nowchinadirect.com, QST, others)

RESCUE RADIO: REBUILDING BROADCASTING FROM GROUND ZERO

An audio recording of the 2003 Audio Engineering Society conference detailing how radio and television broadcasting was returned to the metro New York City area following the September 11th 2001 terrorist attack by al-Quida is now on line at the AES website.

Immediately after the attack, broadcasters, especially TV stations, had to scramble to get back on the air or return their service to full coverage. A common solution was to broadcast from the Empire State Building, where many had been based before moving to the World Trade Center. Nearly two years later, the the 115th AES Convention featured a session titled "Rebuilding of New York Broadcasting." It examined the events from 9/11 through getting broadcasters back up onto the air and exploring ways to make the broadcast systems of the city safer and more secure.

Now, seven years later, audio of that two-hour session is available online at the AES website for anyone to hear. The panel included Joe Giardina of DSI RF Systems, John Lyons of property owner the Durst Organization, Kevin Plumb of WABC and WPLJ, Steve Shultis of WNYC Radio and Tom Silliman of tower builder and antenna installer ERI Inc.

You can hear the entire 2 hour and 18 minute Podcast at tinyurl.com/911radio (RW, AES-NY)

**

HAM HAPPENINGS" CQ WW WEBINAR ON OCTOBER 24

If you are at all interested in contesting, then mark down Sunday, October 24th for an open to the public free webinar dealing with the CQ World Wide contests.

The session will be moderated by CQ World Wide DX Contest Director Bob Cox K3EST. He along with committee members John Dorr, K1AR and Doug Zwiebel, KR2Q will provide an update on the 2010 CQ World Wide SSB and CW DX contests. A Question and Answer period will follow the presentation.

The event is hosted by the Potomac Valley Radio Club and begins at 1900 hours UTC. To register go to www.pvrc.org and click the Upcoming Webinars link. (K4ZW)

NAMES IN THE NEWS: RD3PQ UPLOADS QSL 300 MILLION TO LoTW

Some names in the news. First up is Victor Morozov, RD3PQ, of Tula, Russia who had the honor of uploading QSO number 300 million to ARRL's Logbook of the World electronic QSL service. Yhe League commenced operation of Logbook of the World in 2001. January 2011 will be a decade since the first digital log and confirmation of QSO's in this program were first published. As for Morozov, upload 300 million was his way of confirming a QSO with Ivan Gombos, OM3CGN operating portable SV2 that took place this past October 5th. (WIA News)

**

NAMES IN THE NEWS: G0JHC RECEIVES ROYAL ORDER AWARD

And Neil Carr, G0JHC, has been awarded the prestigious Royal Order of Transatlantic Brass Pounders trophy that recognizes outstanding and consistent DX work.

The Royal Order of Transatlantic Brass Pounders trophy was first awarded in 1924. The original Members of the Order were from those who operated transatlantic tests from 1921 to 1924.

As such, Neil Carr, G0JHC joins a small group of elite U-K operators who have earned this honor. RSGB President Dave Wilson, M0OBW and HF Awards Manager, John Dunnington, G3LZQ will visit G0JGC shortly to present the award. (RSGB)

EMERGING TECHNOLOGY: NIST DEVELOPS RHEOMETER ON A CHIP

Its being called a lab on a chip and its purpose is to experiment with elasticity in just about any material that you can think of. Even things found inside of your ham radio station. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

Researchers at the National Institute of Standards and Technology, better known in ham radio simply as the NIST have demonstrated a microminiaturized device that can make complex viscosity measurements on sample sizes as small as a few nano-liters. Currently a table-top prototype, the NIST Rheometer could be a particularly valuable tool for biotechnologists studying minute quantities of complex materials that must function in confined spaces.

Viscosity, elasticity and how materials flow when subject to a force is the subject of the science of Rheology. Measurements tell a lot about a complicated material like a gel in determining if it is more like a liquid or a solid and to what degree under what conditions by determining its visco-elasticity. For example, the popular children's toy known as Silly Putty is a classic example of complex visco-elasticity, bouncing better than a rubber ball under a sharp, sudden force but slumping into a puddle when left alone.

NIST's early prototype Rheometers include only the core sliding plate mechanism on a MEMS chip, and rely on a microscope and high-speed cameras for the actual measurements. According to the research team, in their more polished version the necessary sensors could be included on the MEMS chip and the entire instrument reduced to a handheld device.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD

--

The National Institute of Standards and Technology's Dynamic Rehometer is described in a new paper adptly titled Lab on a Chip. (NIST, Science Daily, Science OnLine)

**

THE CONTEST CORNER: FINLAND GROUP SPONSORS FEMALES IN RADIO

Turning to the contest corner, the Scandinavian Young Ladies Radio Amateurs organization is sponsoring a have a contest to promote activity around the world by female radio amateurs as well as to encourage more amateur radio communication between women and men. This event takes place from 10.00 UTC on October 23rd to 10.00 UTC on October 24th. Rules for this one are on-line at contestclubfinland.com. (RCF)

**

THE CONTEST CORNER: NEXT CQIR CONTEST IN 2012

A Committee of the Irish Radio Transmitting Society or IRTS at its recent meeting confirmed that as part of the 2012 80th Celebrations of the founding of the organization will be in the form of a second CQIR International HF Contest. That event will be held over the St.Patricks Day weekend in 2012. This will be somewhat similar to the successful 1st CQIR Contest held as part of the 75th Anniversary celebrations. Planners say that with the rising sun spot numbers, HF conditions will be much better for the event. (IRTS)

Sirs:

The enclosed printout is a post that was recently put into two Usenet newsgroups. As you can see, it is done with the hope that the person named in the post will find himself in trouble with the law. This post itself is a crime as you probably know.

If you look further you will realize that the post was made via an anonymous remailer, a favorite tactic of who we know to be Roger Wiseman. Of course being able to prove that Mr. Wiseman in fact posted this is near impossible because the remailer service themselves claim they don't keep track of users.

Mr. Wiseman has a very long history of stalking the person over whose name he placed this post. The stalking and name-calling goes back two or more years.

You may well ask what my interest in this is and to be honest I have little, other than not liking the filth that Roger Wiseman posts. It may interest you to know that Mr. Wiseman used to have an account with Ovis.net, run by a Pam Hoffer. Mr. Wiseman had his Ovis account canceled just prior to signing on with you. The reason he was canceled from Ovis and the provider before that was because of his extremely filthy language and personal abuse of several users, including but not limited to Mr. Davies. Roger even had some very foul things to say about Ms. Hoffer and when she read what he said his Ovis account was canceled the very next day.

Lastly, what worries some of us is Mr. Wiseman's seeming fascination with child pornography and the fact that he seems to be so well versed in it. I do understand that the Glendale police dept. once interviewed Mr. Wiseman about his internet posts but I have no idea if any resolution ever came of it.

I will include my name and address should you wish to contact me. I have no need to send you this kind of missive anonymously but I will ask that you keep my name and address private.

Thank you.

3714. Re: Pam Hoffer booted Roger from this account on the very day she received my letter.

Cops: Glen Dale WV man had sex with dog

By Alexis Stevens
The News Register

A Glen Dale man accused of having sex with a dog remained in jail Sunday night, five days after his arrest, a sheriff's office spokesman told the News Register.

Marshall County Sheriff's Office
Roger Wiseman, 49, was arrested earlier this week after he allegedly broke into a mobile home and had sex with a dog.

Roger Wiseman, 49, has been charged with bestiality and burglary after he allegedly broke into a mobile home and had sex with the animal, the Marshall County Sheriff's Office said.

Neighbors reported seeing Wiseman walking two dogs just before 8 p.m. Monday, police said. Wiseman allegedly took one of the dogs into the mobile home, and neighbors heard loud noises coming from the trailer, according to the report.

The first deputy at the scene went into the trailer and found Wiseman having sex with the dog, police said.

Witnesses said the dog involved was a black mutt about the size of a Labrador retriever.

Wiseman is being held on $20,000 bond.

Recent quotes about The Retard:
Jimbo: "You're an abortion that should have happened."
Attila: "Are you a corpse that has not died yet?"
Virgil: "The world would be a better place if we could go back in time and abort some idiots like formby before they were hatched."
Ejercito:"If he believed in racial hygiene, he would gas himself."
Ray Fischer: "We're not interested in your sexual fantasies, pervert."
Doug: "Pitiful diarrhea is the Revd's real name."
The Chief Instigator: "You've all the strength of wet toilet paper."
W.T.S.: "You are a liar. You are an obvious liar. You are a liar who has no talent for making a lie believable."
Doug: "Your posts are nothing but written diarrhea."

Amateur Radio Newsline Report 1727 - September 17 2010

RADIO LAW: NY STATE HAM WINS FOR HAM RADIO IN TROY CITY COURT
A New York State ham ticketed under the states driving while using a cellphone law has won his case in court. This, after a judge affirms that ham radio gear is not hone the same as a mobile phone. We have more in this report:
--
Back on May 30th Steve Bozak, WB2IQU, of Clifton Park, New York, was operating his station while mobile when an officer in Troy New York pulled him over and cited him under the states cellular phone ban while driving law. Bozak, whose mobile was a hand held transceiver protested. Rather than paying the $100 fine he decided to take the matter to court. When he initially lost in Traffic Court he appealed the matter to the Troy City Court. It was there on September 8th that judge Matthew Turner found in Bozak's favor and dismissed the charge.
In rendering his decision the judge found that the Vehicle and Traffic Law defines a Mobile Telephone as a device used by subscribers and other users of wireless telephone service to access such services. Also that a Wireless Telephone Service is defined as two-way real time voice telecommunications service that is interconnected to a public switched telephone network and is provided by a commercial mobile radio service.
The judge then continued by noting that a review of 47 C.F.R.20.3 reveals that Citizens Band Radio Service and by inference Amateur Radio as well is defined as a private mobile radio service not commercial mobile radio service. Therefore, the court found that the use of an amateur radio device does not fit the definition of a mobile telephone as defined under the Vehicle and Traffic Law and granted Bozak's motion to dismiss.
For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--
At airtime, it is not known if the city of Troy will appeal the judges decision in Bozak's favor or will simply let the matter drop. And while there have been several attempts at getting the law changed to specifically exclude radio

amateurs operating mobile, to date there has been no interest on the part of the legislature to do so. This means that any amateur cited under it has to challenge it as Seve Bozak did or simply pay the fine. (KS4BZ, others)

Which illustrates what I am always bitching about.....The authorities will beat you down with your own money! They will do something unconstitutional to you, and if you want to protest it, you have to spend your own time and money to do so. And then, they will appeal and/or do the same thing to the next guy, and use the taxpayers money to finance their transgressions. So, the citizenry doesn't stand a chance of a snowball in hell of ever getting on top.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 "SUITS UP" FOR FEBRUARY 2011
LAUNCH

Earlier this year, astronauts living on the International Space
Station had to discard two surplus Orlan space suits. With the loss of
the suits, those involved with AMSAT and Amateur Radio on the
International Space Station were at a loss. One of these suits was to
be used to house the electronics for the upcoming SuitSat-2 mission:
the batteries were to be mounted inside the suit, solar panels attached
to the extremities with the electronics, with video cameras and an
antenna mounted on the helmet. But even though the removal of the space
suits took away the "Suit" component of the deployment, AMSAT and ARISS
forged ahead, changing the configuration of the satellite and Amateur
Radio experiment and giving it a new name: ARISSat-1/RadioSkaf-V. Read
more here
<http://www.arrl.org/news/arissat-1-suits-up-for-february-2011-launch>.

==> + ON THE AIR: NO "MAYBES" ABOUT IT -- ARRL SWEEPSTAKES IS FUN!

ARRL Sweepstakes has been part of Amateur Radio in the US and Canada for more than 75 years. In 2010, the tradition continues with the 77th running of the best domestic contest in all of Amateur Radio: CW will be the weekend of November 6, while the Phone portion of the contest runs the weekend of November 20. The 2010 ARRL November CW Sweepstakes runs from 2100 UTC Saturday, November 6 through 0300 UTC Monday, November 8. The SSB portion of Sweepstakes runs from 2100 UTC Saturday, November 20 through 0300 UTC Monday, November 22. Why not make plans now to join thousands of other radio amateurs across the continent and get in on this year's fun in the ARRL November Sweepstakes! Read more here <http://www.arrl.org/news/no-maybes-about-it-arrl-sweepstakes-is-fun>.

==> + PUBLIC SERVICE: THE 2010 GLOBAL AMATEUR RADIO EMERGENCY COMMUNICATIONS CONFERENCE

The 2010 Global Amateur Radio Emergency Communications (GAREC) Conference was held October 10-12 in Cura&#65533;ao (PJ2). At the time most conference attendees arrived in Cura&#65533;ao, it was a part of the Netherlands Antilles along with Bonaire, St Maarten, Saba, and St Eustatius. By the time the attendees headed home, independence had been declared and Cura&#65533;ao was its own nation within the Kingdom of the Netherlands. Read more here <http://www.arrl.org/news/the-2010-global-amateur-radio-emergency-communications-conference>.

==> IN THE SHACK: TWO NEW ARRL KITS COMING SOON

Two new ARRL kits are in the final throes of production. The first is a Morse code oscillator, produced for ARRL by MFJ Enterprises. The project is a good "beginners" electronics kit. We expect the kit will be popular with members, particularly newcomers, and with clubs, instructors and teachers seeking a classroom kit-building experience. A supplementary resource guide for students and educators will be made available by the ARRL Education and Technology Program. The guide helps cover the fundamentals of the working circuit and its components.

<http://www.arrl.org/shop/ARRL-Morse-Code-Oscillator-Kit/> A second kit is a PIC programming lab and project, produced for ARRL by Cana Kit (Canada). This more substantial kit is intended to be used with ARRL's PIC Programming for Beginners <http://www.arrl.org/shop/ARRL-s-PIC-Programming-for-Beginners/> book (revised first edition). The kit includes all the necessary components, parts and boards, and follows the book's step-by-step exercises and tutorial. The kit also includes all the necessary parts to build a microprocessor-controlled CW keyer, which is the book's culminating project.

"We're excited about these new projects, which help emphasize kit construction, basic electronics, and the extraordinary potential of microcontrollers," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "There's no better way to advance the radio art than by introducing more hams to project building and homebrewing." Order your ARRL Morse

Code Oscillator
<http://www.arrl.org/shop/ARRL-Morse-Code-Oscillator-Kit/> and ARRL PIC
Programming Kit <http://www.arrl.org/shop/ARRL-s-PIC-Programming-Kit/>
today in the ARRL Online Store <http://www.arrl.org/shop>.

==> + INTERNATIONAL SPOTLIGHT: ARRL VISITS BRITISH HAMS, RSGB AT
NATIONAL HAMFEST

Earlier this month, ARRL Marketing Manager Bob Inderbitzen, NQ1R,
represented the League at the National Hamfest in the United Kingdom.
Billed as the biggest convention in the UK, the National Hamfest
"kicked off" Ham Week UK, October 1-10. Now in its second year, the
hamfest is sponsored by both the Lincoln Short Wave Club and the Radio
Society of Great Britain. Ham Week concluded with the RSGB Convention
-- formerly the HF Convention -- held October 8-10. According to
Inderbitzen, the RSGB Convention is a smaller event than the National
Hamfest, and includes lectures and presentations for HF and VHF
interests, but no exhibits. Read more here
<http://www.arrl.org/news/arrl-visits-british-hams-rsgb-at-national-hamfest>.

==> SOLAR UPDATE

Tad "The rain exploded with a mighty crash as we fell into the Sun
<http://www.youtube.com/watch?v=oM6auGQ2VGo>" Cook, K7RA, reports:
Although this week saw a high daily sunspot number of 74 on October 26,
the average sunspot number for the week dropped more than five points
to 50.3. One new sunspot group, numbered 1119, emerged this week, but
1117 -- which has been visible since October 19 -- has become huge. On
Wednesday, October 27, it measured 450 millionths of a solar
hemisphere, larger than any single sunspot group this year. Look for
more information -- including some information from Stu Phillips, K6TU,
on how to calculate signal strengths for SSB and CW signals over the
same paths shown in WSPR data -- on the ARRL Web site on Friday,
October 29. For more information concerning radio propagation, visit
the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by Paul McCartney's Band on the Run
<http://en.wikipedia.org/wiki/Band_on_the_Run_%28song%29>.

==> + DX NEWS: ARRL DXCC DESK APPROVES SIX 2010 OPERATIONS

ARRL DXCC Manager Bill Moore, NC1L, reports that six 2010 operations
-- Afghanistan (T6MB), Bhutan (A51A) and Burundi (9U1RSI, 9U4T, 9U1KI
and 9U1VO) have been approved for DXCC credit. "If you had cards that
were recently rejected for this operation, please send an e-mail
<dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Results will
appear in Logbook of The World (LoTW
<https://p1k.arrl.org/lotwuser/default>) accounts, as well as online on
the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK ON THE RADIO

This week:

- October 30-31 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
CQ Worldwide DX Contest (SSB); 10-10 International Fall Contest
(Digital); 50 MHz Fall Sprint
- November 2 -- ARS Spartan Sprint

Next week:

- November 5 -- QRP Fox Hunt
- November 6-7 -- Ukrainian DX Contest
- November 6-8 -- ARRL CW Sweepstakes <http://www.arrl.org/sweepstakes>
- November 7 -- High Speed Club CW Contest
- November 10 -- QRP Fox Hunt
- November 10-11 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

RESCUE RADIO: AMATEUR RADIO ASSISTS IN THAILAND FLOOD RELIEF

Ham radio has come to the aid of flood stricken Thailand. Norm Seeley,
KI7UP, has more:

--

Thailand's amateur radio society R-A-S-T reports that amateur radio
operators in two flood-stricken areas of Thailand have been putting
their communications capabilities to good use, with members helping
authorities setting up a communications center using the call sign,
HS3AN.

It, has been working closely with government agencies. Relaying details
about the emergency situation and explaining the problems being faced
to officials and relief workers so that action to assist them can be
taken.

The president of one of the flood-stricken Amateur Radio Association,
HS4XU, relates that radio amateurs have pitched in with soldiers,
rescue volunteers and workers from various foundations, by helping
flood-stricken people with food and to ferry expectant mothers to
hospitals.

The club station HS3AN has also been coordinating relief work with the
help of other amateur radio communications centers based in three other
cities. The operators at these locations have also been providing
information to people traveling to and from flood-stricken area.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, following this story from Scottsdale, Arizona.

--

There are over 100,000 ham radio operators in Thailand. Many are involved with providing emergency communications. Updates on this story are on-line at www.qsl.net/rast

RESCUE RADIO: SKYWARN HAMS ASSIST THE NEWS IN SEVERE WEATHER ALERT

Amateur radio operators across the mid-western United States went on alert on Tuesday, October 26th to report on severe weather and damage conditions. This as a severe early autumn storm pounded the area.

According to an ARRL press release, most of those providing service were part of the National Weather Service's Skywarn program. This is a group of highly trained radio amateurs nationwide who provided eye witness reports of ground conditions and verification of radar assessments.

>From Michigan to Kentucky, hundreds of Amateur Radio volunteers quickly turned their hobby into radio networks allowing emergency responders to have accurate information of conditions.

Mike Corey is the Emergency Preparedness Manager for the ARRL. According to Corey, there was great need for the hams with Skywarn, especially around Indiana. Their giving the National Weather Service real-time, ground level confirmations was definitely appreciated.

As severe weather continues in some areas, hams in those venues remain on alert. On Wednesday, October 27th, Alabama weathercaster James Spann, WO4W, reported via Twitter and Facebook that a new tornado watch had been issued for many counties south and east of the city of Birmingham. These included Autauga, Bibb, Chambers, Chilton, Talladega and Tallapoosa to name only a few. That warning was to be in effect until 07:00 PM in the evening. When alerts such as this are issued in the Birmingham area, activation of Skywarn is a usual part of any severe weather watch. According to WO4W, Skywan was active all day on Tuesday the 26th well into the evening hours. (ARRL, ARNewsline(tm), Facebook, Twitter, other reports)

BREAKING NEWS: SABLE ISLAND DXPEDITION DELAYED DUE TO AIRCRAFT SAFETY ISSUE

Some breaking news on the D-X front. This with word that the long awaited Sable Island DXpedition has been postponed due to transportation problems.

According to Randy Rowe, N0TG, just prior to the teams planned departure to Sable Island, a major safety issue was discovered with the

charter aircraft that requires repair before it can fly. Rowe says that as of this writing the needed parts have not yet been located. Also, it is estimated that acquiring these components and completing the repairs could take as much as 3 weeks or longer.

Rowe says that as a result, the operators will be returning to the United States to regroup and reschedule a return to Sable for another try. He adds that hopefully, a new date can be announced in the near future.

In the meantime, breaking news will be posted at the operations website at www dot CY0dxpedition dot com. We will have more DX news later on in this week's Amateur Radio Newsline report. (CY0 DXpedition)

**

INTRUDER WATCH: RADIO UGANDA ON 7.195 MHZ

A shortwave station on the African continent is playing hardball and is refusing to leave the amateur only portion of 40 meters. This, even after notification from the government, Radio Uganda continues to operate on the amateur radio frequency of 7.195 MHz.

Following notification by 5X1JM, the Uganda Communications Commission informed Radio Uganda the broadcaster is not permitted to use the frequency within the amateur radio exclusive spectrum. So far, the station has continued to use the frequency and its believed that it may be some time before they move out.

Observers say that at least the point has been made and action initiated by Ugandan government telecommunications authorities against the now unauthorized use of the frequency.

One other note. Uganda radio amateurs have been authorized by Uganda Communications Commission to use the band 7.1 to 7.2 MHz. (5Z4NU)

RADIO RECORDS: G3XBM ACHIEVES 1733 KM ON 500 KHZ USING LOW POWER WSPR

A new 500 KHz distance record may have been set on Thursday, October 21st. This when Roger Lapthorn, G3XBM, in Cambridge, England was heard some 1733 km away in Finland by Paul Henrik, OH1LSQ.

According to Lapthorn, he was operating on 500 Khz using the digital mode W-S-P-R commonly called wisper in the ham radio world. Lapthorn says that quite unexpectedly, he began receiving a string of reports from OH1LSQ in grid square KP03sd at an astounding distance of 1733 km.

Lapthorn said that to him these were amazing reports pushing his best DX on the band to new levels. This is because he runs only a few milliwatts effective radiated power on that band. He also notes that his transmit antenna is a very simple vertical loop made with wire only 1 millimeter thick. (Southgate)

**

HAM HAPPENINGS: SCIENCE WEEK IN IRELAND

Meantime, November 7th to the 14th marks Science Week in Ireland and that nation's amateur radio clubs are being urged to take part. According to the I-R-T-S weekly news, clubs are encouraged to take advantage of Science Week to promote the hobby by putting on a special event station or partnering with some other local organizations in a Science Week project. More details are on-line at www.scienceweek.ie. (IRTS)

AWARDS CORNER: WIA CENTENARY AWARD UPDATE

Turning to radio honors, so far 269 claims for the limited time Wireless Institute of Australia's Centenary Award operating award have been received and verified with certificates now issued.

The 200th award went to Monica Crockett, VK3FMON, of Axedale. According to the award sponsor, it is good to see the enthusiasm of entry level Foundation Licensees with some 30 having already qualified for and claimed the award.

The VK2AWA Contest Group is the very latest radio club on the award list. Some 15 DX stations from Finland, India, Hawaii, Japan, New Zealand, Russia and the USA are also recipients of the award.

For details about the WIA Centenary Award visit WIA website www dot wia dot org dot au. (WIA News)

**

CONTEST CORNER: RULES CHANGES FOR CQWW

The CQ World Wide DX SSB Contest is this weekend of October 30thand 31st, and with this, Contest Director Bob Cox, K3EST, is highlighting the expanded award program for the assisted categories. Specific changes include the following:

First, all Low Power and QRP assisted entrants will be specifically listed and eligible for awards as is already the case for unassisted entries. Second, a band-by-band breakdown for all band assisted World, Europe and USA will be provided within the 2010 results. And Lastly, the number of plaques available to assisted entrants will be increased to include a Europe Assisted All Band and all World Assisted Single Bands operations.

Cox notes that this applies to both the SSB and CW weekends. He also reminds contest participants that the log submission deadlines have been changed. SSB logs must be submitted by November 21st and CW logs by December 21st. We say, good luck in the contest. (CQ)

ENFORCEMENT: FCC ISSUES $10000 NAL TO UNLICENSED NY BROADCASTER

The Federal Communications Commission has issued a $10,000 Notice of Apparent Liability to monetary forfeiture to New York State resident Vicot Chery. This on charges that of allegedly operating an unlicensed radio transmitter on the frequency 90.5 MHz in the city of Spring Valley, New York.

In the notice issued on October 22nd. The FCC says that in response to a complaint. its agents from the Enforcement Bureau's New York Office monitored the frequency 90.5 MHz on October 26, 28, and 29, 2009. On each of those days, the agents observed a radio signal on 90.5 MHz and used direction-finding techniques to locate the source of the transmissions to a business in Spring Valley. The agents also took field strength measurements on each of the three days and determined that the signal being broadcast exceeded the limits for operation under Part 15 of the Commission's rules.

October 29, 2009, the agents entered the premises where two businesses were located. The agents proceeded to the offices of P.C. Taxi and spoke to the dispatcher regarding the unauthorized transmissions. The dispatcher said she would contact Vicot Chery, who she identified as the owner of P.C. Taxi. Subsequently, Chery arrived and the agents asked him about the unauthorized transmissions and asked to inspect the station. In response, Chery led them to an adjacent room where the agents observed a radio station in operation. Next, Chery led the agents to the roof where the FM broadcast antenna for the station was located. Finally, Chery took the agents to the upstairs attic where the station's transmitter was located behind a stack of car tires and hidden from plain view.

Chery told the agents that he was allowing a friend to use the space to operate the station. At the agents' request, Chery turned off the transmitter and also agreed to remove the antenna.

On November 4, 2009, the New York Office issued a Notice of Unlicensed Operation to Chery for the transmissions on 90.5 MHz. The New York Office received a reply from Chery's attorney asserting that Chery had no knowledge of the events which the FCC had charged him. The attorney went on to state that during the two months prior to the agents' inspection, Chery had allowed an unidentified person to use the space in his businesses where the radio station was located but the letter failed to identify the friend by name.

But the FCC did not buy the response. In issuing the $10,000 N-A-L, the regulatory agency noted that taken together, the facts show that Chery had control of the station and was involved in its general conduct or management. Also, the fact that someone else also may have been involved in the station's operation does not make Chery any less of a participant in its operation.

The Commissin then stated that pursuant to the Forfeiture Policy Statement and section 1.80 of the FCC Rules, it concluded that Vicot Chery is apparently liable for a forfeiture in the amount of $10,000. Cherry was given the customary 30 days to pay or to file an appeal

SAFETY IGNORED: COPPER THIEF ELECTROCUTED IN LOS ANGELES SUBURB

A man allegedly trying to steal copper wire from a vacant building in Los Angeles, California, neighborhood was electrocuted on Saturday, October 23rd. This after he tried to cut through a power distribution site he apparently thought was deactivated but was still alive.

The incident took place at an electrical vault on a lot at 3064 Firestone Blvd., at the corner of South Gate Avenue. The lot was the former site of the Liberty Cable Company but has been unoccupied for more than a year.

According to police reports, the unidentified man was electrocuted and died at the scene. His female partner tried to pull him away from the vault when it caught fire and exploded, but the electrical current traveled through her body and she received severe burns. South Gate police spokesman Lt. Keith Huff said she was taken to the nearby St. Francis Medical Center for emergency treatment and then transferred Saturday night to the Grossman Burn Center.

The couple's two small children were found in a truck about fifteen feet from the incident but were not injured. They were being held in protective custody by Childrens' Services until other family members can be found and notified.

According to Lt. Huff, the explosion that took place at 4:14 p.m. knocked out power across the west side of South Gate. Electrical service was largely restored by the evening.

With the economic slide due to the recession continuing and California having one of the nations highest unemployment rates, cooper wire theft for resale to he scrap metal market remains a major criminal activity, state wide. (Published news reports)

WORLDBEAT: NIGERIAN PRESIDENT APPROVES AUTOMATIC LICENSING FOR COMMUNITY RADIO

Nigerian President Goodluck Jonathan has empowered the National Broadcasting Commission to approve licenses for the establishment of community radio stations. This, without recourse to the office of the presidency.

President Jonathan gave the directive while declaring open the eighth biennial conference of Africa Broadcasters. Represented by Vice President Namadi Sambo, the President stated that already, the Federal Executive Council had considered and approved the guidelines proposed by the National Broadcasting Commission for the licensing of Community Radio in Nigeria.

In making the announcement, President Jonathan also urged journalists to maintain professional integrity, by ensuring truth, balance and fairness in their coverage of political activities. (MN)

NAMES IN THE NEWS: ARNEWSLINE ANCHOR KQ6FM NAMED PACIFIC DIVISION HAM OF THE YEAR

And congratulations to Newsline's own Don Carlson, KQ6FM. This on his being named as recipient of the ARRL Pacific Division's 2010 "Ham Of The Year Award." And as Don told our producer Bill Pasternak, WA6ITF, it all came as a big surprise:

--

KQ6FM: "Well, I was sitting at the back of the room at the end of the banquet and Bob Vallio, our Pacific Division Director, W6RGG, called an old friend of mine whom I used to work with in the Santa Clara Valley Section, Glen Thomas, WB6W to the front of the room.

"Well, it had been a very long day and I was batting eyes in the back of the room, though I the to admit it. All the sudden I start hearing my resume and I go `eesh, here we go' and - you know - heart goes up in throat.

"The next thing I know I am standing up there getting the Amateur Radio Operator of the Year Award for the Pacific Division. Its an honor that just blew me away. I was very humbled but very elated and I thank the ARRL and the Pacific Division for this award."

--

KQ6FM received the surprise honor at the recent Pacificon 2010 ARRL Pacific Divison Convention held in San Ramon, California. The award recognizes his many years contributing to the betterment of amateur radio both nationally and in the Pacific Division. (ARNewsline)

PROPAGATION: CHANGES COMING TO 5 MHZ BEACON CHAIN

Changes are coming to the 5 MHz beacon chain. Jeremy Boot, G4NJH, is here with the details:

--

During the summer, the 5 MHz Working Group reviewed certain aspects of the 5MHz Experiment and agreed a number of changes and improvements. These will be implemented over the next few months.

The largest change is that it has been decided to remove the 0.5ms pulse sequence at the end of each beacon transmission.

It has also been decided to build a new beacon for GB3RAL. The new design will incorporate a PSK31 transmission in the place of the pulse sequence. The design of the other two 5MHz beacons does not allow this addition.

The pulse sequence was included in the beacon transmission sequence to allow the propagation paths to be studied.

Peter Martinez, G3PLX wrote an article for the January 2006 issue of RadCom, " 5MHz beacon sounder experiment". The article included some interesting scattergrams of the different paths taken by the signals from the beacons.

I'm Jereamy Boot, G4NJH

--

A date for these changes has not been set, but it is hoped to complete the changes before the end of the year. For further information about the 5MHz beacons, you're your web browser to tinyurl.com/25ulj75 (GB2RS)

**

PROPAGATION: THE SIX AND TEN REPORTING CLUB

The Six and Ten Reporting Club is an informal group of radio amateurs, mostly from the UK, interested in propagation studies at frequencies around the High Frequency to VHF boundary. Mainly, those who operate on the 6 and 10 meter amateur radio bands.

The club produces a monthly newsletter called the Six and Ten Report that includes analysis of 28 MHz propagation based on beacon monitoring. Also included is an ongoing analysis of 50 MHz activity reports broken down by propagation mode as well as reports and discussions on unusual propagation events.

The Six and Ten Report is edited and produced by Steve Reed, G0AEV and Martin Harrison, G3USF and is an activity of the RSGB's Propagation Studies Committee. The Report is usually published online at g7kse dot co dot uk stroke 6and10 about 5 to 6 weeks after the end of the month. (GB2RS)

**

HAM RADIO IN SPACE: FO-29 OPERATING SCHEDULE AFFECTED BY ECLIPSE PERIODS

Mineo Wakita, JE9PEL, reports that the Japan Amateur Radio League has been making necessary adjustments to the Fuji Oscar 29 satellites operating schedule. This as the satellite enters a period of eclipses.

These eclipses have reduced the power budget requiring frequent analysis of available power aboard the satellite. As such, FO-29 will be enabled only when the power budget allows.

Meantime, the Japan Amateur Radio League requests that satellite operators access FO-29 with as little power as necessary to maintain communication. To assist in this, JE9PEL has posted calculations of the FO-29 eclipses on line at tinyurl.com/267jmq7 (ANS, JE9PEL)

**

DX

In DX, an international team of amateur radio operators are planning to activate Kanton Island for 9 days starting April of 2011. An additional day may be added depending on the sailing time to the island. Transportation has been arranged, all licenses are assigned and the permit is in its final stages. Callsign will be T31A. They plan to have 6 stations with 12 operators with activity on 160 through 10 meters using CW, SSB and RTTY. More is on-line at t31a dot com.

Members of the Sony Kyushu's Amateur Radio Club will operate from the Island of Danjo in the East China Sea using the club call JF6ZNT. This, between November 5th to the 7th. Activity will be on 80-10 meters using CW, SSB and RTTY. This island is one of today's most wanted in the Japanese Islands on the Air group. QSL via the Bureau or direct via each operator's home callsign as directed on the air.

And heres a true rare one to listen out for. OM2DX says that he will be on the air as 3W1M from Hanoi during the CQ WW DX SSB Contest on October 30th and 31sst. He will operate as a Single-Operator Single-Band 15 meter only entry. QSL via OM3JW, direct or by the Bureau.

UY5ZZ will be on the air stroke YV7 from Margarita Island between October 26th and November 7th. His activity will be on the HF bands, and include the CQ WW DX SSB Contest and Ukrainian DX Contest. QSL via his home callsign.

DL5MFL, DL4MAQ and DF9MV are planning to be active from Senegal from November 8th to the 18th. The group will be guests of 6W7RV at the Le Calao resort and will operate dedicated holiday style. A 6V7 callsign is being requested and will be made public as soon as its available. QSL via D-E-Zero-M-S-T.

Lastly, G7BXU says that he will be spending the Christmas and New Year holidays in Freetown,m Sierra Leone. He will be there between December 19th and January 7th and hopes to take his FT-897 and a G5RV antenna with him. More details will be forthcoming in the next few weeks.

(Above from various DX news surces)

**

THAT FINAL ITEM: DEVELOPING A LEAD FREE PIZEOELECTRIC

Researchers in Europe may have found a way to make a lead free piezoelectric that could pave the way to lead free electronic components. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Research published October 4th by materials engineers from the University of Leeds could help pave the way towards 100% lead-free electronics. The work, carried out at the United Kingdom's Diamond Light Source synchrotron facility, reveals the potential of a new artificial material to replace lead-based ceramics in countless electronic devices, ranging from digital cameras to hospital ultrasound scanners.

European regulations now bar the use of most lead containing materials in electronic and electrical devices. Ceramic crystals known as piezoelectrics are currently exempt from these regulations but this may change in the future, owing to growing concerns over the disposal of lead based materials.

Piezoelectric materials generate an electrical field when pressure is applied, and vice-versa. The most common piezoelectric material is a ceramic crystal called lead zirconium titanate, or PZT. Using a high intensity X-ray beam at the Diamond Light Source, the University of Leeds researchers have now shown that a simple, lead-free ceramic could potentially do the same job as PZT.

Tim Comyn, lead investigator on the project noted that with the extreme conditions beamline at Diamond Light, his team was able to probe the interior of the lead-free ceramic known as Potassium Sodium Bismuth Titanate to learn more about its piezoelectric properties. He noted that the researchers could see the changes in crystal structure actually happening while they applied and electrical field to the chemical structure. And that's a giant step forward in eliminating lead as a component in electronic components, worldwide.

For the Amateur Radiuo Newsline, I'm Bill Pasternak, in the Newsroom, in Los Angeles.

--

The Leeds team says that it will continue to work at the Diamond facility to study the transformation induced by an electric field at high speed and under various conditions using state of the art detectors. Meantime, the results of the work so far has been published online in the journal Applied Physics Letters. (ScienceOnLine)

Wrong again, Porky. BTW, tell us why you show up at hamfests as they
are closing down.
..

Care to tell us why you hid from Mrs. Heil?
Or why you don't go to hamfests at all?
You aren't a scaredy cat, are you?

Let's be fair here: who in their right mind really wants to spend three days around sweaty, unwashed hams listening to them complain about their IBS while they get a raging boner over Part 15 minutiae?

For my part, I just like to DX with Echolink from my phone!

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

==> + FCC NEWS: US ATTORNEY'S OFFICE CHARGES GLENN BAXTER, K1MAN, WITH
FAILURE TO PAY FINE

On October 25, two US Attorneys filed a Complaint
<http://www.arrl.org/attachments/view/News/55250> in the US District
Court for Maine <http://www.med.uscourts.gov/> against Glenn Baxter,
K1MAN, of Belgrade Lakes, Maine. The Complaint alleged Baxter had not
responded appropriately to an order that he pay a $21,000 fine for
violating several sections of Part 97. The civil action was brought
under Section 503(b) of the Communications Act of 1934, as amended
```

<http://www.fcc.gov/Reports/1934new.pdf>, and Section 1.80
<http://www.arrl.org/intranet/Application%20Data/Microsoft/Word/the%20US%20District%20Court%20for%20Maine>
of the FCC Rules and Regulations.

According to the Complaint, the fine was levied in 2005 "for [the] defendant's willful and repeated violations of Sections 97.101(d) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.101.pdf> [commencing transmissions on top of existing communications on 3.890 MHz] and 97.113(a)(3) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.113.pdf> [transmitting communications in which the station licensee or control operator has a pecuniary interest] of the Commission's Rules, and for the defendant's willful violation of Section 97.105(a) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.105.pdf> [exercising control over station] and 97.113(b) <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr97.113.pdf> [broadcasting] of the Rules and for failure to file requested information pursuant to an Enforcement Bureau directive."

The Complaint seeks to force payment of the $21,000 fine, as well as a filing fee and "such other and further relief as the Court deems just and proper."

==> + FCC NEWS: ARRL RESPONDS IN 2304 MHZ BAND INTERFERENCE DEBATE

On October 28, the ARRL filed a Reply to a Wireless Services Opposition filing, the latest in an ongoing series of exchanges regarding the FCC's proposal to allow mobile broadband services, in addition to fixed services, to operate in parts of the 2.3 GHz band. The Amateur Radio Service has a secondary allocation at 2300-2310 MHz. Read more here <http://www.arrl.org/news/arrl-replies-to-wireless-services-filing-in-2304-mhz-band-interference-debate>.

==> PUBLIC SERVICE: STORM SPOTTERS ON THE LOOKOUT FOR TROPICAL STORM TOMAS

With Tropical Storm Tomas expected to move through the Caribbean over on Thursday and Friday, WX4NHC <http://www.wx4nhc.org/> -- the Amateur Radio Station at the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) -- will activate at 9 AM (EDT) on Saturday, November 6. Hurricane Warnings have been issued for Haiti, Guantanamo, Cuba, the Southeastern Bahamas and the Turks and Caicos Islands. Tropical Storm Warnings have also been issued Jamaica and the Cuban provinces of Santiago de Cuba and Holguin. Read more here <http://www.arrl.org/news/storm-spotters-on-the-lookout-for-tropical-storm-tomas>.

==> PUBLIC SERVICE: THAI HAMS PROVIDE PIVOTAL ROLE DURING MONSOON

Heavy monsoon rains in Thailand have devastated parts of that country, with almost 60 dead and 100,000 homes in 32 provinces damaged or gone. According to the Radio Amateur Society of Thailand (RAST) --

that country's IARU Member-Society -- amateurs in the Nakhon Ratchasima and Chaiyaphum provinces have been helping authorities coordinate the rescue and relief efforts. Nakhon Ratchsima is Thailand's biggest province, with a population of 2.7 million in 32 districts with 3700 villages.

Under the guidance of National Disaster Warning Center Advisor Manas Songsaeng, HS1DE, the Nakhon Ratchasima Amateur Radio Association's (NRARA) club station HS3AN has been coordinating relief work with the help of other Amateur Radio communications centers based in Khao Yai, Phimai and Chaiyaphum that were also providing information to people traveling to and from Nakhon Ratchasima. Located at the provincial hall, the club has been working closely with government agencies, relaying details about the emergency situation to officials and relief workers. Read more here <http://www.arrl.org/news/thai-hams-provide-communication-support-during-monsoon>.

==> PUBLIC SERVICE: HAMS HELP PROVIDE COMMUNICATION SUPPORT FOR DUAL DISASTERS IN INDONESIA

Following two natural disasters, an earthquake triggered tsunami, and separately an erupting volcano, radio amateurs are providing their help as the enormous response effort continues. ORARI (Organisasi Amatir Radio Indonesia) International Affairs Coordinator Wisnu Widjaja, YB0AZ, provided initial information about the involvement of ham radio operators in the dual disasters -- a 7.7 earthquake and an exploding volcano -- that hit the Indonesian archipelago last week. Read more here <http://www.arrl.org/news/communication-support-for-dual-disasters-in-indonesia>.

==> + ARRL FIELD DAY: 2010 RESULTS ARE NOW ONLINE

If you can't wait to get your December issue of QST <http://www.arrl.org/qst> in the mail to see how you did in the 2010 ARRL Field Day, don't worry! The results -- including a copy of the QST article <http://www.arrl.org/files/file/ContestResults/2010/201020Day20QST.pdf> (with line scores) and a results database <http://www.arrl.org/results-database?event_id=13655> -- are now available on the ARRL Web site. Be sure to also check out the 193 comments in the Field Day Soapbox <http://www.arrl.org/contests/soapbox>. It's not too soon to start making plans for next year -- the 2011 ARRL Field Day is scheduled for June 25-26, 2011.

==> + THE DECEMBER ISSUE OF QST IS ON ITS WAY TO YOU!

The December issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including an expanded holiday advertising

guide and the 2010 ARRL Field Day results -- the upcoming issue of QST has something for just about everyone.

If you put 100 hams in a room, you would have at least 100 ways to put up a stealth antenna. As Geoff Haines, N1GY, discovered, neighborhoods that might be averse to a stacked array of 6-element 20 meter Yagis usually don't have a problem with flagpoles. In his article "Constructing a Flagpole Antenna," Haines tells readers that due to restrictions in his neighborhood, he built a flagpole antenna. With this and 100 W, he is able to work most of the stations he hears on 80-10 meters.

If you are a new ham -- or you have one in your life -- a good handheld transceiver is usually the first go-to radio. But with so many out there on the market -- and all of them with tons of features -- how can a new ham -- or even an experienced one -- choose the best one for their purposes? Never fear! ARRL Technical Editor Joel Hallas, W1ZR, comes to the rescue with "Selecting Your First VHF Handheld Transceiver." Hallas takes into account single band vs multi-band modes, access codes, keypads, memory management, connectivity options and more. He reminds hams that any handheld transceiiver you select will provide all the basic communication needs, as well as features you want now and some that you may need in the future.

<http://www.arrl.org/multimedia> NCJ Managing Editor Rick Lindquist, WW3DE, takes a look at the Yaesu FTdx5000D HF and 6 meter transceiver in this month's Product Review. He calls it "an extraordinary transceiver for the discerning contester or DXer. This one will become the gold standard for operators seeking the best receive performance and best value in its class. Yaesu is to be commended for combining top tier receiver performance and a Class A transmitter with the features and functions users expect, all in a competitively priced package."

Many hams spend all year gearing up for ARRL Field Day, the most popular on-the-air operating event in all of Amateur Radio. For those hard-core Field Day aficionados, the December issue of QST is one of the most anticipated issues all year -- this is the issue with the Field Day results! This year, ARRL Field Day Manager Dan Henderson, N1ND, channels his inner-Jimmy Buffett to bring readers the annual Field Day results article. You will also find official announcements for upcoming contests and operating events: the ARRL January VHF Sweepstakes, the ARRL International DX Contest (both SSB and CW), the ARRL Rookie Roundup (CW), Kids Day, the ARRL RTTY Roundup and the ARRL Straight Key Night. The results from the 2010 ARRL June VHF QSO Party are also in the December issue.

Of course, there are the usual columns you know and expect in the December QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio, Hamspeak and more. Look for your December issue of QST in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the

ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + INTERNATIONAL SPOTLIGHT: ARRL PRESIDENT MAKES FINAL QSO WITH AUSTRALIA'S WIA CENTENARY STATION

The Wireless Institute of Australia (WIA) marked the conclusion of their VK100WIA centennial special event operation on October 31 with a QSO between WIA President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN. Logged at 1255 UTC -- five minutes before midnight in Australia -- the QSO between N3KN and VK100WIA, with VK3KI at the microphone, was the last contact recorded in the Australian special event's log.

The contact was made using EchoLink, with VK100WIA using the VK3ANT node in Melbourne, Victoria. Craigie used the K4IJ 440 MHz repeater in Roanoke, Virginia to access the EchoLink node of the linked North Carolina Hospital Emergency Amateur Radio System repeaters (NCHEARS); the NCHEARS system was also linked to the South Carolina Healthcare Emergency Amateur Radio Team repeaters. Repeater users across three states were able to hear the historic conversation between two continents. Read more here <http://www.arrl.org/news/the-2010-global-amateur-radio-emergency-communications-conference>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of October -- includes seeking protection of amateur frequencies with the FCC; representing the ARRL at the local, regional, national and international level; encouraging hams to build their own equipment; administering ARRL awards programs, and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-27>.

==> + MARS: US AIR FORCE MARS GETS NEW LEADERSHIP

Richard Jenson -- a Program Manager at the Air Force Network Integration Center at Scott Air Force Base, Illinois -- has been selected as the new Chief of Air Force MARS (USAF MARS). Jensen replaces Technical Sergeant Jason E. Sandifer, who served as Interim Chief since May when USAF MARS Chief Allen Eiermann, K3LSR, retired. "I am honored to have been selected to lead this organization of dedicated volunteer radio communicators and am enthusiastic about my new responsibilities," Jenson said. "The members of Air Force MARS can be rightly proud of their service to the nation, and I am eager to work with all of them as we enhance our ability to serve those who serve us." Read more here <http://www.arrl.org/news/air-force-mars-gets-new-leadership>.

==> SOLAR UPDATE

Tad "They watched the hazy Sun sinking in the sea <http://www.youtube.com/watch?v=ccTMG1onW5c>" Cook, K7RA, reports: The average daily sunspot numbers declined again this week, this time by nearly 25 points to 25.7, about half what it was last week. Look for good conditions this weekend in the ARRL CW Sweepstakes. The predicted planetary A index for November 4-7 is 7, 5, 8 and 8, and then 5 for the foreseeable future on November 8 and beyond. Predicted solar flux is 82 for each of the next 10 days. The latest three-month moving average of daily sunspot numbers shows a steady rise, with the trailing three-month average at the end of June through October at 16.2, 20.4, 23.2, 28.9 and 33. The average daily sunspot number for the month of October was 35, slightly higher than the trailing three-month average, which is a good sign. Look for more information on the ARRL Web site on Friday, November 5. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Eagles' The Last Resort <http://www.youtube.com/watch?v=ccTMG1onW5c>.

==> + ARRL RECOGNIZES: DAVID W. CRIPE, NM0S, WINS OCTOBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for October is David W. Cripe, NM0S, for his article "Homebrew Challenge II Co-Winner -- The Lowest Cost Entry." Congratulations David! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the November issue today.

==> THIS WEEK ON THE RADIO

This week:

- November 5 -- QRP Fox Hunt
- November 6-7 -- Ukrainian DX Contest
- November 6-8 -- ARRL CW Sweepstakes <http://www.arrl.org/sweepstakes>
- November 7 -- High Speed Club CW Contest
- November 10 -- QRP Fox Hunt
- November 10-11 -- CWops Mini-CWT Test

Next week:

- November 13-14 -- Kentucky QSO Party; WAE DX Contest (RTTY); OK/OM DX Contest (CW)
- November 13-15 -- CQ-WE Contest
- November 14 -- SKCC Weekend Sprint
- November 17 -- QRP Fox Hunt
- November 18 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more

info. Looking for a Special Event station? Be sure to check out the
ARRL Special Events Station Web page
<http://www.arrl.org/special-events>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 6-7 -- ARRL Georgia State Convention
<http://stonemountainhamfest.com/>, Lawrenceville, Georgia
- November 13 -- ARRL Alabama Section Convention
<http://www.w4ap.org/modules.php?name=Hamfest>, North Montgomery,
Alabama
- November 13-14 -- ARRL Indiana State Convention
<http://www.fortwaynehamfest.com/>, Ft Wayne, Indiana
- December 4-5 -- ARRL West Central Florida Section Convention
<http://www.fgcarc.org/>, Palmetto, Florida

Amateur Radio Newsline(tm) Report 1734 - November 5 2010

NOTE: This weeks newscast runs 33 minutes 18 seconds and includes three breaks.

**

Amateur Radio Newsline report number 1734 with a release date of Friday, November 5th 2010 to follow in 5-4-3-2-1. The following is a Q-S-T. The International Space Station celebrates 10 years of manned operation and ham radio was there fore most of it. Also, GlobalSET 2010 takes place on November 13th, the Department of Justice acts to collect a $21,000 fine issued against a Maine radio amateur and an Ohio radio club receives a major grant to buy new gear. Find out the details on Amateur Radio Newsline(tm) report number 1734 coming your way right now. (Billboard Cart Here)

RADIO IN SPACE: THE ISS CELEBRATES ITS 10TH ANNIVERSARY

The International Space Station marked a major milestone on Tuesday, November 2nd. This, as it celebrated the 10-year anniversary of human beings living aboard the orbital outpost. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The story of the International Space Stations manned operations began on November 2, 2000. That's when an American astronaut and a Russian cosmonaut floated side by side into the station that sits in orbit at about than 300 km above Earth's surface.

The station's first crew was made up of Russians Yuri Gidzenko, Sergei Krikalev and American commander Bill Shepherd. In the intervening decade close to 200 people, many of them licensed radio amateurs have spent time on board the ISS and operated the ARISS ham station.

The Current Expedition 25 crew is made up of Commander Doug Wheelock, KF5BOC along with NASA astronauts Scott Kelly and Shannon Walker, KD5DXB. Also on-orbit with them are Russian cosmonauts Fyodor Yurchikhin, RN3FI, Alexander Kaleri, U8MIR and Oleg Skripochka, RN3FU. The I-S-S has also been a hotel on-orbit for several visiting space tourists including Richard Garriott, W5KWQ. He is the son of Astronaut Owen Garriott, W5LFL, who was the first ham radio operator to take to the airwaves back in 1982 from the space shuttle Columbia.

NASA Administrator Charles Bolden was to have begun the event, speaking live to the I-S-S crew at 9:15 a.m. EDT from the Kennedy Space Center in Florida. His remarks and the following news conference were broadcast live on NASA Television.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting from the Newsroom in the City of Angels.

--

In addition to the crew news conference, NASA is updating the content of the International Space Station section of its website in recognition of the 10th anniversary. The update supports the on-going transition from station assembly to utilization. It now will focus on the research in the unique microgravity environment of low- Earth orbit as found on-board the I-S-S.

(ARNewsline Archive, NASA News and various other sources)

**

HAM RADIO IN SPACE: SECOND HAM STATION FOR THE ISS

A second ham radio station will soon be on the air from on board the International Space Station. This, after NASA approves use of the original VHF and UHF Ericsson handheld radios from the Russian module for use in the US segment of the orbital outpost.

A new power cable for the Ericsson radios is being delivered to the I-S-S. The second station is planned to initially use the same frequencies currently used by the Kenwood D-700 amateur radio transceiver. Studies are underway to determine a compatible operating plan which would allow both stations to operate simultaneously.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (ARISS)

**

RESCUE RADIO: GLOBALSET ON NOVEMBER 13th

The second Global Simulated Emergency Test of 2010 or is slated for Saturday, November 13th from 1100 to 1500 hours local time in the geographic region of the stations taking part. Also known by the acronym GlobalSET, the operation will take place on and near the established world-wide Centre-of-Activity emergency frequencies on the 80, 40, 20, 17 and 15 meter bands.

The objectives of GlobalSET are to increase the common interest in emergency communications, to test how usable the emergency Centre-of-Activity frequencies are across the three I-T-U regions and practice the relaying of messages using all modes. The exercise will also be used to try to create practices for international emergency communication.

IARU member radio societies and emergency communications group stations intending to participate are requested to register their intention through their IARU Regional or National Emergency Communications Coordinators. (IARU)

**

RADIO POLITICS RAC AND IC MEET TO DISCUSS CANADIAN HAM RADIO

The 35th meeting of the Canadian Amateur Radio Advisory Board took place on Thursday October 28th. CARAB as its sometimes known, is composed of representatives from both Radio Amateurs of Canada and Industry Canada. The latter is the regulator of amateur radio in that nation. Amateur Radio Newsline's Norm Seeley, KI7UP, tells us what occurred:
--

Among key issues discussed at the meeting was Industry Canada's policy regarding temporary authorization of frequency assignments in amateur bands to non-amateur services such as last September's Pro Tour race in Quebec. Radio Amateurs of Canada did all it could to impressed upon the Industry Canada officials that Canadian amateurs, objected to intrusion into amateur bands by non-amateur services, especially for non-emergency purposes. For its part, Industry Canada noted the objection. It also committed to improve coordination and cooperation and advised that they were sensitive to Radio Amateurs of Canada's concerns

Industry Canada committed to continue to work with Radio Amateurs of Canada on the national societies request for an allocation in the 60 Meter band which mirror those frequencies available to United States amateurs. Radio Amateurs of Canada emphasized the importance of this request as seen by Canadian amateurs.

Industry Canada and Radio Amateurs of Canada also discussed the positive role that amateur radio played in emergency situations. Industry Canada noted that there would be value in more cooperation and planning between it and Radio Amateurs of Canada in this area. Follow-up meetings between the two will be arranged over the coming month's.

Lastly, the value of the Canadian Amateur Radio Advisory Board as a consultative body between Radio Amateurs of Canada and Industry Canada was reaffirmed by both parties and the Terms of Reference between the two were updated.

Watching this story from south of the U-S and Canadian border, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

The next meeting of Canadian Amateur Radio Advisory Board is anticipated for April, of 2011 and to be held concurrent with the Radio Amateurs of Canada Board of Directors meeting. (RAC)

RESCUE RADIO: OHIO CLUB RECEIVES GRANT FOR NEW GEAR

The Lancaster and Fairfield County Amateur Radio Club of Lancaster, Ohio, has received a $5,219.86 grant from the George and Dollie L. Zimpfer Memorial Fund. The grant, administered through the Fairfield County Foundation, permitted the club to purchase emergency radio gear and associated equipment that can be used at all special community events, local emergencies, natural disasters and during other times used for membership training and simulated emergency drills. The equipment will also be used to supplement emergency responders and provide education and training to volunteers who will assist those responders. The Lancaster and Fairfield County Amateur Radio Club is a public service group and has operated the K8QIK repeater on 147.030 MHz since 1976. (Eagle-Gazette.com)

ENFORCEMENT: US ATTORNEYS OFFICE GOES TO COURT TO COLLECT $21000 FINE ISSUED AGAINST K1MAN

It has taken almost five years, but the United States Department of Justice has gone to court to collect a $21,000 fine issued back in March of 2006 by the FCC to Glenn, Baxter, K1MAN, of Belgrade Lakes, Maine. This, as two US Attorneys file a Complaint in the US District Court in Maine against Baxter for not responding appropriately to an order that he pay the fine that was issued for his alleged violating of several sections of the Part 97 rules. Amateur Radio Newsline's Burt Hicks, has the details:

--

The Complaint was filed on October 25 in the US District Court in Maine by United States Attorney Thomas E. Delehanty and Assistant U.S. Attorney Evan Roth and. It seeks to force Glenn A. Baxter, K1MAN, to pay the $21,000 fine along with a $350 court filing fee and other relief as the Court deems just and proper.

According to the court document, the fine had originally been levied based on what the FCC had deemed as the defendant's willful and repeated violations of Sections 97.101(d) and 97.113(a)(3) of the Commission's Rules. In this case the violation of Section 97.101(d) dealt with Baxters alleged commencing transmissions on top of existing communications on 3 point 890 MHz while 97.113(a)(3) involved what the FCC claimed to be transmitting communications in which the station licensee or control operator has a pecuniary interest.

Baxter had also been cited for willful violation of Section 97.105(a) which deals with exercising proper control over his amateur station and Section 97.113(b) which is a prohibition against broadcasting in the Amateur Service bands. Lastly the complaint notes Baxter's failure to file requested information pursuant to an FCC Enforcement Bureau directive.

It should be noted that this action to collect the $21000 fine is a completely separate action from any further sanctions that the FCC might take regarding the renewal of Baxter's Amateur Service license and K1MAN call sign. His renewal request had been in legal limbo since his license was set aside by the regulatory agency before its expiration date back in October of 2005. Under the terms of a set aside, an Amateur Service license holder can continue to operate until the matter has been properly adjudicated. Payment of a fine or forfeiture will have no bearing on Baxter's renewal or continued holding of an FCC license.

The action to collect the $21000 fine was brought under Section 503(b) of the Communications Act of 1934, and Section 1.80 of the FCC Rules and Regulations. As noted, the original FCC Forfeiture Order was released March 29, 2006. The deadline for service of process would have been February 22, 2011 so the Department of Justice beat that date by a little over 3 months

For the Amateur Radio Newsline, I'm Burt Hicks, in Los Angeles.

--

By now, Baxter has likely been informed he has 20 days from date of service in which to answer the summons. If he fails to respond a default judgment will be entered against him in U.S. District Court after which the government can cease whatever property is required to satisfy the judgment.

Those interested can read the full text of the United States Attorney's complaint at the ARRL website at tinyurl.com/2dk3mq (DOJ, FCC, ARRL)

**

ENFORCEMENT: NO STAFF RADIO STATION HIT WITH $25000 FINE

The FCC has notified Rama Communications, Inc, the licensee of A.M. radio station WRHB in Leesburg, Florida, of a proposed forfeiture in the amount of $25,000. This, for violations of sections 73.1125(a) and 73.3526 of the Commissions rules.

The FCC says that the violations stem from a recent visit where inspectors found that Rama failed to maintain full time management and staff at its main studio. It was also charged with failing to maintain and make available a complete public inspection file.

The station was given the customary 30 days to pay the forfeiture or to file an appeal. (FCC)

**

ENFORCEMENT: INDIE POLICE SHOW UP AGAIN ON UNAUTHORIZED FREQUENCIES

For a second time, Indianapolis police are investigating claims that officers are using radio frequencies assigned to an area school district without the proper permission to do so. Jack Parker, W8ISH, has the details:

--

Apparently some members of the Indianapolis Metropolitan Police Department are teaching a new lesson on how to abuse public airwaves and violate FCC rules. According to a report broadcast on one local Indianapolis TV station, some of Indy's finest are using illegal radios for chit chat on a local school systems bus frequency.

This abuse of police radio power has been recorded by a former police-fire dispatcher. According to John, who is a ham radio operator, the cops not only use the school radio channel but mix foul language with cross talk about cases on which they are working. John claims he has recorded about 72 hours of what sounded like car-to-car conversations, some not fit for broadcast.

This is not the first report of this cop caper. Last year Amateur Radio Newsline investigated reports of I-M-P-D officers illegally using amateur radios and frequencies for talk around. The police chief pulled the plug on all un official in-car-radios and ordered their communications people to develop a legal radio system that officers could use for casual talk. Most officers rejected that offer citing the out of pocket cost and the fact that any established radio channel could be monitored by the police brass.

In the past year, at least one other local Amateur Radio operator has filed complaints with FCC offices in Chicago and Washington citing improper use of radio frequencies by Indianapolis Metro Police Officers.

Following that complaint some officers took the high road by earning their amateur radio license. But, they soon realized they can't talk shop on amateur frequencies. The jury remains out on a solution to this touchy tactical dilemma.

I-M-P-D officials say they again are looking into the issue and will implement policy changes if needed.

Reporting from Indianapolis, for Amateur Radio Newsline, this is Jack Parker W8ISH.

--

This is not the first time that members of the Indianapolis Police Force have been found on radio frequencies where they do not belong. You may remember back to when hams found officers chatting on both the 2 meter and 70 centimeter FM sub-bands back in 2009. (ARNewsline(tm) from published news reports)

**

HAM HONORS: NOMINATIONS FOR LEONARD AWARD SOUGHT BY ARRL

The annual nominations for the Bill Leonard Award for professional media coverage of Amateur Radio are now being accepted by the ARRL. Completed nominations are due in no later than December 10th. If you know of a good media hit in the past year, you can nominate the author, reporter or writer. Forms and information are at www dot arrl dot org slash bill dash Leonard dash award. (ARRL)

**

THE SOCIAL SCENE: HAM FAIR IN LISBON

Portugal's Association of Radioamadores of the Village of Moscavide are organizing this years Exposition Ham Fair in the city of Lisbon. The gathering takes place on November 28th and is being billed as one of the biggest events ever for ham radio in that nation. More information in electronically translated English is available on-line at tinyurl.com/3347bds (Southgate)

**

HAM HAPPENINGS: K7NRA TO SAY HAPPY BIRTHDAY NRA

And back in the U-S-A, keep an ear out on special events station K7NRA. It will be active from 1500 to 2300 UTC on November 17th to celebrate the birthday of the National Rifle Association. Frequencies to keep an ear on include on 7.250, 14.250 and 21.335 MHz. More information including QSL routing is on line at tinyurl.com/2fqfrpn (KC5FM) **

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

NAMES IN THE NEWS: VA3QT APPOINTED SPECIAL RAC ADVISOR

Some names in the news. First is Ian Snow, VA3QT, who has been appointed as Special Advisor to the Radio Amateurs of Canada's National Field Organization Executive. Snow, an original member of the National Training Resource Group member, will work closely with National Traffic System Coordinator Hew Lines VA7HU. The two will initially looking at ways for both Canadian ARES and the National Traffic System to remain stay useful to the agencies they serve. This, from both a messaging and use of technology standpoint. (VO1DTM)

**

NAMES IN THE NEWS: EI4HS GRANTED HIS GRANDFATHERS EI4L CALL

And John Kelly, the former EI4HS has recently been issued the callsign EI4L. This was the call which was previously held by his grandfather John Scanlon back in in 1936.

John Scanlon is described as one of the true pioneers of radio in Ireland. He was among the first to experiment with television in the years after World War 2 and was also a very active High Frequency DXer. (IRTS)

**

NAMES IN THE NEWS: DK3WN STREAMING HAMSAT AUDIO

And Mike Ruppercht, DK3WN, is spearheading a project that broadcasts audio streams received by amateur radio satellite operators around the world. Links to the audio streams can be found on-line at tinyurl.com/satsound (Southgate)

**

EMERGING HAM TECHNOLOGY: VOACAP ADOPTS GOOGLE MAPS

In the world of emerging ham radio technology, OH6BG has announced that the online H-F propagation prediction service VOACAP is now using Google Maps for coordinate entry. OH6BG says that this should make the service even more accessible, especially for a casual user.

With this new interface, the transmitter and receiver coordinates are now defined by dragging two location markers on the map. The mouse wheel or keyboard keys can be used for zooming in and out so placing the markers at the exact points as accurately as is possible. This makes the predictions as accurate as today's science allows. You can find the site at online dot voacap dot com. (OH6BG)

**
HAM RADIO IN SPACE: ARISSAT-1 PASSES SAFETY TEST

The NASA safety review for ARISSat-1 has been completed with the written safety presentation and the written report approved with only simple modifications required. According to the ARISSat- 1 team, it expects to finalize shipping arrangements for the satellite structure to Russia in the coming weeks.

The Russian Energia Space Agency is handling the customs certifications to ship the satellite overseas. When ARISSat1 is shipped Lou McFadin, W5DID, and Mark Steiner, K3MS, will travel to Russia to assist with testing before the satellite is forwarded to the launch site.

ARISSat-1 is scheduled to be sent to the ISS aboard a Russian Progress vehicle in January 2011 and deployed during a space walk in in February. (ARISS)

**

HAM RADIO IN SPACE: LIGHTSAIL BACKUP SPACECRAFT TO BE BUILT

A second Lightsail spacecraft is going to be constructed. Jim Davis, W2JKD, has the details:

--

Louis Friedman, who is the director for LightSail-1 program, has announced that a back- up craft to LightSail-1 will be built. This, instead of making an investment in insurance for an estimated cost of $200,000.

As previously announced in July by AMSAT, LightSail-1 is a three Cubesat spacecraft planned to be launched in early 2011. It will use UHF frequencies for tracking and command control stations.

Georgia Tech University is leading the mission operations with Dave Spencer serving as mission manager. California Polytechnic University is supplying the Cubesat bus, avionics and launch vehicle interface. Stellar Exploration, Inc. is actually building LightSail-1.

I'm Jim Davis, W2JKD.

--

No date has been announced for the completion of Lightsail2. (ANS, W9GB)

**

HAM RADIO NEAR SPACE: SARSEM-ICARUS II TO LAUNCH NOVEMBER 20

The Amateur Radio Club of the state of Guanajuato in Mexico will launch its second high altitude ham radio research balloon on November 20th. Called SARSEM-ICARUS II, the nearspace balloon will carry a cross-band UHF - VHF repeater system, an APRS tracking system, temperature, voltage sensors, a flight computer, and a secondary backup system including other GPS and control system. It will also carry a photo camera and a video camera transmitting video downlinking at 900 MHz. More information is on line at craeg.remtronic.com. (AR Mexico)

**

BREAK 3

This is ham radio news for today's radio amateur. >From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

CONTEST CORNER: THE 2010 ARRL 10 METER CONTEST

The 2010 ARRL 10 Meter Contest will be held from Friday December 10th at 0000 U-T-C through Sunday evening December 12th at 2359 U-T-C. Except at the peak of the sunspot cycle, 10 meters is generally a daytime band

for DX so you likely lose any sleep with this contest this year. More information is on-line at www dot arrl dot org slash 10 dash meter. (N9LB)

**

DX

DL4VM will be active as portable Oh-Z from Fyn Island between May 28th and June 18th, 2011. His operation will be on 30, 15 and 6 meters, using CW and PSK. QSL via his home callsign either direct or via the bureau.

ZL2KBR will be active as 5W0BR from Upolu Island through November 13th. His operation will be on all HF bands using SSB and PSK31. He plans to use a FT857D at 100 watts into a dipole or vertical antenna. QSL via his home callsign.

K2TQC, N2MF, W1NG and K2NV are on the air portable PJ2 from Curacao through November 11th. Activity is on the lower bands. QSL via their home callsigns.

And listen out for F4BXW as TR8GV from Libreville, Gabon through November 23rd. His activity will be on the HF bands using SSB. QSL via his home callsign.

VE3EY, will be active from St.Barthelemy Island as TO3A from November 2nd to the 30th. Operations will be on 160 through 10 meters using CW, SSB and RTTY. QSL via VE3EY.

Lastly, K8PT will be active as C6APT from Treasure Cay in the Bahamas between November 27th and December 10th. His operation will be on 40 through 10 meters concentrating on the 30, 17and 12 meter bands. Modes to be used will bee CW and RTTY. QSL via K8PT.

(Above from various DX news sources)

**

THAT FINAL ITEM: VK1WIA ENDS CENTENNIAL WITH SPECIAL CONTACT

And finally this week, the Wireless Institute of Australia marked the conclusion of its VK100WIA centennial special event operation on October 31st. This with a special commemorative contact between W-I-A President Michael Owen, VK3KI, and ARRL President Kay Craigie, N3KN. Take a listen:

--

Actual QSO audio here. Hear it by downloading this weeks audio version of the newscast titled news.mp3 at www.arnewsline.org

--

During the contact VK3KI told N3KN that the Wireless Institute of Australia was pleased that the special event station's final contact could be with her, and thanked the ARRL for its support and for participating in the W-I-A Centenary Weekend through ARRL International Affairs Vice President Jay Bellows, K0QB. President Owen also said that the WIA was passing the baton on to the ARRL, as the League would be celebrates its centenary in four years.

During the centenary event, more than 50 Wireless Institute of Australia affiliated clubs have used the VK100WIA call sign for almost six months as part of WIA's centennial celebration. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again that's arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Fred Vobbe, W8HDU saying 73 from Lima, Ohio, and we thank you for listening.

It's been 5 years folks, can one assume that the FCC enforcement division will soon act to deny the pending renewal and pull his ticket? I don't see how this new chapter is going to make any difference though. This story is taking way to long to play out, and is *far* from over. I guess we can hope somebody comes to their senses soon, but doni¿½t hold your breath.

I'd really like to get that part of 20 Meters back soon....

20 meters is congested enough, MAN just compounds the problem by
clogging up the middle of the band with his "Broadcast." Of course
this drama will drag on for a good while before the court acts.
Probably February or March before we see anything substantial on this
case. It's getting close towards the end of the year when the Feds
start using up their use or lose leave, so I suspect little progress
will be seen on this case.

Nevertheless, it will be interesting to watch it progress.

20 meters is congested enough, MAN just compounds the problem by
clogging up the middle of the band with his "Broadcast." Of course
this drama will drag on for a good while before the court acts.
Probably February or March before we see anything substantial on this
case. It's getting close towards the end of the year when the Feds
start using up their use or lose leave, so I suspect little progress
will be seen on this case.

Nevertheless, it will be interesting to watch it progress.

DL

OK, Herm. What exactly is your interest in how this debacle works out?
Baxter has been an ass, yes. And he is being dealt with, however slowly.
Be patient, Herm. Baxter is not going to evade the monetary judgment.
This one is going to cost him dearly.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Dear Officer <deleted>

In answer to your recent letter concerning Mister Wiseman, you are correct.

Our Department has knowledge of this person and we have had limited contact with him.

We are aware of several complaints concerning Mr. Wiseman and we are well aware of the comments he has made about myself and two of my officers.

Mr. Wiseman has been a person of interest for several years.

Yes, we did once ask Mr. Wiseman to appear at our office for an interview, which he did.

Mr. Wiseman seemed to be extremely confused and a bit disoriented.

Yes, you are correct in that Mr. Wiseman did indeed have a panic attack.

I became concerned enough that I did call for medics to come to the scene. I was concerned that he might have been suffering a cardiac arrest.

I thought that for a minute there that we were going to lose him.

I cannot further advise you of Mr. Wiseman's medical condition. As you know, that is confidential information between Mr. Wiseman and the physician who treated him.

And please feel free to keep me up to date concerning any future comments that Mr. Wiseman might have to say about me or my officers.

You have my office phone number.

If I am unavailable, my cell number is <xxxxxxxxxxxx>.

While the gring gets finer and finer we all have to just ignore the nasty mess on 20 meters?

I really don't understand why the FCC is taking so long to yank his ticket. This seems like a cut and dried enforcement action to me. They guy has an unpaid fine for breaking the rules that they have known about for 5 years now and I don't think that if he's paid the fine or not matters. Maybe they have been hoping he'd offer to give up his ticket and drop the fine or something? Hard to tell what they are thinking.

I sure wish they'd deny the renewal soon... Not that I think that would stop this. If the retoric is any indication of what is to come, the net result of pulling the ticket will have the same effect as the $21,000 fine. Here's hoping it's almost over, but I'm not holding my breath.

Somebody let me know when 20 meters has sanity return.

Well... You can not deny a renawal till the license comes up for renewal

YOU CAN, however, revoke it.. And I'm kind of surprised they have not
done so since I have listened to his transmissions and it would appear
to me that they clearly violate a few different provisions.

The problem is getting him to surrender the license.

As I said, sooner or later the FCC will show up with US Marshalls and
they will take away his toys... Him too.

> Well... You can not deny a renawal till the license comes up for renewal

Actually, his license expired in 2005, right around the time the FCC affirmed the NAL. He retains his operating privileges because a renewal application was properly filed just before his license expired. The application was initially granted, then reversed and set aside "for enforcement action" and until they rule on the application he retains his license. Currently his license will continue literally *forever* waiting on the FCC to do something with his application. All the FCC has to do is deny his renewal and his license is gone.

> The problem is getting him to surrender the license.
>
> As I said, sooner or later the FCC will show up with US Marshalls and
> they will take away his toys... Him too.

The next step towards that is to deny his pending application and yank his ticket. When they finally do pull the ticket, nothing will change. It may make it easier for the FCC to fine him for transmitting, but I donï¿½t think 14 MHz will be any different.

I don't think the US Marshalls will ever show up and haul him to jail. They may come to evict him if he looses his house due to the fines, but we are talking a LONG time before they fine him out of house and home at this pace. They may try to take his toys once heï¿½s a pirate, but given the FCC's slow pace up to this point I think he will be SK for a few weeks before his station stops transmitting. (And I'll bet it won't properly ID when the relays and tape players finally quit..) Of course I sure hope they can get him off the air sooner rather than later. It would be nice to get 14.275 back soon.

Most of us served in the Army, dingbat. We were issued weapons that worked
either on full auto or, as with the new A4 rifles, three shot bursts. We
were trained how to use them. We even had a few special weapons guys in each
Company who were plroficient with crew assisted full auto machine guns.
I doubt that you REMF types were even allowed to touch a BB gun.....

I think that is close to what I was saying in my last post. It will
take time..

Of course it is a bit like an issue that came up at church.. I told
people.. The question is not WILL it happen, It will.. It is will our
grandkids still be alive to see it happen.

==> + FCC NEWS: FCC ISSUES REPORT AND ORDER ON VANITY AND CLUB STATION
CALL SIGNS

In November 2009, the FCC issued a Notice of Proposed Rule Making
(NPRM) -- WT Docket No. 09-209 -- seeking to amend the Commission's
Amateur Radio Service rules to clarify and codify existing procedures
governing the vanity call sign system. The NPRM also sought to revise
certain rules applicable to club stations. The ARRL submitted its
comments to the FCC on March 26. On Monday, November 8, 2010, the FCC
issued a Report and Order with its decisions. These new rules will take
effect 60 days after publication in the Federal Register.

In the Report and Order, the FCC amended and clarified its rules with
respect to Amateur Service vanity call signs "in order to promote
processes that are more equitable and administratively efficient." The
```

FCC has amended its vanity call sign rules to clarify the date on which the call sign associated with a license that is canceled due to the licensee's death becomes available for reassignment. The R&O also clarifies the exceptions to the general rule that a call sign is unavailable to the vanity call sign system for two years after the license terminates. As for club stations, the FCC has placed limits on who can file applications on behalf of a club, how many vanity call signs a club can hold and how many clubs can have the same license trustee. Read more here <http://www.arrl.org/news/fcc-issues-em-report-and-order-em-on-vanity-and-club-station-call-signs>.

==> + PUBLIC SERVICE: INDONESIAN HAMS CONTINUE TO SUPPORT COMMUNICATIONS AS VOLCANO STAYS ACTIVE

As the dual natural disasters of an erupting volcano and the aftermath of a tsunami continue in Indonesia, the Organisasi Amatir Radio Indonesia (ORARI) -- that country's IARU Member-Society -- continues to provide communication support to relief and government agencies. According to ORARI International Affairs Coordinator Wisnu Widjaja, YB0AZ, ORARI members are still working in the field at the site of the Mount Merapi eruption and the Mentawai tsunami: "We are working on the 2 meter band and on HF at 7.065 MHz." He asked that the 40 meter frequency and the IARU Region 3 Emergency Center of Activity Frequencies be kept clear from regular use. These frequencies are 3.600, 7.110, 14.300, 18.160 and 21.360 MHz . Read more here <http://www.arrl.org/news/indonesian-hams-continue-to-support-communications-as-volcano-stays-active>.

==> THE ARRL ON-LINE AUCTION: GOING ONCE, GOING TWICE, GONE!

With almost 200 items up for bid -- and almost 1000 bids placed -- the Fifth Annual ARRL On-Line Auction closed on October 25 with winning bids on every auction item. ARRL Business Services Manager Deb Jahnke, K1DAJ, said that she was happy with the responses the Auction received during its run. The generosity of many donors, Jahnke says, made it possible for the Auction to offer a diverse list of items that included transceivers, ARRL Lab-tested and reviewed equipment, vintage gear, one-of-a-kind treasures, mystery "junque" boxes and more. Read more here <http://www.arrl.org/news/the-arrl-on-line-auction-going-once-going-twice-gone-1>.

==> + THE DOCTOR IS IN: PACEMAKERS AND RF

Schley Cox, W4AMW, of Owensboro, Kentucky, told the Doctor that he's headed to see the cardiologist next week about a pacemaker. He's already started researching their use around RF and says he is happy to go all low power (QRP), if that's what's called for. Schley mentioned that he might also be able to operate his rig remotely -- perhaps 20 feet away, but he needs to know how to measure stray RF in the shack itself.

Here's what the Doctor had to say:

I haven't received actual reports of any pacemaker problems and that seems to go along with the info on the ARRL Web site <http://www.arrl.org/pacemaker>. Note that there are no power levels (or field strength) limits noted there, nor have I found any on manufacturers' Web sites. Thus knowing the actual field strength level in the station may not help. If it were me, I would start by talking to my physician. She won't be able to give you power limits, but perhaps could indicate symptoms to watch for while on the air so you could take appropriate action quickly if called for.

I would start with a careful RF safety evaluation, as required by the FCC anyway. While the FCC guidelines were not based on pacemaker interference, they should result in a reasonably safe environment. If your station is properly set up -- without common mode feed line current, for example -- most radiation should surround the antenna and there should not be much RF within the shack.

Calibrated RF field strength meters are available, but are quite expensive. Relative measurement is pretty easy -- look at any recent ARRL Handbook. If you had a simple field strength meter running at all times in the station (I'm thinking the diode and microampmeter type that doesn't require power), you could see if anything changed, and diagnose and repair as needed.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to "The Doctor," ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + ON THE AIR: W1AW ANNOUNCES WINTER OPERATING SCHEDULE

With the switch from Daylight Saving Time to Standard Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. The standard times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-winter-operating-schedule>.

==> + ARRL SAYS "THANK YOU" TO VETERANS

On Thursday, November 11, here in the US and abroad, we celebrate Veterans Day, also called Remembrance Day or Armistice Day. Originally a holiday that marked the end of World War I -- the "War to End All Wars" -- this day has been set aside to honor all who have served their country. It was on November 11, 1918, on the 11th hour of the 11th day of the 11th month, that Germany signed the Armistice, formally ending the hostilities that had been ongoing since 1914.

The ARRL would like to take this opportunity to thank our service veterans. Whether they served on active duty or reserve, during peace time or time of conflict, they served their county with honor. We also would be remiss if we did not remember the families of those veterans

who kept the homefires burning bright; without their love and support, our veterans would have indeed been alone.

ARRL Headquarters has its share of service veterans: Contributing Editor Al Brogdon, W1AB (Army); Publications Sales Associate Mark Dzamba, KB1FMY (Air Force); Assistant VEC Manager Perry Green, WY1O (Army); Technical Editor Joel Hallas, W1ZR (Army); News Editor S. Khrystyne Keane, K1SFA (Coast Guard); DXCC Manager Bill Moore, NC1L (Army); Reprints Specialist Tony Nesta, AA1RZ (Navy); Membership and Volunteer Programs Manager Dave Patton, NN1N (Navy); Technical Relations Specialist Jon Siverling, WB3ERA (Army); Field and Regulatory Correspondent Chuck Skolaut, K0BOG (Air Force); Education & Technology Program Coordinator Mark Spencer, WA8SME (Air Force), and Archivist Perry Williams, W1UED (Air Force).

Thank you for your service -- your sacrifice and the sacrifice of your fellow service members is not forgotten.

==> + SECTION NEWS: NEW SECTION MANAGER APPOINTED IN WESTERN NEW YORK

Steve Ryan, N2ITF, of Ashville, New York, has been appointed Section Manager of the ARRL Western New York Section, effective November 2. ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, made the appointment in consultation with Atlantic Division Director Bill Edgar, N3LLR, after Scott Bauer, W2LC, announced his resignation for personal reasons on October 31. Bauer had served as Section Manager since January 2000. Read more here <http://www.arrl.org/news/new-section-manager-appointed-in-western-new-york>.

==> SOLAR UPDATE

Tad "Now I believe the Sun is gonna shine <http://www.youtube.com/watch?v=PXyzDpLjMK0>" Cook, K7RA, reports: The average daily sunspot numbers and solar flux increased over the past week, with sunspot numbers up 7.4 points to 33.1, and solar flux up 2.1 points to 84.2. Four new sunspot groups have appeared since November 4. The latest forecast shows predicted solar flux at 86 on November 11-12, 85 on November 13, 83 on November 14-18 and 85 on November 19-25. The predicted planetary A index for the next week is 5. Last year, Steve Nichols, G0KYA, wrote the bulletin for us on October 30, and he has just published a free online book -- Understanding LF and HF Propagation -- with G3NYK. You can download it from Steve's blog <http://www.g0kya.blogspot.com/>. Look for more information on the ARRL Web site on Friday, November 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Eagles' No More Cloudy Days <http://www.youtube.com/watch?v=PXyzDpLjMK0>.

==> + SILENT KEY: JOHN W. SODERBERG, W1AKV (SK)

John Soderberg, W1AKV, of Weston, Vermont, passed away on November 7. He was 90. Soderberg, an ARRL member, was one of the inventors of

the spherical array and its associated electromechanical compensator that was the primary acoustic (sonar) sensor subsystem on three generations of Navy nuclear attack and fleet ballistic submarines. He was also a key member of the Underwater Sound Laboratory (USL) engineering team that developed sonar and related systems for the submarines. According to friends, he was walking the hills for miles with his German shepherd and working CW just days before his death.

==> + SILENT KEY: MILTON A. SULLIVAN JR, EX-K8YDO, FORMER CHIEF ENGINEER AT R. L. DRAKE (SK)

Milton A. "Buddy" Sullivan Jr, ex-K8YDO, of Washington, DC -- the former chief engineer at the R. L. Drake Company <http://en.wikipedia.org/wiki/R._L._Drake_Company> -- passed away from a stroke on October 28. He was 85. Sullivan designed and oversaw the designs of all the most significant Drake Amateur Radio products, including the 1A, 2B and 2NT transmitter, all the 4 lines and the beginning of the 7 line. After retiring from Drake in 1984, Sullivan ran his own business selling and setting up satellite television systems, an offshoot of his later projects at Drake that involved designing satellite equipment. After that, he went back to work full time as chief engineer for Lytton Electronics, where he worked until his final retirement in 1990. In 1993, he and his wife Judith moved to South Carolina where Sullivan worked for Alpha Delta, the small company owned by his former Drake colleague and long time friend, Don Tyrrell, W8AD. Sullivan donated his body to science. A US Navy veteran, he will be interred at Arlington National Cemetery after a term with the Georgetown University Medical School. -- Thanks to John Sullivan and Don Tyrrell, W8AD, for the information

==> THIS WEEK ON THE RADIO

This week:

- November 13-14 -- Kentucky QSO Party; WAE DX Contest (RTTY); OK/OM DX Contest (CW)
- November 13-15 -- CQ-WE Contest
- November 14 -- SKCC Weekend Sprint
- November 17 -- QRP Fox Hunt
- November 18 -- NAQCC Straight Key/Bug Sprint

Next week:

- November 19 -- YO International PSK31 Contest; QRP Fox Hunt
- November 20 -- Feld Hell Sprint
- November 20-21 -- LZ DX Contest; All Austrian 160 Meter Contest; RSGB Second 1.8 MHz Contest (CW)
- November 20-22 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North American Collegiate ARC Championship (SSB)
- November 21 -- EU PSK63 QSO Party; Homebrew and Oldtime Equipment Party

- November 22 -- Run for the Bacon QRP Contest
- November 24 -- SKCC Sprint; QRP Fox Hunt

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Events Station Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- November 13 -- ARRL Alabama Section Convention <http://www.w4ap.org/modules.php?name=Hamfest>, North Montgomery, Alabama
- November 13-14 -- ARRL Indiana State Convention <http://www.fortwaynehamfest.com/>, Ft Wayne, Indiana
- December 4-5 -- ARRL West Central Florida Section Convention <http://www.fgcarc.org/>, Palmetto, Florida

To find a hamfest near you, click here <http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1735 - November 12 2010

Amateur Radio Newsline report number 1735 with a release date of
Friday, November 12th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio continues its emergency respond in
Indonesia, a South African ham helps save two on board a stricken
yacht; the FCC closes a number of loopholes in the Vanity Call Sign
program, Dayton says its time to start sending in nominations for the
2011 Hamvention awards and W5KUB to provide a day long streaming video
tour of M-F-J. All this and more on Amateur Radio Newsline(tm) report
number 1735 coming your way right now.

**

RESCUE RADIO: HAMS RESPOND TO INDONESIAN TWIN DISASTERS

Amateur radio is doing its part after a pair of disasters hit Indonesia
back to back. Jason Dee, VK2LAW, of the WIA News has the latest:

--

Following two natural disasters, an earthquake triggered tsunami and
separately an erupting volcano, radio amateurs are providing their help
as the enormous response effort continues.

ORARI, the Organization of Amateur Radio in Indonesia's International
Affairs coordinator, Wisnu Widjaja YB0AZ has provided initial
information about the nvolvement of radio hams in the dual disasters
that hit the Indonesian archipelago this week.

He said that the ORARI Communication and Rescue Task Force has joined
the team of the Disaster Management of Directorate General Post and
Telecommunications, Ministry of Communication and Informatics Republic
of Indonesia.

They has been operating in the field and provide communications support
to the government and communities in the area where the eruption of
Mount Merapi catastrophe at Yogyakarta province and the earthquake also
followed by tsunami at Mentawai of West Sumatra, said Wisnu YB0AZ.

Media reports that at least 170 died, mostly drowned after the tsunami
triggered by a 7.7 magnitude offshore earthquake struck the Mentawai
islands late Monday week off the west coast of Sumatra. Up to 400
others are missing.

While on the island of Java, several hundred kilometres away, 29 were killed when the volcano, Mount Merapi, erupted on Tuesday releasing clouds of hot gas, rocks and laver into the air. almost 42,000 people had fled to temporary shelters around the nearby city of Yogyakarta as the area is covered in volcanic ash.

I'm Jason, VK2LAW

--

The remoteness of the affected areas, poor communications, and the ongoing disaster response and relief efforts are likely to see the Organization of Amateur Radio of Indonesia Communications and its rescue task force involved for some time yet. (VK3PC)

**

RESCUE RADIO: SOUTH AFRICAN HAM HELPS RESCUE STRANDED YACHT

A real time rescue at sea with the aid of a South African sailor and ham radio operator. Hamnet's Francois Botha, ZS5BUU is here with the details:

--

Roy Cook, ZS5CB was instrumental earlier this week in the rescue of 2 yachtsmen aboard a yacht called Houbo that ran into difficulties off the coast of Mozambique. Roy had intercepted a call for assistance, via a Ham Radio marine VHF monitoring frequency, and contacted NSRI Richards Bay on Saturday afternoon the 30th of October.

He reported that the yacht Philigic had by chance come across the yacht with two Frenchmen, on board and in a desperate state of disrepair, some 200 nautical miles off-shore from the Mozambique coast. The yacht Houbo unfortunately had been caught up in severe tropical weather out at sea and had not only capsized and corrected itself but that the two yachtsmen had lost most of their food, drinking water, and that the boat had been severely damaged. Their radio equipment and antenna system was non functional with result they could not radio for help.

Richards Bay NSRI under the control of Dorian Robertson indicated that the yacht was out of range for a rescue operation but the team were placed on alert to monitor the situation. Roy, in the meantime had been able to maintain contact with the other yacht and kept the Richards Bay NSRI up to date with information on the progress of the two yachts.

Once the yachts were in South African waters by Monday afternoon around 16h00, the Richards Bay NSRI launched the rescue craft and rendezvoused with the Houbo 12 nautical miles off-shore in a 25 knot North Easterly wind and a 1 to 2 meter swell. A towline was attached to the yacht and safely brought to the safety of Richards Bay harbor.

Both the yachtsmen were unhurt but will spend quite a while repairing the yacht before they continue on their journey.

Reporting for Hamnet this is Francois Botha, ZS6BUU.

--

The final destination of the damaged yacht is at this stage is unknown, but it may be a long time before its back at sea. (ARMI)

**

RADIO LAW: FCC CLOSES LOOPHOLES IN VANITY CALL PROGRAM

The FCC has closed some loopholes in the vanity call sign program. Mark Abramovich, NT3V, reports from the City of Brotherly Love:

--

It has been nearly 14 years since the Vanity Call Sign system was rolled out by the Federal Communications Commission. And, in that time, tens of thousands of amateurs have taken part.

The regulatory panel decided only last year it might be time to revisit some issues that it felt were either left unresolved or needed clarification.

Now, the FCC's report and order are out regarding the vanity call sign system and there are some adjustments.

There is one, though that the FCC did not go for - a request to eliminate the fee for a first-time application for a vanity call sign -and the renewal fee for that call sign.

The fee for each will remain $13.30.

The term of the license, like the standard amateur radio license, is 10 years.

Something else also contained deeper in the report and order was discussion and a decision regarding restricting an applicant's vanity call sign to the call region in which he or she lives.

The FCC notes in discussion of this issue that "the applicant's choice of vanity call signs would be reduced to 10 percent of less of the call signs that would otherwise be assignable to the station."

The FCC continues "a limitation based upon the person's place of residence...could easily be circumvented by using a mailing address in another call sign region."

Therefore, the FCC decided there will be no change in the existing rules which allow someone say in the Third Call area to apply for a vanity call sign in any area, including the Third Call area.

What else?

>From now on, any new trustees for a club station license or vanity call sign may not serve as a trustee for multiple clubs and station licenses. But those who already do so will be grandfathered - meaning

they can continue to do so for now.

And, there are also new restrictions on who can file applications on behalf of a club regarding a change in trustee. That application must now be signed by an officer of the club making the application to the Club Station Call Sign Administrator.

The FCC says this should "prevent a departing trustee from making off with the club license and call sign, or refusing to agree to a change in trustee."

The FCC also says this requirement will also address "instances in which a trustee becomes incapacitated."

And, finally, what about the two-year wait until the call sign of a deceased ham can be assigned to someone else in the vanity system?

The FCC decided to clarify that issue by stating that the countdown -so to speak - would begin on the date of death of the licensee and not the notification date to the FCC.

In addition, the FCC decided to add a 30-day waiting period before that canceled license - due to death - is put into the database and available to give all an equal opportunity to complete for the license.

And what about the close-relative exception - that is a close relative being put first in line to apply for the call sign of a deceased relative as a memorial to that person?

The FCC says that's now the rule and clarified who is covered.

Here's what the FCC decided: "the term in-law is to include only a parent, stepparent, sibling, or step sibling of a licensee's spouse, and the spouse of a license's sibling, step-sibling, children or stepchild, or the spouse of a licensee's spouse's sibling or step-sibling.

That expands the pool of relatives quite a bit.

And, finally, the FCC says if you held a license and let it expire, you'll be able to get it back within a two-year window before it's entered in the vanity call sign system.

And, one more thing for those of you who still might hold a Novice license.

The FCC now says you can be the trustee of a club station license.

The FCC reasoned that the license classification "is not a reason to prohibit them from being club station trustees, for frequency and operating privileges are determined soley by the class of the operator license held by the control operator, rather than the license held by the club station trustee."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

In summarizing the changes, the Commission said that it believes that the public interest will be served by amending its rules in order to make the amateur service's vanity call sign system more equitable and transparent. It also believes that changes in the rules governing club station licensing will promote a more equitable and administratively efficient licensing process. (FCC, ARNewsline(tm))

ENFORCEMENT: UNKNOWN SIGNAL AT 500 KHZ BEING INVESTIGATED

The Radio Society of Great Britain is beginning an investigation of a mystery signal in the 500 Kilohertz band. This, after UK radio amateurs who operate from 501 to 504 kHz over the past month have reported reception of a wideband signal between 498 and 502kHz.

The RSGB is looking into the matter. It says that the signal may be an early trial of a so called e-Navigation system that the maritime service is planning to propose for this part of the spectrum at the WRC-12 preparation meetings. (RSGB)

**

RESCUE RADIO: RAC BEGINS REVIEW OF ITS NATIONAL FIELD ORGANIZATION

Radio Amateurs of Canada began its National Field Organization Review Project on Monday, November 8th. With the assistance of Hew Lines, VA7HU, Ian Snow, VA3QT, and others, guidelines were adopted to review the entire Radio Amateurs of Canada Field Organization including but not limited to such aspects as the overall structure, the groups focus, the training it affords members and several other points crucial in an emergency communications and public service environment

According to the Radio Amateurs of Canada news release, this will be an ongoing process that will look at all aspects of how the program operates and how it can better deliver amateur radio resources to those it serves. Canadian hams looking to assist are asked to contact Doug Mercer, VO1DTM. Mercer is the Radio Amateurs of Canada Vice President Field Services. His e-mail is vo1dtm (at) hotmail (dot) com. (RAC)

RESCUE RADIO: ANOTHER FALSE RESCUE BEACON DOWN-UNDER

An improperly disposed of personal rescue beacon recently caused a major T-hunt in New Zealand. Graham Kemp of the WIA News has more:

--

Rescue services were alerted after Tauranga Airport in ZL and an aircraft flying over the Bay of Plenty picked up a distress signal in the region.

A helicopter from Rotorua narrowed down the search area, and Radio. Spectrum Management traced it to the Te Maunga refuse transfer station. The beacon was located in the recycling center.

The Rescue Coordination Centre New Zealand said the beacon had been placed on a glass conveyor belt and was probably triggered when it was lifted off the belt and set aside on a railing. The beacon was operating on the old 121.5MHz or 243MHz frequencies.

The incident served as a reminder for people all around the world to dispose of old beacons properly, either by disconnecting the battery or taking the beacon to police, the coastguard or a beacon retailer.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia

--

No word yet on who the beacon locator beacon belonged to or how it wound up in a trash dump. (WIA News)

**

ENFORCEMENT NEEDED: NEW WAY TO ELECTRONICALLY PILFER MOVIES MADE PUBLIC

Illegal downloading pirated films are no longer Hollywood's worst nightmare, but that's only because of a newer criminal enterprise in the form of equally illegal offshore subscription services. Fred Vobbe, W8HDU, has the rest of the story:

--

Foreign businesses, often with criminal connections collect illegally obtained movies into what are called Cyberlockers. Cyberlockers are similar to Internet storage sites used by individual consumers to squirrel away pirated video. But news reports say that the for-profit version has spawned an array of sophisticated and seemingly reputable websites selling unlimited digital movie files for as little as $5 a month.

Fred Huntsberry is the chief operating officer for Paramount Pictures. He recently detailed the evolution of the latest in professional

electronic movie piracy methods for hundreds of European movie theater operators attending an opening-day seminar at Cinema Expo.

According to Huntsberry It is quite common for Hollywood movies to be made available via illegal for-profit websites within days of theatrical release. He notes that the advent of global releasing now allows the proliferation of individual titles into an array of languages within the first month of a theatrical debut. When movies are later released on DVD and Blu-ray Disc, the illegal Cyberlocker sites upgrade the quality of video offered by the illegally camera recorded images to pristine digital copies.

Cyberlocker-based businesses operate from Russia, Ukraine, Colombia, Germany, Switzerland and elsewhere. Several even sell advertising to mainstream, often-unwitting advertisers.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

Paramount's Huntsberry added these Cyberlockers now represent the preferred method by which consumers are enjoying pirated content. (Published news reports)

HAMVENTION 2011: NOMINATIONS NOW OPEN FOR HAMVENTION AWARDS

The Dayton Hamvention is soliciting nominations for its 2011 Technical Excellence, Special Achievement and Amateur of the Year Awards. Also, by popular demand the Hamvention has decided to continue its new Radio Club of the Year Award and to make it a permanent addition of the Hamvention Awards program.

By way of review, the Amateur of the Year is for the special person who has made a long term or lifelong commitment to the advancement of amateur radio. He or she must be a well-rounded individual who has contributed to our hobby in some outstanding way.

The Special Achievement Award is for the person who has made an outstanding contribution to the advancement of amateur radio. This award is usually given to a respected amateur who spearheaded a single significant project.

The Technical Excellence Award is presented to a radio amateur that has made an outstanding technical advancement in the field of amateur radio.

Lastly, the new Club of the Year award recognizes a radio clubs accomplishment, activities, and its service to the public.

To be considered for any of these awards, completed nominations must be submitted no later than January 15, 2011. Nomination forms can be found at www dot Hamvention dot org in the awards section or with your Yahoo Groups login directly at tinyurl.com/2alox4g. Send your completed nominating forms and substantiating documentation to Hamvention 2011, Attention Awards Committee, Post Office Box 964, Dayton, Ohio, 45401-0964. Again, the cutoff date to submit nominations is January 15, 2011. (DARA)

NAMES IN THE NEWS: W8ROG NAMED KNIGHT OF THE LEGION OF HONOR

Some names in the news. First up is Ken Kott, W8ROG, of Macomb County Michigan. Kott has recently been named Knight of the Legion of Honor for his actions during World War Two.

The award notification issued by Consul General of France, Graham Paul, reads in part: "This outstanding distinction is the highest honor that France can bestow upon those who have achieved remarkable deeds for France. It is also a sign of true gratitude for your invaluable contribution to the liberation of France during these difficult times in the History of our nation."

In addition to radioman and reconnaissance duty with the 3rd Armored Division in Europe during WW2, Kott also taught Morse code in the Army.

Ken Kott, W8ROG who at age 90 is still an ardent C-W operator is also the father of former Worldrado editor Nancy Kott, WZ8C. (WZ8C)

**

NAMES IN THE NEWS: N2ITF APPOINTED SM FOR WEST NEW YORK

And word from the ARRL that Steve Ryan, N2ITF, of Ashville, New York, has been appointed Section Manager of the ARRL Western New York Section, effective November 2. Ryan will finish out the term of Scott Bauer, W2LC, who announced his resignation for personal reasons on October 31st. Bauer had served as Section Manager since January of 2000. ARRL Membership and Volunteer Programs Department Manager Dave Patton, NN1N, made the Ryan appointment in consultation with Atlantic Division Director Bill Edgar, N3LLR. (ARRL)

RADIO PROBLEMS: PROPOSED NEW BUILDING IN NYC COULD LEAD TO RECEPTION PROBLEMS IN NJ

A New York City developer's plan to build a new 67 story building in midtown Manhattan is drawing a closer look from the regions broadcasters. They are worried that the structure could partially block their transmissions from atop the nearby Empire State Building. Bruce Tennant, K6PZW, reports::

--

The skyscraper, named 15 Penn Plaza, is to be built just two blocks from the Empire State Building. Empire as it is known in the broadcast field has been the home for most FM and television broadcasters in the city since the 911 al-Quida terrorist attacks that leveled the twin towers of the World Trade Center. As a result, Empire is currently home to 19 FM stations and most of the city's television transmitters and had served that same purpose before many stations had moved to the taller World Trade Center.

Vornado Realty Trust is the developer behind the proposed 1,190-foot building at 15 Penn Plaza. By comparison, Empire is 1,250 feet, plus a 204-foot antenna structure. Some local observers agree that 15 Penn Plaza could cast a significant signal shadow southwest of the city, and in particular affect FM listening in the New York suburbs.

Jim Stagnitto is the Director of Engineering for New York Public Radio. He says that he is concerned about both of his FMs at the Empire State Building. He notes that without a predictive study to examine, there isa really no way to predict how bad it could be.

Josh Hadden is Stagnitto's counterpart for Clear Channel Radio in New York. He says that his company is studying the different potential impacts the building could have on his facilities adding that they are watching the development of the plan closely.

Reporting for the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The building's designer, Pelli-Clarke-Pelli Architects, is known for designing some of the world's tallest buildings, including the Petronas

Towers in Malaysia. According to observers, Vornado officials have thus far not indicated any interest in building broadcast facilities atop the new tower. (RW, other published reports)

HAM RADIO IN SPACE: ASTRONAUTS TAKE PART IN GROUND BASED ARISS TRAINING EXERCISE

Turning to ham radio space related news, word that astronauts Joe Acaba, KE5DAR and Aki Hoshide, KE5DNI participated in simulated ARISS school contact with students attending Ralph McCall School in Airdrie, Alberta, Canada. This, on Tuesday, October 26th. The simulated contacts are training sessions for the astronaut hams using ARISS equivalent equipment to make terrestrial-based amateur radio contacts. Acaba, who is slated to fly with Expedition 31, also had an ARISS refresher course on Wednesday, October 27th for his upcoming mission in 2012. (ANS)

**

HAM RADIO IN SPACE: NANOSAIL-D TO LAUNCH NOVEMBER 20

NanoSail-D, carrying an Amateur Radio beacon on 437.305 MHz, is planned to launch on November 20th. The spacecraft will be carried into space on board Minotaur-4 rocket. Once in space, NanoSail-D will be in a low earth orbit at 9 degrees inclination. The orbit will be elliptical, 685 km apogee and 340 km perigee, degrading to 200 km at which time it will de-orbit. While in space NasnoSail-D will transmit a beacon signal on 437.305 MHz operating AX25 protocol with one 1/2 second burst every 5 seconds. (AMSAT)

**

WORLDBEAT: SOUTH AFRICA'S REMEMBRANCE DAY

South Africa's annual Remembrance Day service was to be transmitted Sunday November 14th on the radio program Amateur Radio Mirror International. The service, conducted by the Reverend Jan Kramer, ZS6JRK, is a memorial of radio amateurs who lost their lives in service of their country. The script reading was to be in English and the service in Afrikaans. Clubs wishing to retransmit the service on their local repeater can down load a MP3 audio file. Send an email to armi at sarl dot org dot za to receive details of the URL. (ARMI)

**

WORLDBEAT: UK HAMS TO HOLD SOS RADIO WEEK IN JANUARY

The next United Kingdom SOS Day will take place on the 28th of January and the Lifeboat Amateur Radio Society will, once again, be organizing SOS Radio Week to coincide with it.

SOS Radio Week is a nine days non-competitive, operating occasion held as a fund raising event by United Kingdom radio amateurs for the Royal

National Lifeboat Institution.

Taking part is easy. If you are a UK ham, simply take your web browser to saosradiowqeek.org.uk to register. (Southgate)

**

WORLDBEAT: CELEBRATING 20 YEARS OF GERMANYS REUNIFICATION

On the air, listen out for the ham radio festivities surrounding the 20th anniversary of the reunification of Germany are taking place in the city of Bremen. To help in the celebration, the Amateur Radio Club of Bremen has activated the special callsign DL20YDM until August 31st of 2011. If you work this one please QSL as directed on the air. (Various)

**

DX

In DX, the Buddies in the Caribbean DXpedition which is a group which specializes in 100 watt or less low power operation and the Buddipole portable antenna systems is headed back to St Lucia. They will be there from December 5th to the 13th operating portable J 6 from a north shore villa location. There will be three stations in operation at various times on 160 through 10 meters using CW, SSB, and RTTY. Callsigns to listen for are W3FF, N7UN, K8EAB, W7ZT, N4LA, K4MK, NX8L, and W4OKW. . QSL with a self addressed stamped envelope to each operators home call or electronically using Logbook of the World or eQSL.

And keep an ear out for DL2AH on Tristan da Cunha as ZD9AH until December 6th. This is not a DXpedition so he plans to operate mainly SSB on 40, 20, 17, 12 and 10 metres as time permits. Also some RTTY activity during the last two weeks of November. QSL via DL2AH, direct or via the bureau.

F4BXW is on the air from Gabon as TR8GV. He will be there through November 23rd operating SSB from the capitol city of Libertyville. If you make contact, QSL to F4BXW.

VK4KEV will be on Macquarie Island for about 18 months. During his spare time he will sign VK0KEV in SSB und digital modes mostly on 40 and 20 meters. QSL as directed on the air.

Lastly, N0TG reports that the Sable Island DX operation is back on the calendar. The rescheduled dates are December 6th through the 13th. According to N0TG, several critical details were resolved sooner than expected. More is on-line at www dot cy0dxpedition dot com. Above from various DX news sources)

THAT FINAL ITEM: A VIDEO TOUR OF MFJ ON TUESDAY NOVEMBER 16

And finally this week, its well known in ham radio circles that Martin Jue, K5FLU, made the Great American Dream a reality when he formed MFJ Enterprises back in in 1972. And now you can get to meet him and tour his facilities thanks to ham radio webcaster Tom Medlin, W5KUB. Bill Pasternak, WA6ITF, is in the Newsroom with the details:

--

Martin Jue, K5FLU, first ham radio product was a high selectivity filter that would enable a receiver to more easily separate Morse code signals on the crowded High Frequency amateur radio bands. The success of this receiver add-on turned out to be the seed for a company that has grown into the MFJ Enterprises of today. And if you have some free time on Tuesday, November 16th, you can see it all and get to know Martin Jue, K5FLU, in a very special day long webcast produced and hosted by Tom Medlin, W5KUB.

According to W5KUB, the live webcast will include a tour of MFJ, along with its subsidiary companies including Cushcraft, Hy-gain, Ameritron, Mirage, and Vectornics. The webcast will also show all the engineering, design, manufacturing aspects of the ham gear that's now found in stations around the world. Most of all you will get to meet the company's founder, Martin Jue, K5FLU, and even get to ask him questions over Toms two way interactive w5kub dot com website.

So tune in on Tuesday, November 16th to this very special all day tour of MFJ Enterprises to learn how the American dream that has come true in Starksville, Mississippi. A day of ham radio fun brought to you courtesy of Tom Medlin, W5KUB, at his interactive website at w5kub.com.

For the Amateur Radioi Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

Again that's Tuesday, November 16th for this special streaming video tour of MFJ and the chance to meet the company's founder Martin Jue, K5FLU. All of this in a live webcast at w5kub.com. (W5KUB)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If

you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

==> + PUBLIC SERVICE: SKYWARN RECOGNITION DAY SET FOR DECEMBER 4

The 12th Annual SKYWARN Recognition Day (SRD) Special Event will
take place Saturday, December 4, 2010. SRD is co-sponsored by the ARRL
and the National Weather Service as a way to recognize the commitment
made by Amateur Radio operators in helping to keep their communities
safe. According to SRD Coordinator David Floyd, N5DBZ, Amateur Radio
operators can visit their local participating NWS office, working as a
team to contact other hams across the world throughout the 24 hour
event.

Floyd said that as SKYWARN Recognition Day has grown throughout the
years, he has seen a greater use of digital communications in addition
to SSB, CW, RTTY and packet radio: "Each year, more and more contacts
are being made using EchoLink, Winlink and the use of e-mail
reflectors." In keeping with the NWS setting, stations are asked to
```

include a weather report for their location in their exchange. The 2010 SKYWARN Recognition Day will be held on December 4 from 0000 UTC-2400 UTC. Read more here <http://www.arrl.org/news/skywarn-recognition-day-set-for-december-4>.

==> + ARRL RECOGNIZES: DEADLINE APPROACHING FOR NOMINATIONS FOR ARRL'S LEONARD AWARD

Television, radio, magazines, newspapers, blogs, Webcasts -- Amateur Radio has been featured in all of them in 2010. And now it is time to thank the professional media people who made it happen by nominating them for the Bill Leonard, W2SKE, Professional Media Award. This national level annual award is sponsored by the ARRL and honors three professional journalists whose outstanding coverage in audio, video and print formats best reflect the enjoyment, importance and public service value of the Amateur Radio Service. The deadline for nominations is December 10. Read more here <http://www.arrl.org/news/deadline-approaching-for-nominations-for-arrl-s-leonard-award>.

==> + DAYTON HAMVENTION®: NOMINATIONS SOUGHT FOR 2011 DAYTON HAMVENTION AWARDS

The Dayton Hamvention® is accepting nominations for its 2011 awards. Do you know an outstanding amateur in your club, community or from on-the-air contacts? Does this person excel in some phase of Amateur Radio? Do you feel this person deserves worldwide recognition? Is there an Amateur Radio club that you know of that has an outstanding record of public service? All radio amateurs and Amateur Radio clubs are eligible. The deadline for nominations is January 15, 2011. The winners will be recognized at the 2011 Hamvention, May 20-22. Read more here <http://www.arrl.org/news/nominations-sought-for-2011-dayton-hamvention-awards>.

==> ON THE AIR: ARRL PHONE SWEEPSTAKES THIS WEEKEND

ARRL Sweepstakes <http://www.arrl.org/sweepstakes> has been part of Amateur Radio in the US and Canada for more than 75 years. In 2010, the tradition continues with the 77th running of the best domestic contest in all of Amateur Radio: the Phone portion of the contest runs this weekend, from 2100 UTC Saturday, November 20 through 0300 UTC Monday, November 22. Read more here <http://www.arrl.org/news/no-maybes-about-it-arrl-sweepstakes-is-fun>.

==> HINTS & KINKS: SEALING PL-259 UHF PLUGS AND SO-239 UHF CONNECTORS

Don Dorward, VA3DDN, of Pickering, Ontario, sent us this idea for seals for PL-259/SO-239 connectors . Contact Don via e-mail <va3ddn@arrl.net> for more information.

The popular and low-cost PL-259 UHF plug and its mating SO-239 UHF connector were never designed to be waterproof. In spite of this, many of us find ourselves having to use these connectors out-of-doors for an

antenna or cable connection and then have the experience of trying to apply some form of weatherproofing.

If this is not done, and done well, then intermittent connections soon result, especially with wet freezing and thawing conditions, resulting in moisture and corrosion getting into the connectors and even into the coax itself.

One well-known solution is to use a bondable rubber tape wrapping. That often seems to work using one of the soft, moldable, stretchable tapes that are available for the purpose. In practice, I have found that the hardest area to seal effectively using this method is the area from the rim of the male PL-259 shell to the mating SO-239 socket face. This is especially true when the SO-239 socket is located partially inside the cowl of the antenna mount (such as the Solarcon/Antron vertical or other similar types) and it is impossible to get sealing tape up into this tight location.

To overcome this problem, simply slip as many tight fitting O-ring(s) over the SO-239 barrel (see Figure) as needed to fill the space between the base of the SO-239 and the coupling ring. Lubricate the O-rings with a generous amount of silicone grease, often sold in the automotive part stores as "dielectric tune-up grease."

Important: Check that when the mating PL-259 plug is installed and tightened down, the outer rim of the PL-259 shell butts up against and slightly compresses the "O"-ring(s). The "O"-rings I used were ones I had on hand, about 9/16 inch ID ± 0.10 inch thick. I am sure anything that's a snug fit will work. Of course, you will still need to wrap the lower half of the PL-259 shell and the spot where the coax exits the connector with tape to seal that part.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail to h&k(at)arrl(dot)org or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> ARRL PUBLICATIONS: ARRL INTRODUCES EXAM REVIEW SOFTWARE FOR HAM RADIO LICENSING

ARRL announced today that it will begin including practice examination software with all of its popular license manuals. "The first book to include the new bundled-in software is The ARRL Ham Radio License Manual -- used by tens of thousands of prospective hams as their first introduction to Amateur Radio," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "The book includes everything to prepare for a 'first' ham radio license -- the Technician class license. A CD-ROM tucked into the back of the book contains the new software, which we've

named ARRL Exam Review. The software includes the complete examination question pool, plus short explanations of every question to help make sure you understand the answer." Read more here <http://www.arrl.org/news/arrl-introduces-exam-review-software-for-ham-radio-licensing>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEB SITE

Three new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL Web site. Let your voice be heard!

Questions in this month's QuickStats poll include:

- From an operator's point of view, have modern Amateur Radio transceivers become too complex?
- Looking back over the last several years, do you think the amount of time you spend on the air has increased or decreased?
- Which social media platforms do you use most often?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the February QST QuickStats page, located in the rear advertising section. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> + ARRL TO CLOSE IN OBSERVANCE OF THANKSGIVING HOLIDAY

ARRL Headquarters will be closed November 25 and 26 in observance of Thanksgiving. There will be no W1AW bulletins or code practice transmissions those days <http://www.arrl.org/w1aw-operating-schedule>. The ARRL Letter <http://www.arrl.org/arrlletter/> will be published a day early on Wednesday, November 24, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> next week. ARRL Headquarters will reopen Monday, November 29 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> SOLAR UPDATE

Tad "The sky won't snow and the Sun won't shine <http://www.dailymotion.com/video/xret4_eagles-desperado_life>" Cook, K7RA, reports: Five new sunspot groups appeared in the past eight days, and the average daily sunspot number for the November 11-17 period rose nearly 28 points to 60.9, compared to the week before. The average daily solar flux was up nearly four points to 87.9. The current forecast from NOAA/USAF shows a planetary A index of 5 on every day through the end of November, and the predicted solar flux on November 18-27 at 91, 90, 88, 86, 84, 84, 84, 84, 80 and 80. Conditions should be good during the ARRL Phone Sweepstakes this weekend. The latest predictions show continued solar activity with low geomagnetic activity levels. Look for more information on the ARRL Web site on Friday, November 19. For more information concerning radio propagation, visit

the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Eagles' Desperado <http://www.dailymotion.com/video/xret4_eagles-desperado_life>.

==> + SILENT KEY: JOHN CHAMPA, K8OCL (SK)

John Champa, K8OCL, of Richardson, Texas, passed away from complications of cancer on Friday, November 12. He was 66. An ARRL Life Member, Champa was the former Chairman of the ARRL HSMM (High Speed Multimedia) Working Group and Executive Vice President of AMSAT-NA. He was also the High Speed Multi-Media Radio Contributing Editor for CQ VHF Magazine. Champa did early work in Amateur Television (ATV) and later Amateur Digital Video (ADV). His recent focus was on PropNET, Automatic Packet Reporting (APRS) and GPS navigation systems, HSMM radio and HF digital modes. Read more here <http://www.arrl.org/news/john-champa-k8ocl-sk>.

==> THIS WEEK ON THE RADIO

This week:

- November 19 -- YO International PSK31 Contest; QRP Fox Hunt
- November 20 -- Feld Hell Sprint
- November 20-21 -- LZ DX Contest; All Austrian 160 Meter Contest; RSGB Second 1.8 MHz Contest (CW)
- November 20-22 -- ARRL Sweepstakes Contest (SSB) <http://www.arrl.org/sweepstakes>; North American Collegiate ARC Championship (SSB)
- November 21 -- EU PSK63 QSO Party; Homebrew and Oldtime Equipment Party
- November 22 -- Run for the Bacon QRP Contest
- November 24 -- SKCC Sprint; QRP Fox Hunt

Next week:

- November 26 -- QRP Fox Hunt
- November 27-28 -- CQ Worldwide DX Contest (CW)
- December 1 -- QRP Fox Hunt
- December 2 -- ARCI Topband Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 4-5, 2010 -- ARRL West Central Florida Section Convention <http://www.fgcarc.org/>, Palmetto, Florida

- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a hamfest or convention near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1736 - November 19 2010

Amateur Radio Newsline report number 1736 with a release date of
Friday, November 19th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The National Telecommunications and Information Agency proposes a fast track for spectrum reallocation that has little impact on ham radio, the Czech Republic issues its first 500 kilohertz ham radio permit, FM simplex in the satellite subbands is reeking havoc with ham radio space operations and a group opposed to a ham radio antenna installation says it will ask the ARRL for help. Find out the details on Amateur Radio Newsline(tm) report number 1736 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: NTIA PROPOSES FAST TRACK PLAN FOR REALLOCATING SPECTRUM

The National Telecommunications and Information Agency, which is the White House version of the FCC is proposing a fast track approach to the reallocation of 115 MHz of radio spectrum for wireless broadband now, increasing to a total of 500 MHz within ten years. So far the possible losses to ham radio appear minimal. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

If one looks at the National Telecommunications and Information Administration's proposed Fast Track the reallocation of 115 MHz of radio spectrum for wireless broadband now and a total of 500 MHz within ten years from a ham radio point of view, the hobby comes out looking pretty much unscathed. The only amateur radio spectrum on the list is a part of the 2.3 GHz band where hams have a secondary user status, and if this is the re-farming plan that's adopted, Amateur radio comes out with little in the way of losses.

But this is not the only plan that will be put forth. The FCC is still in the process of finalizing its reallocation recommendations and various industry groups will likely be lobbying for theirs. In the end, whatever the Washington bureaucrats dream up is likely to be a composite of what the NTIA. The FCC and other interests agree on. Thats just the way that the Washington DC political arena works.

Perhaps more important for ham radio to consider is the fact that no matter what plan is chosen, there will be various services displaced for the spectrum that they now inhabit. This means they will be searching for new bands to go to. And it is this secondary fallout that could pose more of a threat to the ham radio bands at 420 MHz and above than the initial re-farming plan itself.

Those of you who enjoy wadeing through government documents can find yhis one in PDF format at tinyurl.com/2bq3694

And I'm Bill Pasternak, WA6ITF, watching this one from the newsroom in nthe City of Angels. Jim.

--

More on this plan in future Amateur Radio Newsline reports. (NTIA Release)

**

RESTRUCTURING: CZECH REPUBLIC ISSUES 500 KHZ PERMIT

A new 500 kHz operating permit has been issued in the Czech Republic. The recipient is OK2BVG who has been given permission to operate between 501 and 504 kHz with a maximum of 20 watts Effective Radiated Power until September 1st of 2011.

As we go to air, 11 countries in IARU Region 1 have now authorized amateur or experimental operations in this part of the 500kHz band. More information can be found on the IARU Region 1 website. Its in cyberspace at www dot iaru-R1 dot org. (IARU)

**

HAM RADIO IN SPACE: FM SIMPLEX DAMAGING SPACE COMMUNICATIONS

FM operators are once again being asked to not use 145.8 to 146.0 MHz for terrestrial, point to point casual communications. This is because such operations are devastating to weal signal ground to space and space to ground satellite operations. Take a listen:

--

Actual QSO audio.

--

Thats from the FM interference on HO-68 uplink as recorded by OZ9AEC on November 9th. Two FM stations can be heard speaking in Russian. The one speaker is barely audible in the noise but the stronger one holds the potential of capturing the HO-68 receiver and blocking weak signal operations using CW, SSB band narrowband digital modes.

OZ9AEC has posted the full QSO between these stations operating on the HO-68 uplink to the YouTube dot com. It very graphically illustrates the problem that operating FM simplex operation on 145.8 to 146 and 435

to 438 MHz can cause for ham radio satellite operations. It can be heard at tinyurl.com/35yqkhl (Southgate)

**

BREAKING DX NEWS: SPRATLEY DXPEDITION EXTENDED FOR 160 METER DX CONTEST

Some good news in the world of DX. With less than 60 days to go until the Spratley Island, DX0DX operation hits the amateur bands the DXpedition Team Leader, Chris Dimitrijevic VK3FY, has announced it will be extended to allow participation in the CQ World Wide 160 Meter CW Contest. Felix Scerri, VK4FUQ, of the W-I-A News has more:

--

While DX0DX was to go QRT on the 24th January, a couple of individual and keen members have asked if they could stay on air for that contest when ends at 2200 UTC Sunday the 30th of January. This will now extend DX0DX activation to 1st of February, 2011.

This limited extension was agreed in light of strong interest from Top Band contesters and the 160 meter band being the highest sought after in the DX0DX website online survey.

In another development, the pre-assembly, erection and tuning of eight HF yagi antennas in Fontana California went extremely well with the eight antennas tuned as per instructions to their allotted bands. Each was then partly disassembled breaking down into four parts for allow for quick installation once they reach the island. Masts, rotators, masts and cabling have all been finalized.

Chris VK3FY and DU8/VK3FY says, well done to the Station & Planning Co-ordinator David Collingham K3LP for organising and attending the Pre-Assembly Gathering, and also DXpedition logistics coordinator Charles Spetnagel, W6KK, for his understanding in having all the equipment dispatched to his QTH and also for being part of the Pre-Assembly Gathering.

Im Felix, VK4FUQ.

--

DX0DX will be on air from the 6th of January and now through to the 1st of February, 2011. We will have more DX news later on in this weeks Amateur Radio Newsline report. (WIA News)

**

ROLE REVERSAL: OPPONENT OF HAM TOWERS SEEKS HELP FROM THE ARRL

In a total role reversal, a group of not-so-nearby neighbors trying to stop a Tivoli, Illinois ham from erecting eleven towers on his property say that they will appeal to the ARRL for help. This after being denied a chance to officially offer arguments against a proposed cluster of ham radio towers on private property in rural Tivoli

Township.

The Peoria County Planning and Zoning Commission approved the permit request by Craig Thompson, K9CT, in July for 11 towers that range in height from 30 feet to 195 feet on property he owns. Opponents of the towers are now searching for ways to slow or stop construction that already is under way.

John Martin is the nearest neighbor of the property that's situated among the rolling farm fields and woodlands south of Tivoli. He tells the local newspaper that there is likely little that people in the area can do to stop construction. He then goes on to say that those opposed to the towers are trying to form a grassroots organization to let the American Radio Relay League know their position and get them to agree that what Thompson plans to do is excessive. Martin adds that his hope is to convince the ARRL to show Thompson that it is in his best interest to scale back his plans.

But Martin has also taken his opposition to the towers to the local community. He has posted flyers and bought space in the local weekly shopper newsletter that includes a photograph of a cluster of towers and the caption "Stop this from happening in your town!"

Thompson's attorney is Fred Hopengarten, K1VR, of Massachusetts. He is an expert in telecommunications law and helped convince the state's attorney office that the county zoning law was trumped by Federal Communications Commission mandate that allowed for construction of ham radio towers. Hopengarten and Thompson and both say that the flyers are an exaggeration.

So far there has been no word from the ARRL if it has received a request from Martin to assist in stopping construction of Thompson's tower farm in rural Tivoli, Illinois. More on this story as it develops. (pjstar.com)

SOLAR ACTIVITY: CLIMATE CHANGES AND SUNSPOTS

Hams are not the only ones concerned about the lack of solar activity. Now, WNDU television in South Bend, Indiana, has reported on the way in which lowered solar activity could drastically affect the worlds climate. Amateur Radio Newsline's Jack Parker, W8ISH, has the rest of the details:

--

If you actively pursue DX it may come as no surprise that sunspot activity over the past few years has been at an all time low. According to a special report broadcast by WNDU Meteorologist Mike Hoffman , we have had over 800 days with no sunspots and that has not happened in 300 years.

The last time old sol was this quiet was between 1645 and 1715. A period in time called the Maunder Minimum. Paintings from that era show wintry weather in areas where it's not typical, like carnivals held on frozen rivers and people playing on the ice. According to researchers that period of weather was brutal.

Hoffman's information comes from a recently published paper on sunspots in the Journal of Climate. Purdue University's Doctor Ernest Agee, authored this report. He says civilizations almost perished due to the harshness of winter and things like that. Doctor Agee writes that widespread crop failures caused famine around the world and many villages were deserted. So.could that happen in the modern world? The Purdue professor says the Sun is what powers the Earth, so even the smallest changes on the Sun can have an impact on our lives and our climate.

Sunspot data only goes back to the year 1610. Many scientists correlate low sunspots with low temperatures in many parts of the world and the best data shows that.

Doctor Agee's paper delivers more bad news for Amateur Radio DXer's and modern day society as well. In his Journal of Climate report, the Purdue researcher says the length of the solar cycle, the definition of a quiet period, the length of a quiet period for modern record and the deepness of the quiet period indicate that something has, quote, "upset the apple cart. As a result we are seeing new physics and new science emerging to explain what is happening.

For the immediate future scientists will continue to chart the solar activity and try to forecast a rosy outcome with hopes of increased sunspot activity leading to a brighter future for the world and for those who live by the sun spot cycles in amateur radio.

Reporting for Amateur Radio Newsline, this is Jack Parker, W8ISH.

--

The entire WNDU story can be both seen and read at tinyurl.com/28r7ce7 (W8ISH)

**

RADIO LAW: FCC DENIES APPEAL FOR W5ER VANITY CALL

The FCC has denied a request for reconsideration from Mark S. Wintersole, WB5NMZ, of Montgomery, Alabama, who had sought to change his call to W5ER under the Vanity Callsign System.

The story is one you have heard before. Wintersole was among those who wanted the a call when it became available in trhe Vanity Call Sign system. In this case the call was W5ER and Wintersole filed for it under the Vanity program only to have his application dismissed because the FCC says it was filed to early. So Wintersole appealed the initial decision where he argued that he was entitled to the call because it was canceled on September 27, 2008, and therefore should have been available when he filed his application on September 27, 2010.

Now, in its November 9th letter affirming the dismissal of Wintersole's initial application for the W5ER call, the FCC says that a canceled call sign does not become available for reassignment until after the two year waiting period ends. Because the W5ER call was canceled on September 27, 2008, the call sign became available to the vanity call sign system on September 28, 2010. Consequently, the FCC says that Wintersole's application was properly dismissed because it was filed before the W5ER call sign became available to the Vanity Call Sign system.

The current listed holder of the W5ER call sign is Edward J. Reynolds of Boston, Pennsylvania. (FCC)

**

RADIO LAW: AUSTRALIA TO CONTINUE BAN ON RADIO JAMMERS

The Australian Communications and Media Authority is proposing to continue to prohibit the supply, possession and operation of jamming devices designed to deliberately interfere with public mobile telecommunication services or P-M-T-S. This includes 3G networks and equivalent services such as mobile Wi-MAX.

According to the regulatory agency, since the original prohibition was made in March 1999, technological, economic and social developments have resulted in a proliferation of devices that consumers use for the purposes of wireless communications. A-C-M-A says that there is a growing reliance on mobile connectivity for personal and business transactions. These changes make the case for continuing a ban even more compelling, and this is reflected in the new, updated prohibition proposal. (WIA News)

**

ENFORCEMENT: ANOTHER COMMERCIAL WITH FALSE EAS TONES

Another ad using what sounds like an Emergency Activation System tones has been reported. This time it's a television commercial for the recently released motion picture Skyline.

According to a report in the trade publication Radio World, broadcast engineers have notified the magazine that the promotional sport for the film contains what sounded like EAS tones throughout. In an e-mail reported by the trade publication Radio World, Lincoln Financial's Media's Barry Thomas told SBE engineers that he was able to decode the

data. Thomas e-mail said that he believes it was a replay of a Required Monthly Test that covered central Pennsylvania.

Tom Ray who is also chairman of SBE Chapter 15 in New York City, says the ad was illegal, according to Part 11 of FCC regulations. That section prohibits deceptive E-A-S transmissions and reads as follows:

"No person may transmit or cause to transmit the EAS codes or Attention Signal, or a recording or simulation thereof, in any circumstance other than in an actual National, State or Local Area emergency or authorized test of the EAS. Broadcast station licensees should also refer to 73.1217 of this chapter."

This is the second reported use of EAS tones as a commercial marketing tool. You may recall a few months ago when an ARCO ad used what sounded like simulated EAS tones. (RW)

**

HAM RADIO ON THE WEB: CONTESTRANK.COM

Contestrank is a new website from EA4ZK that contains volumes of information about contesting including results, winners call signs, scores and much more. The site translates itself in five languages. These are English, German, Polish, Russian and Spanish. The full web address is www dot contestrank dot com. (EA4ZK)

**

NAMES IN THE NEWS: G5HF - WW2 UK COUNTERSPY

Some names in the news. First up is Harry Heap G5HF whose story as a World War 2 Voluntary Radio Interceptor has now been told by the The Essex Chronicle newspaper.

Heap was first licensed in 1932 as 2BZZ. He was issued the callsign G5HF in 1933. Following the outbreak of war he moved to Chelmsford where during the day he worked at Crompton on devices to neutralize magnetic mines and during the evenings worked as a Voluntary Radio Interceptor listening in to secret Nazi messages. The information he collected was passed to Bletchley Park for decoding.

Heap later became President of the Chelmsford Amateur Radio Society and retired from that role only a few weeks ago at the tender young age of 93. You can read more about this ham radio World War 2 hero at tinyurl.com/23s86xe (Essex Chronicle)

**

NAMES IN THE NEWS: CHIP MARGELLI, K7JA JOIND CQ PUBLISHING

And congratulations to our longtime friend and supporter Chip Margelli, K7JA. This, on his being appointed as the new Director of Advertising Sales and Marketing for CQ Communications, Inc..

Margelli will join the CQ staff on December 1st and will be responsible for advertising sales for CQ Amateur Radio, CQ VHF and Popular Communications magazines/. He will also take on marketing efforts for all CQ Communications products.

Chip Margelli brings to CQ more than three decades of experience in the amateur radio industry. He spent nearly thirty years with Yaesu and the past four years with Heil Sound. In addition to English, he is fluent in the Japanese, German and Spanish languages.

An active ham for more than 45 years, K7JA is known worldwide as a champion contester, DXer and DXpeditioner. He is currently active on all amateur bands from 160 meters through 1300 MHz, and is a 2008 inductee into the CQ Amateur Radio Hall of Fame.

Chip and his wife, Janet, KL7MF, live in Garden Grove, California, just south of Los Angeles. In addition to amateur radio, K7JA enjoys photography and astronomy, and is a marathon runner.

Chip Margelli succeeds Don Allen, W9CW, CQ and CQ VHF Advertising Manager; and Arnie Sposato, N2IQO, Popular Communications Advertising Manager, both of whom are retiring at the end of 2010. Advertising sales for WorldRadio Online will continue to be coordinated by Jon Kummer, WA2OJK. (CQ)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: MILTON SULLIVAN JR. _ DESIGNER OF DRAKE HAM GEAR - SK.

As we have said far to many times of late, the changing of the guard continues with word of the passing of Milton Sullivan Jr, the former K8YDO, of Washington, DC. Sullivan who was the former Chief Engineer at the R. L. Drake Company passed away from a stroke on October 28th at age 85.

During his tenure at Drake, Sullivan oversaw the designs of all the most of Drake's ham radio gear including the famed models 1A and 2B receivers as well as all of the companys transceivers from the 4 lines through the beginning of the 7 line. He retired from Drake in 1984 and entered the commercial satellite industry first founding his own business and then working for Lytton Electronics until his retirement in 1990. (W8AD via Southgate)

**

WORLDBEAT: RSGB DECLAES BOD ELECTION INVALID

The Radio Society of Great Britain has declared its 2010 Board Election as being invalid. This, because two candidates shared the same two nominators.

This is not in accordance with the society's election rules and therefore the candidates were not properly nominated. As a result the Board has considered its options and has determined that the only course of action open to it is to declare the election as invalid.

Given other requirements the Board will now co-opt both candidates as Board members for a twelve month period until the next election late in 2011, when the candidates may stand for election again. The regional election for Region 4 is unaffected and closes at midday on December 2nd. (RSGB)

**

WORLDBEAT: NEW UK 6 METER REPEATER

A new 6 meter repeater has taken to the airwaves in the United Kingdom. This with word that the Five Towns Repeater Group put its 6 meter machine on the air from the organizations site just west of Wakefield.

The system uses the call sign GB3WY. It operates on the Europen R50-channel pair which equates to 50.800 and 51.300MHz, and requires a continuous CTCSS tone of 82.5Hz to access. Keeping an ear open for the signal from GB3WY could be a good beacon to let hams in the America's know when the band is open across the Atlantic. (Southgate)

**

RADIOSPORTS: THE INTERNATIONAL NAVAL CONTES

The International Naval Contest will be held the second weekend of December. The contest runs from December 11th at 16:00 UTC to December 12th at 15:59 UTC. Bands used are 160 through 10 meters except for the WARC bands. Modes are SSB and CW only. Electronic logs go to df8ld at darc dot de. (OPDX)

**

RADIOSPORTS: AUGUST ARRL UHF CONTEST RESULTS NOW ON LINE

And the results for the 2010 ARRL August UHF Contest are now online. You can find them on line at www dot arrl dot org slash contest dash results dash articles. (KX9X)

**

RADIOSPORTS: PSK63 QSO PARTY ON NOVEMBER 21

The European PSK Club invites amateur radio operators from all over the world to participate in the 5th annual PSK63 QSO Party. The objective

of the competition is to establish as many contacts as possible between radio amateurs around the world by using the BPSK63 mode. The contest will be held from 00:00 UTC to 24:00 UTC on Sunday, November 21st. Complete rules and other information can be found on line at tinyurl.com/39hvvnb (European PSK Club)

**

ON THE AIR: CELEBRTING THE CHRISTMAS HOLIDAY

On the air, listen out for members of the Bethlehem Georgia based Barrow Amateur Radio Club who will activate special event station WR4BC. This from 1700 UTC on December 4th through 1700 UTC on December 5th in celebration of the upcoming Christmas holiday. Operation will be on the primary High Frequency bands using SSB, CW, RTTY and digital modes. A limited-edition collectable QSL will be issued, complete with the Bethlehem Christmas Postmark, to arrive before Christmas. More is on-line at www.barrowhamradio.org. (Via e-mail)

**

DX

In DX, OL5Y, will be active portable I-M-Zero from La Maddalena Island in Sardinia on 15 meters during the CQWW DX CW Contest on November 27th and 28th. This, as a Single-Operator, Single-Band entry. QSL as directed on the air.

IN3KIZ is expected to be active as 5H3OC from Tanzania in the near future. His operation will be on the HF bands. QSL via IN3DEI.

PA1OKZ will be on the air from Jamaica as 6Y5NS through November 26th. His operations will be on the HF bands using SSB and the Digital modes. QSL to PA1OKZ via eQSL or his Callbook address.

DL7VOG is active as HK0GU/1 from Isla del Pirata Columbia through November 21st. Operations are on the HF bands using CW and RTTY. QSL via DL7VOG, direct or by the Bureau.

Lastly, KC0VKN, will be operational portable PJ7 from Sint Maarten Island between December 18th and the 23rd. His activity will be holiday style on 40 through 10 meters using CW depending on operating times and openings. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: CITIZEN BUYS POLICE INTERNET DOMAIN TO FIGHT RED LIGHT CAMERAS

And finally this week the story of how one citizen has taken communications with public officials to a new height. This, by purchasing the Internet domain name of the police department whose red light camera issued him a ticket. We have more in this report:

--

Most of the time, if you or I get a speeding ticket we just grumble about it and pay the fine. Oh we can fight it in court but for most people those are the only two options.

However, after receiving a $90 speeding ticket in Bluff City, Tennessee, Brian McCrary discovered a third. It seems that the Bluff City Police Department had forgotten to renew its Internet domain name of BluffCityPD dot com. It had expired so McCrary bought the domain for $80. He then posted his side of the story along with information about speed traps in Bluff City and the $250,000 per month the system was costing the town's 1,500 residents.

The police department had no idea their domain name had expired and that McCrary owned it. That was until October 8th when reporters started calling them to ask about it.

Bluff City Police Chief David Nelson said the city may approach McCrary about buying the domain back from him, but admits Chief Nelson, the city is not very optimistic that a deal can be made.

For the Amateur Radio Newsline, I'm Bruce Tennent, K6PZW, and trying to avoid the Red Light Cameras in Los Angeles.

--

McCrary says that his goal is to get enough attention to put pressure on the local government to remove the traffic enforcement cameras in Bluff City. (Published news reports)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for

your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, wishing you a Happy Thanksgiving, 73 and we thank you for listening.

>

Mr. Champa was a mentor of mine and he will be missed. In addition to the above accomplishments he served as an executive board member of the Richardson Rockwell Collins Amateur Radio Club (w5rok) for a number of years. During the short 3 years I knew him, he served in leadership positions for other local ham radio clubs. It is hard to over estimate his contribution to the amateur radio service.

John was a visionary who understood and enjoyed the advancement of technology. He was a proponent of ham radio's part in advancing the state of the art in communications. He introduced me to the HSMM ham radio world, a technology which holds much promise in advancing local area emergency communications networks by providing high speed IP network services. We can now deliver e-mail, voice, video and other network services apart from traditional network providers for times when "all else fails".

Thank you Dr. Champa.

==> ARRL BOARD OF DIRECTORS: NEW VICE DIRECTOR FOR SOUTHEASTERN
DIVISION; SOUTHWESTERN, WEST GULF DIVISIONS REMAIN UNCHANGED

ARRL Southeastern Division members have chosen a new Vice Director
for the ARRL Board family. Andrea Hartlage, KG4IUM, is already a
familiar face to many, but on January 1, she will become the youngest
serving ARRL Vice Director in modern times -- and possibly in history.
On November 19, ballots were counted in the races for Director and Vice
Director in the Southeastern and West Gulf Divisions and Director in
the Southwestern Division. Hartlage, 21, of Grayson, Georgia, was
declared the new Vice Director in the Southeastern Division, defeating
incumbent Jeff Beals, WA4AW, of Loxahatchee, Florida.

Director Greg Sarratt, W4OZK, of Huntsville, Alabama, won re-election
as the Director in the Southeastern Division. Dick Norton, N6AA, of
Topanga, California will stay as Southwestern Division Director. In the
West Gulf Division, Dr David Woolweaver, K5RAV, of Harlingen, Texas and
John Robert Stratton, N5AUS, of Austin, Texas, will continue as
Director and Vice Director, respectively. Terms for Directors and Vice
Directors begin at noon on January 1, 2011 and run for three years.
```

Read more here
<http://www.arrl.org/news/southeastern-division-gets-new-vice-director-southwestern-west-gulf-divisions-remain-unchanged>.

==> ARRL SECTION MANAGERS: 2010 FALL SECTION MANAGER ELECTION RESULTS

ARRL members in Western Pennsylvania, Missouri and South Carolina have re-elected their Section Managers -- John Rodgers, N3MSE, Dale Bagley, K0KY, and Marc Tarplee, N4UFP, respectively -- for another two year term. Votes were counted on Tuesday, November 23 at ARRL Headquarters. In Eastern Massachusetts, the only nominee for Section Manager was Phil Temples, K9HI, of Watertown. Temples previously served as the Eastern Massachusetts Section Manager for terms from 1994-1996 and again from 2001-2004. The following incumbent ARRL Section Managers did not face opposition and were declared elected for their upcoming terms of office: Art Zygielbaum, K0AIZ, Nebraska; Mike Lisenco, N2YBB, New York City-Long Island; Thomas Dick, KF2GC, Northern New York; George Strayline, W2GSS, Southern New Jersey, and Dee Turner, N4GD, West Central Florida. New terms of office will begin on January 1, 2011. Read more here
<http://www.arrl.org/news/2010-fall-section-manager-election-results>.

==> ON THE AIR: WARM UP YOUR CHILLY DECEMBER WITH THE 2010 ARRL 160 METER CONTEST

The ARRL 160 Meter Contest <http://www.arrl.org/160-meter> -- an all-CW event -- is tremendous fun! As the object of the contest is for DX stations to contact American and Canadian stations (and vice versa), everyone will be seeking you (especially if you live in a rare section like North Dakota, Nebraska or any of the rare sections from November's Sweepstakes contests).

In this contest, Alaska (KL7) and Hawaii (KH6) count as DX, as do the Caribbean US possessions (KP1-KP5) and all of the Pacific Ocean territories (KH0-KH9). According to ARRL Contest Branch Manager Sean Kutzko, KX9X, if you don't have an antenna for 160, you should just load up whatever you have through an antenna tuner and give "top band" a try -- even a 40 meter dipole through a tuner will make QSOs.

Since ARRL and RAC Sections are worth 2 points each and count as multipliers, the ARRL 160 Meter Contest is a good way to begin working -- or finishing up! -- your Worked All States (WAS <http://www.arrl.org/was>) award. But don't forget about those DX stations -- each DXCC entity is a multiplier and is worth 5 points.

The ARRL 160 Meter Contest runs from 2200 UTC Friday, December 3 through 1559 UTC Sunday, December 5. Logs must be e-mailed <160meter@arrl.org> or postmarked no later than 1600 UTC Tuesday, January 4, 2011. Paper logs should be sent to ARRL 160 Meter Contest, 225 Main St, Newington, CT 06111.

==> AMATEUR RADIO IN SPACE: ARISS AIMING TO RAISE ITS EDUCATIONAL PROFILE

NASA will assume more direct sponsorship of the Amateur Radio on the International Space Station (ARISS) program as an educational project. Among its activities, ARISS oversees the project that enables schoolchildren to speak via ham radio with astronauts aboard the International Space Station. NASA also will embrace ARISSat as an educational project for the ISS National Lab. A reconfigured, yet-to-be-named education planning group will pick up the mission of the ARISS Communications Council. These changes were among the outcomes of a meeting of NASA and ARISS International officials who gathered November 12-13 at ARRL Headquarters. Read more here <http://www.arrl.org/news/ariss-aiming-to-raise-its-educational-profile>.

==> AMATEUR RADIO IN SPACE: HAMS INVITED TO LISTEN FOR NEW SATELLITES

Five research satellites were carried to orbit on November 19 aboard a Minotaur V rocket from Kodiak Island, Alaska. All the satellites use Amateur Radio frequencies and hams have been invited to participate in their missions by monitoring and collecting data.

Two of the satellites are FASTRACs -- relatively small "nanosatellites" -- built by students at The University of Texas in Austin. They enter orbit as a single spacecraft, but then separate into FASTRAC 1 (known as "Sara Lily") and FASTRAC 2 (referred to as "Emma"). Both satellites use 1200 or 9600 baud AX.25 digital communication and transmit at 1 W output, so they should be receivable with omnidirectional VHF or UHF antennas and decodable by ordinary packet radio hardware and software. After their scientific missions are complete, the satellites will be reconfigured to function as digipeater relays for Amateur Radio use, as part of the Automatic Packet Reporting System (APRS). Read more here <http://www.arrl.org/news/hams-invited-to-listen-for-new-satellites>.

==> ARRL TO CLOSE IN OBSERVANCE OF THANKSGIVING HOLIDAY

ARRL Headquarters will be closed November 25 and 26 in observance of Thanksgiving. There will be no W1AW bulletins or code practice transmissions those days <http://www.arrl.org/w1aw-operating-schedule>. The ARRL Letter <http://www.arrl.org/arrlletter/> is being published a day early, but there will be no ARRL Audio News <http://www.arrl.org/arrl-audio-news> this week. ARRL Headquarters will reopen Monday, November 29 at 8 AM Eastern Standard Time. We wish everyone a safe and bountiful Thanksgiving holiday.

==> OUT AND ABOUT: "COMING HOME" TO HAMJAM 2010

On November 13, Georgia hams and others enjoyed HamJam 2010. According to HamJam organizer Mack McCormick, WB4MAK, the event's goal is to encourage members of Amateur Radio clubs in the region to come together for a day of learning and fellowship. Members of more than a dozen clubs from Alabama, Florida, South Carolina, Tennessee -- and of course, Georgia -- were on hand. "HamJam is an example of how the traditional hamfest is evolving to incorporate education and social elements," said H. Ward Silver, N0AX, who attended as a guest speaker.

"Change hasn't left behind the traditional raffle prizes, as high-end manufacturers sponsored equipment donations, allowing attendance to be free, with Georgia Tech providing the meeting space." Read more here <http://www.arrl.org/news/coming-home-to-hamjam-2010>.

==> SOLAR UPDATE

Tad "For I have the warmth of the Sun <http://www.youtube.com/watch?v=70psCljGnXM>" Cook, K7RA, reports: Sunspot numbers declined this week, and it looks like the average daily sunspot number will be less than half the value reported last week <http://www.arrl.org/news/the-k7ra-solar-update-139>. Solar flux was in the 90s a week ago and is now around 75. The predicted solar flux from NOAA/USAF shows levels continuing around 75 through December 1, and then rising gradually and returning to 90 around December 12-14; quiet geomagnetic conditions are predicted for the near term. This week's bulletin will be available as usual on Friday from the ARRL Web site, but it won't go out from W1AW or via e-mail until Monday, November 29. Look for more information on the ARRL Web site on Friday, November 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Beach Boys' The Warmth of the Sun <http://en.wikipedia.org/wiki/The_Warmth_of_the_Sun>.

==> ARRL RECOGNIZES: DEADLINE CLOSING FAST FOR NOMINATIONS FOR ARRL'S LEONARD AWARD

Television, radio, magazines, newspapers, blogs, Webcasts -- Amateur Radio has been featured in all of them in 2010. And now it is time to thank the professional media people who made it happen by nominating them for the Bill Leonard, W2SKE, Professional Media Award. This national level annual award sponsored by the ARRL, honors three professional journalists whose outstanding coverage in audio, video and print formats best reflect the enjoyment, importance and public service value of the Amateur Radio Service. The deadline for nominations is December 10. Read more here <http://www.arrl.org/news/deadline-approaching-for-nominations-for-arrl-s-leonard-award>.

==> ARRL RECOGNIZES: NOMINATION DEADLINE FOR 2010 ARRL INTERNATIONAL HUMANITARIAN AWARD APPROACHING

Nominations are open for the 2010 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster. The deadline for nominations is December 31, 2010. Read more here <http://www.arrl.org/news/nominations-now-being-accepted-for-2010-arrl-humanitarian-award>.

==> THIS WEEK ON THE RADIO

This week:

- November 26 -- QRP Fox Hunt
- November 27-28 -- CQ Worldwide DX Contest (CW)
- December 1 -- QRP Fox Hunt
- December 2 -- ARCI Topband Sprint

Next week:

- December 3 -- NCCC Sprint
- December 3-5 -- ARRL 160 Meter Contest
<http://www.arrl.org/160-meter>
- December 4 -- TARA RTTY Melee
- December 4-7 -- ARS Spartan Sprint
- December 8 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 4-5, 2010 -- ARRL West Central Florida Section Convention <http://www.fgcarc.org/>, Palmetto, Florida
- January 8, 2011 -- ARRL Delta Division Convention <http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention <http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention <http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida

Amateur Radio Newsline(tm) Report 1737 - November 26 2010

Amateur Radio Newsline report number 1737 with a release date of Friday, November 26th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Five new ham radio satellites are now in space. We have their story. Also, Internet connected ham radio is found to be legal in New Zealand, Skywarn Recognition Day is December 4th and a new form of diode could revolutionize the future of electronic design. Find out the details on this Thanksgiving week 2010 Amateur Radio Newsline(tm) report number 1737 coming your way right now. (Billboard Cart Here)

**

HAM RADIO IN SPACE: NEW HAMSATS ARE ON ORBIT

A cluster of new ham radio satellites are now on-orbit. Amateur Radio Newslines Norm Seeley, KI7UP, has the latest on these new birds:

--

Five new satellites are on-orbit. Four are of interest to ham radio and one has already been heard. Take a listen:

--
RAX Audio Here

--

That was RAX-1 as it was heard on 437.505 MHz as it flew over Hawaii on Saturday, November 20th at about 06:00 local time. The bursts of static you hear between the band noise is the 9600 baud RAX-1 transmitter.

But RAX was not alone when it was launched into space at 01:24 UT on Nov 20th. The other for birds are FASTRAC-1 "Sara Lily" transmitting on 437.345 MHz FM using the AX.25 packet protocol at 1200 bits per second.

Then there is FASTRAC-2 "Emma" is its 2 meter counterpart downlinking on 145.825 MHz with the same mode and protocol as FASTRAC-1.

Next up is O/OREOS is 437.305 MHz.

Last but by no means least is Nanosail D2 that transmits a half second beacon beacon every 5 sec on 437.275 MHz.

All of these new birds were sent to orbit on-board a Minotaur-4 launch vehicle from the Kodiak Launch Complex in Alaska. All of the the satellites are in a 400 mile high circular orbit.

And less we forget, some of these new ham radio satellites has its own web page. You will find links to each on in this weeks printed Amateur Radio Newsline report.

With thanks to Ron Hashiro, AH6RH, for providing the audio of RAX, I'm Norm Seeley, KI7UP, reporting on these new satellites from Scottsdale Arizona.

--

The web sites for the satellites are as follows:

RAX Facebook: http://www.facebook.com/pages/RAXRa...68658456492859

RAX Twitter: http://twitter.com/RAX_2010

FASTRAC Facebook http://www.facebook.com/fastracsats

FASTRAC Twitter http://www.twitter.com/fastracsats/ O/OREOS http://www.crestnrp.org

NanoSail-D2 http://nanosaild.engr.scu.edu/dashboard.htm

More on the new satellites in future Amateur Radio Newsline reports. (AMSAT, AH6RH)

**

RADIO RULES: INTERNET CONNECTED HAM RADIO LEGAL IN ZL

Some good news for hams in New Zealand. The government regulatory agency has completed is review of Internet connect ham radio systems and has concluded that no changes are required to the current Amateur General User Radio License conditions to accommodate amateur radio modes such as APRS, IRLP, D-Link, and the like.

According to a government release, normal New Zealand repeater licensing procedures will continue to apply to those circumstances where frequency coordination is required and/or the internet-connected device is located at a site belonging to a non-amateur third party. Also, in operating Internet connected systems, New Zealand amateurs need to be aware of the provisions of the Amateur General User License as well as Regulation 25.2 of the International Radio Regulations The latter says that transmission between amateur stations of different countries shall be limited to communications incidental to the purposes of the amateur service. (NZART)

**

RESCUE RADIO: NEW WORKING AGREEMENT SIGNED BETWEEN RSGB AND RAEN

A new agreement between the Radio Society of Great Britain and the Radio Amateurs Emergency Network will improve emergency response in the

U-K. Jeremy Boot, G4NJH, is here with the details:

--

The Radio Amateurs' Emergency Network, the UK's principal organization of volunteers providing radio communications in time of need, and the Radio Society of Great Britain (RSGB), the UK's national society for Amateur Radio, are pleased to announce the signing of a formal agreement between the two organizations providing a framework to progress the closer working relationship between them.

The Network Chairman, Cathy Clark, said "I am delighted to sign this agreement, which promises to bring the two organizations closer together for the benefit of our members and the service they provide to our many User Services."

RSGB President Dave Wilson, said "I would like to thank all those who've been working behind the scenes on what was undoubtedly not an easy task to get us to the position we are today."

The signing of this agreement cements on-going co-operation between the two organizations. Joint working will continue to ensure the smooth implementation of the Principles of Co operation described in the agreement.

I'm Jeremy Boot, G4NJH.

--

The agreement, which had unanimous acceptance by both the RSGB Board and the Network's Committee of Management, was signed on Saturday 20th November 2010 during the RSGB Spectrum Forum meeting in which all parties consider frequency planning and usage issues. (GB2RS)

RADIO RULES: IC SUGGESTS CANADIAN HAMS CAN HELP ELECTRICAL INDUSTRY LOCATE INTERFERENCE

Canadian hams could be called upon by that nations power industry to help find sources of interference emanating from power lines and associated devices.

At a November 2nd meeting between the Canadian Electricity Association and telecommunications regulator Industry Canada, the subject of the power industry properly controlling interference from its generators, power transmission line or annularly gear was discussed. Such interference is governed under an Industry Canada document titled Interference Causing Equipment Standards number 004.

Canadian Electricity Association representatives indicated that front line electrical utility workers may not be familiar with the requirements of the document. They also noted that many utilities may not always have the expertise available to locate sources of electrical

interference

In response, Industry Canada pointed out to Canadian Electricity Association that radio amateurs can be an invaluable resource in these cases. This is because hams may have skills that could be used to help identify interference sources.

The interference discussion with the Canadian Electricity Association was the result of a meeting last October 28th of the Canadian Amateur Radio Advisory Board. This is a joint Radio Amateur of Canada and Industry Canada consultation body which meets to discuss matters of mutual concern. (RAC)

RESCUE RADIO: NC HAM ASKS HELP IN LOCATING MISSING 14 YEAR OLD DAUGHTER

The 14 year old daughter of David Westphalen, KJ4ENS has gone and he is asking hams nationwide to be on the lookout for her. Tabatha Marie Self was last seen in the Delway area of Sampson County, North Carolina on Thursday November 11th. She stands about 5 foot 5 inches tall, weighs about 140 lbs, has blue green eyes and multi colored red, blonde and brown hair that she usually wears up most of the time. If you spot Tabatha Marie Self, please call Sergeant Sanchez at the Sampson County, North Carolina Sheriff's Department at area code 910-592-4141. Photos of Tabatha are on- line at tinyurl.com/22or3gp (QRZ.com)

**

ENFORCEMENT: MOVIE-MOVIE - NOT

Lots of enforcement action in the past few weeks, but none of it directly involving ham radio. In fact, a lot to do with the motion picture industry and all of it in California and a unit called the Modulus UHF wireless video assist device.

Able Cine Tech of Burbank, South Bay Film and Video Services of Redondo Beach and Wolf Seeberg Video of Marina del Rey, have all been issued a Citation for the alleged illegal marketing of the Modulus un-certificated radio frequency device.

The Modulus is a wireless unit designed to transmit composite video-in and retransmit it to a wireless video monitor and eliminating the need for hard wire coax cable between the two. (FCC)

**

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION TO HOBBY LOBBY INC.

The FCC has issued an Official Citation to Hobby Lobby International, Inc.. This, for marketing unauthorized radio frequency devices in the United States.

In a November 22nd release, the FCC said that it found that Hobby Lobby had been selling a product known as the JETI Duplex 2.4 GHz System for radiocontrolled models. These units, built in the Czech Republic had not been approved by the FCC for sale in the United States.

The FCC warned Hobby Lobby that future violations of its rules in this regard may subject the company to substantial monetary penalties, seizure of equipment, and criminal sanctions. It also gave the company the usual 30 days to file a reply to the citation. (FCC)

**

RESCUE RADIO: SKYWARN RECOGNITION DAY DECEMBER 4th

The 2010 SKYWARN Recognition Day event will take place Saturday, December 4th. Cosponsored by the National Weather Service and the ARRL, SKYWARN Recognition Day is the National Weather Service's way of expressing its appreciation to Amateur Radio operators for their commitment to keep communities safe. Over 100 National Weather Service regional offices will be participating in this year's event to recognize the community service of ham radio operators who volunteer to provide this vital severe weather watch service. (NWS, ARRL)

**

BROADBAND NEWS: COX CABLE LAUNCHES CELLULAR NETWORK

Cox Communications which is the nations thirdlargest cable company, is launching its new cellular telephone network in three scattered areas on Friday, November 26th.

Initially, the Cox cellular service we only be available in Orange County, California., Omaha, Nebraska and Hampton Roads, Virginia. These are cities where Cox is the local cable company but Cox plans to expand the network sometime in the future.

It is public record that Cox has spent $550 million to buy rights to use wireless spectrum in and around Atlanta, New Orleans, San Diego, and Las Vegas as well as much of Kansas and southern New Mexico. Those areas represent about 23 million potential wireless customers that the cable giant likely hopes to entice to join its service. (B&C)

**

THE SOCIAL SCENE: PRCARC HAMFEST DECEMBER 11 IN MISSISSIPPI

The Pearl River County Amateur Radio Club in Poplarville, Mississippi, holds is annual hamfest on Saturday, December 11th starting at 8 a.m.

local time. The venue is the National Guard Armory in Poplarville, and will feature commercial sales, VE testing, forums and much more. For information take your web browser to tinyurl.com/2592362 or e-mail Larry Wagoner to N5WLW (at) arrl dot net. (AE5DW)

**

NAMES IN THE NEWS: W1JNR TO SPEAK ON DECEMBER 6TH

Some names in the news. The Hartford Current newspaper reports that area hams, broadcasters and the public are invited to a slide show and talk by John Ramsey, W1JNR, chief technical officer of WCCC Radio and general manager of FM station WWUH. In his presentation, Ramsey will play memorable air checks and give his own recollections of outstanding radio events interspersed with slides of studios, transmitter towers and related sites.

By way of background, John Ramsey is chairman of the Society of Broadcast Engineers local chapter and webmaster of HartfordRadioHistory.com and Coldwar-ct.com. He is also president of Ramsey Communications Services a broadcast engineering consulting firm and also holds an Advanced Class Amateur Radio license as well as an FCC Radio Telephone First Class Commercial license. He started in broadcasting in1971 as a DJ and board operator at the former WEXT radio in West Hartford.

This free event is presented by Newington Amateur Radio League. More information is available at 860-667-2864. (NARL)

**

NAMES IN THE NEWS: 2004 YHOTY RECIPIENT KG4UIM ELECTED ARRL SOUTHEASTERN VICE DIRECTOR

And a word of congratulations to 2004 Amateur Radio Newsline Young Ham of the Year Andrea Hartlage, KG4IUM, of Grayson, Georgia. This, on her election as ARRL Vice Director Southeastern Division.

Andrea was declared the winner after garnering 3573 votes and ousting incumbent Jeff Beals, WA4AW, who garnered only 1615 votes. Beals was appointed Vice Director in June 2009 upon the death of Vice Director Sandy Donahue, W4RU.

At age 21, Hartlage is believed to be the youngest person ever elected to this high a position in the ARRL political structure. She is currently a student at Georgia Tech studying Aerospace Engineering with hopes of eventually joining the United States Astronaut Corps.

In the same election Brian Mileshowsky, N5ZGT, of Albuquerque, New Mexico, who was the 1997 Young Ham of the Year recipient was re-elected as Director of the League's Rocky Mountain Division for his second term.

A complete list of this falls ARRL election winners can be found at the Leagues website at www.arrl.org. (ARNewsline(tm), ARRL)

EMERGING TECHNOLOGY: NEW DIODES COULD REVOLUTIONIZE FUTURE ELECTRONICS

Researchers at Oregon State University have solved a fundamental problem in material science that has eluded researchers since the 1960s. One that could form the basis of a new approach in electronic designs.

The discovery, just reported online in the professional journal Advanced Materials, outlines the creation for the first time of a new high performance "metal-insulator-metal" diode. Creation of such a device could change modern electronics. This is because these so called next generation diodes previously made with other approaches always had poor yield and sub-standard performance.

As one of the basics of electronics, diodes are an important part in all future circuit designs. You can read more about this fascinating discovery is on-line at tinyurl.com/28tqqzm (Science OnLine)

**

ON THE AIR: XR33M CELEBRATES CHILEAN MINE RESCUE

On the air, word that members of the Radio Club de Copiapo are active through the end of December as XR33M. This in celebration of the rescue of 33 trapped miners near San Jose in Chile. The XR33M call will also be used during the CQ World Wide DX CW Contest the 27th and 28th of November, and the ARRL 10 Meter Contest on December. 11th and 12th.

On a historical note, club members offered their support to the rescue effort by providing communications in the desert region where the copper mine is located. That support enabled links to various authorities with emergency equipment inside the San Jose site and also with family and authorities in the City Of Copiapo. (Various)

**

DX

In DX word that G3PJT will be active stroke J6 from the northeast corner of St. Lucia between March 8th and the 15th. His activity will

be holiday style using an Elecraft K2 transceiver and vertical antennas. QSL direct to G3PTJ.

Bill Moore NC1L, the Awards Branch Manager at the ARRL has announced that two DXpeditions from earlier this year have been approved for DXCC credit. These are the 2010 5-X-ZeroC-W operation from Uganda and the 2010 D-2-Q-V operation from Angola.

RD3A will be active from Bonaire island as PJ4G during the ARRL DX CW Contest which runs from February 19th to the 20th. He will be a Single-Op All-Band HighPower entry. QSL via K4BAI.

N3QQ says that NL8F will join him on the DXpedition to Marshall Islands only a few weeks from now. Both operators will arrive on Majuroon November 30th and they will stay in V73-land until December 17th. The operators will operate from Enewetak Atoll where some of the equipment is already pre-positioned. More on this one is on line at www dot oc278 dot ucoz dot com.

OH1VR will be active from Chatham Island as ZL7VR through November 29th. His operation will be on all of the high frequency bands and will also include the CQ World Wide DX CW Contest on November 27th and 28th. QSL via OH1VR.

W2GD will operate P40W from Aruba through December 1st. He plans to join the World Wide DX CW Contest in the single Operator all band category with his focus on 160 meters and the WARC bands before and after the contest. QSL via Logbook of the World or direct to N2MM.

And lastly, the trio of VK3KH, VK4UH and VK3XPD are returning to Norfolk Island after

their inaugural VHF/UHF and

Microwave band DXpedition of last

summer. The dates for the next

outing are the 7th to the 21st of

January. The prime focus this time

is for those elusive microwave

QSO's on 2.4 GHz thru 10 GHz to

Australia and New Zealand. The

team will also carry gear for 6

meters, 2 meters, 70 cm and 1296

MHz. QSL as directed on the air.

(Above from various DX News Sources)

**

RADIO FROM SPACE: MARS HOPPER COULD REPLACE MARS ROVER And finally this week, word that researchers at the University of Leicester are developing a conceptual motor design for a Mars 'hopping' vehicle which should lead to a greater understanding of the 'Red Planet'.

The hopper can collect fuel between hops by compressing gas from the Martian atmosphere and can fly quickly between sites, powered by a longlife radioisotope power source. It could therefore study hundreds of locations over a lifetime of several years and continually radio its findings back to Earth.

The Leicester research is focused on

the rocket motor, looking at its size

and materials. A video illustrating

the concept is available on YouTube

at tinyurl.com/22ujspj

(SD)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Please do not forget that in association with the Newark Amateur Radio Society that we are currently conducting a survey to determine where these weekly Amateur Radio Newsline reports are replayed on the air. If you are a bulletin station that transmits these weekly newscasts or a listener who has the following information, we need you to supply to us the call sign of the repeater or bulletin station making the transmission, the frequency where it can be heard, the time and day and days of the week it is broadcast, the time zone and the estimated audience you think it has. Please e-mail that information along with your name and callsign to arnschedule (at) gmail (dot) com. Once again thats arnschedule (at) gmail (dot) com. As always we thank you for your assistance in this survey.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Frank Haas, KB4T, in Holly Hill Florida saying we hope you had a great Thanksgiving holiday, 73 and we thank you for listening.

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

==> + PUBLIC SERVICE: ARES®, SKYWARN ACTIVATED AS TORNADOS SWING THROUGH THE SOUTH

```
<http://www.arrl.org/images/view/News/MississippiTornados.JPG> On
the evening of Monday, November 29, a series of severe storms swept
through Louisiana, Mississippi and Alabama, and hams provided support
from the National Weather Service office in Jackson, Mississippi.
According to the NWS, seven tornados were embedded in the storm system,
with at least six counties reporting damage. There were no deaths in
```

the latest storms, though 15 people were hurt in Mississippi and buildings were badly damaged there and in Louisiana. Schools were closed in Alabama and tornado watches were posted in Tennessee and parts of North and South Carolina on Tuesday as the storms moved east. Read more here <http://www.arrl.org/news/ares-sup-sup-skywarn-activated-as-tornados-swing-through-the-south>.

==> + BPL: ARRL STRENGTHENS THE CASE FOR MANDATORY BPL NOTCHING

The ARRL filed an ex parte submission with the FCC on November 30, providing additional support for its position that the FCC should require mandatory notching of the amateur bands by Broadband over Power Line (BPL). The ARRL's filing stated such devices can cause harmful interference to Amateur Radio operators, and requested that the FCC "establish rules that are appropriate for unlicensed BPL systems and which minimize the interference potential."

After the FCC released its Request for Further Comment and Further Notice of Proposed Rule Making in July 2009, the ARRL filed comments and reply comments and made oral and written ex parte filings, urging the adoption of Part 15 Rules which reflect both the capabilities and practices of the bulk of the BPL industry, and which are sufficient to protect licensed radio services in the HF and VHF bands.

"It has been painfully apparent that the present rules permit the deployment of BPL in configurations which cause severe, ongoing harmful interference if operated on radio spectrum that is in use locally," the ARRL asserted in its filing. The ARRL, in its numerous filings on this issue has "strenuously urged" the FCC to require full time, mandatory notching of all amateur allocations to at least 35 dB notch depths. "This level of notching is both achievable by present BPL systems and is typically, but not universally, implemented by the BPL industry." Read more here <http://www.arrl.org/news/arrl-strengthens-the-case-for-mandatory-bpl-notching>.

==> + AMATEUR RADIO IN SPACE: ISS EXPEDITION 24/25 CREW BACK ON TERRA FIRMA

After more than 160 days in space, ISS Expedition 25 Commander Doug Wheelock, KF5BOC -- along with Flight Engineers Shannon Walker, KD5DXB, and Fyodor Yurchikhin, RN3FI -- has returned to Earth from the International Space Station (ISS). Their Soyuz spacecraft landed in Kazakhstan on Friday, November 26. While on board the ISS, both Wheelock and Walker participated in the Amateur Radio on the International Space Station (ARISS) program, and made 22 ISS-to-school and ISS-to-camp QSOs. In addition, Wheelock averaged about two dozen casual QSOs each week while on board the ISS. Read more here <http://www.arrl.org/news/iss-expedition-24-25-crew-back-on-terra-firma>.

==> + ON THE AIR: SOAR HIGH IN THE ARRL 10 METER CONTEST

The highest of the HF bands will be the central operating focus of many amateurs in the ARRL 10 Meter Contest, December 11-12. During the event, many propagation modes will be available: Sporadic-E will help you work stateside stations, a touch of meteor scatter in the morning will give you split-second chances to work stations -- you'd better be quick, though! -- and DX stations could find their way into the log, thanks to some recent signs of life from the F-layer. "Ten meters was open from the United States to Africa, Europe and South America during the CQ World Wide DX CW contest on the weekend of November 27," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "Let's see if those conditions remain for the second weekend in December." Read more here <http://www.arrl.org/news/soar-high-in-the-arrl-10-meter-contest>.

==> ON THE AIR: THE SPRATLY ISLANDS DXPEDITION GETS WINGS

The 37 operators from 15 countries who make up the DX0DX DXpedition Team that will go to the Spratly Islands is finalizing preparations for the almost month-long DXpedition that begins January 6, 2011. Instead of going by boat, the team will instead fly to Thitu Island where they will set up their operation. Thitu is the second largest island in the Spratly Islands. The Spratlys are a group of more than 750 reefs, islets, atolls, cays and islands in the South China Sea between Vietnam, the Philippines, China, Malaysia and Brunei. They comprise less than 4 square kilometers of land area, spread out over more than 425,000 square kilometers of sea. Read more here <http://www.arrl.org/news/the-spratly-islands-dxpedition-gets-wings>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of November -- includes ARISS activities ; new licensing exam software; elections of Board members and Section Managers; and on-the-air events. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-28>.

==> SUPPORT ARRL: ARRL THANKS DONORS WITH PUBLICATION GIFT CERTIFICATES

The end of 2010 is fast approaching and ARRL is poised to close the books on December 31! Many members wait to make contributions at the end of the year -- these contributions are important to the ARRL funds that are not supported by member dues.

But wait! There's more! When you make a contribution of $30 or more before December 31, you'll receive a complimentary $10 gift certificate* on your next publication sales purchase at ARRL. You can make your gift on our secure Web site <http://www.arrl.org/donate>, by mail or by phone at 860-594-0397 and we'll send your $10 gift certificate right away.

You may designate your contribution to one or more of the following funds:

- The ARRL Diamond Club <http://www.arrl.org/the-arrl-diamond-club> (to renew your ARRL membership and make a contribution!)
- The Spectrum Defense Fund <http://www.arrl.org/spectrum-defense-fund>
- The Education & Technology Fund <http://www.arrl.org/education-and-technology-fund>
- The Lab Fund
- The Historic Preservation Fund <http://www.arrl.org/historic-preservation-fund>
- The ARRL General Fund.

You may decide to make a monthly credit card contribution of $10 or more on the ARRL Web site to support one of the areas listed above. For more information, contact ARRL Chief Development Officer Mary Hobart, K1MMH, via e-mail <mhobart@arrl.org> or by phone at 860-594-0397. Your year-end contribution is tax deductible to the extent allowed by law. ARRL is an IRS designated 501(c)(3) organization holding tax identification number 06-6000004.

* About ARRL Gift Certificates: After making your contribution of $30 or more, your $10 ARRL Gift Certificate will be promptly mailed to you. Certificates must be redeemed by April 30, 2011. It is easy to redeem your certificate online, by mail or phone. This offer is valid on all sale and regular-priced ARRL publications.

==> + AMATEUR RADIO ENFORCEMENT: BRITISH MAN CONVICTED FOR DELIBERATE INTERFERENCE, OPERATING WITHOUT A LICENSE

Clive McMurray of the British town of Hull (located about 45 miles southwest of York) was convicted and sentenced on November 22 for causing deliberate interference to Amateur Radio users and unlawfully using radio equipment without a license. According to the Radio Society of Great Britain -- that country's IARU Member-Society -- McMurray caused interference to operators in the Hull region of Humberside between June-November 2009. Read more here <http://www.arrl.org/news/hams-invited-to-listen-for-new-satellites>.

==> + AMATEUR RADIO ENFORCEMENT: FCC ISSUES RETAILER SECOND CITATION IN 18 MONTHS FOR MARKETING NON-COMPLIANT RF DEVICES

On November 23, the FCC issued a Citation <http://www.fcc.gov/Daily_Releases/Daily_Business/2010/db1123/DA-10-2220A1.pdf> to Hobby Lobby International (HLI <http://www.hobby-lobby.com/>) for marketing non-compliant radio frequency devices. According to the Commission, these devices were in violation of Section 302(b) of the Communications Act of 1934, as Amended and Section 2.803(a)(1) of the Commission's Rules <http://edocket.access.gpo.gov/cfr_2002/octqtr/pdf/47cfr2.803.pdf>. In July 2009, HLI was also issued a Citation <http://www.arrl.org/news/fcc-issues-citation-to-part-15-marketer> for the same reason. This time, HLI was found to be selling an unauthorized radio frequency device, specifically the JETI Duplex 2.4 GHz System <http://www.hobby-lobby.com/jeti-duplex.htm> for radio-controlled

models. This system consists of a transmitter and receiver used for remote control of model aircraft, boats, and cars. The FCC Citation warned that if, after receipt of the Citation, HLI violates the Communications Act or the Rules "by engaging in conduct of the type described herein, the Commission may impose monetary forfeitures...as well as criminal sanctions, including imprisonment." HLI has 30 days to respond to the Citation, either through a personal interview at the FCC office in Atlanta or via a written statement.

==> SOLAR UPDATE

Tad "Holding you close is like holding the summer Sun <http://www.youtube.com/watch?v=E8SsSlak5xE>" Cook, K7RA, reports: The average daily sunspot numbers for the seven days -- November 25 through December 1 -- were up 1.3 points to 25.9, compared to the prior seven day period. The predicted solar flux for the next 10 days, December 2-11 is 88, 90, 90, 90, 88. 88. 86, 86, 85 and 85. The predicted planetary A index for the same period is 5, 10, 8, 7, 5, 5, 5, 5, 5 and 7. The three-month moving average of daily sunspot numbers changed from 28.9 to 33 and 35.6 for the periods centered on August, September and October (ending in September, October and November). This shows a continued slow upward trend in sunspot activity. Look for more information -- including some news on Long Delayed Echoes (LDE) -- on the ARRL Web site on Friday, December 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Billy Joel's This Is the Time <http://www.youtube.com/watch?v=E8SsSlak5xE>.

==> ARRL HOMEBREW CHALLENGE HAS NEW DEDICATED WEB PAGE

The original announcement of the Third ARRL Homebrew Challenge -- as seen on page 47 in the November 2010 issue of QST -- referred readers to the QST-in-Depth Web page for updates and rules clarifications. We have now established a dedicated Web page for the ARRL Homebrew Challenge <http://www.arrl.org/homebrew-challenge>. This page not only has the original and updated rules and clarifications to the third challenge, but also has information about the earlier contests. For additional clarifications, just e-mail <w1zr@arrl.org> QST Technical Editor Joel Hallas, W1ZR.

==> + ARRL RECOGNIZES: JOE TAYLOR, K1JT, AND BRUCE WALKER, W1BW, WIN NOVEMBER QST COVER PLAQUE AWARD

The winners of the QST Cover Plaque Award for November are Joe Taylor, K1JT, and Bruce Walker, W1BW, for their article "WSPRing Around the World." Congratulations Joe and Bruce! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the December issue today.

==> THIS WEEK ON THE RADIO

<http://www.youtube.com/watch?v=Qh6lH5vqw-Y> This week:

- December 3 -- NCCC Sprint
- December 3-5 -- ARRL 160 Meter Contest
<http://www.arrl.org/160-meter>
- December 4 -- TARA RTTY Melee
- December 4-7 -- ARS Spartan Sprint
- December 8 -- CWops Mini-CWT Test

Next week:

- December 10 -- NCCC Sprint Ladder
- December 11 -- Feld Hell Sprint
- December 11-12 -- ARRL 10 Meter Contest
<http://www.arrl.org/10-meter>; International Naval Contest; MDXA PSK
Death Match
- December 11-16 -- NA High Speed Meteor Scatter Winter Rally
- December 12 -- SKCC Weekend Sprint; CQC Great Colorado Snowshoe Run
- December 15 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- December 4-5, 2010 -- ARRL West Central Florida Section Convention
<http://www.fgcarc.org/>, Palmetto, Florida
- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1738 - December 3 2010

Amateur Radio Newsline report number 1738 with a release date of
Friday, December 3rd 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A jammer of ham radio communications is convicted in a United Kingdom
court but nobody knows why he did it. We have the details. Also, a
new broadband threat to ham radio on 75 and 80 meters in a tiny modem
from France and its time to say goodbye to an old friend from Sony.
Find out the details on Amateur Radio Newsline(tm) report number 1738
coming your way right now.

ENFORCEMENT: UK REPEATER JAMMER CONVICTED AND SENTENCED

It's taken the better part of four years, but a jammer of amateur radio
of repeater operations in the United Kingdom has been brought to
justice. Jeremy Boot G4NJH, is in Nottingham with the details:

--

A Hull resident was sentenced at Hull Crown Court on 22 November for
causing deliberate interference to amateur radio users in the Hull
region of Humberside between June and November 2009. The defendant was
also convicted of unlawfully using radio equipment without a license
from Ofcom, which was installed in his van and driven around the region
to interfere with legitimate users of the local amateur frequencies. He
was sentenced to four months imprisonment suspended for 18 months, a
curfew between 7pm and 7am for 3 months via a means of electronic
tagging and forfeiture of his van and radio transmitters to Ofcom.

Commenting on the sentence, Paul Mercer, Head of enforcement at Ofcom,
said: "There are around 900 amateur radio users in and around the Hull
area, who have been deliberately disrupted for more than four years.
Ofcom is very pleased with this result, which will hopefully give these
users some welcome relief, as well as sending a very strong signal to
those that abuse the airwaves. This followed a dedicated investigation
by Ofcom involving six enforcement officers working day and night to
bring the culprit to court.''

Mr Sheldon, the Court Recorder commended Ofcom for the quality of the
evidence that had been collated and the quality of file presented in

court. RSGB General Manager Peter Kirby, G0TWW, said "RSGB volunteers co-operated closely with Ofcom in gathering evidence for this case. This conviction shows that deliberate interference will not be tolerated and can have serious consequences for the perpetrator."

I'm Jeremy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

The British newspaper The Register identifies the perpetrator as 63 year old Clive McMurray. According to the newspaper he has so far not explained why he spent all this time harassing the ham radio community in the area. More on this case is on-line at tinyurl.com/2fwmnu7 and tinyurl.com/2a425df (GB2RS, various UK news reports)

**

THE BPL WARS: NEW WPC MODEM OPERATES ON 2 - 4 MHZ

A new threat to the 75 meter ham radio band. This as a French company called Watteco has developed a new powerline modem based on Watt Pulse Communication or W-P-C technology that the Wireless Institute of Australia says transmits across the 2 to 4 MHz segment of the High Frequency radio spectrum.

Described as a small, low cost, low power consumption modem, the device can be used for any type of data communication applications such as Smart Power Meters, home lighting and appliance control and street lighting to name only a few. According to the WIA News, the unit reportedly transmits a wideband signal that completely covers the amateur radio 75 and 80 meter ham bands and effectively rendering them useless anywhere in the proximity of the device.

For those interested, technical data on the modem can be found on-line at tinyurl.com/2u24lae. (WIA News)

**

ENFORCEMENT: FCC GOES AFTER MAINLAND CHINA CELLULAR JAMMER SUPPLIER

Back in the United States, the FCC has issued an Official Citation the mainland China based company Jammer World and its on-line subsidiary TheJammerStore dot com. This, for marketing unauthorized radio frequency devices in the United States in violation of the Communications Act and Section 2.803(a)(1) of the Commission's rules. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

According to the FCC Citation, this past July 20th an agent from the Enforcement Bureau's Columbia Office viewed Jammer World's web site. There he observed an advertisement for a device listed as a "Handheld GPS and Cell Phone Jammer Mini GPJ."

On July 21, 2010, the agent made an undercover buy on-line, and received the device through the mail from New Century Technology Limited. The agent conducted tests and confirmed that the device jams signals in the Cellular Telephone Band from 845 to 975 MHz, the PCS Band from 1800 to1996 MHz and G-P-S frequency of 1575.42 MHz.

Based on this and other findings, the FCC Citation tells Jammer World that if it continues to violate the Communications Act or the Rules by engaging in sales to customers in nthe United States, the Commission may impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment through forfeiture actions, as well as criminal sanctions, including imprisonment.

The only problem with this citation is that the company is located in Shenzhen China and the Chines government has a long record of not cooperating with the United States in matters involving on-line sales by mainland China based companies. Without the Chinese governments cooperation, collecting a fine or forcing the company to not sell mail order to customers in the United States may be an impossible task.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

As we go to air, TheJammerStore dot com was still offering cellphone and GPS jamming devices for sale, worldwide. (FCC)

HAM RADIO NEAR SPACE: MEXICAN HAMS LAUNCH CROSSBAND BALLOON REPEATER EXPERIMENT

A recently launched Mexican near space crossband repeater carried on a high altitude balloon has been deemed an overwhelming success.

The SARSEM-ICARUS II Mexican Aerostatic Sub-Space Repeater System was launched on November 20th. According to flight controllers, the balloon reached an altitude of 94,301 feet during which time 103 contacts where made using the crossband repeater. Ground stations reported it having coverage of 551 miles across 13 States of Mexico.

The balloon's payload consisted of a UHF to VHF repeater, temperature and voltage sensors, a flight computer, and a secondary backup system including another GPS and control system. Also on board was a video camera transmitting live video bacxk to the ground on 900Mhz.

This is a second ham radio balloon flight success for the Amateur Radio Club of the State of Guanajuato. The group has already announced its planning a third flight in 2011. (ARCSJ)

WORLDBEAT: BROADCAST TRANSMITTER SITE IN WALES IS VANDALIZED

Vandalism to a transmitter temporarily forced a broadcaster in Wales off the air. What are described as hooligans attacked the radio transmitter site and caused BBC Radio Wales on 882 KHz to shut down for three hours. The exact nature of the vandalism was not revealed. The site in north Somerset broadcasts across much of Wales. The damage also hit services from other broadcasters who share the site. (Soiuthgate)

RESCUE RADIO: HAMS REUNITE MISSING HORSE WITH OWNER

An Alabama amateur radio operator's weekend trek into a national forest turns into an experience he and members of one family will never forget. Rex Free, KN4CI, had no idea he was in for a bloody scene that would lead to a storybook happy ending. As Amateur Radio Newsline's David Black, KB4KCH reports from our Southeastern Bureau, the entire episode depended on amateur radio:

--

Thanksgiving weekend was the perfect time for Rex Free and two fellow hikers to set out exploring North Alabama's Bankhead National Forest. It's something Free and his friends have done many times before, but they ran across this time left them stunned:

--

Free: We were in the middle of the wilderness area, probably about three miles from the vehicle, exploring bluffs and looking at tree carvings and all the sudden..wham..we come upon a full size horse with blood on it dragging a saddle. And we're like okay...(laugh)"

--

There's no one around, and with no cell phone coverage, no one to call.

--

(Free/bite 2) Free: "After we got the saddle off we started thinking that there could be a person around here or there could be a body around here. We didn't know how to handle it or what to think of it. So we had to scope the area out to try to find somebody but we didn't didn't see anybody, thank goodness."

--

As a frequent visitor to the forest, Free always takes his amateur radio handy talkie with him. He uses the Bankhead Amateur Radio Club's repeater, and asks a monitoring ham to notify law enforcement. Free learns that the horse named Joe Dirt had been reported missing more than 3 weeks earlier by owner Pam Coan:

--

Coan: "I was devastated. I was so worried that something had happened to hurt him. That he ewas out there hurt and that there was nothing I could do to help him."

--

It will be the next day before the animal can be rescued; in the meantime, Free uses ham radio to communicate with the owners:

--

Free: "At the campsite at night we were relaying traffic to the owners and what they neededе to bring in to get the horse; what condition the horse was in. That the saddle was destroyed and details that they needed to know."

--

The following morning, Pamela and the horse she named Joe Dirt--because he loves to roll in the dirt--are reunited.

--

Coan: "I never thought that I'd see him again, and then there he was standing. I couldn't get to him fast enough just to touch him. You know, it was just such a high that you can't explain it. Its just to know that he was okay."

--

Joe Dirt's rescue brings a happy end to Pam Coan's emotional roller coaster ride. And she's thankful, too, for the key role Free and his fellow hams played.

--

Coan: "They're a blessing. They're heroes. I don't even know how to thank them for what they've done."

--

As for Joe Dirt, he's home, happy and doing well...rolling in the dirt as he loves to do.

>From the South East Bureau in Birmingham, Alabama, Im David Black, KB4KCH, for the Amateur Radio Newsline.

--

Joe Dirt appears to have followed the same advice hikers are given about what to do if they get lost which is to just stay put. Rescuers say by doing that, and the fact that he was found by ham radio operators with communications capability are the likely reasons he survived. (KB4KCH)

**

HAM RADIO IN SPACE: EXPEDITION 24 ALL HAM CREW RETURNS HOME

Members of the Expedition 24 and 25 crews that spent 160 days on-orbit on board the International Space Station has returned to soild ground. On Friday, November 26th Commander Doug Wheelock, KF5BOC along with Flight Engineers Shannon Walker, KD5DXB, and Fyodor Yurchikhin, RN3FI landing in Kazakhstan on flying home in a Russian-built Soyuz space vehicle.

While on-orbit, both Wheelock and Walker collectively made 22 ARISS contacts with schools around the world. In addition, Wheelock was on the air making one on one contacts as his time and work schedule allowed. Before leaving the ISS, Wheelock recorded a 20 minute video tour of part of the space station that included a live demonstration of his making contacts with hams on Earth. OIne seemed especially memorable for Commander Wheelock. Take a listen:

--

Contact audio here. Hear it on the MP3 edition of this weeks newscast downloadable at www.arnewsline.org

--

You can hear and see that entire video including the I-S-S tour on-line at tinyurl.com/3yep54f (ARISS, NASA)

**

HAM RADIO IN SPACE: TWO HAMS IN NEW ISS CREW SOON TO LAUNCH

Meantime, replacements for the now returned space adventurers will soon be on their way to orbit. On December 17th a new trio of flight engineers are expected to arrive at the I-S-S following a December 15th launch. They are identified U.S. astronaut Catherine Coleman, KC5ZTH, the European Space Agency's Paolo Nespoli, whose call is IZ0JPA and Russian cosmonaut Dmitry Kondratyev. And we will have more ham radio related space news later on in this weeks Amateur Radio Newsline report. (ARISS, NASA)

**

RADIO LAW: FCC EXTENDS NEW EAS-CAP COMPLIANCE DEADLINE

The FCC is giving broadcasters, cable operators, satellite radio and television operators and wireline video service providers more time to

implement the next generation emergency alert system. The commission announced on November 18th that it will move the deadline for compliance from March 29, 2011, to September 30, 2011.

In 2007, the FCC set a communications industry compliance deadline of 180 days after FEMA adopted the standard for the Common Alerting Protocol or C-A-P formatted emergency messages. Since then the agency has extended that date based on public comment and a specific recommendation by the FCC's Communications Security, Reliability and Interoperability Council.

This latest extension is to give broadcasters, cable operators and others sufficient time for development, testing and potential certification of the new equipment. The FCC added that in making the decision that it took into account the cost of buying the new compliant equipment in extending the Common Alerting Protocol adoption deadline.

While its been reported that a handful of amateur repeaters carry EAS alerts, there is no law or rule that requires them to do so. (FCC)

**

RADIO CONFERENCES: ESA TO AWARD TEN SCHOLARSHIPS TO STUDENTS PRESENTING BAT SPACE CONFERENCE

An Italian astronomic study group has announced that the European Space Agency Education Office has offered ten scholarships. These for students who present papers at the 1st International Academy of Astronautics Conference on University Satellites Missions and the Cubesat Conference to be held in Rome from January 24th to the 29th of 2011. Students selected by the ESA Education Office will also be reimbursed their conference registration fee and awarded a maximum stipend of 300 Euros to help cover travel and accommodation expenses. More information is on line at tinyurl.com/25wouy5. (ANS)

NAMES IN THE NEWS: N6GHZ APPOINTED AS AMSAT DIRECTOR OF LAUNCH OPPORTUNITIES

Some names in the news. First up is Bill Ress, N6GHZ, of Camino, California. He has been appointed to the newly created post as AMSAT's Director of Launch Opportunities by the organizations President Barry Baines, WD4ASW. In his new capacity, Ress will serve as the central point for managing Fox Launch Opportunities, Ride Share Opportunities as well as coordinating AMSAT's presence at small satellite conferences. Supporting Ress efforts will be a volunteer task force to help coordinate and compile launch information. (ANS)

**

NAMES IN THE NEWS: MARK RODWELL TO RECEIVE IEEE-SARNOFF AWARD

Mark J.W. Rodwell will receive the 2010 I-Triple-E David Sarnoff Award at a meeting in San Francisco in December. Rodwell is a research scientist who developed indium phosphide heterojunction bipolar transistors that are capable of operating at very high frequencies.

According to an I-Triple-E release, in doing so Rodwell set the guidelines for further improvements enabling powerful radio, optical communications and imaging applications. The award specifically recognizes his development of millimeter-wave and sub-millimeter-wave indium phosphide heterojunction bipolar transistors and associated integrated circuits. (RW)

**

NAMES IN THE NEWS: VE5TRF NAMED RAC SASKATCHEWAN SM

And Barry MacKenzie VE5TRF has been appointed Radio Amateurs of Canada's Section Manager for Saskatchewan effective immediately. MacKenzie has a military background, and is the current President of the Moose Jaw Amateur Radio Club, an accredited examiner as well as the clubs webmaster. MacKenzie's appointment was announced on November 20th by Radio Amateurs of Canada's Doug Mercer, VO1DTM, who is the organizations Vice President for Field Services. (RAC)

EMERGING TECHNOLOGY: LONG DELAYED ECHOS CAPTURED ON 40M

Another case of Long Delayed Echo's of a ham radio signal being heard by the originating station has been reported and this time the ham had enough time to capture the sound to a recording. Amateur Peter Brogl, DK6NP, reports hearing Long Delayed Echos on 7 MHz during a geomagnetic storm on November 27th. This is part of one of the recordings he made:

--

Long Delayed Echo audio: Hear it on the MP3 edition of this weeks newscast downloadable at www.arnewsline.org

--

What you just heard was what DK6NP heard forty-six seconds after he transmitted his call sign at 7 MHz, he received an echo of his own transmission. Brogl said that ast first he thought someone was playing

on him so he changed frequency, re-keyed his call and got another echo. This went on for more than an hour, enough time for Brogl to make several recordings.

Long Delayed Echo's are not a new phenomena. They were first reported in 1927 by Norwegian civil engineer Jorgen Hals but happen rarely and are not really understood. Most researchers believe that unusual propagation conditions linked to solar storms may be one of many possible explanations. Others can be seen on Shlionskiy's Long Delayed Echo page at tinyurl.com/355lvc6. Audio recordings made by DJ6NP of the 7MHz Long Delayed Echos can be heard at brogl.net/audio. (Space Weather, Southgate)

HAM RADIO IN SPACE: UK SPACE AGENCY TO USE AMSAT-UK FUNCUBE BOARDS ON NEW BIRD.

The United Kingdom's Space Agency is proposing to use the AMSAT-UK designed FUNcube boards. This, as part of its innovative new UKube-1 CubeSat satellite slated for launch in December 2011.

The baseline design for this new bird includes a set of FUNcube boards to provide the educational outreach for the project. AMSAT-UK is presently discussing the precise details of an arrangement with the UKube-1 project team. If adopted, use of these boards will enable a much higher level service to be provided for Science, Technology, Engineering and Mathematics outreach to schools than would be possible with other spacecraft designs.

More on this project is on-line at tinyurl.com/27cotj6 (AMSAT-UK)

**

WORLDBEAT: VK100WIA - THE FINAL SCORE

Some interesting statistics from down-under. This, as the Wireless Institute of Australia closes the logbook on its centenary station VK100WIA. Graham Kemp, VK4BB, is here with some very interesting numbers:

--

With the log book now finalized at 24,440 contacts David Park VK3JDA has carried out some further in-depth analysis of its 611 pages. The 40 meter band had 10,500 contacts, followed in popularity by 80 meters with 5,000, 20 meters 4,100 and 2 meters just over 3,000. In fact 12 bands were used by VK100WIA ranging from 160 meters through to 23 cm.

Looking at the modes used, as would be expected SSB comes up triumphs with 19,000 contacts, and CW got a very good pounding with nearly 1400 QSO's logged. Others listed as modes in the log were AM, IRLP, D-STAR, PSK, JT65C, SSTV, ATV, APRS and one EME or moon bounce contact.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

And less we forget a final word of congratulations to our friends at the Wireless Institute of Australia on this 100th anniversary achievement. (WIA News)

**

WORLDBEAT: MAJOR SITE RENTAL INCREASE FORCES UK REPEATER TO GO QRT

The GB3PF 70 centimeter voice repeater near Blackburn in the United Kingdom is be closing down. This, after its operator, North Western Repeater Group, was notified of a site rental cost increase that would have the club paying more than £6000 a year for site space. That's over $9300 in U-S dollars and is beyond the means of the small ham radio group. Until now, the group was paying what was described as a small nominal site rental fee.

**

DX

In DX, ZS6SIG has relocated to Nairobi, Kenya is now signing 5Z4EE and will be doing so for the next four years. He will operational on 160 through 10 meters. Please QSL via NV7E or at the address shown for 5Z4EE on QRZ.com. By the way, this is the same call that he originally held back in the 1980s.

Russian Robinson Club members NL8F and N3QQ are off to the Marshall Islands to activate three Islands On The Air including a new uninhabited island. Their operation will continue through December 16th. QSL V73RRC and V73QQ via N7RO and V73CF via K8NA.

F1BCS, will be active as portable 3B8 from Mauritius through December 17th. His operation will be on 20, 17 and 15 meters using SSB, RTTY and PSK. QSL per the operator's instructions.

VK8NSB, is currently in the planning stages at the moment for a DXpedition to Timor-Leste in July 2011. He is inviting any interested amateurs in joining the DXpedition teamto e-mail him at vk8nsb at hotmail dot com.

VK4KHZ, is expected to be active as H44DA when he arrives on Guadalcanal Island January 6th. He will be there through January 16th operating holiday style primarily on 6 meters on a daily basis, subject to favorable conditions. He may also operate on the High Frequency bands as time permits. QSL via VK4KHZ.

DJ2EH is on the air as ZD9T from Tristan da Cunha until December 8th. No operating schedule was made public. QSL via his home call.

And lastly, listen out for VP8SCC to begin transmitting using various digital modes during December. His operation will be from the Falkland Islands Sea Cadet Corps unit. This is a young person's organization and is run with a nautical theme based on the traditions of the Royal Navy. The VP8SCC station is managed by VP8CWQ. QSL to the Falkland Islands Sea Cadet Corps, c/o PO Box 785, Stanley, FIQQ 1ZZ, the Falkland Islands.

**

THAT FINAL ITEM: THE SONY WALKMAN - SK

And finally this week, as the holiday gift giving season approaches we are kind of sad to report that the famed Sony Walkman will likely be on dealer shelves for the last time this year. This is because Sony has announced that the thirty-one year old cassette tape based unit is being phased out of production. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with our final goodbye:

--

The Sony Walkman -- the cassette tape player that forever changed music listening habits before becoming outdated by digital MP3 players --has become a sort of silent key, this after Sony announced on October 25th that it has stopped production of the cassette tape player in Japan -effectively sounding the death knell of the now-obsolete portable audio device.

If you're looking to put a date in the Walkman's tombstone, then October 25, 2010, is as good as any. Perhaps October 23, 2001, the day the Apple iPod was launched, is the better date. But none of the success of Apple's portable music players and those of other manufacturers would have ever happened without the Sony cassette tape Walkman.

Some 220 million Walkman players were sold since the first model, the TPS-L2, debuted in July 1979. It was developed under the stewardship of Sony founders Akio Morita and Masaru Ibuka. Morita insisted the device be focused on high quality mobile playback which was considered a relatively odd idea at the time.

Originally called the "Soundabout" in the U.S., Sony quickly replaced the Soundabout name with the Walkman designation. It retailed for around $200 was an immediate sensation. In fact, it was quickly hailed by supporters as a total revolution in mobile music listening.

But more than just portability, the Walkman fostered a personalization of one's music. In fact, the Walkman was also the father of the so-called mixtape. For the first time, music listening was something you could make very personal by arranging songs in the order you wanted to hear to them. It was also a way of courting a future spouse or love interest during the 1980's and 1990's.

For those of you too young or simply unfamiliar with this process, making a mixtape typically entailed gathering songs, putting them all on a cassette in the order you wanted them played, labeling the tape with care and giving it to a love interest in school or elsewhere.

The Walkman didn't disappear as much as it was improved upon by its creators and others. Sony continued to use it as a brand, but the company long ago surrendered style to Apple and the ubiquitous iPod. But one day the iPod will likely go the way of the 45 RPM record, the L.P. and the Walkman. When that happens in some far distant time, that generation will be waxing nostalgic about its passing just as we are today about the Walkman as it becomes a part of electronic history.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, looking for my earphones and cassette tapes in Los Angeles.

--

The Walkman is survived by the CD-based Sony Discman and hundreds of Chinese-made knock-off tape based players. It's also revered by those music listeners who think using a Walkman in this day-and-age is charmingly out-of-touch. (Compiled from various published news reports)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). [...]

The ARRL made a written Ex Parte presentation to the FCC in the matter
of ET 04-37. In this presentation, the ARRL provided documentary
evidence to the FCC supporting the ARRL's recommendation that BPL
systems be required to notch amateur radio bands by at least 35 dB. At
least partial justification for this is that most BPL providers already
do this.

The entire text of the ARRL's presentation, including attached exhibits,
may be found in the EFCS at:

http://fjallfoss.fcc.gov/ecfs/comment/view?id=6016062528

Ed Hare's (W1RFI) technical report is particularly interesting and
informative, and is included as Exhibit A linked above.

3918. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2010-12-07 07:05:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1291705500@panix.com>
Source record: 243986
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

203> Why is your boring drivel in alt.checkmate, tholenbot?

Who is "tholenbot", Checkmate? There is nobody in this newsgroup
using that alias. Rather ironic that you should talk about drivel,
Checkmate. You didn't hestitate to post your drivel in an OS/2
newsgroup.

Apparently when you update your name or address in the Universal
Licensing System (ULS), you must also update it in the Commission
Registration System (CORES). I didn't know that, and I suspect that a
lot of amateurs didn't know that either. It's implied, but not
specifically stated, in the ARRL's FAQ:

http://www.arrl.org/uls-faq

Fred Maia, W5YI, petitioned the FCC to automatically update CORES when
the ULS was updated by an amateur licensee. The FCC is seeking comments
on this.

It can be useful in the manufacture of certain flavors of ice cream, and
on a fish farm as fish food.

==> + REGULATORY: AMATEUR ALLOCATION AT LOWER MF GAINS FORMAL SUPPORT
IN THE AMERICAS

A secondary allocation to the Amateur Radio Service at 461-469 and
471-478 kHz gained inter-American support in meetings held earlier this
month in Bogota, Colombia, with the Permanent Consultative Committee II
of the Inter-American Telecommunication Commission (CITEL) adopting the
US position for the MF allocation. World Radiocommunication Conference
2012 Agenda Item 1.23 calls on participants "to consider an allocation
of about 15 kHz in parts of the band 415-526.5 kHz to the Amateur
Service on a secondary basis, taking into account the need to protect
existing services." Read more here
<http://www.arrl.org/news/amateur-allocation-at-lower-mf-gains-formal-support
-in-the-americas>.

==> + ON THE AIR: SADDLE UP FOR THE 2010 CW ROOKIE ROUNDUP!

The ARRL's newest on-the-air operating event is designed to help newly licensed amateurs build their operating skills on HF. Three Rookie Roundups -- one each for SSB, RTTY and CW -- are held each calendar year. The CW running of the Rookie Roundup will take place Sunday, December 19 from 1800 UTC through 2359 UTC.This is a contest specifically for those new to Amateur Radio, similar to the ARRL Novice Roundup that ran from 1952 until 1995. The Rookie Roundup combines a competitive event with some on-the-air training, bringing the fun and Elmering of the old Novice Roundup into the 21st century. The Rookie Roundup is a single-operator event only. Stations are allowed a maximum of 100 W. Elmering is encouraged and use of spotting networks is allowed. Read more here <http://www.arrl.org/news/saddle-up-for-the-2010-cw-rookie-roundup>.

==> + EXAMS: NCVEC RELEASES NEW GENERAL CLASS QUESTION POOL

The Question Pool Committee (QPC) of the National Conference of Volunteer Examiner Coordinators (NCVEC <http://www.ncvec.org/>) released the new General class (Element 3) question pool <http://www.ncvec.org/page.php?id=358> on Tuesday, December 7. This new question pool -- including graphics and diagrams -- will become effective for all General class examinations administered on or after July 1, 2011; it will remain valid until June 30, 2015. The current General question pool that became effective July 1, 2007 will expire June 30, 2011. The new General pool contains 457 questions, from which 35 are selected for an Element 3 examination. The current Technician class question pool <http://www.ncvec.org/page.php?id=349> that was effective July 1, 2010 is valid through June 30, 2014. The current Amateur Extra class pool <http://www.ncvec.org/page.php?id=351> that was effective July 1, 2008 is valid until June 30, 2012.

==> ARRL PUBLICATIONS: ARRL INTRODUCES BOOK ON SELECTING, USING ANTENNA TUNERS

Antenna tuners are devices often misunderstood in the Amateur Radio world. While not every station requires an antenna tuner to transmit radio signals, without one an incompatibility between the transmitter and the antenna system can result in poor performance. The ARRL Guide to Antenna Tuners: A Radio Amateur's Guide to Antenna Matching by Joel R. Hallas, W1ZR, will help you understand how to select the right tuner for your needs and how to use it in your shack.

The ARRL Guide to Antenna Tuners discusses the details of the different configurations and requirements of antenna tuners. It explores the design, construction and applications of the different types available. You'll be able to determine if one is necessary in your station, what type of tuner is needed and where to install it for maximum improvement. This book will give you a better understanding of your antenna system and the way it can be improved through the selection and use of the appropriate antenna tuner. Read more here <http://www.arrl.org/news/arrl-introduces-book-on-selecting-using-antenna-tun

ers-in-your-station>.

==> + GET READY FOR THE JANUARY ISSUE OF QST!

The January issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at a number of do-it-yourself (DIY) projects -- the upcoming issue of QST has something for just about everyone.

If you are contemplating building your own ham radio gear, chances are that you're going to have to bring out the soldering gun. But is there another way? In his article "Reflow Soldering for the Radio Amateur," Jim Koehler, VE5FP, talks about how he found it easier to assemble a PC board using surface mount components instead of through-hole parts using reflow soldering. With this method, a PC board -- with the surface mount components held in place with solder paste -- is placed in an oven where it is heated, turning the paste into liquid solder; after the board cools, the solder solidifies again. Koehler says that because all the soldering is done at the same time, it is a very quick process.

Hams have a long tradition of making their own antennas, accessories and equipment -- but you definitely need the right tools for the job at hand. QST Technical Editor Joel Hallas, W1ZR, takes a look at some tools that you should have in your shack -- from soldering tools to test equipment to socket drivers and wrenches -- if you are looking to try a homebrew project. Who says you need a giant dish and expensive equipment to "ping" the Moon? Bob Baker, KD3UY, shows how you can do "Moonbounce on a Budget" to describe what you actually need -- and don't need -- to make that first Earth-Moon-Earth (EME) contact.

<http://www.arrl.org/multimedia> ARRL Contributing Editor Howard Robins, W1HSR, takes a look at the Yaesu FTM-350R dual band FM transceiver in this month's Product Review. He calls it "a top-of-the-line mobile FM transceiver with well thought out controls. It offers some unusual features, such as 222 MHz transmit and a stereo FM broadcast receiver, as well as options such as APRS and Bluetooth connectivity." ARRL Technical Advisor Bruce Prior, N7RR, checks out the Begali CW machine. He says that it is "more than just a keyer and offers a wide range of features for on-air CW operation and off-air Morse code training."

Of course, there are the usual columns you know and expect in the January QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your January issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + ARRL HEADQUARTERS CLOSED FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Friday, December 24 and Friday, December 31 in observance of Christmas and New Year's Day. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> or ARRL Audio News <http://www.arrl.org/arrl-audio-news> on Thursday, December 23 and 30. We wish everyone a safe and joyful holiday season and a prosperous 2011.

==> + DXCC: EIGHT AFRICAN OPERATIONS APPROVED FOR DXCC CREDIT

ARRL DXCC Manager Bill Moore, NC1L, reports that eight operations in Africa -- 9Q/DK3MO (Democratic Republic of the Congo), 3C0C (Annobon), 3C9B (Equatorial Guinea), 3V9A (Tunisia), 3V0A (Tunisia), TS7TI (Tunisia, also includes /p operation), TS8P (Tunisia, also includes /p operation) and TS9A (Tunisia) -- have been approved for DXCC credit. All operations -- with the exception for the 9Q/DK3MO -- are 2010 operations. The 9Q/DK3MO operation is good for operations commencing in 2007 through the present. Read more here <http://www.arrl.org/news/eight-african-operations-approved-for-dxcc-credit>.

==> SOLAR UPDATE

Tad "Lost in their overcoats, waiting for the Sun <http://en.wikipedia.org/wiki/Old_Friends_%28song%29>" Cook, K7RA, reports: The average daily sunspot numbers for the week were up more than nine points to 35, and the average solar flux rose more than six points to 87.3. These changes compare the dates of December 2-8 with the previous seven days. The average planetary A index declined 2.5 points to 2.1, while average mid-latitude A index dropped 1.1 points to 1.6. These are nice numbers, with higher sunspot numbers accompanied by lower geomagnetic indices. The predicted solar flux for the near term is right at the same level as the average for the past week, at 87 for December 9-14, followed by 85, 83, 81 and 80 for December 15-18. The predicted planetary A index for December 9-13 is 5, 8, 10, 10 and 8, followed by 5 for December 14-18, and possibly out to December 23. Note the period of slightly unsettled geomagnetic activity centers around this weekend, the dates for the ARRL 10 Meter Contest <http://www.arrl.org/10-meter>, December 11-12. But only a mild increase in geomagnetic activity is expected. This year's event is the first time that Mexican states will be counted as multipliers along with US states and Canadian provinces, as well as DXCC countries. You can see a map of the 32 Mexican states here <http://www.dxxe.org/concurso/xe-mults.pdf>. Look for more information on the ARRL Web site on Friday, December 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Simon and Garfunkel's Old Friends <http://www.youtube.com/watch?v=BPTOY8FrvNw>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEB SITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL Web site. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you use CW on a regular basis?
- If your out-of-warranty transceiver failed, what would you do?
- Do you own a tablet computer?
- Does your ARES® group use the ARRL Public Service Activity Report <http://www.arrl.org/files/file/Public%2520Service/fsd157.pdf> form to document SKYWARN activity?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the March 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> + SILENT KEY: BODY OF VETERAN BALLOONIST RICHARD ABRUZZO, KC5VWK, FOUND OFF ITALIAN COAST

The bodies of famed hot-air balloonist Richard Abruzzo, KC5VWK, of Albuquerque, New Mexico, and a companion were discovered on Monday, December 6 deep underwater off the coast of Vieste, Italy. Abruzzo, 47, and Carol Rymer-Davis, 65, of Denver, Colorado, had been missing since September 29 when they lost contact with officials during a balloon race, after their balloon made a rapid descent during rough weather. Read more here <http://www.arrl.org/news/body-of-veteran-balloonist-richard-abruzzo-kc5vwk-found-off-italian-coast>.

==> THIS WEEK ON THE RADIO

This week:

- December 10 -- NCCC Sprint Ladder
- December 11 -- Feld Hell Sprint
- December 11-12 -- ARRL 10 Meter Contest <http://www.arrl.org/10-meter>; International Naval Contest; MDXA PSK Death Match
- December 11-16 -- NA High Speed Meteor Scatter Winter Rally
- December 12 -- SKCC Weekend Sprint; CQC Great Colorado Snowshoe Run
- December 15 -- NAQCC Straight Key/Bug Sprint

Next week:

- December 17 -- NCCC Sprint Ladder; Russian 160 Meter Contest; AGB-Party Contest
- December 18 -- OK DX RTTY Contest; RAC Winter Contest
- December 18-January 2 -- Lighthouse Christmas Lights QSO Party
- December 18-19 -- Stew Perry Topband Challenge; Croatian CW Contest
- December 19 -- ARRL Rookie Roundup (CW)

<http://www.arrl.org/rookie-roundup>
- December 20 -- Run for the Bacon QRP Contest
- December 22 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2011 -- ARRL Delta Division Convention <http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention <http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention <http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention <http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here <http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1739 - December 10 2010

Amateur Radio Newsline report number 1739 with a release date of
Friday, December 10th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISS celebrates a decade of International
Space Station to schoolroom contacts, the National Conference of
Volunteer Examiner Coordinators releases its new General Class Question
Pool, a roadblock catches unlicensed radio operators in Brunei and
researchers in Belfast Ireland propose humans as walking cellphone
towers. Find out the strange details on this one on Amateur Radio
Newsline(tm) report number 1739 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ARISS CELEBRATES ITS 10th ANNIVERSARY

Amateur Radio on boards the International Space Station, better known
by the acronym ARISS is celebrating the 10th anniversary of student ham
radio contacts with crew members on board the orbiting outpost. We
have more in this report:

--

On December 21st of the year 2000, astronaut William Shepherd turned
from his usual activities aboard the newly occupied International Space
Station. Floating over to a ham radio station attached to an I-S-S
bulkhead, he called the Burbank School in Burbank, Illinois and was
soon talking with 14 students earger to know more about life in space.
Now in 2010, amateur radio operators world-wide are celebrating the
tenth anniversary of this first ARISS school contact.

Since that first QSO, the ham operators coming to the Space Station
along with their ARISS volunteers on the ground have conducted 565
successful contacts in 40 countries and 5 continents. This has allowed
thousands of students to share the excitement of those first 14.
Moreover, tens of thousands of students, faculty, and parents have
participated in the program by working on the planning phase and
attending these events.

ARISS contacts have prompted countless students to seriously consider
pursuing science, technology, engineering, and math careers, including
becoming an astronaut. Educational programs and amateur radio clubs
established at participating schools continue to inspire students long

after the contact has ended.

The value of manned amateur radio on-orbit was so apparent to NASA and the Russian Space Agency that the ham radio from orbit became the first experiment to be activated on board I-S-S.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The use of amateur radio in space began in the early 1980's when Astronaut Owen Garriott, W5LFL, became the first ham to operate from orbit on board the Space Shuttle Columbia. His ground breaking ham radio from space operation was chronicled in the ARRL distributed video titled Amateur Radio's Newest Frontier produced and hosted by the late NBC newsman Roy Neal, K6DUE. In all, what became known as the Shuttle Amateur Radio Experiment or SAREX flew on 28 shuttle missions, proving the educational and crew morale benefits of ham radio. Ham radio also proved popular with the cosmonauts aboard the Russian space station Mir. (N5VHO, W8AAS, ARISS, ARNewsline(tm) Archives)

AMATEUR RADIO TESTING: NCVEC RELEASES NEW GENERAL CLASS QUESTION POOL

If you plan to upgrade your ham ticket, listen up. On Tuesday, December 7th, the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators released the new General class question pool also known as the Element 3 exam. This new question pool includes graphics and diagrams It will become effective for all General class examinations administered on or after July 1st of 2011 and will remain valid until June 30th, 2015.

The new General pool contains 457 questions, from which 35 are selected for an Element 3 examination. The current General question pool that became effective July 1, 2007 will expire June 30, 2011.

And for those interested in the other classes of United States ham radio license testing, the current Technician class question pool that became effective on July 1, 2010 is valid through June 30, 2014. The Amateur Extra class pool that was effective July 1, 2008 is valid until June 30, 2012. (ARRL, FCC)

**

BREAKING DX NEWS: SABLE ISLAND DXPEDITION POSTPONED

Some breaking news in the world of DX. This with word that the long awaited Sable Island DXpedition has been postponed.

According to team spokesman Randy Rowe, N0TG, the group has been advised that the beach at Sable Island will not be suitable for landing at this time. That puts the DXers into the holiday period. As such

they have no choice but to return home, re-group and come up with a new re-schedule.

Rowe adds that they will assess the situation over the next couple of weeks and layout our new plan at that time. Newsline will bring you another update on this long awaited operation as soon as more information is released. (Sable Island DX Team)

**

RADIO IN SPACE: SUN DEVELOPS MEGA FILAMENT

A spectacular filament is reportedly snaking around the sun's southeastern limb. Spaceweather reports that from end to end, this filament stretches more than 700,000 km. That's a full solar radius or almost twice the distance from Earth to the Moon. We have more in nthis report:

--

According to scientists at the Solar Dynamics Observatory the flare stretches nearly twice the distance between the Earth and moon.

The flare, described by astronomers as a filament, is an elongated cloud of cooler gases suspended above the Sun by magnetic forces. NASA scientists say the solar storm is confined to the Sun and poses no threat to satellites in space or the power grid here on Earth.

Last month we reported that a Purdue University professor had researched the lack of solar activity in recent years. His published report indicated that we have not had a sun spot in over 800 days. Records show that this is the longest solar spot dry spell in 300 years.

Observers are watching to see if we can expect increased sun spot activity. Those operating high frequency amateur radio bands surely hope this is just the beginning of a bright solar future.

Reporting for Amateur Radio Newsline, this is Jack Parker, W8ISH

--

The massive build up is an easy target for backyard telescopes as long as optical safety precautions to insure no damage to the astronomers eyes. Solar observers say that the filament holds the potential for an impressive eruption if it happens to collapse in the days ahead. Spaceweater.com is carrying a series of ongoing photos as well as technical updates.

(W8ISH, Spaceweather)

ENFORCEMENT: STATION ISSUED NAL FOR FAILING TO REDUCE NIGHTTIME POWER TO 15 WATTS

The FCC has issued a $6000 Notice of Apparent Liability to Donald Coss, owner of KCKX in Stayton, Oregon. This for not operating in accordance with the authorized 15 watt nighttime power specified on his license.

According to the FCC, its Portland office monitored the signal of KCKX before and after local sunset. Field strength was found to remain constant both before and after sunset on consecutive days last April. The agent also captured KCKX-AM's relative signal strengths for its daytime and nighttime operations. At that time he determined that there was no reduction in signal strength for nighttime operation.

A few days later the FCC agent inspected the station at its control point in Woodburn. The commission said that during an interview with the Portland agent, the owner said he was aware of the requirement to reduce operating power at night from 1000 watts down to 15 watts. But the owner said that it was just too costly to maintain the necessary time-keeping devices, power switching devices and other equipment to accomplish this.

Now, in its latest correspondence with the station, the FCC noted that in 2000 it's Enforcement Bureau had issued a Notice of Violation to Coss also for failing to reduce the nighttime power of KCKX AM. It then issued the $6000 Notice of Apparent Liability and instructed Coss to send a sworn statement about how he'll fix the problem. It also cautioned Cross that future violations of its rules may subject him to more severe enforcement penalties.

Cross was given the customary time to reply as well as to pay the $6000 Notice of Apparent Liability or to file an appeal. (FCC)

**

ENFORCEMENT: BRUNAI HOLDS ROADBLOCK TO CATCH UNLICENSED OPS

Unlicensed mobile radio operators in Brunai, some of whom are hams with expired licenses but still on the air have felt the sting of that nations government enforcement. This, when several of them were caught in a good old fashioned roadblock on December 6th.

The roadblock was a joint operation conducted by the Authority for Information Communications Technology and the Sengkurong (SEN CURE ONG) Police Station. In only two hour time, all vehicles with an outside antenna mounted to it were stopped and inspected. Several were found to contain radio gear capable of operation between 137 to 174 megahertz

which with the exception of 144 to 148 megahertz are supposed to be blocked from use.

The operation was part of an awareness campaign to urge operators to obtain ham radio licenses and confine their operation to within the confines of the amateur radio bands. Also, to avoid the possibility of a fine of up to $10,000 and /or three years in jail. The ventire story is on-line at tinyurl.com/brunai (Borneo Bulletin)

**

WORLDBEAT: FRENCH ATV'ERS CONCERNED OVER NEW SAT NAVAGATION IN 1.2 GHZ BAND

French amateur television enthusiasts have voiced their concerns over the future of the 1.2 GHz band. At a recent meeting, the trepidations of the French A-T-V Association were raised regarding the use of the Amateur Radio 23cm band by the Galileo and Glosnass satellite navigation systems. Heres why.

The European Union's Galileo system will use 1260 to 1300 MHz while the Russian Federation Glosnass system will be on 1240 to 1260 MHz. Both systems are expected to be operational by 2015 and there is fear among some hams I FDrance that Amateur Television operations could be impacted. Complete proceedings of the November 27, gathering in Google English is on line at tinyurl.com/38c4vhw. (Southgate)

**

RADIO SCIENCE: RESEARCHERS IN IRELAND PROPOSE HUMAN ANTENNAS

Turning to an interesting story out of Ireland, scientists are proposing to increase broadband nework availability by making people into walking cell phone towers. Jim Linton, VK3PC, of the WIA News is here with the rather strange details:

--

Researchers at Queen's University Belfast are looking to improve the reliability of modern wireless systems. They believe that humans could be turned into wireless towers to create what they call body-to-body networks.

A five year research project is investigating how small sensors carried by people could communicate with each other to create a ubiquitous wireless networking paradigm.

This would provide enhanced bandwidth needed when too many people use their phone in the same cell area, help the service to penetrate weak signal areas or black holes and counteract drop outs that result from interference.

In a rapidly developing science of body centric communications, new sensors carried by everyone with a mobile phone would interact with

each other and wireless devices embedded in local surroundings to transmit data, providing anytime, anywhere mobile network connectivity.

The technology also promises to open up the use of wireless communications in a wider range of activities including law enforcement and first responder teams, sports applications through to medical monitoring of patients in their own homes.

For the Amateur Radio Newsline, Im Jim Linton, VK3PC.

--

While an interesting idea, its likely to be another of those scientific advances that prove to have little practical application. At least not until scientists first prove conclusively the effect that radiation from cellphones have no adverse affect on the human body. And that may not be proven either way for decades. (WIA News)

**

HAM RADIO ON THE NET: NEW FREE SPANISH LANGUAGE HAM RADIO MAGAZINE

A new Spanish language amateur radio magazine is now available free on the Internet. Called Radio Noticias, the publication includes information on transceivers, receivers, antennas tests and much more. Also included is news from the worlds of DX, contest operation, shortwave, propagation and much more. And its picture filled website has photos of radio gear some of which is not available in the United States including a very simple to operate 2 meter mobile rig. You can download the current issue and see it for yourself at www.radionoticias.com. (Southgate)

**

HAM RADIO EVENTS: JANUARY 2 2011 IS KIDS DAY

If you are free on Sunday, January 2nd, consider using the hours of 1800 bto 2400 UTC to help introduce youngsters to amateur radio on Kids Day.

The Kids Day operating event is sponsored by Oregon's Boring Amateur Radio Club in association with the ARRL. It was created to expose young minds to the magical world of ham radio by putting them on the air under the supervision of a licensed radio amateur so that they can experience making a contact first hand. And as a Kids Day volunteer station you get rewarded by knowing that you have done your part in passing the hobby on to the next generation.

More information about Kids Day can be found on the ARRL website. That's in cyberspace at kidsday@arrl.org. (ARRL)

**

MILITARY HAM RADIO: TWO STORIES IN MULLIGAN LIFESTYLES

Amateur Radio Military Appreciation is featured in a story in the winter 2010 edition of Mulligan Lifestyles Magazine. Mulligan Lifestyles is a publication that honors our troops, veterans, active duty military, and their families. The story can be found on page 58. The same issue also contains a story about Amateur Radio on page 42 submitted by Nick Shyshuk. You can read both on line at tinyurl.com/29v7jv8 (ARMAD)

**

NAMES IN THE NEWS: ZL2BHF CELEBRATES 25 YEARS PRODUCING NZART NEWSCAST

And a word of congratulations to Newsline's own Jim Meachen, ZL2BHF. This as he celebrates a quarter of a century producing and usually voicing the monthly NZART Official Broadcast to New Zealand's national ham radio community.

The big celebration of this milestone for ZL2BHF takes place on December 19th. For the event Jim has has compiled some memorial broadcasts from presenters that are not with us. Also, the November to December bi-monthly issue of the NZART magazine Break-In will carry a story on his quarter-century of work on this New Zealand national ham radio broadcast project. (Break-In / NZART)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO IN SPACE: ARISSAT ONE ENROUTE TO MOSCOW

ARISSat One is on its way to its launch site. Late word from AMSAT that the ARISSat One flight hardware and the backup unit are in Germany and are scheduled to be delivered to Moscow on Saturday, December 11th. Meantime, Lou McFadin, W5DID, and Mark Steiner, K3MS, will be heading to Moscow on the 10th of December to assist with integration and testing of the Kursk experiment and battery. The schedule still has ARISSat going to the ISS via a Progress vehicle in late January 2011 and release from the ISS in late February 2011. (ANS)

**

HAM RADIO NEAR SPACE: HABEX TO LAUNCH ON DECEMBER 18TH

South Africa's HABEX team will be launching its third high altitude balloon on December 18th. The balloon will be carrying various payloads in preparation for a future 2011 launch to serve the educational needs of students 8 schools.

The payload is made up of 4 separate modular units. The primary function is the on-board controller board that contains an APRS unit. This will provide real time the balloon location during the mission. Also, a store and forward or parrot repeater on 438.500 MHz which includes a backup APRS unit is also onboard. During the flight, if the repeater is not in use, the APRS unit will transmit data.

The Sci-Bono Discovery Centre in conjunction with the Gauteng Department of Education initiated this project. Its purpose is to support the Electrical Technology Curriculum and provide expanded opportunities to students in this field. More is on-line at www.habex.za.net. (SARL)

**

HAM RADIO IN SPACE: DISCOVEREY'S LAUNCH DELAYED

NASA has announced that the 39th planned final flight of the space shuttle Discovery is being pushed back to early February of 2011. This in order to give engineers more time to determine the root cause of cracks in the shuttle's external fuel tank covering . NASA had been targeting launch for a short window that opens December 17th and closes December 20th. But Shuttle Program Managers have determined that tests and analyses intended to determine the cause of the cracks would not be complete in time to launch during that last 2010 opportunity because engineers have not yet determined the cause of the cracks.

The space agency' concern is that such a fracture could cause foam insulation to break loose during launch and damage the shuttle's heat-shield components needed for a safe reentry to the Earth's atmosphere. (NASA)

**

WORLDBEAT: HCJB REACHES RADIO DISTRIBUTION GOAL

International religious broadcaster HCJB's recent campaign in cooperation with Moody Radio to raise funds to deliver pre-tuned radios to listeners in under-developed regions of the world appears to have succeeded. According to a press release, enough funding was raised to send 7,000 radios to Burkina Faso and Sierra Leone and Ghana. That's or 2,000 above the initial goal.

The radios were designed by HCJB's Global Technology Center in Elkhart, Indiana in the United States. Their simple operation is designed to permit listeners to tune in three HCJB partner stations in the target audience region. (RW)

**

THE DXCC PROGRAM: NUMEROUS OPERATIONS APPROVED

Bill Moore NC1L, the ARRL DXCC Branch Manager advises that a number of operations are now approved for DXCC credit. They are the 2010 operations as 3COC from Annobon, the 3C9B out of Equatorial Guinea

along with the 3V9A, 3VOA, TS7TI and the TS8P from Tunisia.

Going back in time, also approved was the 2009 approved is the TS9A also fromTunisia and the 9Q stroke DK3MO from 2007 out of the Democratic Republic of the Congo.

If you had any of these operations rejected in recent applications send a note to dxcc at arrl dot org to have your record updated. Once updated, this will be reflected in your Logbook of the World account or in the live, daily DXCC Standings at www.arrl.org/dxcc.

**

DX

In DX, G7BXU, will be spending the Christmas and New Year holidays in Sierra Leone operating portable 9L. He will be there from December 19th through January 7th likely using the callsign 9L1BXU. QSL via his home callsign after his return.

PY2ZX will be active portable PT7 from the PW7T contest station through December 13th. His operation will be limited to 6 and 2 meters looking mainly for Carribean stations operating weak signal modes and using horizontal polarization. He will also be checking 70 MHz for openings to Europe.

NA3J tells Newsline that hew will be operating through December 20th as J3 stroke NA3J Maritime Mobile aboard the 50 foot yacht the Yaba Jaba. His operation will be using SSB and CW on all bands and he will make use of the WARC bands when they're open. He says that he might get as far north as J8 but there's no real itinerary. QSL as directed on the air.

N1DG was expected to arrive in the United Arab Emirates on December 5th. He was anticipated to operate from the A61AD station possibly on 12 and 17 meters using CW, SSB and RTTY. Logs will be uploaded to LoTW on his return.

BX5AA, will be active from Taiwan during the ARRL DX SSB Contest slated for March 5th and 6th. He says that BX5 is a rare prefix for Taiwan. QSL via BX5AA.

N2RFA will be on the air as C6ABB from Nassau in the Bahamas between February 7th and the 17th. Activity will be on 80/40/20/17 meters. He plans to operate on some of the Digital modes including PSK31, RTTY and possibly SSTV. QSL via N2RFA

Lastly, WJ2O, will be active as stroke 6W from Senegal during the ARRL DX CW Contest on February 19th and 20th as a Single-Operator, All-Band, High-Power entry. Dave told the Ohio Penn DX Newsletter that he will arrive in Senegal on February 17th and will be leaving on the 23rd. Activity outside of the contest will be 100% on CW and mostly on the 30, 17 and12 meter bands. Logs will be available in almost real-time at wj2o.com. QSL via WJ2O.

(Above from various DX news sources)

**

THAT FINAL ITEM: RADIO CAN LOWER BLOOD PRESSURE

And finally this week, word from down under of a remarkable new experimental medical procedure. One that holds the promise of lowering peoples blood pressure through the use of radio waves. Graham Kemp. VK4BB, of the W-I-A News has the details of this new way of dealing with what for many is a life threatening medical problem:

--

No not BP as in Broadband over powerlines but BP as in Blood Pressure. A new procedure which takes just 45 minutes involves a doctor inserting a catheter into an artery in the upper thigh, then threading it into an artery next to the kidney.

There, they use low-power radio waves to heat up and effectively turn off specific nerves which are known to play a role in high blood pressure.

Professor Markus Schlaich from the Baker IDI Heart and Diabetes Institute in Melbourne was a principal investigator in an international trial which involved 106 patients across 24 separate sites in Europe and Australia.

After the first ten patients or so were treated, they really were quite confident that this is a fantastic new technology that allows lots of people out there who have trouble with their blood pressure.

How long will it be before this treatment is available to people in Australia? They are quite hopeful that certainly within the next year, this radio wave treatment for High Blood Pressure should be available for clinical use.

For the vAmateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

As to when this new procedure might become available in nthe United States? As we go to air, that too, is unknown. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). OS/2 is a basic requirement for puncing, Tholen. You should know
that.

37> What does your post have to do with OS/2

Suffering from reading comprehension problems, miguel?
You called OS/2 the world's only fecal operating system,
and I called your claim about OS/2 unsubstantiated and
erroneous.

37> and its legion security holes?

Classic pontification.

Suffering from reading comprehension problems, miguel?
I made no such admission. In fact, I called your claim
that OS/2 is a basic requirement for puncing both
unsubstantiated and erroneous.

Frankly, Windows is too secure an operating system with which to punce
effectively. Only a security-riddled operating system like OS/2 can
enable meaningful puncing. You should know that, Tholen, since you are
an admitted chronic puncer.

==> + FCC NEWS: NEW RULES GOVERNING VANITY, CLUB STATION CALL SIGNS TO
TAKE EFFECT FEBRUARY 14, 2011

On Wednesday, December 15, new rules affecting vanity and club
station call signs within the Amateur Radio Service were published in
the Federal Register
<http://edocket.access.gpo.gov/2010/pdf/2010-31349.pdf>. These new
rules will go into effect on February 14, 2011. Thirteen months ago,
the FCC announced its intention to modify Part 97
<http://www.arrl.org/news/fcc-looks-to-revise-clarify-vanity-call-sign-rules>
as it applies to the vanity call sign system and club station call
signs, aligning the rules to prior Commission decisions. Last month,
the Commission released a Report and Order
<http://www.arrl.org/news/fcc-issues-em-report-and-order-em-on-vanity-and-clu
```

b-station-call-signs>
(R&O), outlining its decision. Along with the changes to the call sign rules, the FCC made "certain minor, non-substantive amendments" to portions of Part 97.

==> + SPECTRUM DEFENSE: WHAT ROLE CAN YOU PLAY TO DEFEND OUR AMATEUR RADIO SPECTRUM?

The third edition of Spectrum Defense Matters -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- has just been released on the ARRL Web site. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. Your financial support is vital to continue the ARRL's work to protect your operating privileges. You can help protect these privileges by contributing generously to the 2010 ARRL Spectrum Defense Fund before December 31.

"The coming year will see the completion of preparations for the next World Radiocommunication Conference (WRC-12), to be held in Geneva in January and February 2012," said ARRL Chief Executive Officer David Sumner, K1ZZ. " We hope for favorable outcomes on the agenda items we care about -- but that will not be the end of it. This WRC will recommend an agenda for the next one, later in the decade. Will that agenda pose serious threats to amateur spectrum? Will it include the possibility of new or expanded amateur allocations? The answers will depend in part on work being done on your behalf today, in Geneva and within regional telecommunications organizations that cover the globe."

This edition of Spectrum Defense Matters includes articles on how the IARU works with the world's six regional telecommunications organizations, a look at how the FCC's National Broadband Plan could affect the Amateur Radio Service and a message from ARRL Chief Technology Officer Brennan Price, N4QX, outlining many of the ways the ARRL advocates for the defense of your spectrum. Read more here <http://www.arrl.org/news/what-role-can-you-play-to-help-defend-our-amateur-radio-spectrum>.

==> + AMATEUR RADIO FUN: BE A STAR! ENTER THE ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its first-ever video contest <http://www.arrl.org/video-contest>! We are looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby is; extra points will be awarded for a video showing someone, young or old, licensed or not, making their first contact. Videos will be judged on overall quality and composition, and prizes will be awarded. The video author/producer must be an ARRL member; however, the people who appear in your video can be non-members. This contest is intended for amateur videographers. If you are a professional, please do not apply. Check out all the details -- including the fine print -- on the ARRL Video Contest Rules and

Guidelines Web page <http://www.arrl.org/video-contest>.

==> ARRL PUBLICATIONS: NEW EDITION OF ON4UN'S LOW-BAND DXING NOW SHIPPING

The fifth edition of ON4UN's Low-Band DXing: Antennas, Equipment and Techniques for DXcitement on 160, 80 and 40 Meters by John Devoldere, ON4UN, features new and updated material. This is a book -- with CD-ROM included -- that every fan of 40 meters through Top Band needs in the shack. It is loaded with everything you need to succeed on the low bands. It's been 25 years since Devoldere published the original Low Band DXing, sharing his knowledge of techniques for success on 160, 80 and 40 meters. Over the years, the book has evolved to keep pace with the growing knowledge of propagation, equipment, operating techniques and receiving and transmitting equipment for the low bands. This edition is no different, with significant new additions and updates throughout the book. Read more here <http://www.arrl.org/news/new-edition-of-em-on4un-s-low-band-dxing-em-now-shipping>.

==> + ON THE AIR: 2010 A BANNER YEAR FOR DXCC, INCOMING/OUTGOING QSL BUREAU

With the coming of more sunspots, comes more DX. And when more amateurs are working DX, that means the ARRL's Membership and Volunteer Programs Department -- especially the DXCC desk and the ARRL Incoming and Outgoing QSL Bureaus -- goes into high gear.

"Compared to 2009, 2010 saw a dramatic increase in the number of cards we received from ARRL members that were sent to foreign QSL bureaus, as well as the number of cards we sent out to the bureaus," said DXCC Manager Bill Moore, NC1L. "In addition, the number of DXCC applications -- including those for initial awards and endorsements -- also increased." Read more here <http://www.arrl.org/news/2010-a-banner-year-for-dxcc-incoming-outgoing-qsl-bureaus>.

==> + SUPPORT ARRL: ARRL RECEIVES $1 MILLION GIFT TO THE ARRL ENDOWMENT

In October 2010, the ARRL received word that that it is a beneficiary of the Charles and Iona Mathias Joint Trust. Dr Mathias, W8KGD, became a Silent Key in 2008 at the age of 93; Iona, his wife of 62 years, passed away in June 2010. The ARRL is one of five beneficiaries of the Trust that has an estimated value in excess of $8 million. Each beneficiary is scheduled to receive a 20 percent share of the residual after other distributions are completed. The ARRL first learned of the Trust upon Dr Mathias' passing.

"The generosity of Dr and Mrs. Mathias is a shining example of how individuals can make a continuing impact on the organizations that influenced their lives," said ARRL Chief Development Officer Mary Hobart, K1MMH. "The Mathias' generosity to the ARRL during their lifetime -- and through the Charles and Iona Mathias Joint Trust -- is

an example of commitment to the work of the ARRL, even after their passing." Read more here <http://www.arrl.org/news/arrl-receives-1-million-gift-to-the-arrl-endowment> .

==> SUPPORT ARRL: ARRL THANKS DONORS WITH PUBLICATION GIFT CERTIFICATES

The end of 2010 is fast approaching and ARRL is poised to close the books on December 31! Many members wait to make contributions at the end of the year -- these contributions are important to the ARRL funds that are not supported by member dues.

But wait! There's more! When you make a contribution of $30 or more before December 31, you'll receive a complimentary $10 gift certificate* on your next publication sales purchase with the ARRL. You can make your gift on our secure Web site <http://www.arrl.org/donate>, by mail or by phone at 860-594-0397 and we'll send your $10 gift certificate right away.

You may designate your contribution to one or more of the following funds:

- The ARRL Diamond Club <http://www.arrl.org/the-arrl-diamond-club> (to renew your ARRL membership and make a contribution!)
- The Spectrum Defense Fund <http://www.arrl.org/spectrum-defense-fund>
- The Education & Technology Fund <http://www.arrl.org/education-and-technology-fund>
- The Lab Fund
- The Historic Preservation Fund <http://www.arrl.org/historic-preservation-fund>
- The ARRL General Fund.

You may decide to make a monthly credit card contribution of $10 or more on the ARRL Web site to support one of the areas listed above. For more information, contact ARRL Chief Development Officer Mary Hobart, K1MMH, via e-mail <mhobart@arrl.org> or by phone at 860-594-0397. Your year-end contribution is tax deductible to the extent allowed by law. ARRL is an IRS designated 501(c)(3) organization holding tax identification number 06-6000004.

* About ARRL Gift Certificates: After making your contribution of $30 or more, your $10 ARRL Gift Certificate will be promptly mailed to you. Certificates must be redeemed by April 30, 2011. It is easy to redeem your certificate online, by mail or phone. This offer is valid on all sale and regular-priced ARRL publications.

==> + ARRL HEADQUARTERS CLOSED FOR CHRISTMAS, NEW YEAR'S HOLIDAYS

ARRL Headquarters will be closed Friday, December 24 and Friday, December 31 in observance of Christmas and New Year's Day. There will be no W1AW bulletins or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> those days. There will be no ARRL Letter <http://www.arrl.org/arrlletter/> or ARRL Audio News

<http://www.arrl.org/arrl-audio-news> on Thursday, December 23 and 30; both the Letter and Audio News will return on January 6, 2011. We wish everyone a safe and joyful holiday season and a prosperous 2011.

==> SOLAR UPDATE

Tad "The windows are illuminated by the evening Sun <http://www.youtube.com/watch?v=NZtJWJe_K_w>" Cook, K7RA, reports: The average daily sunspot numbers for this week declined more than 7 points from the previous week to 27.6. The solar flux stayed about the same, up less than a point. The predicted planetary A index for the next five days -- December 16-20 -- is 8, 5, 8, 8 and 5. The solar flux for the same days is predicted at 87, 86, 84, 86 and 86. Flux values are expected to meander between 86 and 88 until the end of the month, when they are expected to hit 90 around December 29-January 1. Look for more information -- including information on JHelioviewer, a free visualization program for examining the millions of images from NASA's Solar Dynamics Observatory -- on the ARRL Web site on Friday, December 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Crosby, Stills, Nash and Young's Our House <http://www.youtube.com/watch?v=NZtJWJe_K_w>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEB SITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL Web site. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you use CW on a regular basis?
- If your out-of-warranty transceiver failed, what would you do?
- Do you own a tablet computer?
- Does your ARES® group use the ARRL Public Service Activity Report <http://www.arrl.org/files/file/Public%2520Service/fsd157.pdf> form to document SKYWARN activity?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the March 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- December 17 -- NCCC Sprint Ladder; Russian 160 Meter Contest; AGB-Party Contest
- December 18 -- OK DX RTTY Contest; RAC Winter Contest

- December 18-January 2 -- Lighthouse Christmas Lights QSO Party
- December 18-19 -- Stew Perry Topband Challenge; Croatian CW Contest
- December 19 -- ARRL Rookie Roundup (CW)
<http://www.arrl.org/rookie-roundup>; ARCI Holiday Spirits Homebrew
Sprint
- December 20 -- Run for the Bacon QRP Contest
- December 22 -- SKCC Sprint

Next week and beyond:

- January 1 -- ARRL Straight Key Night
<http://www.arrl.org/straight-key-night>; SARTG New Year RTTY Contest;
AGCW Happy New Year Contest; AGCW VHF/UHF Contest
- January 1-2 -- Original QRP Contest
- January 4 -- ARS Spartan Sprint
- January 7 -- NCCC Sprint Ladder
- January 8 -- Midwinter Contest (CW)
- January 8-9 -- ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>;
North American QSO Party (CW); Michigan QRP January (CW); Contest
Hunting Lions in the Air Contest; EUCW 160 Meter Contest; WW PMC
Contest
- January 9 -- NRAU-Baltic Contest (CW); Midwinter Contest (Phone);
NRAU-Baltic Contest (SSB)
- January 12-13 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1740 - December 17 2010

Amateur Radio Newsline report number 1740 with a release date of
Friday, December 17th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Hawaii are ready as a Pacific storm
hits the island state, a New Brunswick cellphone law could ban amateur
radio mobile operations, the long awaited Jarvis Island DXpedition is
put on hold until November of 2011 and Ohio hams provide the technology
to improve a sheriff's radio system. All this and more on Amateur
Radio Newsline(tm) report number 1740 coming your way right now.

RESCUE RADIO: HAWAII HAMS READY AS PACIFIC STORM HITS

Hams in Hawaii were ready as a major Pacific storm raked itself over
the Island state. Bill Pasternak, WA6ITF, is in the newsroom with
more:

--

(Sound of ham rtadio emcomm operations)

That's the sound of ham radio RACES and SKYWARN operations as a strong
Pacific storm system moved over Hawaii on December 9th and 10th
bringing with it heavy rain, accompanied by thunder and lightning.
According to News reports, worst hit was Oahu and Kauai with gusty
winds taking down trees in several areas.

Ron Hashiro, AH6RH, is the Hawaii State Civil Defense RACES Coordinator
and an accredited SKYWARN member. He explains the system that caused
the severe storm:

--

AH6RH: "What we had was a cold front move through the system and
butting up against some warm air to the South-East. As that storm
front came through it produced a collection of thunder storms and those
were sweeping through Kauai then hiting Oahu and moving toward the
South-East :

--

Hashiro told Newsline that the National Weather Service needed severe
weather spotters all across the Island state and the hams were ready to

respond:

--

AH6RH: "Ray Tanabe, who is WH7IH, is one of our contacts at state Civil Defense asked us to activate SKYWARN so Clem Jung, KH7HO, contacted a number of hams on Oahu and put together a response team and had people scheduled from 6 p.m. on Thursday all the way through Friday evening.
--

According to Hashiro, the ham radio volunteers were both communicators and severe weather spotters:

--

AH6RH: "We (hams) provided radio communications at the National Weathewr Service in Honolulu and a number of hams at their homes or on the road called in weather reports on the tremendous amount of rain, lightning, thunder and the wind conditions. (That's) something that the National Weather Service can't quite pick up on is what is the wind speed on the ground and what is the total amount of lightning that is present in a given area. Therefore weather spotting is a very important part of the collection of information on weather conditions."

--

As hams did their job, Honolulu Fire crews worked to clear what was left of the roof of a plumbing supply company that had been sheared off by the storm. Officials said that the overnight, gusty winds blew open a large warehouse door, and then lifted the roof off. Some 3,000 feet of the roofing material was taken off, with some parts landing several blocks away on the famed Nimitz Highway.

With thanks to former Newsline Production Coordinator Bill Orenstein, KH6QX, for the on the scene audio, I'm Bill Pasternak, WA6ITF, in the newsroom in the City of Angels reporting for the Amateur Radio Newsline.

--

Thanks to the ongoing training that many hams in Hawaii devote themselves to, everyone was ready to handle this latest challenge that Mother Nature brought their way. (ARNewsline(tm) with some audio supplied by KH6QX)

**

RESTRUCTURING: UK GOVERNMENT LOOKING FOR 500 MHZ FOR BROADBAND

The United Kingdom's government is looking 500MHz spectrum and this could spell problems ahead for hams in that nation.

The British newspaper the Register recently carried a story on government plans to reallocate as much as 500 MHz of spectrum for

broadband Internet. The article points out that if large chunks of Ministry of Defense spectrum are sold off, the new owners are unlikely to be willing to share it with others.

The problem for UK hams comes from the fact that all Amateur Radio UHF and Microwave bands are shared with either the Ministry of Defense or the U-K Civil Aviation Authority. If some of the spectrum that gets reallocated happens be shared with radio amateurs, its quite likely that the hams will be forced off those bands.

Those interested can read the entire Register article at tinyurl.com/28ayvzl (Southgate)

**

RESTRUCTURING: NEW MICROWAVE BAND ALLOCATIONS IN SPAIN

Thanks to the efforts of the Spanish amateur radio society the U-R-E, hams in that nation now have access to three new microwave bands. These are 2320 to 2322, 5760 to 5762 and 10368 to 10370 MHz Amateur use of this spectrum has been authorized for a year, however, those intending to use 2320 to 2322 must first inform the nations telecommunications regulator. More on this regulatory change in Spain in Google translated English is on line at tinyurl.com/SpainURE. (URE)

**

RADIO LAW: NEW BRUNSWICK CANADA CELL LAW COULD BAN MONBILE HAM OPEATIONS

The Canadian province of New Brunswick has introduced legislation banning cellular telephone and two way radio use while mobile. Amateur radio Newsline's Norm Seeley, KI7UP, has the details:

--

The measure was introduced in the New Brunswick Legislature on November 24th. Its aim is to control cell phone and any other hand-operated electronic device use while driving. As worded it would prevent radio amateurs from using their mobile radios while in motion.

Now in a letter to Brunswick Minister of Public Safety, Robert Trevors, the national society Radio Amateurs of Canada has taken strong opposition to the proposed law. In its communiqu&#65533; to Trevors, RAC notes that most provinces such as Nova Scotia, Manitoba, British Columbia, Quebec, Newfoundland and Labrador have chosen not to restrict the operation of mobile amateur radio equipment while driving. RAC notes that these governments have recognized the value of amateur radio to their citizens during such emergencies such as floods, dangerous weather and ice storms. Also noted is the support by Canadian hams in support of public events such as Marathons and of emergency relief groups such as the Red Cross and a variety of provincial and municipal agencies across Canada. RAC adds that this support provided by amateur

radio is frequent, freely given and in the highest standard of public service.

The letter goes on to state that hams in New Brunswick regularly and without fail respond to the provinces citizen's needs. This includes helping municipalities fighting flooding along the St. John River. The note ends by warning New Brunswick legislators that eliminating the use of Federally Certified Canadian radio amateurs to use mobile radio equipment will not increase public safety but will decrease it.

The third reading on the bill is expected during the week of at about the time this newscast goes to air. After that the Bill permits the New Brunswick government to proclaim the legislation at a time of its choosing anytime thereafter.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching the events up North from Scottsdale, Arizona.

--

Radio Amateurs of Canada says that it is preferable that any exclusion for Amateur Radio operators occurs in the legislation itself as it has requested. However it notes that there are provisions for a regulated exclusion for radio amateurs under Canadian law. This states that the Lieutenant-Governor in Council may make regulations exempting, with or without conditions, certain classes or types of devices or motor vehicles, or certain classes of persons. Read the latter as referring to Canadian hams. (RAC, VE4BAW)

BREAKING DX NEWS: JARVIS ISLAND OPERATION DELAYED TO NOV 2011

The DXpedition to Jarvis Island organized by Radio Expeditions Inc has been postponed until November 2011. The reasons are complex but boil down to it taking authorities to long to come up with a plan acceptable to all parties and then getting it approved though all the bureaucratic red tape. Once it was in place several groups qualified under it. So more time was spent in holding a lottery to decide which group would be permitted to go.

While Radio Expeditions Inc was fortunate to be the group selected in late August, it soon became apparent that due to all these factors plus scheduling transportation to Jarvis, that it was best for all involved

that the expedition be postponed one year.

November remains the best month to visit Jarvis Island from a propagation standpoint, with the largest combination of openings predicted to Europe on the H-F band. This being the case the new plan is for the operation to take place in November of 2011 with exact dates to be announced. (Radio Expeditions Inc.)

RESCUE RADIO: OHIO HAMS PROVIDE TECHNOLOGY SUPPORT TO IMPROVE COUNTY RADIO SYSTEM

Ham radio operators have volunteered their time and technical expertise to improve communications for the Wood County Sheriff's Office just south of Toledo, Ohio. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the rest of the story:

--

After years of incomplete police radio coverage, the Wood County Sheriff's Office has made some significant communications upgrades.

In many remote areas of the county, deputies' police radios wouldn't work once they got out of their car. That caused them t0 loose contact with dispatchers and other officers. But with a little ingenuity, and some help from ham radio operators, the problem is solved.

"It was scary for me to know that there were times when my deputies went there on a call we had no communication with them, said Wood County Sheriff Mark "That caused a lot of sleepless nights."

Estimates for communications upgrades ran in to the millions. Wood County did not have that kind of money. So the Sheriff turned to amateur radio operators from around the county.

"They looked at our system and came up with a relatively inexpensive fix which was to move antenna situation around the county to much high locations," said Wasylyshyn.

Wood County was able to update the system for just $160,000. Tower space at eight locations around Wood County was donated, from radio towers to water towers. And to make sure deputies could stay in contact anywhere outside, as well as inside buildings, they are putting mobile repeaters in the trunks of cruisers.

I'm Fred Vobbe, W8HDU, reporting from Lima, Ohio.

--

To even further strengthen Wood County's communication system, it has now installed two new propane powered generators for the radio system. That means the county can maintain radio contact with its officers in the field in case of a power outage that could last several days. Up until the generators the battery back-up system would only keep the

county's communication's network going four hours. (W8HDU from published news reports)

**

ENFORCEMENT: CALIFORNIA CB'ER ISSUED NOTICE OF UNLICENSED OPERATION

The FCC's Sam Francisco Field Office has issued a Notice of Unlicensed Operation to Victor M. Coucelos of Anderson, California. This for what the regulatory agency says were violations of its Part 95 Rules governing the Citizens Radio Service.

According to the FCC, it received a complaint of Citizens Band Radio interference in the city of Anderson, California. This past August 24th agents from the San Francisco office confirmed by direction finding techniques that radio signals on 27.085 MHz were emanating from Coucelos residence. Agents also heard Coucelos station transmitting sound effects, language that might be classified as profane, indecent or obscene, and music.

During an inspection on August 25th of Coucelos CB station he was identified as the person responsible for its operation. The inspection revealed that a Galaxy, model DX 2517, transceiver was in use at Coucelos base station, and a model Magnum S-9 Nitro transceiver installed in Coucelos vehicle. These transmitters are not certificated for CB use and Coucelos operation of these transmitters voided his authority to operate his CB station.

During the inspection, the San Francisco agents issued Coucelos a verbal warning that any further operation with these transmitters might subject him to more serious sanctions for engaging in violations of the Part 95 rules.

Coucelos was told that he must cease such violations immediately. If he fails to abide by the FCC edict, he could be re-investigated during FCC enforcement efforts. If such an investigation were to indicate that Coucelos had violated any FCC Rules he could face severe penalties, including a substantial monetary forfeiture, seizure of his radio equipment and criminal sanctions including imprisonment. He was given 15 days from the date of the letter to respond advising what corrective actions hr has taken to eliminate the observed violations of the Commission's Rules. (FCC)

**

RADIO LAW: FCC GRANTS WAIVER FOR TRAIN BREAK RADIO SYSTEM The FCC has granted eight railroads temporary waivers of the power limit for telemetry operations in the 450 to 470 MHz band. Specifically, the waivers to permit the operation of end-of-train ot E-O-T devices with eight watts transmitter output power, pending the resolution of a related rulemaking proceeding. Also granted in the December 3rd decision was a waiver to permit the equipment authorization of E-O-T devices with a transmitter output power of up to eight watts.

For those not aware, end-of-train devices operate on frequency pair 452 and 457.9375 MHz. They transmit information regarding the brake pipe pressure on the rear car to the lead locomotive for display to the locomotive engineer. This in turn allows the engineer to apply the rear train brakes in an emergency. (FCC)

**

HAM HAPPENINGS: PAPERS SOUGHT FOR 2011 SOUTHESTERN VHF SOCIETY CONFERENCE

A call has gone out for papers to be presented at the 15th annual Southeastern VHF Society Conference to be held in Huntsville, Alabama on April 29th and 30th, 2011. Papers and other presentations can be on both the technical or operational aspects of VHF, UHF and Microwave weak signal amateur radio. Contact Steve Kostro by e-mail tp SVHFS2011 (at) downeastmicrowave (dot) com by January 8th if you wish to make a presentation or submit a paper. Deadline for the submission of papers is next March 11th. For further information about the conference please take your web browser to www.svhfs.org. (Southeastern VHF Society)

HAM RADIO IN SPACE: SANASA TO SUPPORT HAM RADIO SPACE PROGRAM

The newly formed South African National Space Agency has announced its intention to champion the amateur radio in space. In response to a question at the agency's launch ceremony press briefing from the South African Radio League, the new space agency's representative stated that the organization will support the amateur radio satellite program and that radio amateurs are part of the plans.

Naledi Pandor is the South African Minister of Science and Technology. She officially launched the South African National Space Agency at a gala event on Thursday December 9th. At that time she said that the new agency will be that nations primary but not its only leader to direct Government's investment in space sciences and technology. Just how the South African National Space Agency will support amateur radio space efforts was not spelled out at the briefing. (SARL)

**

EMERGING TECHNOLOGY: MULTIPLEXED AMATEUR RADIO DTV DOWN UNDER

A group of New Zealand hams have successfully multiplex four digital video and audio streams. On Saturday, December 4th, a group of Wellington and Hutt Valley Radio Amateurs simultaneously multiplexed the four video and audio streams into a single digital television transmission and did so using low cost equipment.

The transmission was centred on 1282 MHz, in accordance with the NZART bandplan. It occupied 1274 to 1290 MHz, the same bandwidth as one analogue FM television transmission. DVB-S modulation format was used and was receivable on an unmodified satellite TV set-top box.

Further development and testing is planned with the aim of transmitting the four video and audio streams within an 8 MHz bandwidth. Thats half the bandwidth used by the initial tests.

The next transmissions will use the DVB-T modulation format. That wil make them receivable on an ordinary Digital terrestrial television receiver of the type sold down-under. (NZART)

**

EMERGING TECHNOLOGY: 100 MW SIGNAL ON 8.970 KHZ HEAR OVER 2873 KM

The low frequency transmissions by DK7FC on 8.970 kHz have been received at a distance of 2873 km by 4X1RF in Haifa, Israel. Reception at these super low frequencies within the human audio hearing range requires ground rod antennas, low noise preamps and sophisticated decoding software. None the less, the fact that DK7FC's 100 milliwatts of effective radiated power was copied and recorded by 4X1RF at this great a distance indicates that transatlantic amateur VLF reception may indeed be possible in the very near future. (VHF Reflector)

**

WORLDBEAT: REPEATER LOCATION GUIDE FOR GREECE NOW IPHONE APP

A directory of amateur repeaters in Greece is now available for iPhone, iPod and IPad users developed by SW1NJX is now available from the iTunes on-line store. This is a free app designed to assist hams living in or traveling through Greece to find the closest VHF or UHF to their current location. You can find it tinyurl.com/grkrpt (SW1NJX)

**

CONTEST CORNER: THE ARRL JANUARY VHF SWEEPSTAKES JANUARY 22 To 24

Turning to radiosporting news, the ARRL January VHF Sweepstakes is set for 1900 UTC on January 22nd to 03:49 UTC on January 24th. This is primarily a weak signal contest aimed mainly at operators who use SSB and CW. Some FM is allowed as long as it's not on a United States national calling frequency or through a repeater.

The required exchange is simply your callsign and the Maidenhead grid square locator you are operating from.

Logs are due no later than 0400 UTC on Wednesday, February 23rd. Paper submissions go to the ARRL January VHF Sweepstakes, 225 Main Street, Newington, Connecticut 06111. Electronic logs must be in Cabrillo format and e-mailed to Januaryvhf (at) arrl (dot) org. (ARRL)

**

DX

In DX, getr ready for Tonga as W6ZL, informs OPDX that he is planning to be active as A35KL rom Foa Island between December 16th to the 20th. His operation will be primarily CW with the possibility of some RTTY and SSB. His gear is an Elecraft K3 radio and verticals on the beach for 80 through 10 meters. He will not have InterNet access there. QSL Logbook of the World or direct to W6ZL, with a SASE or new style IRC.

JE1RXJ, will be on the air as T88RX from Palau between January 21st and the 26th. Activity will be holiday style on 160 to 6 meters using CW and SSB. His emphasis will be on the lower band and CW. QSL via JE1RXJ, direct or by the JA Bureau.

For those of you still needing Bangladesh for your DXCC listen out for S-21-FGC during the period December 16th to the 21st. Several foreign operators will be using this call. QSL is via JH1AJT.

Lastly, JA2EZD will be active from Laos as XWPA from the Vientiane DX Club for another year. His operation will be on the HF bands only. QSL to Hiroo Yonezuka, Box DD153, Huang Sathai, Vientiane, Laos. And that callsign is not a mistake. It is XWPA.

(Above from various DX news sources)

THAT FINAL ITEM: TV RECEIVING ANTENNAS REGAIN POPULARITY

And finally this week, word that over-the-air television antenna sales in the United States are growing dramatically. This as people disconnect from cable and satellite as they rediscover free, over the air TV. Much of it now in true High Definition.

Asked if the popularity will continue, one antenna manufacturer and distributor said yes because 80% of the population doesn't even know you can get over-the-air High Definition TV, but they are finding out.

The same manufacturer added that when you tell people that the same programming is available over the air they look at you like you're crazy. They then say: "You're saying I can actually get free HDTV from an antenna? It's shocking to a lot of people."

As it turns out, the ability of over the air stations to multicast several channels on what used to be one has opened up a a new and growing market for those wanting High Definition Television reception without having to pay a monthly fee. More about the comeback of antennas to tele-viewing in the United States is on line at tinyurl.com/39fhj39. (TV News Check, CGC)

If more people used the notoriously security-riddled OS/2 our country
could climb its way out of recession by the massive influx of
anti-virus programmers into the work force.

40> If more people used the notoriously security-riddled OS/2

Classic pontification. If OS/2 was so security-riddled,
why did banks widely use it for ATMs, miguel?

40> our country
40> could climb its way out of recession by the massive influx of
40> anti-virus programmers into the work force.

Classic erroneous presupposition.
```

Gary L. Burnore writes:

29> Newsgroups: alt.checkmate,alt.usenet.kooks,soc.support.fat-
acceptance,rec.radio.amateur.policy,comp.os.os2.advocacy

29> Says someone who has no reading ability.

What does your classic unsubstantiated and erroneous claim
have to do with OS/2, Burnore?

29> I didn't ask what OS/2 had to do with OS/2.

Irrelevant, given that I never said that you did ask that,
Burnore. Rather, you asked what anything has to do with
OS/2, Burnore, and I answered your question.

29> So now stop posting off topic, ok?

OS/2 is on-topic in an OS/2 newsgroup, Burnore.

30> Newsgroups: alt.checkmate,alt.usenet.kooks,soc.support.fat-
acceptance,rec.radio.amateur.policy,comp.os.os2.advocacy

30> Because it's all there was at the time

Classic unsubstantiated and erroneous claim. If it was all
there was at the time, then OS/2 would have had a 100 percent
market share, but it didn't.

30> and they ran away from it as quickly as they could.

Classic unsubstantiated and erroneous claim. OS/2 remained
in greater use among banks late into it's IBM lifetime.

30> Your logic, as usual, is flawwed.

Classic unsubstantiated and erroneous claim. Ironically,
it's you who has flawed information.

30> It's crap.

Classic unsubstantiated and erroneous claim.

30> You know it.

Classic erroneous presupposition.

30> I know it.

Classic hallucination.

30> We all know it.

Who are you allegedly speaking for when you say "we",
Burnore?

30> OS/2=old news.

Non sequitur. The issue was never the age of the news,
Burnore, but rather the security of OS/2.

224> OS/2 is a delusion, tholen.

Classic delusion on your part, kachina, which is rather ironic,
wouldn't you say?

Gee, Google flagged your posting with:

"Note: The author of this message requested that it not be
archived. This message will be removed from Groups in
6 days (Dec 27, 4:31 am)."

Further evidence that you're a poltroon, kachina, which is rather
ironic.

Shame on our original parents. Adam and Eve. Experienced auto
erotic orgasm. Orgasm, too soon. It was the Garden of Pleasure.

(HaShem wanted to use that virgin, for His son's birth)....

It didn't work out that way.....

"God got mad at them, and told them, put your clothes on, and get
the hell out of here" (Archie Bunker).....
>
> > >> You didn't really mean to do that, did you?

Harry Scott = 64 year old black dude arrested in Florida for trespassing.
Never mind OS/2, what's this got to do with anything? Did eMutt go down with
him?

2> The question is pertinent because eMutt was involved in the Harry
Scott
2> arrest, the subject of the thread.

Your question is irrelevant because you were responding to my
question of kb9rqz, in which he remarked that he never touches
an un-cut cock, Baum. In other words, the Harry Scott arrest
wasn't involved in the sequence of exchanges, therefore your
question is non sequitur.

2> Your OS/2 participation in the Harry
2> Scott thread is non sequitur, Tholen.

Take it up with kb9rqz, who added comp.os.os2.advocacy to the
distribution of the thread, Baum.

OS/2 is a criminally inept operating system. Thus, anything relating
to criminals is related to OS/2.

3> You complained.

On what basis do you call a question about what a posting has
to do with OS/2 a complaint, Baum?

3> I could care less what gets x-posed into AUK.

Then why did you ask what my question of kb9rqz has to do with
eMutt, Baum?

Amateur Radio Newsline(tm) Report 1741 - December 24 2010

Amateur Radio Newsline report number 1741 with a release date of Friday, December 24th 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Region 3 of the International Telecommunications Union nappears poised to back a proposed new ham band near 500 Kilohertz, the FCC's new rules on club station calls take effect on February 14th, Butte Montana hams to be excluded from a new mobile cellphone law and a radio station replaces a city's Christmas tree that's burned down by copper thieves. Find out the details on Amateur Radio Newsline(tm) report number 1741 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: NEW LF HAM BAND ME BE REQUESTED AT WRC 2012

ITU Region 3 will likely back a proposal to create a new, low frequency ham radio allocation near 500 Kilohertz. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

The Asia Pacific Telecommunity or APT is currently hosting a gathering of the regions telecommunications administrations. This is one of a series of meetings intended to develop common positions for all of Region 3 prior to the World Radiocommunication Conference to be held in Geneva in early 2012.

Of particular interest to the amateur community is Agenda Item 1.23. It seeks an allocation of about 15 kHz in parts of the band 415 from 525.6 kHz to the amateur service on a secondary basis. The International Amateur Radio Union Region 3 has representatives as observers at these preparatory meetings. While this particular meeting is not expected to adopt final positions, it is an important step in the process leading to any decisions that will be finalized at WRC 2012 in relation to any new Low Frequency Amateur Service band.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

For those unaware, the Asia Pacific Telecommunity is the regional telecommunication organization that covers all types of electromagnetic communications in ITU Region 3.

(WIA News)

RADIO RULES: NEW CLUB CALL RULES TAKE EFFECT FEBRUARY 14

The new FCC rules governing vanity and club station callsigns will go into effect on February 14, 2011. On Wednesday, December 15, new revised regulations affecting vanity and club station call signs within the Amateur Radio Service were published in the Federal Register meaning they are effective 60 days later.

Thirteen months ago, the FCC announced its intention of modifying Part 97 as it applies to the vanity call sign system and club station call signs, aligning the rules to prior Commission decisions. Last month, the Commission released a Report and Order outlining its decision. Along with the changes to the call sign rules, the FCC also made what it calls certain minor, non-substantive amendments to portions of the Part 97 Amateur Service rules. You can read the entire Report and Order on line at tinyurl.com/2d8kpu5 (FCC, ARRL)

**

RADIO LAW: BUTTE MONTANA TO EXEMPT HAMS FROM CELLPHONE BAN LAW

Butte, Montana, will have a driving while using a cellphone while driving law with a specific exemption for ham radio operators.

According to an article in the December 17th edition of the Montana Standard, County attorney Eileen Joyce has been asked to write cellphone while driving ban. Joyce says she's modeling Butte's ordinance after one already adopted by the city of Billings. That ordinance prohibits a driver from having a cell phone or other similar device in their hand while operating a bicycle, motorcycle, any four-wheeled vehicle and motor vehicles.

Joyce says the soon to be Butte ordinance will not apply to people reporting a health, safety or a police emergency. Nor does it govern the activities of others including to emergency responders, drivers using two-way radios for work and citizens who are federally licensed amateur radio operators.

Joyce says she plans to have the ordinance written in time for the next regular council meeting on January 5th. After it's introduced, the ordinance would be read twice with the final reading as soon as February 2nd. She adds that a public hearing is not planned, but residents can contact their commissioner about it. Those not exempt and found to be in violation would face a $100 fine. You can read more on-line at tinyurl.com/26k9gc6 (Montana Standard, N1TCB)

**

RADIO LAW: CONGRESS PASSES LOCAL COMMUNITY RADIO ACT

The Local Community Radio Act passed the United States Senate on Saturday, December 18th with a unanimous vote of approval

The bill had been held up by various senators, most of whom remained anonymous. However, minor changes inserted in the House version designed to protect incumbent full power FM stations earned the support of the National Association of Broadcasters. This in turn made possible House passage on a voice vote.

The second seal of approval from the Senate had been considered all but a done deal. The bill now awaits President Obama's signature, which he has committed to do. (NAB Smart Brief)

RADIO LAW: RADIO CLUB LOOSES HOME TO NEW UK SCHOOL REGS

Red tape has forced a United Kingdom amateur radio club out of the school it has called home for a decade.

Great Britain's Halifax and District Amateur Radio Society has trained new hams and operated from a physics lab at Rishworth School for the last 10 years. Now it is set to become homeless as the Ripponden Boarding School is forced to tighten security in line with child welfare regulations.

School Headmaster Richard Baker said the decision was made to comply with the National Minimum Standards for Boarding Schools and the Independent Schools Inspectorate regulations. He said that regulations governing child welfare can make it difficult for a school to manage certain situations in which outsiders use the premises. At the same time he must ensure the school remains fully compliant with regulatory requirements.

Society chairman Martin Cox described the move as over-zealous, but added that he did not blame the school. Instead, the group is appealing to local businesses or groups who may be able to offer it a new home.

There are around 60 licensed radio amateurs in the Halifax and Calderdale area. Many are part of the U-K disaster response organization known as RAYNET. RAYNET is similar to the United States ARES and RACES organizations, combined. (RSGB, Southgate)

RESCUE RADIO: OLD ELT SAVES COUPLE ON YACHT AND GETS THEM FINED

A couple rescued by Australian emergency services has been fined almost $1,000 by regional police for not having the correct emergency equipment on their yacht.

The 62 year-old woman and a 71 year-old man made it back safely to Port Pirie in Southern Australia after their boat was battered by storms. The unregistered yacht's navigation devices were damaged while sailing in the Spencer Gulf and the couple were not carrying any flares. However they managed to contact police using an outdated distress radio beacon.

Police say the fines serve as a warning to other boat owners to have the proper safety equipment on board. The Southern Australia Transport Department has been informed and may take further action against the skipper. (WIA News)

HAM RADIO IN PRINT: OFF THE GRID NEWS RECOMMENDS HAM RADIO

Ham radio is being feature in the current issue of the e-zine Off Thre Grid News. According to an op-ed article, by David M Hill, Sr., W4DMH, people often ask him what the best option is for off-grid communication is.

Hill responds by saying that to him, there is only one answer to this question that makes sense to him. That being what he calls the wonderful world of amateur radio or ham radio.

Hill goes on to note that ham radio is the only legal form of two-way radio that you can get involved in that will provide you with all levels of communication ability. He says that no other radio service can provide all of this to you, and it's very simple to get involved in ham radio today.

This very charming and informative article can be read by taking your web browser to tinyurl.com/hamfun (Via e-mail)

**

HAM RADIO ON HE WWW: TWO NEW IPHONE APS FOR HAMS ON THE GO

Amateur radio enthusiasts who travel to the U-K and own an iPhone may find two new applications or apps from Mark Turner, G7LEU very useful. First is Ham Dashboard which is designed for hams on the move or away from home.

Ham Dashboard shows a searchable list of repeaters in the UK and Ireland, along with details of input and output frequencies, a map, and a handy bearing arrow for each system. It also includes a basic APRS tracker that allows your position to be sent to the APRS-IS network. You find this one at the iTunes store at tinyurl.com/2af5rsg.

Meantime Ham Tracker allows radio amateurs on the move to send location updates to the Internet side of APRS from their mobile device. Once sent, your position can be tracked using services such as aprs dot fi. Using Ham Tracker makes it easy to send an email containing an aprs dot fi tracking link for your callsign or a map link showing your current location. This one is also at the iTunes store at tinyurl.com/2c8f4uw. More details and screen shots of botg aps are on line at www dot kramstuff dot com. (G7LEU)

BROKEN TECHNOLOGY: CRACKED DROID FACEPLATE INJURES CELLPHONE USER

And now the strange story of another self destructing cellular smart phone. Jim Meachen, ZL2BHF, has the details:

--

A north Texas man talking on his cell phone was rushed to a hospital after thedisplay on his phone apparently exploded on Thursday morning, December 2nd. According to news reports, man said he had just finished a call when he said he heard a loud popping noise followed by blood trickling down his face.

His ear was bleeding profusely and he was transported to the emergency room at Parkland Memorial Hospital in Dallas. There he received four stitches but suffered no hearing loss.

Later on inspection it was found that the glass faceplate on the LCD display of the two day old Motorola Droid smart phone apparently shattered. The phone still appeared to be functioning and its battery was intact.

On Thursday evening, Motorola issued at statement non what had transpired. It said - and we quote: "Motorola's priority is, and always has been the safety of our customers, and all Motorola products are designed, manufactured and tested to meet or exceed international and local standards for consumer safety. We will reach out to the consumer and investigate this thoroughly."

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting.

--

While an self destructing L-C-D displays on a cellular phone is a rare occurrence, it is not unique. Thankfully, most such accidents happen when the phone is in charging mode rather than in use. (KHOU, WFAA, other reports)

NAMES IN THE NEWS: W7EQI TO CHAIR HOUSE ENERGY AND COMMUNICTIONS

United States Representative Greg Walden, W7EQI, of Oregon used Morse code when he tweeted the news to his followers on Twitter that he had been named Chairman of the House Energy and Commerce Committee's

Subcommittee on Communications and Technology.

The full text of Walden's Twitter message read - and we quote: "Will chair comm and tech sub 73s w7eqi"

In a follow-up message Walden explained that hisst tweet was Morse code and that it was just the ham radio operator in him having fun.

Walden is one of two ham radio operators in Congress. The other is Rep. Mike Ross, WD5DVR from Arkansas.

Among other things, the subcommittee Walden will chair has responsibilities that include oversight of the FCC. (Worldradio OnLine Bulletin)

NAMES IN THE NEWS: DUB CHARMAN G6CJ AERIAL CIRCUS NOW ON VIDEO

If you are in need of an interesting program for your next radio club meeting, listen up. The British Amateur Television Club has made available on-line a historic video of Dud Charman, G6CJ, and his world famous Aerial Circus.

Dud Charman G6CJ was the United Kingdom's antenna guru for amateur radio aerials. There was nothing Dud did not know about the subject anf it was this knowledge that was used to bring the subject to life in a lecture known as The Aerial Circus.

The very last time G6CJ performed this lecture was in 1981. The Bristol ATV group recorded it using an early Ampex video recorder. Later, with a little help from broadcaster HTV, it was copied and edited to 1" Type C and then vaulted to preserve its historic value

This very interesting piece of ham radio history has been in the British Amateur Television Club archive since the 1980's. Now it has been made available for public showing. To watch it online go to www.batc.tv and click on the "Archive" icon. Then select Dud Charman which is near the bottom of the drop down list.

A copy of the video in Adobe Flash format can also be downloaded at tinyurl.com/22q5pvc (Southgate)

**

NAMES IN THE NEWS: THE TED RANDALL WB8PUM CHRISTMAS HAM RADIO SHOW

And if you are hearing this before Christmas, then you might want to know that Ted Randall, WB8PUM, will be hosting an international radio show on the evening of Christmas Day and you can be part of it.

Ted has set up a special phone line for ARRL Public Information Officers, clubs and individuals to call in and leave their season's greetings. You can call in through Christmas Day. These will be played during the broadcast.

The number is area code 615-547-9520. Just call in and leave your greeting for broadcast during the show that will air live on WBCQ on 7.415 MHz and WTWW on 9.480 from 8 p.m to 2 a.m. Eastern Standard time. It will also be live streamed on iTunes as well. Look for more information on line at www.tedrandall.com. (Various)

**

BREAK 2

EMERGING TECHNOLOGY: HAM DESIGNS STEALTH RADIO ANTENNA FOR NEW CAMARO

The 2011 Chevrolet Camaro Convertible boasts new AM/FM antenna technology developed by a Michigan ham radio operator and his non-ham design partner.

Supporters of the vehicle spoke out negatively after leaked photos of the new Camaro revealed an AM/FM whip antenna on the rear deck lid. So General Motors turned to ham radio operator and antenna expert Don Hibbard, W8BDH, to help redesign the car's antenna system.

Hibbard and colleague Gregg Kittinger were challenged to conceal the AM/FM antenna without sacrificing radio reception. After much research they came up with a new tri-band antenna design mounted inside the cars trunk airflow spoiler. More on how this was accomplished is on-line at tinyurl.com/29pqgn2. (C-Net, Auto Design News, Others)

**

EMERGING TECHNOLOGY: FIRST MEASUREMENTS MADE OF MAGNETIC FIELD IN EARTHS CORE

A University of California at Berkeley geophysicist has made the first-ever measurement of the strength of the magnetic field inside Earth's core at 1,800 miles underground.

Bruce A. Buffett, professor of earth and planetary science at UC Berkeley is the study's author. He found that the magnetic field strength is 25 Gauss, or 50 times stronger than the magnetic field at the surface that makes compass needles align north-south. Though this number is in the middle of the range geophysicists predict, it puts constraints on the identity of the heat sources in the core that keep the planets internal dynamo running to maintain this magnetic field.

Professor Buffett indicates that the result is not controversial, but do rule out a very weak magnetic field and argues against a very strong one. Buffett says that a weak field of 5 Gauss or so would imply that

little heat is being supplied by radioactive decay. On the other hand a strong field on the order of 100 Gauss, would imply a large contribution from radioactive decay.

The results are published in the December 16th issue of the journal Naturewith excerpts in Science Daily. More on this fascinating research can be found at tinyurl.com/2eh9n42. (Science Daily)

**

EMERGING TECHNOLOGY: IBM DEVELOPS NEW CMOS TECHNOLOGY

Researchers at IBM have unveiled a chip technology called CMOS Integrated Silicon Nanophotonics, integrating electrical and optical devices on the same piece of silicon.

According to IBM, this means computer chips will be able to communicate using pulses of light instead of electrical signals, boosting power efficiency and speed, while miniaturizing the chips themselves. IBM claims this new CMOS technology provides at least a ten fold improvement in integration density than is feasible with current manufacturing techniques.

For more information please take your web browser to inyurl.com/29tr3na. (ZL1GWE)

HAM RADIO IN SPACE: STRAIGHT KEY NIGHT ON OSCAR 2011

Amsat says that you are cordially invited to participate in Straight Key Night on OSCAR 2011. There are no rules, no scoring and no logs required. Just operate Morse on any OSCAR satellite using a straight hand key, from 0000 UTC to 2400 UTC on January 1st. This, while working as many Straight Key Night stations as you can find.

In keeping with the friendly nature of this event, each participant is asked to nominate one of the operators worked for "Best Fist." Please send your nomination to via email to w2rs (at) amsat (dot) org. Those nominated will be recognized in an Amsat News Service bulletin to be published in early February, and also in an upcoming issue of the AMSAT Journal.

This year's event is dedicated to the memory of Dick Peacock, W2GFF, who became a Silent Key in 2010 at age 91. (ANS)

**

DXCC UPDATE: TWO NEW OPERATIONS APPROVED

Bill Moore, NC1L, the ARRL Awards Branch Manager, reports that two more operations hve been approved for DXCC credit. These are the 7Z1HB from Saudi Arabia that began in 2007 and continues to the present. The other is the H40HP Temotu Provinceo peration that took place in 2009.

Moore says that if you had these operations rejected in a recent application, please send an E-mail to the ARRL DXCC Desk. You likely will not get a direct response but updated results will appear in Logbook of The World accounts, as well as online on the daily listings. (ARRL)

**

DX

In DX, DG1FK and DK9FN will be active from the rare DXCC entity of Temotu from December 21st through January 3rd. They will use the calls H40FK and H40FN from the island of Nendo. QSL this one as directed on the air

DL5RMH will be active portable TG9 from Guatemala City through January 13th. Activity will be CW only on 40 through 10 meters with preference given to 30 meters. QSL cards should be sent via bureau or direct to his home callsign.

G7BXU is on the air as 9L1BXU from Freetown in Sierra Leone from until January 7th. He is using a FT-897 and a G5RV antenna. QSL via G7BXU.

AB7FS is on the air as E51AND from Rarotonga. He will be on the island through January 1st. QSL via home callsign.

ZS1HF stroke ZS8M on Marion Island is partially QRT for a while until he finds a way around some e electronic interference from the new base. He thinks it may be from the fire alarm system and the air handling units. Once switched on, they cause severe broad band interference, preventing successful HF operations, even on the commercial frequencies.

Lastly, K8LJG will be active stroke 4 from Amelia Island until January 4th. He will operate SSB and CW on or around the Islands on the Air frequencies. Again, QSL this one via his home call.

(Above from various DX news sources)

THAT FINAL ITEM: RADIO STATION REPLACES BURNED DOWN CITY CHRISTMAS TREE

And finally this week, when thieves attempting to steal wire accidentally burned down Birmingham, Alabama's official Christmas Tree, it was radio to the rescue. Amateur Radio Newsline's David Black, KB4KCH, is at the South-East bureau with the details on this holiday helping hand and he has them in holiday rhyme:

--

It was ten nights before Christmas, and all through the city, lights, trees and decorations were looking very pretty.

The city's 35-foot tree stood proudly in the park.... But evil grinches struck while it was still dark.

The bandits noticed copper attached to insulation made of plastic; If they could get the copper separated from that stuff, they thought it would be fantastic.

They used gasoline to try get to their coveted wire, Instead, by mistake, they wound up starting a fire.

In their haste to make off with copper that's worth quite a bit per pound, the 75-hundred dollar tree wound up burning to the ground.

The situation was anything but funny, especially since the city had no tree replacement money.

But this is not a story that is all sad. A Birmingham Radio Station vowed, the city would not be had.

Radio station KISS-98.7 said we'll bring the city residents some glee. We'll do it, they said, by getting a new tree.

--

Kori White: "Christmas is something that's held so sacred to so many people and that's one symbol we are not going to let anybody take away."

--

Kori White is the radio station's operations manager. He helped arrange finding a replacement tree and having it delivered less than 12 hours after the first tree had burned.

--

Kori White: " When the tree rolled up, there were some individuals in the park and this lady ran up to me and she said: `Are you guys going to put the Christmas Tree back up?'

And I said: "Of coarse, there it is right there."

And she just started crying."

--

People could ask why even bother getting a new tree? Why deal with it?

But White says this is Christmas, and he wouldn't hear it.

--

Kori White: "Everybody is excited that we were able to do it and do it so quickly because a lot of times you have companies and governments that get caught so much in the bureaucracy that nothing is going to happen. We said: `Forget about it. We are just going make it happen.'

"No matter the cost. No matter what we need to do, we were going to put this joy back into the city of Birmingham. And that's exactly what we did."

--

For a time, this copper caper might have left residents feeling in a pinch. But in Birmingham at Christmas, being a grinch is no cinch.

>From Birmingham, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Yet another case where radio creates joy from sadness and gives that happiness freely to an entire community. (RW, ARNewsline(tm))

For many years I parked wherever I wanted (except tow away zones) by putting a fake license plate on my vehicle. (I bought it in a garage sale here in Oregon) The tickets would go to never-never land. I was living in the Bay Area down in California. At one time, I was considering wall papering my whole bedroom in uncolletable parking tickets....:^) They are just another way that government has of collecting taxes from people unfairly. It is your duty to cheat them as much as you can.

More and more...

http://mt-shortwave.blogspot.com/2010/06/radios-confiscated-in-zimbabwe.html

Radios confiscated in Zimbabwe

Report: Radios used to listen to VOA Studio 7 confiscated in Zimbabwe

Tony Saxon: "Zanu (PF) supporters and self-styled war veterans here
are reportedly moving door-to-door here in an effort to prevent people
listening to foreign radio broadcasts by confiscating their radios.
The people from Buhera said the move was to force people not to listen
to the radio reports on constitution making process that is expected
to begin next week. An [opposition] MDC T councillor Tapiwa Ngorima
said: 'All those listening to radio stations broadcasting from outside
the country are being told they will be identified, because they are
accused of influencing others to support the MDC in the area.' He said
there were some incidents reported to police in Buhera but there have
been no any arrests made so far. 'We have cases where our supporters
lost their radios after the Zanu (PF) and war veterans accused them of
listening to Studio 7. Their radios were forcibly confiscated. We have
made reports to the police in Buhera but nothing was done to bring the
perpetrators to book,' said the councillor. Studio 7 is broadcast
through the Short Wave from Voice of America."
(The Zimbabwean, June 2, 2010 via Kim Elliott)

Apart from being the most security riddled OS that was ever coded,
OS/2 is indistinguishable in all respects from raw sewage. 9 out of 10
scientists agree, tholen.

Legal FCC-approved (federally-approved unmodified 70 centimeter ham
radios transmit on public service frequencies straight out of the box
directly from the factory or store.

Because under FEDERAL law, they are shared frequencies.

They are the SAME frequencies.

So the strupid idiotcops have absolutely NO business arresting,
fining, and jaiing hams just because their radios can transmit on
their police frequencies.

For a cop to do so, confiscate a scanner, when the scanner owner has not met
requirements constitutes only a minor misdemeanor.
Licensed Ham ops are allowed to have scanners and Ham rigs that can receive
pub service frequencies.
No Ham is allowed to TX on public service frequencies with his or her Ham
rig even if it can transmit there.
And, dumbass...most cops won't or don't have the knowledge to see or
determine if the radio in the car of a "pullover" can transmit on their
frequencies.
You are a Troll.
You should be ignored.

Actually, they can. Police and fire emergency services have priority.
If it is deemed that the ham operator is causing interference to the
communications, then he can be charged.

Even though 420 - 450mhz is shared, an actual specific frequency might not
be.

Just because that radio can transmit on any particular frequency out of the
box, doesn't mean you have the legal right to do so.

If your radio is capable of transmitting on public service channels, and
you do so, you are violating the law. For one, to do so you need to be
authorized and have a license for that frequency.

Kentucky law, e.g., says that a scanning radio can be confiscated IF that
radio transmits on public service channels. The exception being, a licensed
amateur radio operator.

Note the word IF. This does not mean the cop can legally take your betty bearcat scanner.

Actually NO, the LEO can NOT enforce FCC Rules and Regulations, in the
senerio above, and should he/she try, they can be prosecuted for
exceeding their Authority. An FCC Agent can investigate such violations
of said FCC Rules and Regulations, inspect Licensed Stations, and seal
Radio Gear in the OFF, non-powered State, Request to inspect a
non-licensed Station, but can NOT enter that location if the REQUEST is
refused by the OWNER of the Land or Building. FCC Agents are NOT able to
Confiscate, or Arrest ANYONE for such violations. If they need "muscle"
to do the later, then on Land they go get the local US Marshal, and on
water they go grab the local USCG Officer, who CAN, and Will make those

things happen, when the FCC Agent has made the case. Lots of LEOs think that they can do these things, but when they get into a court of Law, they find their case thrown out due to the above stated lack of jurisdiction, and if the fellow so arrested, has a Good and Smart Mouthpiece, can actually get significant DAMAGES from the LEOs government. I have dealt with such cases, and invariably, the thing gets resolved by the local Prosecutor, long before they ever get in front of the Judge, because he, if he is smart, researches the Federal Statutes, and reams out the LEO, BIG TIME, and tries to quietly make the whole thing GO AWAY..... if he isn't all that smart, then he gets his ass handed to him in Court, by the defendants smarter Mouthpiece, and if the Judge goes along with the local guys, the whole case gets overturned on appeal, when they get to a REAL court of LAW with a Judge who follows the LAW.....

Actually, they are NOT the same frequencies.

Radios designed for 70cm amateur use are normally limited to transmitting
between 420-450 Mhz, and for most FM radios, 440-450 Mhz (the FM segment).
While they can be modified, they are not normally able to transmit out of
the amateur band without modification.

420-450 Mhz is allocated to amateur radio on a secondary basis, and to
radiolocation (ie: radar) on a primary basis.

In some areas of the country (north of "line A", ~50 miles south of the
Canadian border), and (east of "line C", along the eastern edge of Alaska,
~50 miles west of the Canadian border), 420-430 Mhz has been removed from
the amateur service, and may be reallocated to land mobile use, subject
to coordination with Canada.

47 CFR 2.106 footnote US230 indicates that certain segments in the 420-430
Mhz band are allocated to land mobile service for non-federal uses within
50 miles of Detroit MI, Buffalo NY, and Cleveland OH, which are along, or
very close to, the Canadian border.

So, if you are using a unmodified FM radio built for part 97 amateur use,
it probably will not transmit on 420-430 Mhz by default, which is the
only segment that is reallocated. Since the segment is reallocated, not
shared, there is no shared use.

However, there is nothing in the FCC regulations that would prevent a
amateur radio operator from using a radio built for part 90 land mobile

service on the amateur bands, and such radios are capable of being
programmed for frequencies shared with public safety. After all, they are
the same general type of radios used by public safety agencies.

It is the responsibility of the licensee to adhere to the conditions
of their license.

Very true.. The FCC takes a very dim view of local law enforcement
attempting to enforce laws relating to telecommnications, over which
the locals have no jurisdiction whatsoever.

Still, interfering (deliberately or not) with public service units such as fire and police are criminal acts punishable usually by state law.

Do not the FCC rules and regs also state that when a public service unit has been issued a license to operate on that shared frequency that said unit has priority over amateur radio service?

http://www.myvalleynews.com/story/47559/

Scroll down aways and you'll find a paragraph that states, she was issued a
license to operate on "Adjacent" frequencies, but not on actual police
frequencies.

If she bought a radio that was capable of transmitting on known assigned
police frequencies, then that radio should be banned as being illegal.
As it permits transmissions outside of the allotted frequencies.

Does having a radio that has voice and code capabilities give you the legal
right to transmit voice on code only frequencies?
Your viewpoint says yes.

http://forums.qrz.com/showthread.php?t=32203

So you're going to continue stating your belief the amateur radio operator
is always the winner?
As you can see, the FCC can yank your license if they want to.

Amateur Radio Newsline(tm) Report 1742 - December 31 2010

Amateur Radio Newsline report number 1742 with a release date of
Friday, December 31st 2010 to follow in 5-4-3-2-1.

The following is a Q-S-T. Kids Day goes International as Germany
climbs on board this twice a year youth involvement program; hams in
Iceland get a new allocation at 5 Megahertz; amateur radio vying for
spectrum with national broadcaster in India and a new way to rate boat
anchor beauty. Find out the details on this New Years Eve Amateur
Radio Newsline(tm) report number 1742 coming your way right now.

(Billboard Cart Here)

**

WORLDBEAT: KIDS DAY GOES INTERNATIONAL AS GERMANY JOINS THE EVENT

Kids Day has gone international. This with word that the Deutscher
Amateur Radio Club which is Germany's national amateur radio society is
supporting Kids Day on Sunday, January 2nd.

As most of you know, Kids Day is an on-air event conceived by Larry
"Tree" Tyree, N6TR, and Oregon's Boring Amateur Radio Club. Its
purpose is to encourage young people to have fun with Amateur Radio.
This, by giving members of the younger set some on-the-air experience
and in doing so to hopefully foster interest in these kids getting
licenses of their own. It is also intended to give older hams a chance
to share their station and love for amateur radio with their children
and those in their local neighborhoods. According to Tyree, this
decision by the DARC to expand Kids Day internationally is a good one
for the future of amateur radio:

--

N6TR: "Originally when I set out on this my goal was very modest which
was if there is one additional radio ham that comes out of this
(program) I'll consider it a success. Now, its likely grown beyond that
and to see it spread to other countries makes me feel good."
--

The complete Deutscher Amateur Radio Club press release can be seen in
Google English at tinyurl.com/38bkqf4. More about Kids Day and how to
take part can be found at www dot arrl dot org stroke kids-day. And if
you missed taking part in this first Kids Day of 2011, don't worry. You
will get a second chance to share ham radio with youngsters in your

area on Saturday, June 18th.

(DARC, Southgate, ARNewsline)

RESCUE RADIO: AMATEUR RADIO PRAISED FOR ASSISTING IN NEVADA FLOODS

This is Don Carlson, KQ6FM - Nevada Section EC in Reno, Nevada with some breaking news.

On December 21, Southern Nevada was inundated with heavy rains, high winds and mountain snow, which caused a number of weather-related outages and situations in the area. These included flooding in the town of Mesquite, minor flooding around the greater Las Vegas area, and a massive power outage to the Mt. Charleston area which forced evacuations. Amateur Radio Emergency Services in Southern Nevada was there providing information and backup communications during this time, under the direction of District Emergency Coordinator Glenn Hale, KB7REO and Clark County EC Bill Smith, W7HMV.

More than a dozen operators took part in the efforts, as they gave up valuable holiday time to serve their community. The communications efforts were aided by a statewide IRLP/Echolink "intercom" which allowed traffic and information to be passed around the state, thanks to NARRI dot org and Kent Johnson, W7AOR who provided us with a wonderful system to accomplish this.

According to an article in the Las Vegas Sun, Amateur radio received high praise from the director of emergency planning for the state, as he briefed Gov. Elect Brian Sandoval of the situation. He said that Amateur Radio was right on the mark, and that we provided tremendous information to the state who apparently monitored Amateur Radio frequencies and traffic being passed in and out of Clark County. According to the article, officials also noted that Amateur Radio operators are important to everyone with a presence at county EOC's. They were very grateful to Amateur Radio for once again providing a great service to the state and communities during times of disaster.

Reporting from Reno Nevada, this is Don Carlson, KQ6FM -Nevada Section Emergency Coordinator. Now back to Don Wilbanks, AE5DW for more of this week's Amateur Radio Newsline. (Nevada ARES, Las Vegas Sun)

**

RESTRUCTURING: HAMS IN ICELAND GET 5.36-5.41MHZ PLUS 500 KHZ AND 70 MHZ EXTENSION

The national association of Icelandic Radio Amateurs has announced that continued access for Icelandic ham radio licensees has been secured on the 500 kHz, 5 MHz and 70 MHz bands. In a letter from the nations Department of Post and Telecom Administration dated December 13th, 2010, access to the 500 kHz and 70 MHz bands previously granted last February 19th and to the 5 MHz band granted on January 1st, 2008 has

been extended for two years, to December 31, 2012. All were due to expire on December 31, 2010. . Privileges and access to 500 kHz and 70 MHz remains unchanged but the grant at 5 MHz is a major improvement to what hams in Iceland have had to live with. This is because the 150 kHz in the 5360 to 5410 kHz band replaces eight fixed channels permitted up to now. The only negative is that the maximum power allowed on 5 MHz was reduced from 200 to 100 watts. Permissible modes in that spectrum are Morse along with Upper Sideband at a maximum bandwidth is 3 kHz. (TF2JB)

**

RESTRUCTURING: THE AMATEUR RADIO SOCIETY VS ALL INDIA RADIO

Telecommunications interests in India, including ham radio have been meeting to decide who should be allotted what frequency bands in that nation According to an article in India's Daily News & Analysis on-line technical newspaper, the meeting are a part of the ongoing talks on the revised National Frequency Allocation Plan or N-F-A-P for the next decade.

Among those crossing each others' path are Amateur Radio Society of India and state-owned All India Radio. In a meeting held in November, it was decided that the proposal of the Amateur Radio Society of India for some frequency bands shall be examined as per the International Telecommunications Union Regulations, and that views of All India Radio must be considered as well. Exactly what issues exist between the two was not spelled out in the news article.

India's Department of Telecommunications is targeting sometime in 2012 to put in place the new National Frequency Allocation Plan. This, as per the requirements of the industry and technological developments. Currently, government agencies and companies across all sectors are following a national plan that was put into place back in 2008. (IDN)

**

HAM HAPPENINGS: ARRL WORKING TO UPGRADE LOTW FOR VUCC

The ARRL Logbook of the World web page noted on Dec 22nd that VUCC support is being installed and tested. When this upgrade is implemented, amateurs will be able to use Logbook of the World to apply for awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award. But its not ready for general use yet. You will have to await official word from the ARRL as to when this service will come on line. (ARRL)

**

HAM RADIO IN SPACE: SUMBANDILLA HAM RADIO SATELLITE OFF THE AIR AGAIN

South Africa's Sumbandilla ham radio satellite is off the air again. ZR1CBC reports that the flash boot memory of a controller on was likely corrupted by a solar radiation event. It does not affect satellite

overall health but prevents activation of the amateur radio repeater, as the particular script detects an anomaly and aborts.

This is the same problem that occurred in October of 2009 and was corrected. However, the fix requires time consuming effort, which cannot be accomplished immediately. Because of this SO-67 repeater activations are therefore suspended. Controllers say that they hope to return Sunbandilla to normal operations sometime in January. We will have more ham radio spave related news later on in this week's Amateur Radio Newwsline report. (ANS, ZR1CBC)

**

BREAK 1

Wishing you a happy new years, from the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W9ELK repeater serving Elkhorn Wisconsin.

(5 sec pause here)

**

ON THE NET: NEW OWNER OF LOS ANGELES W6NUT REPEATER INTERVIEWED ON THE RAIN REPORT

The 147.435 Mhz W6NUT repeater in Los Angeles has yet another new owner. Her name is Christina Holzschuh, KE6RRI, and in an exclusive interview with the Chicago based Radio Amateur Information Network, she talks about her philosophy in regard to managing this ever controversial system:

--

KE6RRI: "As I said when it came out on the repeater, I am not here to change the repeater or to change you because .435 is really a psychology. It's a unique type of psychology that makes it work. And if I try to get in there and make all of thyese changes it will cease to work. That's not what I am attempting to do.

"I don't think that there has been a female owner of this repeater. I'm interested in my own thinking how will this work with men relating to a woman who is the repeater owner. How are they going to relate to me other than your standard slander, name calling? How are they going to relate to me giving them maybe a down time?

"I like to refer to them as down times. You know if I find that someone is jamming to much, Ill like to temper that and Ill just say Ill give you a down time for an hour, and you know to go ahead and get yourself some coffee and something to eat, Then you can come back and resume your conversation without jamming.

"I find that's most effective in that it does not put them on the defensive where they feel like they have to come at me with vulgarities

and bad words, so as to speak."

--

You can hear the entire interview between Hap Holly, KC9RP and Christina Holzschuh, KE6RRI, this week and next on the Rain Report. Just take your web browser to www.therainreport.com to listen in real time or to download the audio file for replay at a later date. (RAIN)

**

ENFORCEMENT: FCC RULES FORCE CANCELLATION OF WWTM FINE

It appears as if the FCC gave an early present to R&B Communications which is the licensee of WWTM-AM in Decatur, Alabama. This, as it cancels a $7,000 fine and instead admonished R&B for operating after its license had expired.

The case began in January 2007 when the FCC approved WWTM's license renewal application. But in April the agency fined the station $7,000 for not filing the application on time and operating the station without authorization. The renewal should have been filed by December 2003, four months before WWTM's license expired on April 1, 2004.

The agency said the renewal application wasn't actually filed until March 24, 2005. That was after the Media Bureau wrote to R&B indicating that WWTM's license had expired and that authority to operate the station had been terminated. Also that WWTM's call letters being deleted from the commission's database.

R&B told the commission its late filing was inadvertent and that it couldn't pay the fine. However, under the FCC's own rules, if the violations occurred more than a year before the fine was imposed, the fine must be cancelled. That was the case here and that's why the agency cancelled the fine and admonished R&B instead. (FCC)

**

ENFORCEMENT: FCC REDUCES UNLICENSED BROADCASTER FINE TO $750

A Christmas present of sorts from the FCC to a south Florida unlicensed radio operator. This as the regulatory agency orders Adilson Alves de Almeida of Boca Raton Florida to pay a $750 fine. But it could have cost de Almeida $20,000 until he proved the amount would be a financial burden that he could not pay. We have more in this report,

--

The story goes back to December 6, 2006. In response to a complaint of interference from an authorized government user, agents from the Enforcement Bureaus Miami Office investigated the unlicensed radio activity in the Boca Raton. On that date and two subsequent dates the agents monitored transmissions on the frequencies 294.080 MHz, 296.550 MHz, and 294.023 MHz, respectively. The agents, using

direction-finding techniques, located each of these transmissions to Mr. de Almeidas residence in Boca Raton and determined that the field strengths of these transmissions exceeded the limits for unlicensed operation under Part 15 of the Commissions Rules.

On April 19, 2007, the Miami Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to de Almeida for operation of a radio transmitter without a license. de Almeida submitted a response requesting cancellation of the forfeiture, based on his removal of the Yagi-type antenna from his roof, expressing regret, and giving his assurance that radio interference would not happen again.

But it did happen again and on September 15, 2008, in response to another complaint of interference from an authorized government user, agents from the Miami Office again investigated unlicensed radio activity in the Boca Raton area. Once again, using direction-finding techniques, they located the transmissions to de Almeidas residence in Boca Raton. That same day, agents inspected de Almeidas station and found an Alinco transceiver that was programmed to operate on 297.235 MHz.

On September 25, 2008, the Miami Office issued a second Notice of Apparent Liability for Forfeiture in the amount of $20,000 to de Almeida for operation of a radio transmitter without a license. de Almeida submitted a response to the Second N-A-L requesting cancellation of the forfeiture based on his claim that he did not operate a radio transmitter on an unlicensed basis and his inability to pay the proposed forfeiture. He also submitted his three most recent years of tax returns to substantiate his claim.

In analyzing a financial hardship claim, the Commission has determined that, in general, an entities gross revenues are the best indicator of its ability to pay a forfeiture. As such, it reached a decision that a fine of at least $750 was warranted based solely on de Almeida's lack of income and the fact that he is a dependent of his son.

For the amateur Radio Newsline, Im Bill Pasternak, WA6ITF, reporting from Los Angeles.

--

de Almeida was given the customary 30 days to pay the fine or to file a further appeal. (FCC)

**

RADIO LAW: FCC PASES NET NEUTRALITY MEASURE

The Federal Communications Commission on Tuesday, December 21st voted to regulate the speed of Internet traffic. This, as the Commissioners voted on a proposal from FCC Chairman Julius Genachowski to prevent wireline broadband providers from controlling bandwidth-heavy users.

The 3 to 2 vote was down party lines, as expected, with support from the Democratic members and dissent from the two Republicans. The rules require all broadband providers to publicly disclose network management practices, restrict broadband providers from blocking Internet content and applications, and bar fixed broadband providers from engaging in unreasonable discrimination in transmitting lawful network traffic, the commission's announcement said.

Democrats and Republicans have fought over network neutrality for several years. Democrats contend it preserves an open Internet. Republicans contend it regulates the Internet unnecessarily. FCC Chairman Julius Genachowski said the rules represented a compromise because they allow usage-based pricing. The two commission Republicans nonetheless submitted stinging assessment for the record.

Reaction in the telecommunications industry has been generally negative to the FCC's Net Neutrality decision. The National Journal's David Hatch is reporting that Verizon's attorney's are gearing up for a lawsuit. Meantime, Broadcasting & Cable Magazine's John Eggerton reports that lawmakers are fixing to call the FCC to the carpet over its decision in this matter. It should be noted that these same rules would not be applied to wireless providers. (FCC, Published reports)

TECHNICAL DIFFICULTIES: SOME NEW IPODS DON'T GET NEWSLINE

This note to users of new Apple iPod or those who may have just upgraded to the latest model over the holiday and now find that they cannot download audio files or podcasts of Amateur Radio Newsline. We want to let you know that the problem is not with us here at the Amateur Radio Newsline and quite honestly we have no idea what the cause might be.

What we can say is that we have not made any changes to our production methods in years. We provide an MP3 audio file at our website at www dot arnewsline dot org that has not changed in any way for almost a decade. So if you have a new iPod that refuses to play Amateur Radio Newsline, all we can do is to refer you to Apple and let them provide the remedy. None of us are in any way expert on iPods, Iphones or any part of the Apple product line. We just produce a newscast, and nothing more.

If anyone has an answer to this one, please let us know and we will on pass it to our lidtener base. (ARNewsline(tm))

**

THE SOCIAL SCENE: PRIZE OFFERED TO UK HAMS PARTICIPATING IN SOS RADIO WEEK

Over in the United Kingdom, the Royal National Lifeboat Institution fundraising event, SOS Radio Week, starts on January 22nd. According to several reports many UK amateur radio clubs and individual hams have

already signed up to tale part.

Now comes word that an unidentified big name in Great Britain's amateur radio scene has offered a prize for those who take part. Everyone who operates during event will have his or her call entered for a drawing to win a new Wouxun KG-679E 2 meter hand-held transceiver.

If you are a UK ham and want to take part, simply visit the website at www.sosradioweek.org.uk and view the registration page. All monies raised are donated to the Royal National Lifeboat Institution. (RLBI)

**

NAMES IN THE NEWS UK FAMILY HAS FIVE HAMS

Some names in the news. Still in the UK, the Daily Post newspaper reports that five members of the same family in the town of Tywyn are now licensed radio amateurs. The newspaper says that the latest member of the family to get an amateur radio callsign is 11 year old Ricky Duckhouse. His father Kevin, mother Alison, and brother and sister Josh and Sonyarisa had all previously received their licenses. Sorry, but the article did not include the callsigns of the Duckhouse clan. (Daily Post)

**

BREAK 2

The news never sleeps and neither do we. Serving you 52 weeks a year since 1972, we are the Amateur Radio Newsline with links to the world from our only official website at www dot arnewsline dot org and being relayed by the volunteer services of the following radio amateur:

THE CHANGING OF THE GUARD: FAMED RADIO ANNOUNCER FRED FPY DEAD AT AGE 89

He was not a ham, but the legendary radio announcer Fred Foy, best known for his booming, passionate lead-ins to "The Lone Ranger" radio and television series, died Wednesday, December 22nd of natural causes at his Woburn, Massachusetts.

According to his daughter Nancy Foy, her father worked as an actor before landing the job as the announcer and narrator on "The Lone Ranger" radio show in 1948. He is best remembered for the shows lead in that introduced the masked cowboy hero and his trusted horse with the line: "A fiery horse with the speed of light, a cloud of dust and a hearty 'Hi-Yo Silver!' ... The Lone Ranger!"

According to radio historian Jim Harmon, Foy's dramatic introduction and narration, performed in a powerful baritone, were so good it made many people forget there were others before him. Harmon called Foy

perhaps the greatest announcer-narrator in the history of radio drama.

Foy was born in Detroit in 1921, graduated from that city's Eastern High School in 1938 and landed a job on the announcing staff of radio station WXYZ in Detroit in 1942. He was drafted into the Army that year and served in an Armed Forces Radio unit in Cairo during World War II. Foy returned to WXYZ in 1945. Three years later he won the job on "The Lone Ranger," even stepping into the lead role for one radio broadcast when actor Brace Beemer had laryngitis. Foy also performed on other classic radio series including "The Green Hornet" and "Sgt. Preston of the Yukon."

In 1960, Foy began working for the ABC network. He spent five years as an announcer on the "The Dick Cavett Show" and narrated documentaries. He left ABC in the mid-1980's and later retired.

Fred Foy is survived by his wife of 63 years, Frances Foy, their three children and three grandchildren. He was age 89. (From published news reports)

**

EMERGING TECHNOLOGY GLITCH: SKYPE DOWN FOR A DAY AS SUPERNODES GO OFF LINE

Internet calling and messaging service Skype SA mostly recovered Thursday, December 23rd from an outage caused by an undisclosed glitch. The service went down for almost all of its users starting at midday Eastern time on Wednesday, December 22nd. By Thursday afternoon, things had improved to the point where about 21 million users were logged in, said CEO Tony Bates. That was 10 percent less than the usual traffic for the time of day, as some people still could not log on.

On Wednesday a spokesman said a problem affecting some versions of Skype caused many of its supernodes to go offline. Supernodes are computers that the company likens to phone directories, helping Skype users connect with each other. To help remedy the situation, Skype repurposed some servers to act as supernodes,

On average, 124 million people use Skype each month, though the total number of registered users is more than four times that. (SKYPE)

**

HAM RADIO NEAR SPACE: THE HABEX SUCCESS

Some good news from South Africa. This with word that the main HABEX high altitude ham radio balloon payload flew in excess of 33 000 meters before returning to the ground.

Controllers Say that the on-board store and forward or parrot repeater was the highlight of the day with many radio amateurs making contact from as far awayas Harrismith and Victoria West.

After the balloon burst and returned to Earth, recovery teams found the main payload was found in a farmer's field. Unfortunately the second balloon carrying a simple controller board and ancillary equipment failed.

Project leaders say that flight helped further the learning curve for the team who will build on the knowledge gained for further launches. (SARL)

**

HAM RADIO IN SPACE: SA AMSAT TO LAUNCH TWO NEW BIRDS

South Africa AMSAT announced on their web page that they they plan to launch two satellite projects with totally different design approaches and time lines.

Both of these birds will be of the Cubesat design. The first will focus on providing a FM transponder that will be available on most passes over South Africa and will have a short time line to launch. This FM Transponder CubeSat which has yet to be named, will be based on a standard available space frame and sub system with a locally designed payload. The project will be coordinated by Hannes Coetzee, ZS6BPZ.

The second bird called SAiSAT focuses on an innovative approach to the deployment of fold-out solar panels. The project is aimed at getting Master and Phd students involved in the development and design of various payloads and substructures. A detailed paper on SAiSAT will be released in the next two weeks on www dot amsatsa dot org dot za. Both satellite projects will the subject of papers to be present at the South African AMSAT Space Symposium to be held on 26 March 2011. (SA AMSAT via ANS)

**

HAM RADIO IN SPACE: QST EDITOR ON HO-68

And the Southgate news reports that you never know who you'll find on the amateur radio satellites. How about QST Magazine editor Steve Ford, WB8IMY.

Writing on the AMSAT bulletin board K8YSE says that Hhe recently hear Ford calling CQ on the HO-68 bird. According to K8YSE, Ford was operating from home with his TS2000 and Eggbeater antennas. He says that the two had a nice chat and the reception was excellent. (Southgate)

**

ON THE AIR: NEW ZEALAND AMATEUR RADIO DAY JAN 15

New Zealand Amateur Radio Day takes place annually from 1000 to 1200 hours local time on the 3rd Saturday of January. This year that's January the 15th.

The purpose of the New Zealand Amateur Radio Day is to promote the hobby to the public so that some may be encouraged to join the local club, take on classes and become amateur radio operators.

Clubs taking part are urged to set up at any prominent and public location where there is plenty of public foot traffic. Participating amateurs are required to keep a log of all stations worked during the 2 hours and use of club callsigns is encouraged, however individuals may also set up a station using his or her own callsign.

Operation on New Zealand Amateur Radio Day can be on any band and any mode. Digital modes and CW may also be used to attract interest. (NZART)

**

ON THE AIR: A QSO A DAY FOR G6HMU DURING 2011

And throughout 2011, Keith Maton, G6NHU, is embarking on an ambitious project to have a QSO every day of the year. He says that his QSOs will be on any band or any mode

There is a blog to follow the progress of this project at www.qso365.co.uk. The blog won't necessarily be updated every day but it will document how the project is going with updates as time permits. (Southgate)

**

DX

In DX, W5JON says that he will be operating as V47JA from his new Calypso Bay, St. Kitts vacation home from February 16th until March 30th. He will be active on 80 through 6 meters SSB including both the ARRL International DX SSB Contest SSB on March 5th and 6th as well as the WPX SSB Contest on Marth 26th and 27th. Also, listen out for John's wife Cathy, W5HAM, will also operate using her newly issued V47HAM callsign. All QSL's go to W5JON at his callbook address.

XW1B is planning another operation from Danang, Vietnam, for the ARRL DX CW Contest to be held February 19th and 20th. He will operate a a Single-Operator Low-Power entry using the callsign 3W3B. He states that he will be living in Danang most of the year and anticipates being very active on the various bands. QSL only via E21EIC. NO eQSLs will be accepted for this one.

DC0KK is again active from Sri Lanka as 4S7KKG until March 13th. Hes on all of the HF bands using CW, SSB and the Digital modes. He also hopes to activate Barberyn Island sometime during his stay. QSL via DC0KK, either direct or by the Bureau.

IK2QPR will be on the air as 5R8PR from Nosy Be, Madagascar between January 17th and the 25th. Activity will be holiday style on 40through 10 meters using CW, SSB and RTTY. QSL via his home callsign.

F6BLP, will be active as 6W7SK from Senegal between January 8yj to the 21st. This operation will also be holiday style operating mainly CW. QSL via F6BLP, either direct or by the Bureau.

Lastly, JK1FNL will be active from the Maldives as 8Q7FF between January 4th through the 9th. Listen out for this operation on 160 through 6 meters using CW, SSB and RTTY. QSL via his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: BABE - THE BOAT ANCHOR EVALUATOR

And finally this week, there are a lot of web sites on the Internet that deal with so called Boat Anchors. You know -old radio equipment full of tubes. Well how is this site with a variation on this theme and its called BABE.

BABE stands for the Boat Anchor Beauty Evaluator. It is a website that contains a formula that includes terms such as the number of knobs on front panel, of these the number of knobs not generally used, the number of tubes and meters, the rack space required for the unit and more. In the end the site will give you a very subjective Functionality Quotient which is an arbitrary value based on the single question of: "does everything work?"

You can have some real fun with this one. It's in cyberspace at tinyurl.com/2b9453l (VHF Reflector)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the deadline for Dayton Hamvention award nominations is getting close. The Hamvention now sponsors four annual awards. These are the Technical Excellence, Special Achievement and Radio Amateur of the Year Awards. And as the special Radio Club of the Year was such a big success in 2010, that Hamvention planners have decided to make it a permanent addition to the Hamvention Awards program.

If you know of a radio amateur or a radio club deserving of recognition please submit your nomination. Further information and nomination forms can be found on-line at www.Hamvention.com in the awards section. To be considered for any award the nominations must be submitted no

later than January 15, 2011.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying Happy New Year 2011, 73 and we thank you for listening.

Oh so you finally found me here too huh?
Must be really really boring.

FYI, asswipe, the FCC has numerous rules and regs on what is considered to be an illegal radio. One of the most common infractions is a radio that is designed to transmit on 10 meters, but can also be easily modified to transmit on 11 meters, the CB band. Ergo, transmitting out of the legal range.

If you, as a properly licensed operator, operate on a frequency you are not entitled to, even as a ham, you can get your license yanked.

As you ARE a licensed ham, you should know this.
You are required to know it.

The correct answer to the question is NO.

However the statement that there are no legally enforceable code only frequencies may be technically correct if 'code' is used in the historical sense to mean (International) Morse Code. The existing 'code' only frequency bands (e.g. 3.500 to 3.600 MHz) also permit RTTY and other data encoding protocols. They do not permit voice (AM, FM, SSB, etc.)

Its by FCC rule. The regulations specify what emission type (and power)
is allowed on what frequencies.
```

This answer only applies to HF bands in the US. There are CW only
frequencies in
the 6 and 2 meter bands. Other countries have other rules.

> > attempting to enforce laws relating to telecommnications, over which
> > the locals have no jurisdiction whatsoever.

and just how were the MURS users who were travellers on the free way
supposed to know that they were "interfering with police frequencies"
on 154.570 mhz when they heard absolutely nothing on the channel until
after they tried to talk to their friends on 154.570 mhz and the
police department transmitted back all p.o.'ed that some people they
didn't know (private U.S. citizens) was transmitting on their puiblic
safety "police channel" of 154.570 mhz??????

and those travellers were monitoring the whole time on their vacation
(travels)
>
> Still, interfering (deliberately or not) with public service units such as
> fire and police are criminal acts punishable usually by state law.

See above. You say they can be pubnished for interfering with the
police on 154.570 mhz even though they did not deliberately interfere
with them.

As I understand the rule, it is NOT interference if you're (they're)
transmitting when you hear no one on teh channel after monitoring it,
and not transmitting over the top of them when the police are talking.

But of course, if they could hear the police and transmitted, that
would be deliberate interference which they would be guilty of, but
didn't and even if they did, which they didn't, is a matter for the
FCC to handle, not the local-yokel cops.

So the only way to interfere with them not deliverately is what
happened, not knowing anyone else was on the channel ssince they were
monitoring it for a very long time, transmitted when they needed to,
the the police come back which you claim they are responsible for even
though it wasn't delibarate interfering since it was interfering with
the police. (Not the way I understand the FCC rules say).

And the police claiming it's illegal delibarate interference for them
to transmit on the "police channel" (154. 570 mhz) 9even though it
wasn't delibarate since the police didn't transmit unti AFTER they
heard the private citizens transmit.)
The FCC rules plainly say that the NURS channels MUST be SHARED and
will NOT be assigned exclusively to any one group, person, business,
or organization.

>
> Do not the FCC rules and regs also state that when a public service unit
> has been issued a license to operate on that shared frequency that said
> unit has priority over amateur radio service?- Hide quoted text -

And just which public service agency has the FCC ever licensed to use
154.570 MHZ as their main police frequency or their main public
service frequency????

Furthermore, just which police or public service agency has the FCC
ever licensed to use 154.570 mhz as their police freqiuency or public
service frequency???

Before itr was MURS, it was a business band frequency, NOT a police or
public-servuce frequency.
